No. N1071—Malleable iron frame and large malleable swivel eye, frame has heavy ribs and is riveted together at both ends, making a very substantial construction, designed for extra heavy work and guaranteed to be the best pulley of its kind on the market, 5 in. sheave with wide groove suitable for any size rope up to 1¼ in. in diameter, wheel revolves on hard steel roller gearings, which in turn surround a ⅝ in. hard steel pin held rigidly In position, w't per doz. 72 lbs. .....per dozen $22.50

LOOSE

HAY FORK PULLEYS

The frames of Nos. 1133 and 1120 are two separate heavy ribbed halves riveted together at the swivel eye. The construction of the frame provides an easy approach for the rope.

No. N1133—"O. K.," plain, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1¼ in. loose pin, swivel, w't per doz. 40½ lbs., per dozen $9.90

LOOSE

No. N1120—"O. K.," pass knot, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1 in. loose pin swivel, w't per doz. 58 lbs., per dozen $12.40

LOOSE

The iron sheave revolves on a steel bushing and a heavy machine bolt passes through the bushing, making it very strong and durable.

No. N1550—For ⅝ or ¾ in. wire cable, 7 in., iron wheel, high carbon steel frame, steel bushings, roller bearings, w't per doz. 80 lbs., per dozen $24.75

LOOSE

The frame of this pulley is wider than the sheave, so as to allow two pulleys to be used together, the one sheave not interfering with the other. This is an extra heavy pulley intended for heavy work.

No. N189—**Derrick,** 1¼ in., hard maple frame, wood wheel, steel yoke and hook, size of sheave 5 in. diam. x 1¾ in. thick, w't per doz. 56 lbs., per dozen $18.00

LOOSE

HAY FORK PULLEYS

No. N16—6 in. iron wheel, 1¼ in. loose pin, cast frame reinforced with heavy ribs on edge, w't per doz. 48 lbs., per dozen $10.90

LOOSE

No. N36—6 in. maple wheel dipped in hot oil, 1 in. loose pin, heavily ribbed cast iron frame, "pass knot" swivel, w't per doz. 46 lbs., per dozen $11.80

LOOSE

No. N36EW—Extra Wood Wheels, for No. 36 .....per dozen $4.40

LOOSE

No. N046—Reed's pattern, 4½ in. wood wheels, hollow axle, wrought iron strap, forged steel eye, riveted hardwood, shell, swivel, self-lubricating, w't per doz. 33 lbs., per dozen $9.90

LOOSE

No. N046EW—Extra Wood Wheels, for No. 46 .....per dozen $4.40

LOOSE

No. N26—6 in. maple wheel, 1¼ in. loose pin, cast iron frame swivel w't per doz. 37 lbs., per dozen $9.90

No. N26EW, Extra Wood Wheels, for No. N26 per dozen $4.40

LOOSE

No. N56—One piece wrought steel frame, malleable swivel eye, cast iron sheave 5½ in. in diameter, revolving on steel bearing, w't per doz. 48 lbs., per dozen $9.00

Flowers as shown, extra .. 15.00

Electric Fountains

For Dining Room, Sun Parlor or Living Room Decoration

No plumbing necessary. Can be set up in ten minutes. Just pour in a bucket of water, insert the plug into any light socket connection, turn on the current and you have a beautiful fountain effect. The same water is used over and over, circulation being gained by means of a concealed centrifugal pump operated by a General Electric motor. The consumption of power is about equal to that of a 100 watt lamp.

FOUNTAIN. No. 45/42.

Fountain. A beautiful table fountain 25 in. in diameter. Has a woven base decorated with hand tinted mountings, and may be finished in any desired color. Equipped with art glass, splash ring
No. 45/42 .....

PLANES

"BAILEY" ADJUSTABLE IRON

The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use, is adjustable both endwise and sidewise, and bedded to the heel of bevel. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated—see cut 7C—as desired.

ONE IN A BOX

STANLEY "BED ROCK"

For fine work on hard and knotty wood, this plane surpasses all others.

The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.

The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.

Bottoms either flat or corrugated (see No. 606C) as desired.

ONE IN A BOX

STANLEY PLANES

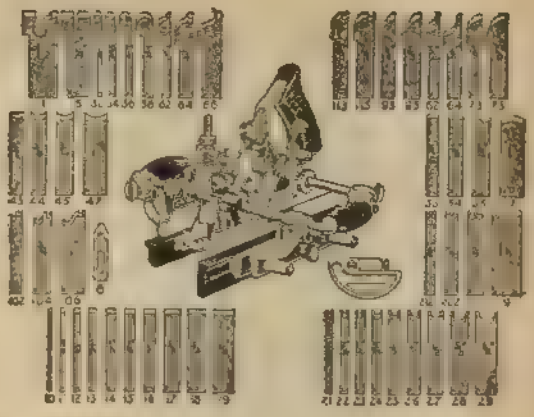
BEADING, CENTER, PLOW, DADO, RABBET, FILLISTER, MATCH, SASH, SLITTING AND MOULDING

THE MOST COMPLETE STANLEY SET

Will accomodate cutters of almost any shape and size. All metal parts nickel plated, handle and fences of selected rosewood, all parts well finished.

No. 55—Length 10 in., w't 15¼ lbs., complete with 52 cutters, each $39.00

ONE IN A BOX



BEADING, CENTER BEADING, PLOW, DADO, RABBET, FILLISTER, MATCH PLANE, SASH AND SLITTING

Seven beading tools, ¼ in., 5/16 in., ⅜ in., 7/16 in., ½ in., 9/16 in. and ⅝ in., ten plow and dado bits—⅛ in., 3/16 in., ¼ in., 5/16 in., ⅜ in., 7/16 in., ½ in., ⅝ in., ¾ in. and ⅞ in., a tonguing tool, a sash and a slitting cutter, are regularly furnished.

Each plane has an adjustable fence, a depth gauge, spurs for use across the grain, a cam leveling or steading rest and can be used either right or left hand.

No. 45—Nickel plated, with twenty tools ..... each $19.80

Extra Bottoms and Cutters.

By substituting special bottoms for the sliding section, cutters as follows may be used. Special bottom required for each cutter. Prices of hollows and rounds include two cutters and two bottoms, of nosing tool, one cutter and one bottom.

No. 6—Hollow and round ½ in. cutters work ¾ in. circle, per pair $3.00

No. 8—Hollow and round ⅝ in. cutters work 1 in. circle, per pair 3.00

No. 10—Hollow and round ¾ in. cutters work 1¼ in. circle, per pair 3.30

No. 12—Hollow and round 1 in. cutters work 1½ in. circle, per pair 3 30

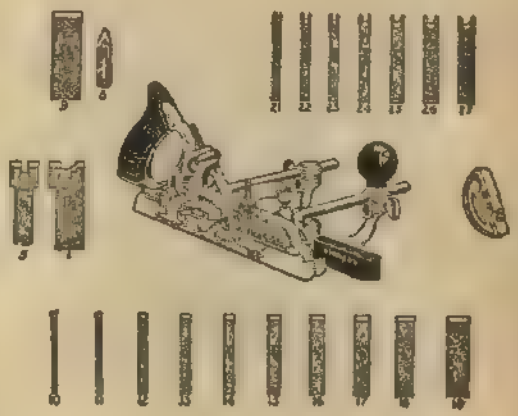
No. 5—Nosing tool, 1¼ in. cutters work 1½ in. circle ..... each 2 40

Extra Cutters, 20 tool bites, etc. ..... per set 10.00

Extra Spurs ..... per dozen .96

Extra Screws ..... per dozen .96

ONE IN A BOX



PLOW, BEADING AND MATCHING

For light work, consists of a main stock with metal handle, carrying a spur and a depth gauge and forming a support for one side of cutter, a sliding section carrying a spur and forming a support for other side of cutter, a fence with a 5 inch adjustment.

The cutters comprise 7 plow and dado bits—⅛, 5/16, ⅜, 7/16, ½, ⅝ and ¾ inch, 7 beading tools, ¼, 5/16, ⅜, 7/16, ½, 9/16 and ⅝ inch, and a ¼ inch tonguing tool.

No. 50—Nickel plated, length 9¼ inches, 15 cutters, w't 8¼ lbs., each $10.90

ONE IN A BOX

PLOW, DADO, FILLISTER AND MATCHING

Skew cutters are the feature of this plane, main stock carries a spur, depth gauge, slitting cutter, sliding section carrying a spur forming an extra sole for the plane. Rosewood handle and knob.

Cutters comprise 8 plow and dado bits—5/16, ¼, 5/16, ⅜, ½, ⅝, ¾, 1¼ in., 1½ in. fillister cutter, ¼ in. tonguing tool and slitting cutter.

No. 46—Nickel plated, length 10½ in., 11 cutters, w't 5¾ lbs., each $14.00

No. 113—10 in., adjustable, 1¾ in. cutter, w't 8½ lbs., each $9.50

ONE IN A BOX

VICTOR, 10 in. adjustable, 1¾ in. cutter, w't each 4 lbs.

No. 20—Japanned .....each $11.70

ONE IN A BOX

STANLEY IMPROVED SCRUB

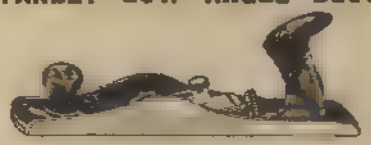
N°40

This tool has a single iron with cutting edge rounded, and is particularly adapted for roughing down work before using jack or other planes.

Nos.	40	40½
Length, in	9½	10½
Cutter, in.	1⅛	1⅝
Each	$3 10	4.20

ONE IN A BOX

STANLEY LOW ANGLE BLOCK



The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with an adjustable throat, which enables the user to work equally well on hard or soft wood.

No. 62—14 in., 2 in. cutter, w't 4 lbs. ....each $7.20

ONE IN A BOX

"BAILEY" BLOCK PLANES

With Throat and Lateral Adjustments.

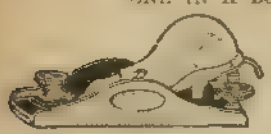
JAPANNED CAP

Nos.	9½	15
Length, in.	6	7
Cutter, in.	1⅝	1⅝
W't each, lbs.	1¼	1⅜
Each	$2 90	3.10

NICKEL PLATED CAP

Nos.	16	17
Length, in.	6	7
Cutter, in.	1⅝	1⅝
W't each, lbs.	1¼	1⅜
Each	$3.30	3.60

ONE IN A BOX



Knuckle joint with throat and lateral adjustment.

NICKEL PLATED CAP

The knuckle joint in the cap makes it a lever, too; and placing the cap in position, will also clamp the cutter securely in its seat.

[illegible]	18	19

Nos.	60½	65½
Length, in.	6	7
Cutter, in.	1⅝	1⅝
W't each, lbs.	1¼	1¼
Each	$3.10	3.30

No. 61—Nickel plated cap, length 6 in., cutter 1⅝ in., **rosewood knob,** w't 1¼ lbs. ..... each $2.90

ONE IN A BOX

NICKEL PLATED CAP

No.	65
Length, in.	7
Cutter, in.	1⅝
W't each, lbs.	1½
Each	$4.00

ONE IN A BOX

BAILEY BLOCK PLANES

This plane has two slots and a movable cutter seat. When it is desirable to use it as a bull nose plane, the adjustable cutter seat can be reversed as indicated in cut.

No. 131—Double end, 8 in., 1⅝ in. cutter, w't 1½ lbs. ..... each $3.60

ONE IN A BOX

STANLEY BLOCK PLANES

No. 101—3½ in., 1 in. cutter, w't 4½ oz., each $0.55

ONE IN A BOX

No. 103.

No. 102—5½ in., 1⅝ in. cutter, w't ¾ lb., each $1.10

No. 103—5½ in., adjustable, 1⅝ in. cutter, w't ¾ lb. ..... each $1.50

ONE IN A BOX

No. 110—7 in., 1⅝ in. cutter, w't 1¼ lbs. ..... each $1.50

ONE IN A BOX

No. 130—8 in., double-ender, 1⅝ in. cutter, w't 1½ lbs. ..... each $2.20

ONE IN A BOX

No. 220—7 in. adjustable, 1⅝ in. cutter, w't 1½ lbs. ..... each $2.20

ONE IN A BOX

No. 203—Screw adjustment, rosewood knob, length 5½ in., 1⅜ in. cutter, w't ¾ lb. ..... each $1.90

ONE IN A BOX

CABINET MAKERS' EDGE PLANES

A useful tool for piano makers and all cabinet workers, for trimming inside work where space prevents use of any other plane.

No. 97—10 in., 2½ in. cutter, w't 3¾ lbs., each $5.60

ONE IN A BOX

BAILEY VENEER SCRAPERS

No. 12 takes the same cutter as No. 112 Scraper Planes. For many kinds of work, its peculiar form is of great advantage.

Nos.	Iron. Wd. 12	Fce. 12½
Length, in.	6½	6½
Cutter, in.	3	3
W't each, lbs.	3½	3½
Each	$6.20	8.40

Extra Cutters ..... each $0 65

ONE IN A BOX

STANLEY SCRAPER PLANES

No. 112—9 in. adjustable, 3 in. cutter, with 1 scraper blade, w't 4 lbs., each $5 50

Extra Cutters, for scraping, each $0 65

Extra Cutters, for toothing, Nos. 22, 28, 32—22, 28 or 32 teeth each $0 90

ONE IN A BOX

BULL NOSE RABBET PLANES

No. 75—4 in., iron stock, 1 in. cutter, w't 8 oz., each $0 95

STANLEY EDGE TRIMMING PLANES

No. 95—6 in., ⅞ in. cutter, japanned. w't each 1¼ lbs. ..... each $2 40

ONE IN A BOX

STANLEY ADJUSTABLE PLANES

TONGUING AND GROOVING

Nickel plated iron stock and face, including tonguing and grooving tools.

The fence is set in a center pivot and can be swung around and locked either way. Set one way it exposes two cutters for cutting the tongue and when reversed leaves only one exposed for making the groove.

No. 48—8¾ in., for ⅜ to 1¼ in. boards, w't 3 lbs. .....each $6 80

No. 49—8 in., for ⅛ to ⅜ in. boards, w't 2½ lbs. .....each $6.80

ONE IN A BOX

DOUBLE END MATCH

Nickel Plated.

Provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit.

No. 146—Matches ⅝ in. boards, cuts groove ¼ in., w't 1½ lbs., each $5.10

No. 147—Matches ⅞ in. boards, cuts groove 3/16 in., w't 2 lbs., each $5.45

No. 148—Matches ⅛ in boards, cuts groove ¼ in., w't 2¾ lbs., each $5 75

ONE IN A BOX

RABBET AND FILLISTER

The sides and bottom being square with each other, the planes will lie perfectly flat on either side. Adjustable fence slides under bottom to regulate width of cut. Has one spur on each side and adjustable depth gauge. Is suitable for either right or left hand work. The front part of plane can be easily detached thus providing a bull nose plane.

No. 278—Japanned iron stock and fence, 6¾ in. long, 1 in. cutter, w't 2 lbs. .....each $4.10

ONE IN A BOX

IMPROVED RABBET

Iron stock, length 8 in., with depth gauge.

WITH SPUR

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

Nos.	190	191	192
Cutter, in.	1⅛	1½	1
W't, lbs.	2½	2½	2
Each	$3.80	3.35	3.30

ONE IN A BOX

DUPLEX RABBET AND FILLISTER

This plane has two seats for the cutter, one for regular work and the other where a bull nose is required. Has spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom regulating width of cut. To use as rabbet plane, remove fence and arms.

No. 78—8¾ in. iron stock and fence, 1⅛ in. cutter, w't 3 lbs., each $4.20

ONE IN A BOX

SKEW CUTTER, FILLISTER AND RABBET

The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. By removing arms and fence a skew cutter rabbet plane is obtained.

No. 289—8¾ in., japanned, 1⅝ in. cutter with fence and depth gauge and two adjustable spurs, one on each side, w't 4 lbs. .....each $4.90

ONE IN A BOX

WOODWORKERS' ROUTER

For surfacing the bottom of grooves and depressions parallel with the general surface of the work. The open throat design gives more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip and a second attachment for closing the throat for use on narrow surfaces.

Open Throat.

No. 71—Nickel plated, width 7⅛ in., ¼ and ⅜ in. steel bits, with throat attachment, w't 2½ lbs., each $5 20

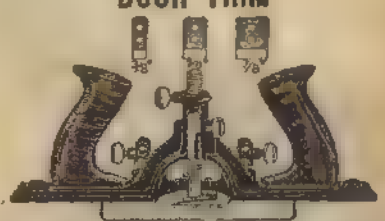
ONE IN A BOX

Closed Throat.

No. 71½—Nickel plated, width 7⅛ in., ¼ and ⅜ in. steel bits, w't 2½ lbs., each $4.10

ONE IN A BOX

DOOR TRIM



This new plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. Cutter can be set to work from either end of the plane or across it. Spring prevents taking a heavier chip than can be easily carried.

No. 171—11 in., japanned, nickel plated trimmings, rosewood handles, 3 forged steel cutters, w't 3 lbs. each $7.50

ONE IN A BOX

STANLEY PLANES, BEADERS, ETC.

CARRIAGE MAKERS' RABBET PLANES

Adapted for mining, wagon making and other heavy work.

Flat Bottom.

Nos.	10½	10
Length, in.	9	13
Cutter, in.	2⅛	2⅜
W't, lbs.	3	4½
Each	$6.80	8 20

ONE IN A BOX

SIDE RABBET PLANES

Convenient tools for side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give each tool a form by which it will work close up into corners.

No. 98—4 in., nickel plated, right hand, w't 8 oz. .....each $2.80

ONE IN A BOX

No. 99—4 in., nickel plated, left hand, w't 8 oz. .....each $2.80

ONE IN A BOX

UNIVERSAL HAND BEADERS

Very handy for beading, reeding or fluting straight or irregular surfaces and for light routering. The handles are curved to give ample room between the user's hands and the surface of the work.

No. 66—Width 1¼ in., nickel plated stock, 7 steel cutters and 1 blank with 2 gauges for straight or curved work, w't 1¼ lbs, each $2 10

ONE IN A BOX

RABBET AND BLOCK PLANES

The detachable side will easily change this tool from block plane to a rabbet plane and vica versa. The cutter is adjustable end-wise and is set on askew.

No. 140—7 in., with detachable side, 1⅝ in. cutter, w't 1¼ lbs., each $3.80

ONE IN A BOX

IMPROVED DADO

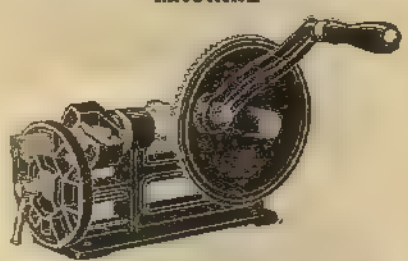
8 Inch, Iron Stock, with Depth Gauge and Two Adjustable Spurs.

Holds true in narrow widths where a wood plane will not. Has a skew cutter and adjustable depth gauge and spurs on each side of plane, thus allowing wear to be taken up and depth of the cut regulated.

Nos.	392	393	394
Cutter, in.	½	⅝	¾
Each	$3.70	3.95	4.20
Nos.	395	396	397
Cutter, in.	⅞	1	1⅛
Each	$4 40	4.60	4.80

ONE IN A BOX

STANLEY DOWEL AND ROD TURNING MACHINE



No. 77—Frame 9 in. long, height 6 in. japanned, malleable frame, 6¼ in. steel gear wheel, adjustable handle, cuts dowels of varying sizes and lengths to perfect dimension and with it one can also form rods of practically any length. Operated by hand. Workman can cut his dowels when ready to use them. For use of cabinet and pattern makers and manual training schools. Complete with one ⅝ in. Cutter head, w't each 13 lbs. .....each $15.30

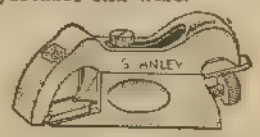
ONE IN A BOX

Extra cutter heads for No. 77 Dowel Machine, sizes ¼, 5/16, 7/16, ½, 9/16, 11/16, ⅝ in. .....each $1.55

ONE DOZEN IN A BOX

CABINET MAKERS' RABBET PLANES

For fine cabinet or other work where extreme accuracy is required. The sides and bottom, being square with each other, the plane will lie perfectly flat on either side and can be worked either right or left hand. They have adjustable throats; this means that the width of the throat opening, or mouth, can be widened or narrowed as coarse or fine work may require. They are also fitted with the side groove or "Handy" grip feature. The cutters are adjustable end-wise.



Nickel Plated, with Adjustable Throat.

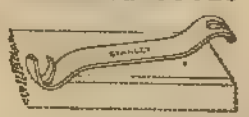
No. 90—4 in., bull nose, adjustable. 1 in. cutter, w't 1 lb. ....each $5.10

Nickel Plated, with Adjustable Throat.

Nos.	92	93	94
Length, in.	5½	6½	7½
Cutter, in.	¾	1	1¼
W't, lbs.	1½	1¾	2
Each	$5.10	6.10	7.10

ONE IN A BOX

CORNERING TOOLS



These tools are used by pattern makers and all wood workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.

Nos.	28	29
Size, in.	5¾×⅝	5¾×⅞
Cutters, in.	1/16 & ⅛	¼ & ⅜
W't, lbs.	1½	1½
Per dozen	$5 90	6.20

HALF DOZEN IN A BOX

CABINET SCRAPER BURNISHERS

This tool is used to put a smooth finishing edge to a cabinet scraper.

No. 01—Polished oval cast steel blade, wood handle with ferrule, entire length 8½ in., w't per doz. 1¾ lbs., per dozen $7.20

An improvement has been made in the "Bailey" Iron Plane which necessitated a change in the construction of the Bottom and Frog, thereby making it impossible to use the new style Frog in an old style Bottom, or the old style Frog in a new style Bottom.

For a time an intermediate style was made having same Frog and Bottom as the latest design, except that there was no Frog adjusting screw, consequently no clip on the Frog.

The latest design Frog or Bottom will be furnished for both the intermediate and new style Planes. If your Plane is of the intermediate pattern, remove the steel clip from the Frog and the parts will fit.

In order that we may fill your order correctly, kindly advise us which style Plane you have.

The difference in construction of the Frogs and Bottoms is very clearly shown in the illustration above.

WOOD PLANES

BARTLETT'S BENCH

All Bartlett planes are fitted with superior irons, manufactured from best cast steel and fully warranted.

ONE DOZEN IN A BOX

LUMINOUS—TANDEM SPINNERS

The "Tandem Spinner" with a Trailing Hook is made to satisfy a demand for a bait that will overcome the difficulties of fish striking short, in other words, to catch the "Nibblers."

Little or nothing need be said about the merits of the Tandem Spinner as it is too well known.

The Luminous Spinners are especially suited for either day, evening or night fishing and for deep or roily waters and for cloudy days.

Size hooks, long

No. 3445— Sizes	1/0	1	2

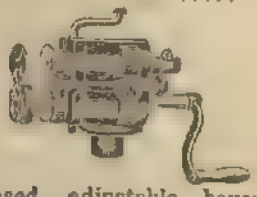
PEXTO TINNERS' MACHINES

TURNING

COLUMBIAN, solid frame, with two sets of faces, for 22 iron and lighter.

No. 542—Large, diam. of faces 3 in., with stand, w't 31 lbs., each $44 00

No. 541—Small, diam. of faces 2½ in., with stand, w't 25 lbs., each $40 00



Encased, adjustable boxes, with two sets of faces, for 24 iron and lighter.

No. 546—Large, diam. of faces 3 in., with stand, w't 28 lbs...each $58.00

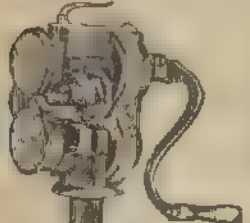
No. 545—Small, diam. of faces 2⅛ in., with stand, w't 23 lbs., each $54.00

Turning machines are used for turning the tops of vessels to receive wire.

WIRING

COLUMBIAN, for 22 iron and solid frame, lighter.

No. 525—Diam. of faces 3 in., with stand, w't 31 lbs. .....each $46.00



Encased adjustable boxes, for 24 iron and lighter.

Wiring machines follow the turning machines. They are intended for rolling sheet metal tightly around wire after its seat has been prepared by the turning machine.

No. 526—Diam. of faces 3 in., with stand, w't 28 lbs, ...each $60.00

BURRING

COLUMBIAN, solid frame, with extra upper face, for 22 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 577—Large, diam. of face 2½ in., with stand, w't 25 lbs...each $38.00

No. 576—Small, diam. of face 1⅞ in., with stand, w't 21 lbs...each $34.00

Encased, adjustable boxes, with extra upper face, for 24 iron and lighter.

Burring machines are used for creasing, edging rims of covers for pails, boilers, etc. and for preparing circular edges of bottoms and bodies of vessels for double seaming.

No. 580—Large, diam. of face 2½ in., with stand, w't 23 lbs. ..each $52.00

No. 579—Small, diam of face 1⅞ in., each $48.00

SETTING DOWN

COLUMBIAN, solid frame, for 24 iron and lighter.

Setting down machines follow the burring machines pressing the edge of bottom onto the flange of body in preparation for double seaming.

No. F556—With stand, for seams up to ⅞ in., w't approximately 23 lbs., each★ $48.00

SETTING DOWN

Improved with Adjustable Gauge.

Inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, facilitating the operation of double seaming.

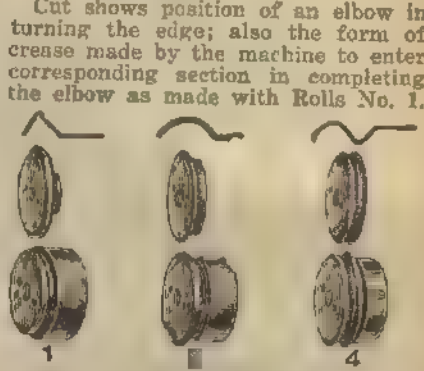
No. 562 can be fitted with pulley for power at extra cost.

No. F561—Light, for seams up to ⅝ in., capacity 24 iron and lighter, with stand, w't 31 lbs.★ each $56.00

No. F562—Heavy, for seams up to ¾ in., capacity 18 iron and lighter, with extra heavy stand, w't 100 lbs., each★ $110.00

COLUMBIAN, elbow edging machine, for 24 iron and lighter.

Cut shows position of an elbow in turning the edge; also the form of crease made by the machine to enter corresponding section in completing the elbow as made with Rolls No. 1.



Rolls type No. 1 produce V-shape edges on both elbow sections.

Rolls No. 3 and 4 are preferable for elbows riveted or grooved with loose joint. Faces can be used with and are readily adapted to either Columbia or Encased small turning machine.

Diameter of faces 2½ in.

No. F551—Columbian Elbow Edging Machine, with standard and one pair of rolls, w't each 25 lbs., each★ $40.00

Specify Type of Rolls Desired.

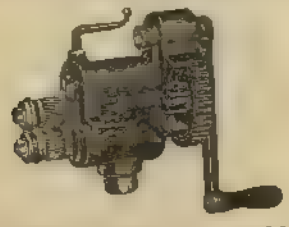
TINNERS' MACHINES

PEXTO CRIMPERS AND BEADERS

Connecting gears of machine cut steel, rolls of high grade steel, scientifically hardened. Adjustments are provided for regulating depth of crimp and bead.

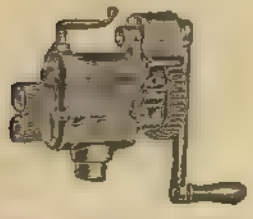
Designed for strength and rigidity and produce snug-fitting pipe joints that hold when put together.

Two speeds provided for, back geared for heavy stock and direct drive when lighter materials are used



Capacity—20 gauge iron and lighter, diameter beading rolls 1 29/32 in., diameter crimping rolls, 1 15/16 in., back gear, 3 to 1.

No. E585—Stove Pipe with crank screw, for depressing rolls, w't each 65 lbs. .....each $52.00



No. E591—Cornice Maker, diam. of rolls 1 13/16 in., back geared 3 to 1, w't each 65 lbs., each $50.00

CRIMPING

No. E285—Packham's for stove and conductor pipe, with standard, w't 24 lbs. .....each $24.00

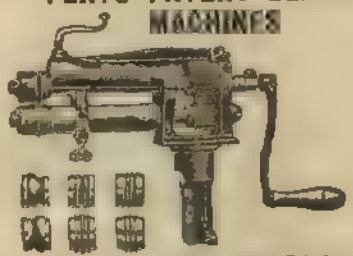
PEXTO PATENT CRIMPING AND BEADING MACHINES

For 26 Gauge and Lighter.

For crimping or beading stove pipe, elbows, furnace pipe, etc., construction throughout is exceedingly strong and rigid, and permits of easy and rapid adjustment, depression of rolls accomplished by foot treadle, contact of upper beading roll is adjusted by lever, which also gives an independent adjustment for raising upper beading roll, taking same out of contact with lower roll, if crimping only is desired, adjustment of this lever is affected by means of an eccentric device, handy and practically instantaneous in action. Application of this feature greatly increases simplicity, as operation of crimping alone can be performed without substituting blank collars for beading rolls. Crank adjustable to light or heavy work.

No. F602—With treadle, w't each 38 lbs.★ .....each $56.00

PEXTO PATENT BEADING MACHINES



For No. 24 Iron and Lighter.

Size of beads, Ogre ¾ in., Triple ⅜ in., Triple Coffee Pit ⅜ in., Single 5/16 in.

Beading or swaging machines are intended for stiffening and ornamenting pipe, bodies of pails, cans, boilers, etc.

No. E620—6 in. throat, with four pairs rollers and stand, w't 50 lbs., each $56.00

For No. 20 Iron and Lighter.

Illustration shows single beading rolls and supporting arm attached.

No. F617—13 in. throat, with three pairs rollers and stand, w't 140 lbs., each★ $110.00

STEEL CORNICE BRAKES

The Apron or Bending Leaf reinforced by angular shaped strengthening plate. Substantial truss rods provided for additional support and adjustment.

Five Formers, all sizes in general use for making moulding, furnished.

A Steel Angle Bar is bolted to apron to give additional leverage when bending extra heavy material.

Stop Gauges furnished free of cost.

The Clamping of material is done by means of an eccentric on each end.

When ordered with Eccentric Levers, connected brakes are so fitted without additional cost.

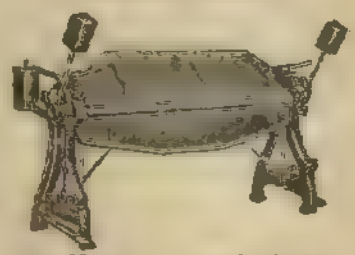
Set Screws provided on ends which move the upper jaw forward and back to accommodate heavy or light material and for sharp or rounding bends.

An Eccentric Bushing in lower part of connecting link allows for greater or less pressure on material.

The Angle Bar, as well as the special steel bar, is removable from the apron and narrow opposing members can then be formed. Apron edge is ¾ inch, from which ¾ inch is detachable.

No. F4—Forming edge 8 ft. 1 in. long, for cornice and other light work as well as ¾ in. and more, bends on No. 18 gauge, **complete with angle bar** and five formers, w't 1000 lbs.★ .....each $297.00

HARE'S PATENT FOUR LEAF CORNICE BRAKES



For No. 20 Iron and Lighter.

The bending leaf is properly balanced by weights, and is provided with a forcing bar for beding heavy iron.

Seven formers to be attached to the brake for making circular bends are furnished, sizes ⅜, 2½, 2, 1½, 1¼, 1¼ and 1 in.

No. F685—98 in., w't 3650 lbs., each★ .....$.....

TINNERS' MACHINES

FOLDING MACHINES

STOW'S patent improved adjustable bar folder for No. 22 iron and lighter.

The gauge is operated by hand wheel in front of machine. Set screw in front at left holds gauge firmly in place and secures a fold or lock of uniform width the entire length. These machines form square joints or angles and turn sharp edges, also round edges for inserting wire. Locks ⅛ in. to 1 in. can be formed.

No. E62—20 in., w't 100 lbs., each $110.00

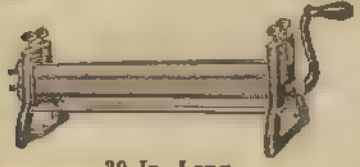
No. E63—30 in., w't 180 lbs., each $130 00

WRIGHT'S, 30 in., improved, for No. 24 iron and lighter.

This machine will turn locks of different widths on any length of sheet. May be used on material as thick as No. 24 gauge.

No. E1—Will turn locks ¼ and ⅜ in., w't 80 lbs. .....each $56.00

No. E12A—Will turn locks ⅛, ¼, ½ and ¾ in., w't 90 lbs., each $80.00



30 In. Long.

Will form 20 iron into 10 in. or 22 iron into 5 in. cylinders.

Grooves are cut in rolls to allow work being formed after wiring.

No. E357—2 in. rolls, w't 140 lbs., each $48.00

PEXTO FORMING MACHINE

Patent stove pipe formers, compensating gear, 30 in. long.

No. E374 will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

No. E373 will form 22 iron into 8 or 10 in. cylinders.

Gears are machine-cut steel and rolls are made of special rolled hard steel. Grooves are cut in rolls to allow forming of cylinders after wiring.

No. E373—2 in. rolls, w't 140 lbs., each $58.00

Will form 20 iron into 10 in., or 22 iron into 5 in. cylinders.

These machines are much more easily adjusted and can be set for forming any desired size of cylinder in much less time than is required to set others. They are made with Slip Rolls, so that small work can be readily taken from the end after it has been formed.

No. E382—Grannis', patent slip roll stove pipe former, with compensating gear, 2 in. rolls, 30 in. long, w't 150 lbs. .....each $72.00

EAVE TROUGH END FORMERS

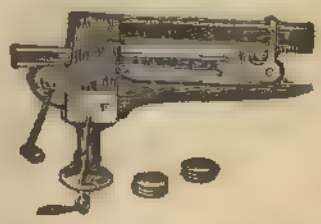
The Tool.

The Work.

No. 6—Bishop's, cast iron Trough, in.	4	4½	5
W't, lbs.	3½	4	5
Each $1.20	1.30	1.60	

For closing end of eave trough in corrugations as shown in illustration.

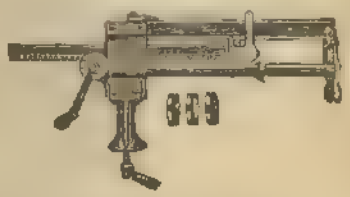
PEXTO BRASS MOUNTED GROOVING



With steel bar and milled horn, for No. 24 iron and lighter.

No. E502—20 in., three grooving rolls, one each ⅛, 5/32 and 7/32 in., with standard, w't 100 lbs.., each $64.00

IMPROVED PATENT GROOVING MACHINES



For No. 22 iron and lighter.

Grooving horn is reversible so that either the flat surface or one of the groves that are planned into the horn can be turned upward.

One smooth or flattening roll and three grooving rolls are furnished.

No. F507—30 in., rolls 5/32, ⅛ and ¾ in., w't 110 lbs.★ .....each $110.00

PEXTO IMPROVED MACHINE STANDARDS

Improved Machine Standards.

No. 975—For use with all except wiring machine, size of hole 1⅛ in., height over all from bench 9¾ in., w't each 10½ lbs. .....each $3.00

No. 976—Wiring machine, size of hole 1⅛ in., height over all from bench 9¾ in., w't each 11 lbs., each $3.00

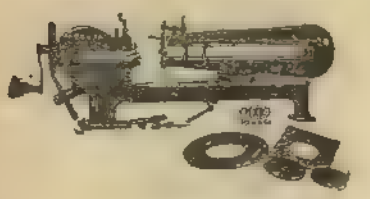
TINNERS' MACHINES

PEXTO RING AND CIRCULAR SHEARS



Intended for cutting circles or internal rings and irregular curves. In circular cutting the blanks are clamped between rubber covered discs by means of a quick acting, eccentric, lever device adjustable for exerting extreme uniform pressure to prevent the work from slipping and insuring more accurate cutting. The bed on which the Tail Piece slides is graduated in inches and fractions of inches for quick setting of the Tail Piece for the size circle to be cut. The angular position of Cutters allows for as clean cutting on the inside as on the outside of circle.

Nos.	F298	F299
Will cut circles, in	3½ to 22	3½ to 38
W't, lbs.	195	290
Each	$140.00★	$180.00★

WAUGH'S PATENT CIRCULAR SHEARS

For No. 22 Iron and Lighter.

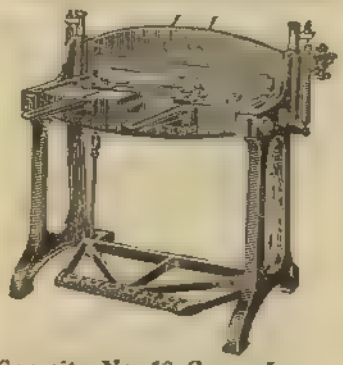
No. F278—Will cut circles from 2½ to 22 in., w't 125 lbs.★ each $110.00

Suitable for cutting circles, trimming or squaring tin plate, sheet iron, brass and copper.

A graduated scale is attached to the bed for the purpose of securing quick and accurate adjustment of the sliding arm.

They are fitted with quick-acting eccentric lever, which clamps material between discs with great rapidity and releases the blank instantly.

PEXTO SQUARING SHEARS



Capacity No. 18 Gauge Iron and Lighter.

No. E132A—Cuts 30 in., w't 540 lbs., each $190.00

No. E137A—Cuts 36 in., w't 650 lbs., each $260.00

Furnished with complete gauge equipment, one pair front arms. No. 137A has hold-down attachment.

BENCH SHEARS

Made of best materials, blades of crucible tool steel, useful in all metal working shops, tool rooms, garages. For cutting automobile brake bands, leather belting, strip steel.

No. F20—Length of blade, 3 in., capacity 12 gauge, w't each 24 lbs., each★ $30.00

HAND PUNCHES

No. 789—Capacity ¼ in. hole in 16 ga. iron with three punches and dies, ¼, 5/16 and ⅜ in. Length over all 8¼ in., depth of throat 1½ in., w't 3 lbs. ..... each $15.60

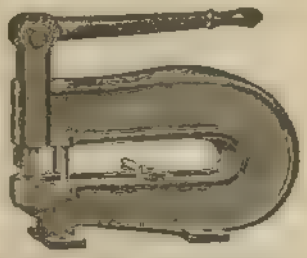
PEXTO COMBINATION SHEARS AND PUNCHES

These machines are suitable for both cutting and punching metal. They may be used for cutting ¼ inch iron and 5/16 and ⅜ inch narrow bars. The No. E678 will punch the center of a circle 5½ in. in diameter and the No. E679, 5½ in. Four Punches are put up with No. E678, viz., ¼, 5/16, ⅜ and 7/16 in. Five Punches are put up with No. E679, viz., ¼, 5/16, ⅜, 7/16 and ½ in.

No. F678—4½ in. cut, will punch ¼ in. iron, w't 105 lbs., each★ $72.00

No. F679—5½ in. cut, will punch 3-16 in. iron, w't 122 lbs., each★ $88.00

PEXTO SAMPSON PUNCHES



Will punch No. 9 iron with and No. 12 without, "stay bolts" and will center on 30 in. sheets without and on 7 in. sheets with them.

No. F675—Improved, bolt fastened, adjustable gauge depth of gap 15 in., 3 sets of dies and punches, ¼, 5/16 and ⅜ in., w't 125 lbs.★ ..... each $80.00

BENCH SHEARS

Made with compound lever principle, blades solid crucible tool steel, running full length of jaw.

No. F30—Total length 33 in., length of blade 8 in., length of cut 4½ in., capacity 12 gauge, w't each 16 lbs., each★ $38.00

★ Items Marked Thus ★ Are Shipped From Factory Only.

TINNERS' HAND SHEARS OR SNIPS

SHEAR OR SNIPS

Crocus Finished Blades, Gun Metal Handles, Steel Laid and of Superior Finish.

Snips are Forged from the Best Material Obtainable. They are Accurately Fitted and in Every Way Designed for the Workmen who Demand the Best to be had.

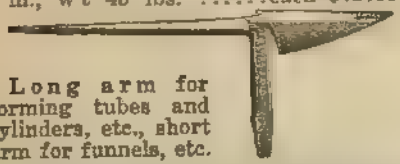
TINNERS' TOOLS

WROUGHT IRON STAKES WITH POLISHED STEEL FACES

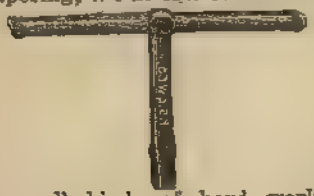
Used for beveled or square work.

No. E901—Beakhorn stake, round tapering end 16½ in., flat end 20×00 in., w't 45 lbs. .....each $48.00



Long arm for forming tubes and cylinders, etc., short arm for funnels, etc.

No. 925—Common Blowhorn, large end 9 in., small end 17½ in., both tapering, w't 10 lbs. ...each $26.00



For all kinds of hard work and double seaming.

No. E921—Double Seaming, large end 17 in., small end 12 in., w't 34 lbs. .....each $42.00

For forming tubes and cylinder creasing, etc.

No. 927—Creasing, with horn, round tapering end 9½ in., flat end 6½ in., w't 12½ lbs. .....each $26.00

For very small cylinders, etc.

No. 957—Needle case, flat end 8 in., small tapering end 10½ in., w't 4 lbs., each $13.00

For small tubes, rings, etc.

No. 956—Candle mould, small end 18 in., horn 8½ in., both arms round and tapering, w't 6½ lbs., each $16.00

WROUGHT IRON STAKES WITH STEEL FACE

Hatchet.

Nos.	943	944
Length of blade, in.	13	11
W't, lbs.	9	6
Each	$16.00	14.00

No. 936—Common square, face 2⅝×4½ in., w't 11 lbs. ...each $13.00

CAST IRON STAKES

Polished faces, size A, 6 in.; size B, 8½×2⅝×3½ in.; size C, 5½×4½ in.; size D, 5¾×4½×3¾ in.

No. E949—Double seaming, with 4 heads, round, square, oblong and oval, w't 110 lbs. .....each $36.00

Cast iron, polished face, for locking seams on conductor pipe.

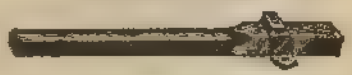
No. E971—Conductor, turned, large end 15 in., small end 11⅞ in. long, w't 30 lbs. .....each $18.00

HOLLOW MANDRELS

Cast iron, polished face, heavy clamps for attaching to bench.

No. E910—Entire length 3 ft. 4 in., flat part 9 in. long 6 in. wide, oval part 31 in. long, w't 60 lbs., each $18.00

PIPE MANDRELS



No. E65—Cast stove pipe, length 36 in., width 4½ in., w't 38 lbs., each $11.00

A low-priced mandrel for a dealer who does not have a regular tinshop.

BENCH PLATES

Cast iron, planed surface.

No. E981—37×8 in., w't 50 lbs., each $20.00

No. E982—30×8 in., w't 37 lbs., each $14.00

"HANDY" SEAMERS

Adjustable for seams of different widths up to ¾ in. Can be used where larger seamers would not be practical. As it is light it can be carried in tool kit or pocket.

No. 791—Japanned, length 7 in., width 3⅜ in. ....per dozen $48.00

RULES AND STRAIGHT EDGES

Back.

36 in. Long.

Laid off on one side with two rows of figures, the first like an ordinary steel square, by eights and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub-divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.

The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom and height of each size and kind.

Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body and compass marks for striking breast.

Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.

Fifth table is for dry measure, from 1 qt. to 3 bu., giving height and diameter.

No. 5—Plain polished, w't 1¾ lbs., each $6.50

No. 95—Nickel plated, w't 1¾ lbs., each $8.00

MAGIC PATTERN RULES

Marked in circumference inches on the front and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. Particularly convenient for laying out elbow patterns.

No. 7—Lufkin's, nickel plated steel bar, length 4 ft. 7/16 in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19×23 in., hinged wooden case w't 7 lbs., each $26.00

HALF DOZEN IN A BOX

The Pullman—Known All Over the World as the Perfect Davenport Bed

The Pullman is regarded as the highest attainment in the Davenport Bed idea. Never before have there been such beautiful patterns, such noble designs and such expert workmanship as shown in the present line of Pullman Davenport Beds.

The Pullman adds an extra room without increasing the rent. It gives double duty—a handsome davenport by day a comfortable bed at night.

Every family needs extra sleeping quarters in the home in case of emergency. Unexpected visitors come—a nurse may be necessary in any home at any time—friends may wish to remain over night—or it may be necessary to accommodate a neighbor, or a business friend.

Whatever the emergency or the occasion may be, a Pullman provides the extra room—the needed extra sleeping quarters

Some families may want to rent out a room because of present high rents. Some families may be moving to smaller apartments with fewer sleeping rooms—these are but SOME of the reasons for the immense popularity of the Pullman

The Pullman is in all respects the Perfect Davenport Bed

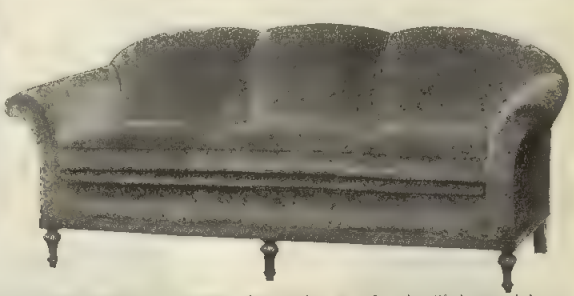
High Grade Overstuffed Suites

There is more deception in this kind of furniture than any other and for this reason we are showing but one manufacturer's line. After years of investigation and experience with different lines we offer this year what we know to be one of the best made, as well as designed series of suites on the market.

Here is a beautiful design. Surely no nicer living room suite could be wished for. It is one of the newest designs and exceptionally rich in appearance and indicative of good taste. Every line and every feature in it is handsome. Davenport is significant of comfort and luxury. Proven parts of this style have always been sought and recognized as the most desirable. It is exceptionally large, roomy and suitable for any home. Details—Extreme length, 86 in.; seat 18 in. high, 24 in. deep. Full spring construction. 168 springs in seat. Cushions removable. Weight of sofa, 200 lbs.; chair, 150 lbs.

		Tapestry Grade 6	Velour or Tapestry Grade 12	Velour of Mohair Grade 16
No. 100 /11	Sofa	$146.00	$174.00	$256.00
No. 100C/11	Chair	74.00	88.00	128.00

Rocker same price as chair. State kind and color of upholstery wanted.



The popularity of this suite right now is not a fad but will continue for the season, that anything that adds to beautify homes will be permanent. The inviting softness makes the suite the most comfortable to be found. We strongly recommend this number when a sofa of the finest quality, finish and design at the price consistent with its merits is desired. It is a piece of furniture that will continually invite admiration. With fancy fluted legs and a well defined border trimming. The finishes can be supplied in mahogany, walnut or golden oak. Details—Extreme length, 84 in., seat 17 in. high, 25 in. deep. Full spring construction. 160 springs in seat. Cushions removable. Weight, Sofa, 200 lbs. chair, 150 lbs.

		Tapestry Grade 6	Velour or Tapestry Grade 12	Velour of Mohair Grade 16

SPECIAL NOTE—Sofas covered on back with same material as upholstering **$30.00** to **$50.00** net extra. Birch mahogany finished feet are dipped unless otherwise ordered. All prices subject to change.

SOCKET WRENCHES

WALDEN-WORCESTER

Long Shank Brace Grinder Wrench. Some garage men prefer the brace grinder in place of short grinder VG3. Fork end flexible and will reach all valves including one under dashboard.

No.	Shank	Sweep	Length	Wt. each	Each
VG2	10 in	8 in.	18¾ in.	1½ lbs.	$0 95

Five in a carton.

Short Valve Grinder Wrench. The original wire handle valve grinder redesigned with ⅝" bar handle which swivels on cone bearing. The fork end fits the head perfectly.

No.	Length	Wt. each	Each
VG3	3¾ in.	½ lb.	$0.55

Five in a carton.

INTERCHANGEABLE STEEL SOCKETS

These sockets are machine made from the solid bar. Broaching depth is the thickness of the nut to be fitted, and broached ¼" over the size of the nut. Sockets are counter drilled making extreme bolt size depth of socket ½" more than the thickness of the nut. The outside diameter of the socket size and taper have been designed to insure strength and service conditions. The broached end is countersunk slightly to relieve the square edges and to allow more rapid placing of socket on bolt head. All sockets are heat treated to toughen them.

27	16 x 10 x 2$\frac{7}{8}$	25 lbs.	$27.00

One set in a handsome hardwood case.

SOCKET WRENCHES

WALDEN-WORCESTER

HEAVY DUTY OFFSET SOCKET

Our new 4200 series of heavy duty offset wrenches meets a demand for an improved type of offset wrenches.

The deep sockets allow for full thickness of the nut or bolt head, also sufficient depth to permit the bolt to extend through the nut.

The handles are long and heavy permitting a mechanic to start any bolt without using a length of pipe.

The sockets are designed for maximum of strength and minimum of clearance required.

No.	Socket size	S.A.E. nuts and cap screws	U.S. stand. nuts	U.S.S. cap screws	Size handle	Weight each	Each

4264	2	1⅝	1¼		1 x24 in	9½ lbs	4.40

One in a package

RATCHET

⅜-inch hexagon opening. Particularly designed for use on the Ford brake and reverse transmission bands. Opposite end ⅛-inch for use on slow speed connecting lock nut. One of the most valuable tools to an owner on account of the ease in taking up bands.

No.	Length	Wt. each	Each
4564	9 in	½ lb	$1.00

Five in a carton.

TRIPLE SOCKET OFFSET

Socket sizes ⅞, ⅞ and 1⅛-inch. Used on: Body bracket, front radius rod, front spring perch, front spring hanger, radius rod, rear hub nut, rear spring clip, rear spring hanger, rear wheel to brake drum, spindle bolt, spindle connecting rod. Truck: Brake support, rear axle housing split, rear spring hanger.

No.	Length	Wt. each	Each
5880	10½ in	1¾ lbs	$1.30

Five in a carton.

CONNECTING ROD

Fits all connecting rod cap nuts. Includes the fourth connecting rod. This is an original design, the first wrench made to reach the fourth connection without removing the engine from the car.

No.	Length	Wt. each	Each
5810	11 in	1 lb	$0 60

Five in a carton

SPEED

Shank 11¼ inches. Long shank brace socket wrenches are used as speed tools in assembling and dismantling cars. Are most efficient when used on a series of the same sized nuts as on cylinder heads. These tools are big time savers, and are considered indispensable in garages where they have been tried.

No.	Size	Sweep	Length	Wt. each	Each

One set in a wooden box.

NO. 100 STEEL OPEN END WRENCH SETS

Thin stamped wrenches are most useful in many places. Special steel used to give strength and wearing qualities. Sizes are 1" x ⅞, ¾ x ⅝, ½ x ⅜.

Set No.	No. wrenches	Wt. per set	Per set
100	5	1½ lbs.	$1.50

One set in a cardboard box.

(Sold in sets only)

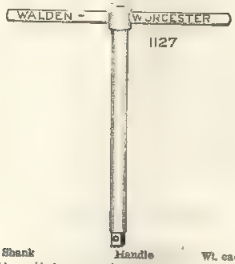
SOCKET WRENCHES
WALDEN-WORCESTER

OFFSET HANDLE

No.	Length	Wire	Wt. each	Each
1125	12 in	½ in.	1¼ lbs.	$0.80

Five in a carton.

TEE HANDLE



No.	Shank	Handle	Wt. each	Each
1127	10½ x ½ in.	12 x ⅛ in.	1¾ lbs.	$1.40

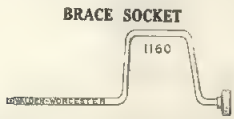
Five in a carton.

Extension Bars, also Shanks, for Combination Tee and offset handle No. 1105. Bars have ball friction on either end to retain sockets and other parts in engagement.

No.	Size	Wt. each	Each
1135	5 in.	⅛ lb.	$0.50
1139	9 in.	¾ lb.	.60

Five in a carton.

BRACE SOCKET



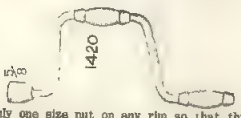
Long Shank. A considerably heavier speed wrench than our 6000 series. Extra sweep allows more leverage for use with large size sockets.

No. 1160—

Shank	Length	Wire	Sweep	Wt. each	Each
10½ in.	20 in.	⅝ in.	12 in.	2¼ lbs.	$1.65

Five in a carton.

BRACE RIM



There is only one size nut on any rim so that this solid handle tool fills all requirements (no loose socket to be misplaced).

No.	Size	Length	Wt. each	Each
1420	⅝ in.	13½ in.	1¼ lbs.	$1.10
1422	⅞ in.	13 in.	1¼ lbs.	1.10
1424	⅝ in.	13 in.	1¼ lbs.	1.10
1426	⅞ in.	13½ in.	1½ lbs.	1.10
1428	⅞ in.	13½ in.	1½ lbs.	1.10

Five in a carton.

TIRE AND RIM

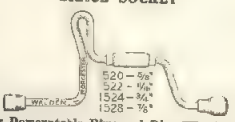
A new wrench for tire and rim service. A very substantial brace made of ⅝" wire 12" sweep. On shank of brace is a holder for five interchangeable sockets which are held by ball friction so that sockets may not drop off. Sockets include all standard sizes. Any socket may be replaced from regular stock (our Nos. 220, 222, 224, 226, 228). The longer shank on brace provides ample clearance for all standard tires and rims.

No. 1451 -Quintet.

Shank	Length	Wire	Sweep	Wt. each	Each
5 in.	13¾ in.	⅝ in.	12 in.	3¾ lbs.	$3.50

One wrench complete with five sockets in a carton.

BRACE SOCKET



For Demountable Rims and Disc Wheels

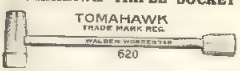
The loop on the handle is the grip for extra leverage in releasing and final tightening. The lesser throw on the brace gives more speed on account of lesser hand travel. It combines advantages of our offset and speed wrenches. The shank on this wrench is five inches long providing extra clearance for use on practically all disc wheels.

A desirable wrench for other uses than tires and wheels in garage service.

No.	Size	Sweep	Length	Wt. each	Each
1520	⅝ in.	7 in.	15 in.	2¼ lbs.	$1.10
1522	⅞ in.	7 in.	15 in.	2¼ lbs.	1.10
1524	¾ in.	7 in.	15 in.	2¼ lbs.	1.10
1528	⅞ in.	7 in.	15 in.	2¼ lbs.	1.10

Five in a carton.

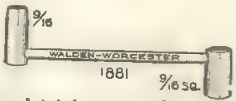
TOMAHAWK TRIPLE SOCKET



Socket sizes, ⅝ and ⅞-inch. This is the original Triple Socket Wrench, trademark "Tomahawk," having ⅛-inch rod connecting the two sockets. Used on: Axle housing, brake shoe support, crank case lower cover, cylinder head, dash bracket to dash, differential drive gear, drive shaft roller bearing, motor support (front), muffler, water cylinder inlet connection, and water cylinder outlet connection.

No.	Length	Wt. each	Each
1620	9½ in.	1 lb.	$0.75

Five in a carton



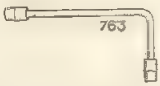
Socket sizes, ⅞-inch hexagon and ⅞-inch square. Used on: Crank shaft bolt, piston pin, locking screw, running board, running board to fender.

No.	Length	Wt. each	Each
1881	9 in.	1 lb.	$1.20

Five in a carton.

SOCKET WRENCHES

WALDEN-WORCESTER



L Type Wrench. 9½" x 4¼". Socket sizes ½" and $\frac{9}{16}$".

No.	Wt. each	Each
763	1 lb.	$0 80

Five in a carton.

L Type Wrench. 6¼" x 6¼". Socket sizes $\frac{7}{16}$" and ½".

No.	Wt. each	Each
852	¾ lb.	$0 80

Five in a carton

Universal Joint Tee Handle Wrenches. The tee handle socket wrench of rigid type has been a favorite of years' standing. The "Tee-Flex" series has the added advantage of operating in difficult and seemingly impossible places gained by the use of a universal joint built integral with the tool and toughened by the proper heat treatment

No	Size	Length	Wt. each	Each
1016	½ in.	12¾ in	1¼ lbs.	$2.50
1018	$\frac{11}{16}$ in.	12⅝ in	1¼ lbs.	2 50
1020	⅝ in.	13¼ in	1¼ lbs	2 50
1022	$\frac{13}{16}$ in.	13 in.	1½ lbs.	2.50
1024	¾ in.	13 in	1½ lbs.	2.50
1028	⅞ in.	13½ in	1⅝ lbs	2.50

Five in a carton.

Universal Joints are solid steel full machined finish used in combination with ratchet wrench extension bars and sockets working successfully at 45 degree angle.

No.	Wt. each	Each
1102	¾ lbs	$1.80

Five in a carton.

Combination Tee and Offset Handle. This number covers the handle only as illustrated. If complete tool is wanted, order No. 1104.

No.	Length	Wt. each	Each
1105	8 in.	½ lb.	$0.60

Five in a carton.

Combination Tee and Offset Handle Wrench with extension. The shank or extension bar (1135) is removable. The ball friction on both ends to couple combination parts or sockets.

No.	Length	Handle	Wt. each	Each
1104	6 in.	8 in.	1 lb.	$1.10

Five in a carton.

BRACE WRENCH

Brace Wrench. For use with various sockets and combination parts. Ends of brace are provided with ball friction to hold parts in engagement.

No.	Length	Sweep	Wt. each	Each
1107	9¾ in.	10 in.	1½ lbs.	$1.20

Five in a carton.

BRACE TOP

Brace Top a pressed steel handle, working on cone bearing and provided with socket end to fit brace wrench and various combination parts. Valuable auxiliary with extension bar ratchet wrench and socket on overhead work—millwrights particularly will appreciat this attachment and combination

No.	Wt. each	Each
1108	¼ lb	$0.60

Five in a carton.

PLUG CONNECTOR

Square bar connector, with ball friction on each end for coupling combination parts.

No.	Wt. each	Each
1109	1¾ oz.	$0.35

Five in a carton.

SOCKET CONNECTOR

Round socket with ½-inch square hole for coupling combination parts.

No.	Wt. each	Each
1110	¾ lb	$0.35

Five in a carton.

HEAVY DUTY WRENCHES

Popular types of wrench handles with interchangeable sockets are many times the desirable wrench equipment.

Recognizing this demand and also the necessity for heavier style of tools the following numbers are stock items.

These handles are usable with all interchangeable parts in our regular sets and sockets, our series Nos. 100 and 200.

BRACE SOCKET

No. 1114—

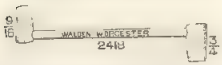
Shank	Length	Wire	Sweep	Wt. each	Each
2½ in	12 in.	⅝ in.	12 in	2 lbs.	$1.40

Five in a carton.

SOCKET WRENCHES

WALDEN WORCESTER

DOUBLE END OFFSET



Socket sizes, ⅞-inch and ¾-inch. Used on: Brake and reverse support, brake shoe support, clutch pedal support, crank case arm, crankshaft bearing nut, crankshaft rear bearing bolt, dash bracket to dash, differential case, fan bracket, front fender iron, front spring clip, inlet and exhaust clamp radiator support, spindle bolt nut, steering post bracket, steering yoke clamp, universal ball cap, On truck. Rear axle housing (front), rear axle housing (rear).

No.	Length	Wt. each	Each
2418	9 in.	1 lb.	$0.90

Five in a carton.

Socket sizes, 1-inch and ¾-inch.

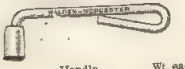
No.	Length	Wt. each	Each
2432	11¼ in.	1½ lbs	$1.15

Five in a carton.

TEE AND OFFSET HANDLE SOCKET

Wire handle construction and machine turned sockets make it possible to produce an equally well made and serviceable tool at much less cost than usual drop forged wrenches. Sockets are steel, machine turned from solid bar and broached accurately to size. Wire handles are proper size and class of material to guarantee service. Sockets are so fastened to the wire they will not turn or loosen.

OFFSET SOCKET



No.	Size	Handle	Wt. each	Each
2514	⅜ in.	7 in.	¾ lbs.	$0.55
2516	½ in.	7 in.	¾ lbs.	.55

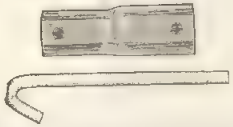
2722	¾ in.	6 in.	12 in.	1¼ lbs.	.65
2724	13/16 in.	6 in.	12 in.	1¼ lbs.	.65
2725	⅞ in.	6 in.	12 in.	1¼ lbs.	.65
2726	15/16 in.	6 in.	12 in.	1¼ lbs.	.65
2728	1 in.	6 in.	12 in.	1¼ lbs.	.65

Five in a carton.

DOUBLE END SPARK PLUG



Pressed steel. Case hardened—two sizes in one. 1/64-inch over size of spark plug, which prevents stretching and gives better outside clearance where plugs set in port plugs or deep in block.

No.	Socket sizes	Lgth. of socket	Lgth. of handle	Wt. each	Each
2961	7/8-1⅛ in.	4½ in.	6¾ in.	¾ lb.	$0.45
2963	7/8-1 in.	4½ in.	6 in.	¾ lb.	.45
2967	7/8-1⅛ in.	4½ in.	6¾ lb.	¾ lb.	.45
3187	1⅛-1⅛ in.	4½ in.	6¾ in.	¾ lb.	.45

Five in a carton.

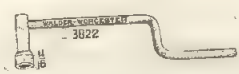
SPARK PLUG AND CYLINDER HEAD

Socket sizes, 1⅛ and ⅝-inch. The 1⅛-inch hexagon type opening has been so designed as to fit down squarely on the spark plug which is not true, using usual claw or open end type.

The ⅝-inch socket has been shaped to make it possible to take all cylinder head cap screws, even the two under the dash on latest models. Used on: cylinder head, spark plug, water cylinder inlet, water cylinder outlet.

No.	Length	Weight each	Each
3620	11 in.	1 lb.	$0.80

Five in a carton.



Socket size 11/16-inch hexagon. Used on fly wheel cap screws, heretofore considered an impossible place for a socket wrench. An ugly place made accessible.

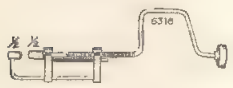
No.	Length	Length of shank	Wt. each	Each
3822	12 in.	2½ in.	¾ lb.	$0.70

Five in a carton.

SOCKET WRENCHES

WALDEN WORCESTER

NUT AND BOLT SPEED



A one-man tool. The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths

No.	Size	Lgth. ext.	Lgth. closed	Wt. each	Each
6316	½ in.	22¾ in	19 in	2½ lbs.	$3.00
6318	⅝ in.	22¾ in.	19 in.	2½ lbs.	3.00

Five in a carton

DOUBLE POWER SPEED

An entirely new design in speed wrenches. The lesser throw gives more speed (less hand travel). The loop on handle is the grip for extra leverage in releasing and final tightening.

No.	Size	Sweep	Length	Wt each	Each
7014	⅓ in	.6 in.	19¾ in.	2 lbs.	$1.00
7016	½ in	.6 in.	19¾ in.	2 lbs	1.00

No. DE35—Polished Blades; Japanned Handles; Length of Cut 2 inches, Length Over All 7 inches; Weight per Doz. 6 lbs. $2.00

Half Dozen in a Box

THE "HAND" OF SNIPS

There is Considerable Confusion Regarding the Meaning of Right and Left Hand Snips. Left Hand Means that the Work is at the Left of the Snips Cutting and the Scraps at the Right; We Show Only Snips with Left Hand Cut, as they are Invariably Used by Right Hand Men, and are Always Sent Right Hand Snips are Specially Ordered.

Standard Bench Snips, However, are always Furnished Right Hand Cut, that is the Lower Blade is on the Right Side of the Shears.

TINNERS SNIPS

PECK, STOW AND WILCOX

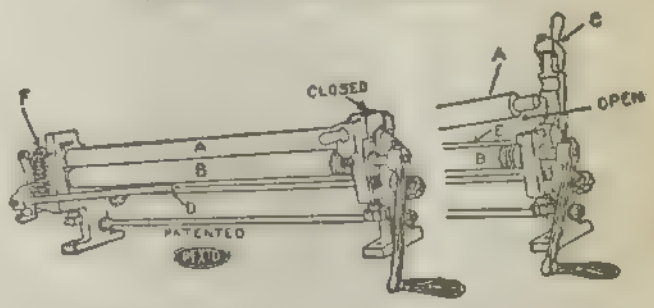
PATENT SLIP ROLL FORMERS



New Original Pexto Features are Embodied in These Forming Machine Patterns that Place Them in a Class by Themselves. They are Greatly Improved Over Our Old Slip Roll Pattern Forming Machines and Those Which the Present Market Offers. A Careful Study of the Illustration Shows the Time and Steps Saved Through Being Able to Perform All Operations at One End of the Machine, the Convenient End Where the Crank is Fitted. Without Necessitating the Changing of Positions the Sheet to be Formed is Placed Between the Gripping Rolls (A) and (B). The Cylinder Formed, Open Latch (C), Then by Means of Lever (D) raise Upper Gripping Roll (A) and Slip the Formed Cylinder From the Roll (A). It will be Readily Seen that all Operations are Performed at the Crank End of the Machine—a Pexto innovation that Can be Well Appreciated by the Mechanic Who Has Operated the Old Pattern Slip Roll Former. Rolls (A) and (E) are Adjusted with Knurled Screws, and Once Adjusted They Cannot Slip. The Gears (F) are Steel, Machine Cut, Running More Smoothly Than Cast Iron Gears Without Danger of Slipping or Breaking with Whatever Thickness of Metal is Used.

The Roll Raising Mechanism in These Machines is so Balanced that the Roll (A) is Easily Lifted with a Slight Pressure on the Lever (D). The Latch (C) is Released and Closed with one Movement, and is Self-Locking.

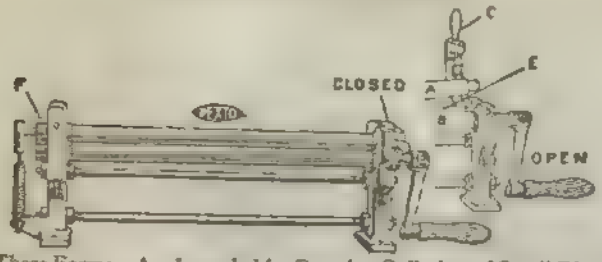
TINNERS TOOLS

PECK, STOW & WILCOX
PATENT SLIP ROLL FORMERS



These Formers Are Intended for Forming Cylinders of Small Diameters and are an Improvement Over Our Old Slip Roll Tin Pipe Forming Machines and Those Which the Present Market Offers. All Operations are Performed at One End of the Machine—the Convenient End, Where the Crank is Fitted.

After the Cylinder is Formed the Latch (C) When Opened Permits the Upper Roll (A) to Raise Automatically. The Formed Cylinder Can then be Removed from the Roll (A) Without Distorting It. The Latch (C) when the Roll (A) is Returned to Closed with One Movement and is Self-Locking. Rolls Bored Out and Fitted with Knurled Screws and Once Adjusted They Cannot Slip. The Gears Are Steel Wrought

GUTTER BEADERS

Gutter Beaders are Intended for Forming a Bead on the Edges of Gutters. This Machine is so Constructed that it can be Easily Adjusted to be Used with Rods from 3/8 to 7/8-inch in Diameter. The Thickness of the Metal is Determined by the Size of the Rod. It has a Gauge or Stop on the Left-hand End, so that after Adjusting the Jaws and Setting the Gauge for the Size of the Rod to be Used, the Jaws can be Easily Opened to Remove the Work and Rod, and then Closed in Exactly the Same Position as when the Bead was Formed, so that the Operator can Form any Number of Beads of Exactly the Same Size. The Jaws are Adjusted by a Hand Wheel with Rack and Pinion, which Adjusts Both Ends of the Movable Jaw.

Each

No. 700—Length 31 inches; Diameter of Rod 3/8 to 7/8 inch; Weight Each 75 lbs. $42.00

GROOVING MACHINES

These Machines are Constructed for General Grooving and Have an Improvement [illegible] Operation. Lower Bar or Horn (A) is Reversible, so that Either the Flat Surface of One of the Grooves Which is Planed into the Horn can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Seam is Put on the Inside of Work by Means of Flat Roll which Presses the Seam into One of the Grooves Planed in the Horn, Outside Grooving is Done in the Usual Manner by Using the Grooved Rolls on Flat Surface of Horn. An Adjustable Stop Collar (B) is Fitted on Lower Horn (A) to prevent work Slipping while Being Grooved

An Improved Feature will be Found in the Carriage (C) which Holds Flattening Roll (D) and Grooving Roll (E). The Flattening Roll (D) Runs Idle on the Outward Run and the Grooving Roll (E) Runs Idle on the Backward Run. In other Words, Both Rolls do Not Press on the Seam at the Same Time, which Makes for Easy Grooving. The Old Style Flattening Spring and Rod for Tension are Not Used, the Tension Being Secured through a More Simple Arrangement at (F), which Permits for Greater Uniformity in the Seams Grooved and Eliminates Frequent Spring Breakage

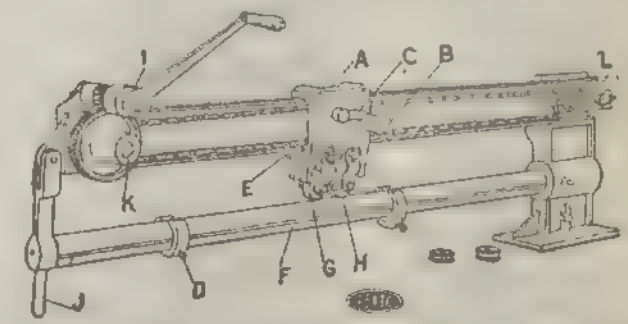
GROOVING MACHINES



The Trained Eye of a Mechanic is Not Necessary to Claim for These New [illegible] Masterpiece Machine for Grooving and Flattening the Seams in Sheet Metal Work. The More Important Principles Embodied in the Construction of this Machine are Original, Making for a Greatly Serviceable and Convenient Machine for Light as well as Heavy Work

[illegible] Grooving Carriage for Many Years [illegible] Taking [illegible] and Coasting Cut [illegible] Rotating Knob [illegible] When so Engaged the Carriage [illegible] Forward by the Handle (B) for Lightning Grooving on Light Material. The Position of Hand Crank (I) offers a Direct-acting Motion. Fitting the Crank (I) in the Large Gear (K), the Machine Becomes Back Geared for Greater Ease when Grooving Heavy Iron. Pressure of the Grooving Roll (G) and Flattening Roll (H) is Secured Through Eccentrics and which are Quickly and Easily Adjusted Through a Turn of Knobs (E). The Flattening Roll (H) Runs Idle on the Outward Run and the Grooving Roll (G) Idle on the Backward Run. The Two Rolls do Not Press the Seams at the Same Time, Therefore Easy Grooving is Assured. Lower Bar (F) is Reversible, so that Either the Flat Surface or One of the Grooves which is Planed into the Horn can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Stop (D) is Steel and Prevents Work Slipping while the Grooving is Taking Place.

The Combination of Features Described Offers an All-around Grooving Machine for Light and Heavy Work up to 30 inches and No. 20 Gauge. The Big, Busy Shop Cannot Afford to be Without One.

For Light Material Operated by Hand

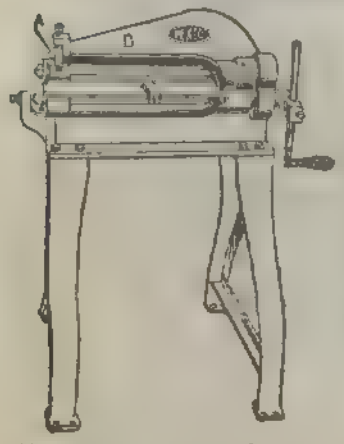
Will Cut any Square or Bevel under 20 inches Can be Instantly Changed to Cut Circles; Adapted to Metals up to 22 Gauge.

Each

†No. 278—Will Cut Circles 2¾ to 22 inches; Weight Each 125 lbs. $115 50

One in a Box

SLITTING SHEARS



For Slitting Iron, used in Cornice, Furnace and Ventilation Work, etc. Will Cut Circles and Irregular Curves on a Scribed Line; Cutters Forged from Special High Grade Tool Steel, Hardened and Tempered, and have Two Cutting Edges, Making them Reversible; Crank is Adjustable to Different Leverages, Bearings are Adjustable to Take Up Wear; Cutting Head Mounted on Heavy Cast Iron Legs; Capacity 16 Gauge Iron and Lighter.

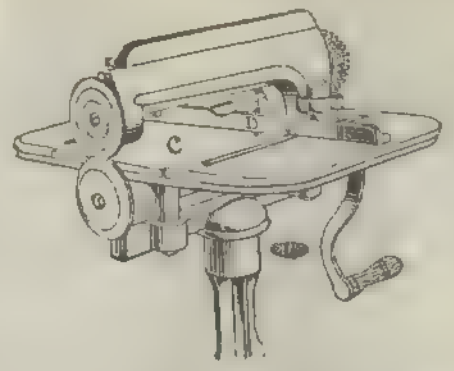
Each

†No. 255A—Diameter of Cutters 3½ inch; Depth of Throat 19 inches; Size of Table 20x8 inches; Weight Each 325 lbs. $154 00

One in a Box

TINNERS TOOLS

PECK, STOW & WILCOX



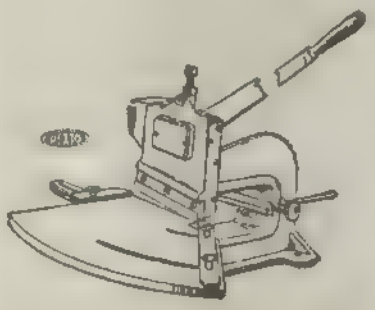
SLITTING SHEARS

Improved; Exceedingly Solid and Compact; All Adjustments Easily Made; Capacity 20 Gauge Iron and Lighter; Will Cut Strips as Narrow as ⅛ inch.

Each

†No. 250A—Diameter of Cutters 3⅛ inch; Depth of Throat 10⅛ inches; Weight Each 100 lbs. $94 50

One in a Box



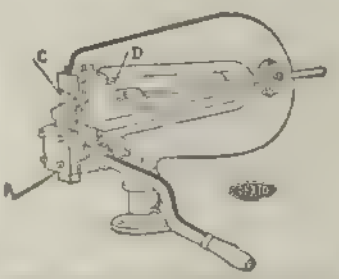
SLITTING AND BENCH SHEARS

For Variety of Work, Surpass All Other Shears; Especially Adapted for Range Manufacturers; Car Shops, Automobile Plants, and All Shops where a Variety of Straight and Irregular Cutting is Made; Capacity, 18 Gauge Iron and Lighter.

Each

†No. 248A—5½ inch Blade; Depth of Throat 10 inches; Size of Table 12x15 inches; Weight Each 165 lbs. $142 80

One in a Box



SCROLL SHEARS

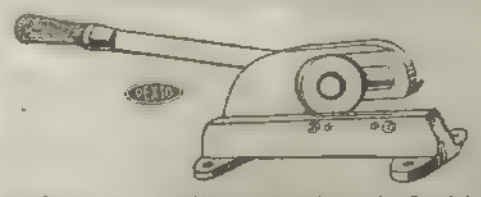
Will Cut Circles, Ovals, Ogees, etc., Adapted for Cutting from Center of Sheet; Mounted on Standard, which Screws to Bench, and is Adjustable to Any Angles; Upper Blade Can be Adjusted for Wear; Capacity, 20 Gauge Iron and Lighter.

Each

†No. 269A—4 inch Blade; Depth of Throat 12 inches; Weight Each 100 lbs. $124 50

One in a Box

CONTINUOUS ROLLING CUTTER SHEARS



In these Shears the Power Travels with the Cutter; They are Operated by a Pinion Lever Engaging in a Rack and Cutting with the Forward Roll of the Disc; the Disc is Reversible and Can be Changed to 6 Different Positions; the Straight Cutter Blade is Double Edged; the Motion of the Disc is about 1-3 of its Circumference; Pieces May be Cut Out of Sheet Metal Without Leaving Cross Marks.

Each

†No. 294—Will Cut 20 Gauge Iron; Length 12½ inches; Weight Each 4 lbs. $16 80

No. 295—Will Cut 16 Gauge Iron; Length 12½ inches; Weight Each 11 lbs. 23 10

One in a Box

HAND PUNCHES

WIZARD

The Wizard Hand Punch Works Like Magic, it is Powerful in Action, and Drop Forged from Steel. Excluding the Punch and Die, Only Two Parts are Used in its Construction. No Links to Spring, No Rivets to Split or Stick. No Pins, Small Screws and Other Parts to Become Easily Worn or Lost.

To Remove the Punch, Take Out the Easy-Working Knurled Head Screw. The Die is Slotted and Has a Screw Thread, Easily Removed with the Ordinary Screw Driver. A Simple Gauge is Fitted and which is Adjusted Through Turning Knurled Head

The Wizard is Guaranteed to Withstand the General Hard Usuage which a Hand Punch Usually Undergoes. An Actual Test will Prove the Advantages Gained by the Use of this Little Tool.

Each

No. 789—Depth of Throat 1⅜ inches; Capacity ¼ inch Hole in No. 18 Gauge Iron and Lighter; Length Over All 8¼ inches; Weight Each 3 lbs..... $17.60

No.	Length	Cutter	Wt. each	Each
40	.....9½ in.	1⅝ in	2½ lbs	$3 50

MISCELLANEOUS PLANES

STANLEY

CARRIAGE MAKERS RABBET

For heavy framing in mining work, carriage or wagon building or work of similar nature.

No.	Cutter	Lgth. over all	Wt. each	Each
10½	2⅛ in.	9 in.	3 lbs.	$7.40
10	2⅛ in.	13 in.	4½ lbs.	9.00

One in a cardboard box.

LOW ANGLE

This plane is especially adapted for use in cutting across grain on heavy work. The cutter is adjustable and set at an angle of 12 degrees. Adjustable throat. Varnished rosewood handle and knob.

No.	Cutter	Lgth. over all	Wt. each	Each
62	2 in.	14 in.	3⅝ lbs.	$7.80

One in a cardboard box.

ADJUSTABLE CIRCULAR

By means of the graduated scale on the gears, the flexible steel face can be easily shaped to any required arc, either concave or convex, by turning the knob on the front of the plane.

No.	Cutter	Lgth. over all	Wt. each	Each
113	1¾ in.	10 in.	4 lbs.	$10 30

One in a cardboard box

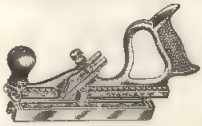
VICTOR CIRCULAR

This is a more recent and improved design. The face is fastened at each end to the plane body, and adjusted by a screw at the center. Nickel plated.

No.	Cutter	Lgth. over all	Wt. each	Each
20	1¾ in.	10 in.	4 lbs.	$12.50

One in a cardboard box

SWINGING FENCE MATCH



Has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue. Nickel plated. Rosewood knobs.

No.	Cuts grooves	On boards	Centers on	Wt. each	Each
48	⅛ in.	¾ to 1¼ in.	⅞ in.	3¾ lbs.	$7.40
49	⅛ in.	½ to ¾ in.	½ in.	2⅝ lbs.	7.80

One in a cardboard box.

DOUBLE END MATCH

Provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends the plane will cut a groove to fit. The tonguing tools are made wider on one side for use on thicker stuff than the plane will tongue and groove in the center.

No.	Cuts groove	On boards	Centers on	Wt. each	Each
148	¼ in.	⅝ to 1 in.	⅞ in.	2⅝ lbs.	$6.20

One in a cardboard box.

DOVETAIL TONGUE AND GROOVE

Cuts both tongue and groove for dovetail work. Four cutters are furnished with each plane, three of which are for cutting grooves of different sizes and one for cutting tongues of any size. Complete instructions for operating accompany each plane. Nickeled.

No.	Length	Wt. each	Each
444	9 in	6½ lbs.	$15.20

One in a cardboard box.

PIANO MAKERS EDGE

A useful tool for piano makers and all cabinet workers, for trimming inside work where space prevents the use of any other plane. Screw adjustment.

No.	Cutter	Lgth. over all	Wt. each	Each
97	2¼ in.	10 in.	3¾ lbs.	$6.30

One in a cardboard box

DADO FILLETSTER AND MATCHING

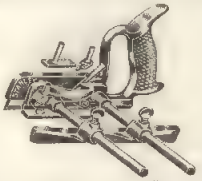
Skew cutters are the feature of this plane. It consists of a main stock carrying a spur, a depth gauge and a slitting cutter, a sliding section carrying a spur and forming an extra sole for the plane and a fence (rosewood face) which can be set for either plow or filletster work. It has a rosewood knob and handle. Nickel plated.

The cutters comprise 8 plow and dado bits, 3/16, ¼, 5/16, ⅜, ½, ⅝, ⅞ and 1¼ inches; a 1½-inch filletster cutter; a ¼ inch tonguing tool and a slitting cutter.

No.	Length	No. cutters	Wt. each	Each
46	10½ in.	11	5¾ lbs.	$15.10

One in a cardboard box.

COMBINED BEADING AND MATCHING



By adjustment of the fence, center beading can be done up to 5 inches from the edge of a board. Except for working across the grain the spurs need not be used. The cutters comprise 7 plow and dado bits, ¼, 5/16, ⅜, 7/16, ½, ⅝ and ⅞-inch; 7 beading tools, ⅛, 3/16, ¼, 5/16, ⅜, ⅝ and ½-inch, and a ¼-inch tonguing tool.

Nickeled stock and fence.

No.	Lgth. over all	Wt. each	Each
50	9½ in	4 lbs.	$11.70

One in a cardboard box.

OPEN THROAT ROUTER

For surfacing the bottom of grooves or other depressions parallel with the general surface of the work. Open throat. Bottom designed so that an extra wooden bottom of any size desired can be screwed on, enabling routing on large openings. Nickeled.

No.	Cutter	Lgth. over all	Wt. each	Each
71	¼, ½ in.	7½ in.	2⅝ lbs.	$5.60

CLOSED THROAT ROUTER

Same as No. 71, but with closed throat.

No.	Length	Cutter	Wt. each	Each
71½	7½ in.	¼-½ in.	2⅛ lbs	$4 40

One in a cardboard box.

UNIVERSAL HAND BEADERS

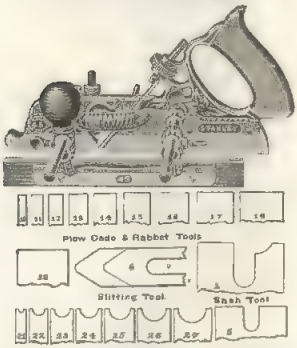
For beading, reeding or fluting straight or irregular surfaces and for light routing. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. Also furnished eight cutters sharpened at both ends as follows: 6 single beads, 1/8, 3/16, ¼, 5/16, ⅜ and ½ inches; 2 fluting tools, 7/16 and ¾ inches; 4 reeding tools (2 beads 7/16-inch, 3 beads ¼-inch and 3 beads ½-inch, and 4 beads ½-inch), 2 routers ⅜ and ¼-inch, and a ⅝-inch blank, which latter cutter the owner can file up as he desires. Curved handles.

No.	No. of cutters	Wt. each	Each
66	8	1⅜ lbs.	$2 30
			Each
Extra cutters or blanks			$2.60

One in a cardboard box.

PLANES

STANLEY FORTY-FIVE



This plane combines a main stock and a sliding section so arranged that cutters of different width can be used. Each plane is fitted with adjustable fence or guide and a depth gauge, and also with spurs for use in working across the grain. This plane can be used right or left hand.

This plane embraces (1) beading and center beading plane; (2) rabbet and fillstster; (3) dado; (4) plow; (5) matching plane, (6) sash plane, and (7) a superior slitting plane.

Each plane has 7 beading tools, 1/8, 5/32, 3/16, 1/4, 5/16, 3/8, 7/16 and 1/2-inch, 10 plow and dado bits, 1/8, 5/32, 3/16, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8, 3/4 and 7/8-inch, a sash tool, a match tool, slitting and fillstster tool

Nickel plated .Complete with 21 tools, bits, etc.

No.	Wt each	Each
45	9½ lbs	$31 60

One in a steel box

NOSING TOOLS

For Plane No. 45

Nosing tool, 1¼ inches (attachment same as hollows and rounds).

No	Each
5	$2.70
Extra cutters	1.50

One in a box

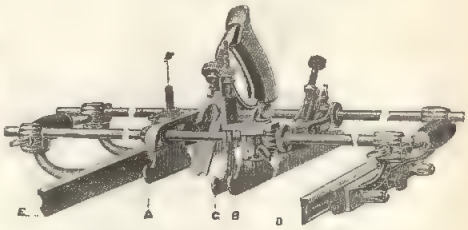
10	¾ in.	1¼ in.	2 lbs	3 80
12	1 in	1½ in	2¼ lbs	3 80
				Each
Extra cutters				$1 50

One pair in a box.

STANLEY FIFTY-FIVE



Can be used for all lines of work covered by a full assortment of so-called fancy planes.

The 52 cutters are arranged in 4 separate cases

This plane consists of:

A main stock (A) with 2 set screws of tranverse sliding arms a depth gauge (F) adjusted by a screw, and a slitting cutter with stop.

A sliding section (B) with a vertically adjustable bottom.

The auxiliary center bottom (C) is to be placed in the front of the cutter, as an extra support, or stop, when needed. This bottom is adjusted both vertically and laterally

Fences (D) and (E). Fence D has a lateral adjustment by means of a screw for extra fine work. The fences can be used on either side of the plane and the rosewood guides can be tilted to any desired angle, up to 45 degrees, by loosening the screws on the face. Fence E can be reversed for center beading wide boards.

An adjustable stop to be used in beading the edges of matched boards is inserted on left hand side of sliding section (B)

Nickel plated, with 52 tools, bits, etc.

No.	Wt each	Each
55	15 lbs	$46 50

THE ATHENA

The Athena Pattern, in "1835 R. Wallace" Heaviest Silver Plate, embodies the strength, grace and beauty that was characteristic of the Greece of by-gone days. The simple, harmonious lines, in combination with refined ornamentation, give the pattern an atmosphere of quality that is borne out in practical use. The finish is bright.

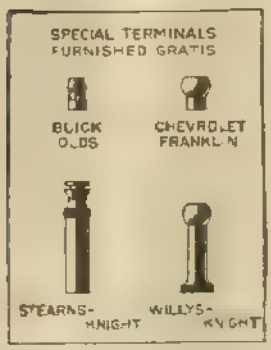
SPECIAL TERMINALS FOR A-C PLUGS



We are prepared to supply at no additional charge, special terminals for AC Plugs as shown. These will be supplied only when so ordered at time of shipment.

AC QUICK SELLER

FREE

A high grade, well made attractively finished sales cabinet. It takes up little counter space yet keeps stock at your finger tips.

A chart gives complete information as to the proper plug for every type of motor. Enables you to see at a glance when your stock of plugs is getting low, so that you can reorder before running out. A complete tie-up with AC National advertising. Ask our salesman or write us how you can secure one free.

Large size, holds 140 Plugs, 18 in., high 14½ in., wide.

Junior size, holds 50 Plugs, 11½ in., high, 10¾ in., wide.

Hibbard Hardware for Hard-Wear

SPARK PLUGS

RAJAH

Insulation—Highest grade imported hard fire porcelain of special pattern, securely packed, which insures against firing through. The new clip terminal does away entirely with the necessity for either thumb screw, nut or other device for attaching or securing wire or cable to spark plug.

No. 5266—½ in. porcelain, per box of 12 ..... **$13.92**

No. 5267—½ in., S. A. E. porcelain, per box of 12 ..... **$13.92**

No. 5269—Porcelains, extra, per box of 12 ..... **$7 68**

KINGSTON Mica

These plugs are made from mica of best obtainable grade and are recognized as the standard of all mica plugs.

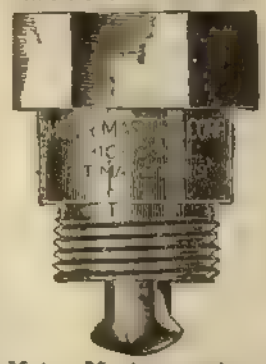
No. 5300—½ in. . . per box of 10 **$10.00**

No. 5301—½ in. S. A. E., per box of 10 ..... **$10.70**

SPARK PLUG BRUSHES

No. 5354—Presco, wire bristles, hair tuft, 2 tempered thin flat steels, per dozen **$2.40**

MOTOR MASTERS



The Motor Master creates a vapor field directly at spark plug points which explodes instantly when spark occurs.

Easily installed. Just screw spark plug into Motor Master and then screw Motor Master into cylinder. No moving parts. Lasts forever. Made to fit every car.

Made of polished brass, Approx. Wt., per Master 4 oz.

No. 5357—Set of 4 to fit ½ in. Spark Plugs ..... per set *$5.00*

No. 5358—Set of 4 to fit ½ in. Spark Plugs ..... per set *$5.00*

No. 5359—Set of 6 to fit ½ in. Spark Plugs ..... per set *$7.50*

ONE SET IN A BOX

SPARK PLUG WRENCHES

Pressed steel, double end, removable handle, will not crack or spread when in use. For ½ and ½ in. plugs, length 4 in

BENCH VISES

ABERNATHY RAPID ACTION

Especially Suitable for Manual Training and Technical School Equipment.

ROLLER NUT SCREW STYLE

These Vises have but ONE part in addition to the elements of an old style, slow acting screw vise, and that is the "Roller," which is a large substantial casting, Practically impossible to put out of order even by abuse. They have no springs whatever, but depend upon the weight of the "Rollers" for their action, and this is a Permanent factor.

So constructed that it is absolutely impossible for the nut section to rise or the screw to spring out of engagement.

The "Roller" is a practically balanced cylinder containing a tapered dovetail mortise into which a nut section is removably fitted; the "Roller" simply hangs upon the screw, and due to its weight and the resulting frictional contact between these two parts the "Roller" rolls in whichever direction the screw is turned.

Made of the very best quality gray iron castings, well machined and nicely finished, with cold rolled steel slides; with an extra smooth and ccurately milled steel screw and with the highest grade of phosphor bronze hobbed nut, of more than usual length, which insures strength and long wear.

CLUTCH STYLE
Manual Training School Special

Made of the very best quality of gray iron castings, well machined and nicely finished with cold rolled steel sides.

Clutch No. 20

This Vise is instantaneous in adjustment; that is, the handle being in a vertical position, the front movable jaw may be drawn or pushed to any desired adjustment by a single motion.

The compression feed is three-fourths of an inch for each revolution of the handle, and if it is so desired the front jaw may be fed the whole length of its adjustment by a continuous turning of the handle, but approximately a one-fourth turn of the handle is all that is necessary to clamp an article for any ordinary purpose. The front jaw may also be pushed to an adjustment regardless of the position of the handle, which is often a convenience and a further saving of time.

The entire manipulation of this vise is accomplished by the handle alone, and all wearing parts are located under the bench, where they are protected from knocks and dirt.

Each

No. 20—Jaws 10 inches Wide; 3 inches Deep; Opening 9 inches; Weight 28 lbs. **$15 20** 8 00

"HALF-INCH" is specially selected and specially sized for use in automobile generators, bicycle lamps, motorcycle generators, hunters' lamps, fishing lamps, camping lamps, watchmen's dark lanterns' steam boiler inspection lamps, hand lanterns and numerous other small pieces of portable Acetylene apparatus designed for the use of Carbide of this size.

Because of its high gas yield, special selection, uniform size, freedom from dust, and its uniform quality, is most economical and satisfactory for use in apparatus for which this size of Carbide is adapted.

Each can is equipped with a compression top which can easily be replaced in position, so that the Carbide remaining in the can will be thoroughly protected from air and moisture.

Will keep indefinitely if protected from air and moisture.

IGNITION GAUGES

AIRCO

You Can Instantly Detect Faulty Spark Plugs, Short Circuits and Leaks in the High-Tension Wiring. Faulty Spark Plugs, Short-Circuits, Leaking High-Tension Wires are Troubles with Which Every Motorist is Familiar.

By Using the Airco Ignition Gauge All These Troubles Can Be Instantly Located. It is Only Necessary to Hold the Gauge on the Plug or Run It Along the Wires.

There is No Danger in Using the Airco Ignition Gauge—Shocks are Impossible.

The Gauge is Simplicity Itself—It Is Instantly Ready for Use, No Wires Have to be Connected. It Fits the Vest Pocket and is Practically Indestructible.

The Airco Ignition Gauge Consists of a Hard Rubber Insulating Shell Into Which is Packed a Glass Tube of Neon, One of the Rarest of the Gases in the Air. When the Metal Cap, Which Seals One End of the Gauge is Brought into Contact with a Spark Plug or High Tension Electric Current, the Neon Becomes Luminous, Visualizing Accurately the Condition of that Part of the Ignition System Being Tested.

Per Dozen

TRANSFORMERS

VAN KERR

For Pleasure Cars, Tractors, Motorcycles and Gas Engines.

DOES YOUR MOTOR PUMP OIL? DON'T WORRY.

Van Kerr Transformers Cure the Troubles Which are Due to This Condition. Their Patented Figure of Construction Allows the Current of Electricity to be Broken in the Open Air Without Danger of Igniting Any Vapors Under the Hood. The More Combustible Spark so Produced Burns Every Particle of Oil and Gas, Giving Greater Power and Leaving No Carbon. The Van Kerr Method of Ignition Eliminates the Necessity of Reboring Cylinders and Installing New Piston Rings, and Instantly Removes the Difficulty Caused by Motors Pumping Oil.

Per Set

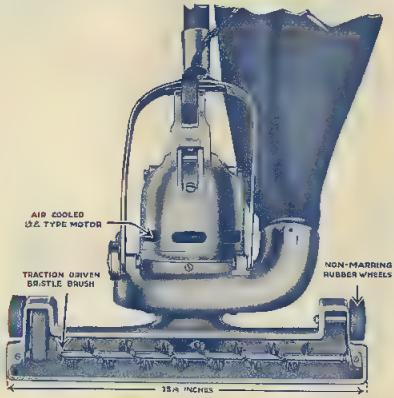
Aladdin VACUUM CLEANER

The Wonder Cleaner

The greatest electric vacuum cleaner value in America—and we know them all. A high grade cleaner at a price that beats all others. It's a wonderful trade winner. Made by the largest manufacturer of electric vacuum cleaners in the world.



FREE Dealers' Helps

We will furnish a quantity of attractive 8 page folders, a display card and a newspaper electro to help you sell "Aladdin" Vacuum Cleaners. Ask for these FREE Dealers' Helps when you order.

Following Are a Few of Its Distinctive Features:

(1) **REVOLVING SPIRAL BRISTLE BRUSH**—Loosens the embedded dirt and sweeps up all lint, ravelings and surface litter.

(2) **G. E. TYPE MOTOR**—Air-cooled, no belts or cogs, fan forces air through motor and cools it during actual operation. This is a great point of superiority in the "Aladdin" motor.

(3) **TWILL BAG**—Handsome blue bag of fine-cut twill, air and dust tight. Slide on clamp—simply pull the clamp off the end of bag, empty it and slide the clamp on. A quarter turn fastens the bag onto cleaner by a bayonet lock—a quarter turn back and it is released for emptying.

(4) **NOZZLE ADJUSTMENT**—Cleaning nozzle can be raised and lowered by turning adjusting screw over the rear caster.

(5) **ALL ALUMINUM BODY**—All castings of highly polished aluminum.

(6) **PISTOL GRIP HANDLE**—Equipped with switch for instant starting and stopping.

(7) **FLEXIBLE COVERED CORD**—20 ft. long. When cleaner is not in use cord can be folded onto metal guides on handle.

(8) **NON-MARRING RUBBER CASTERS.**

(9) **EXTRA WIDE TAPERED NOZZLE**—13½ in. long, 1¾ in. wide, tapered so that it gets into the corners of rooms and stairs. It is unnecessary with the "Aladdin" to make a separate job of cleaning out-of-the-way places.

1H6900—110 volts, single phase motor, alternating or direct current.

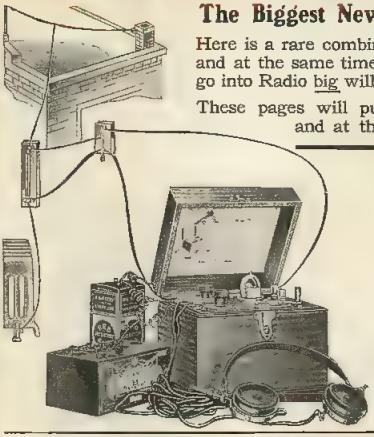
COMPLETE RADIO SETS

The Biggest New Thing for Home Entertainment

Here is a rare combination—an article that runs into big money and at the same time sells like hot cakes. The merchants who go into Radio big will be mighty glad they did.

These pages will put you into the radio business completely and at the lowest prices in America.



"AERIOLA SR." RECEIVING SET

This "Aeriola" is being advertised all over the country by the Radio Corporation of America.

1H7929—"Aeriola Sr." Complete with parts for operating. The only receiver on the market that does not require a storage battery. A dry cell is used to light the tube. This set will receive stations broadcasting on wave lengths of 100 to 500 meters and excellent results are obtained at distances of 75 miles. Under favorable conditions static as several hundred miles away can be heard. The operation is very simple, turning one lever is all that has to be done to hear concerts, weather reports, etc. This outfit includes one extra battery. Outfit consists of

Model RF "Aeriola Sr." Vacuum Tube Receiving Set. (As listed on nearby page under 1H6693 at $48.75 each.)
1 set 2,000 ohm Headphones
1 WD-11 Acoustic Detector Tubes
1 complete Antenna Set, consisting of Wire, Lightning Arrester, Ground Clamp, etc.
2 1½ volt "Red Seal" Dry Batteries.
1 only 22½ volt variable "B" Battery.

Set, **$52.50**

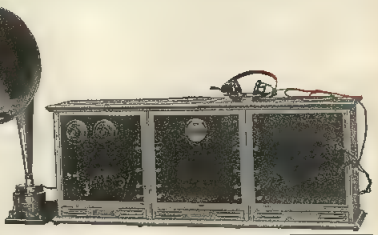
COMPLETE DEMONSTRATION OUTFIT
With "Magnavox" Loud Speaker

Merchants, as well as their customers, who have bought this set, find it exceeds all that is claimed for it.

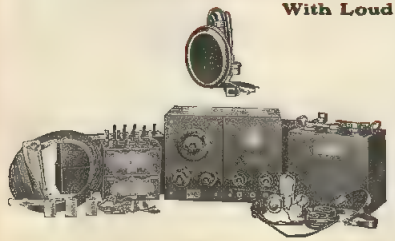
1H2384—A complete 3 unit set with loud speaker that can be used with the best results for either store demonstration purposes or home use. Will receive stations broadcasting on wave lengths of 160 to 1,000 meters. At distances of 350 miles with loud speaker brings in broadcasting stations loud enough to be heard at a considerable distance. With the telephones stations 800 miles away can be heard. There are one solid oak, waxed gray finish cabinets that fit into a top and bottom frame giving the appearance of one unit. Batteries are placed inside, cabinet. Set is 33 in. long, 14 in. high and 10 in. deep. Outfit consists of

1 Tuner Detector Unit
1 Cabinet for Storage Battery
1 Two Stage Amplifier Unit
1 "Magnavox" Loud Speaker
1 set 2,000 ohm Head Phones.
1 V V 200 Detector Tube.
1 V V 201 Amplifier Tube
1 V V 202 5 Watt Amplifier Tube.
1 six v. 16 Ampere Storage "A" Battery
2 22½ volt variable "B" Batteries
2 45 volt variable "B" batteries
1 complete Antenna Set, consisting of wire, lightning arrester, ground clamp, etc.
1 Set "Radio" Window Streamers.

Set, **$165.00**



"WESTINGHOUSE RC" COMBINATION SET
With Loud Speaker



There is no better set for all-around broadcasting reception purpose than this superior product of the Radio Corporation of America. It is a scientific triumph of the Westinghouse engineers.

A complete receiving set that gives results unequaled by any medium priced set on the market. The receiver is made by the Westinghouse Electric Co. and is so simple to operate that any beginner can secure perfect results. Will receive stations broadcasting on wave lengths of 150 to 700 meters, ocean, market reports etc. can be heard at distances of 470 to 500 miles. The parts composing this set from the aerial to loud speaker were selected after many trials and experiments by our experts to make the best possible combination. Outfit consists of

1 Model R C Westinghouse Receiving Set. (As listed on nearby page under 1H6693 at $39.28 each.)
1 pr. 2,000 ohm Head Phones
1 V V 200 Detector Tube.
1 V V 201 Amplifier Tube.
1 V V 202 5 Watt Amplifier Tube.
2 22½ volt Variable "B" Batteries
1 six volt 90 ampere storage "A" Battery.
2 45 volt Variable "B" Batteries
Complete Antenna Set, consisting of wire, Lightning Arrester, Ground Clamp, etc.

1H7932—Complete set with "Vocarola" loud speaker. Set, **$179.50**

1H7980—Complete set with "Magnavox" loud speaker. Set, **195.00**

VACUUM CLEANERS

Two famous brands—favorably known from one end of America to the other

Aladdin

The Wonder Cleaner

Made by the largest manufacturer of Electric Vacuum Cleaners in the world. There is no better cleaner on the market in construction and performance than the "Aladdin." Combines excellence in construction and operation with moderate price. Following are a few of its distinctive features:

(1) **Revolving Spiral Bristle Brush**—Loosens the embedded dirt and sweeps up all lint, ravelings and surface litter.

(2) **G. E. Type Motor**—Air cooled, no belts or cogs, fan forces air through motor and cools it during actual operation. This is a great point of superiority in the "Aladdin" motor.

(3) **Twill Bag**—Handsome blue bag of finest twill, air and dust tight. Slide on clamp—simply pull the clamp off the end of bag, empty it and slide the clamp on. A quarter turn fastens the bag onto cleaner by a bayonet lock, a quarter turn back and it is released for emptying.

(4) **Nozzle Adjustment**—Cleaning nozzle can be raised and lowered by turning adjusting screw over the rear caster.

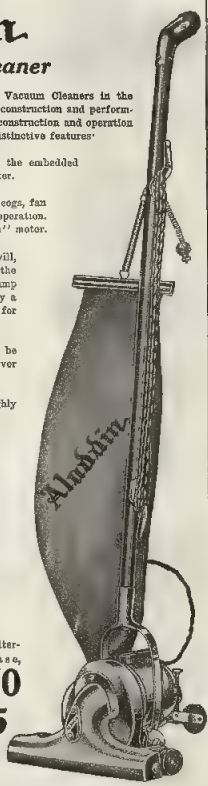
(5) **All Aluminum Body**—All castings of highly polished aluminum.

(6) **Pistol Grip Handle**—Equipped with switch for instant starting and stopping.

(7) **Flexible Covered Cord**—20 ft. long, with plug. When cleaner is not in use cord can be folded onto metal guides on handle.

(8) **Non-Marring Rubber Casters.**

(9) **Extra Wide Nozzle**—13¼ in. long, 1¾ in. wide, tapered so that it gets into the corners of rooms and stairs. It is unnecessary with the "Aladdin" to make a separate job of cleaning out of the way places.



1H6900—For 110 volts, single phase motor, alternating or direct current. 1 in case, 12 lbs.

Each, **$26.50**

Lots of 3, " **25.75**

Complete set of instructions for assembling and operating the "Aladdin" included with each cleaner.

FREE FOLDERS & DISPLAY CARD

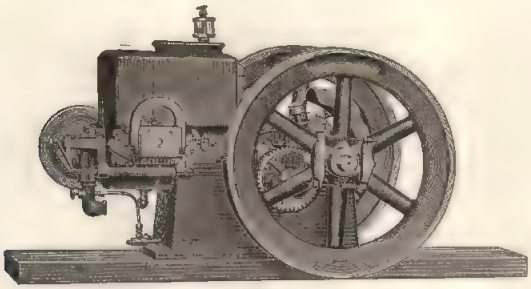
GASOLINE AND DISTILLATE ENGINES

ALAMO



2½ HORSE POWER

The Two and One-half Horse Power Alamo Engine is considerably heavier than the One and One-half Horse Power, but light enough to be easily moved about and very easy to start and operate. It is the biggest labor saver on the farm. We urge our customer in selecting an engine to get one with surplus power. A larger engine will do all that a smaller one will, satisfactorily, and often extra power is found very valuable.

Alamo Engines are finished with the greatest care in every detail, every part that enters into their construction is carefully tested and inspected. These engines run with a steadiness and dependability not found in engines which are less carefully manufactured.

Some of the outstanding features incorporated in our 2½ H. P. Engines:

Main bearings tilted at an angle of thirty degrees to lengthen their life.

Governor weight collar is fastened on the outside of the fly wheel so that it can be easily removed without removing or disturbing the fly wheel.

Hot type of cylinder head to assist in vaporizing fuel, thereby increasing the efficiency of the engine.

Large and finely balanced fly wheels.

Mixer has one adjustment.

Ground and polished crank shaft made of the very best material.

Engine has only two gears which are machine cut.

Cam and cam gear cast separately.

Large grease cups on main bearings.

Positive lock grease cup on connecting rod.

Large water hopper for cooling.

Valves are extra large with cast iron heads and nickel steel stems.

Four ring piston provided with oil grooves to make certain of lubrication.

Heavy galvanized iron gasoline tank in base.

Ignition—Webster oscillating magneto.

Equipment

All 2½ H. P. Alamo Stationary Engines are regularly equipped with muffler, Webster oscillating magneto, solid iron pulley, wrenches, oilers, oil can and a fuel tank in base of engine of sufficient capacity for a full day's run.

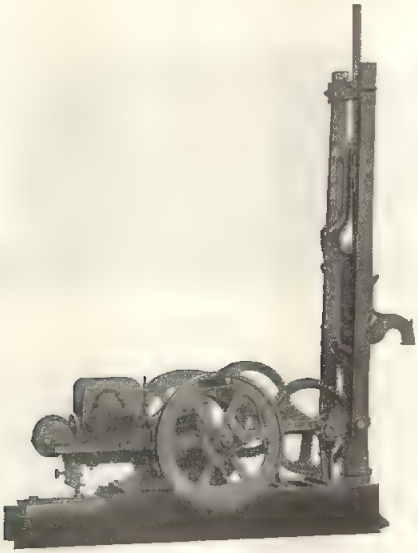
GASOLINE AND DISTILLATE ENGINES

ALAMO



1½ HORSE POWER DIRECT CONNECTED PUMP JACK

The 1½ H. P. Alamo Direct Connected Pump Jack is designed to work with any ordinary force pump or windmill standard This combination outfit is compact and especially suitable for pumping purposes where space is limited. It consists of a regular 1½ H. P. Alamo Engine equipped with the Webster magneto, direct connected to a single, cut geared Pump Jack mounted on a substantial wooden base.

The Jack has cut gears throughout and being geared direct to the pump does away with the use of belts entirely. By removing four base bolts the engine can be used for general farm purposes without disturbing the pump or jack.

This outfit makes one of the handiest and most economical pieces of machinery that can be installed

Complete strokes per minute 40.

Length of strokes, 4, 7 and 9 inches

Grease cups on all bearings.

Machine cut gears throughout.

Jack base webbed on bottom for additional strength

Jack of the single gear type, adjustable for any height pump

Equipment

All 1½ H. P. **Direct Connected Pump Jacks** are regularly equipped with muffler, Webster oscillating magneto, solid iron pulley, wrenches, oilers and oil can, and a fuel tank of sufficient capacity for one day's run.

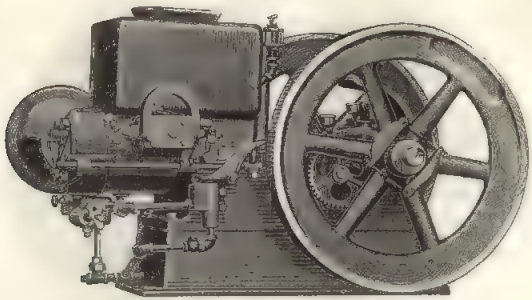
GASOLINE AND DISTILLATE ENGINES

ALAMO



6½ HORSE POWER

The Alamo Six and One-half Horse Power is an all around general power purpose engine. It is regularly furnished with the modern and up-to-date attachments and is eminently an engine of service. For the farm it will do all the work that the smaller sizes will do and where the engine can be set on a permanent foundation and various machines run from a line shaft, this is an ideal engine for the average condition. This is also the most popular size for blacksmith shops, machine shops, retail lumber yards, and all places where an engine of this size is required.

These engines are built for hard work and continuous service and will deliver their rated power with ease under all conditions with a liberal overload capacity.

Some outstanding features incorporated in our 6½ H. P. Engines:

Well-known four stroke cycle type, attractive in appearance, symmetrical in design and substantial in operation, with liberal bearing surfaces for all moving parts.

Hopper Jackets—Are large and require a minimum amount of water for cooling.

Crank Shaft—Is forged from solid billet of open hearth crank shaft steel, heat treated, carefully machined and ground accurately to size.

Main Bearings—Are large, set at a thirty degree angle and are lined with the very best grade of babbitt metal.

Piston—Is of the trunk pattern, ample length, machined and ground to size. Provided with four expansion rings perfectly fitted to the grooves in the piston. Oil grooves are also provided to make certain of perfect lubrication of all parts of the piston and rings.

Piston Wrist Pin—Is large of size, case hardened, ground and polished, and securely fastened in a manner which makes it quite impossible for it to come loose.

Cylinder—Is cast from a special mixture of charcoal iron, which makes a casting of great strength, density and of the greatest wearing quality.

Cylinder Head—Thoroughly jacketed and provided with large valves. The valves have cast iron heads and nickel steel stems.

Governor—The hit and miss type, recognized as the most satisfactory in engines for general hard service and the most economical in fuel.

Carburetor—Has only one adjustment. It is not affected by climatic conditions and engine starts readily in all weather. A perfect working carburetor is of the greatest importance, for the satisfactory operation of an engine. The carburetor is designed especially for this size engine and will control the mixture perfectly under all conditions.

Gasoline Pump—Has no packing whatever and as it is placed above the level of the carburetor there is no possible chance for any leak of gasoline resulting in an insufficient supply of fuel to the carburetor. Plunger has ball check valve and can easily be removed without disturbing other working parts of the engine.

Speed Changing Lever—Enabling the operator to vary the speed of the engine twenty-five per cent while running.

Ignition—Webster Tri-Polar Oscillator.

Equipment

All 6½ H. P. Alamo Stationary Engines are regularly equipped with muffler, Webster Oscillating magneto, solid iron pulley, wrenches, oilers, oil can, and have fuel tank in the base of engine of sufficient capacity for one day's run. Friction clutch pulley can be furnished as an extra if so required.

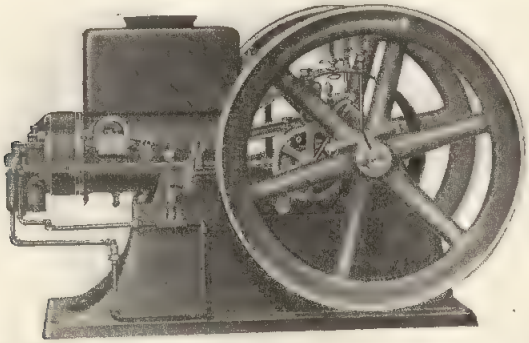
GASOLINE AND DISTILLATE ENGINES

ALAMO



9, 12 AND 15 HORSE POWER

The Alamo Stationary Engines of 9, 12 and 15 Horse Power sizes are intended for general power service. They are powerful, well designed engines, reliable and economical and adapted for all classes of work.

Elevators, mills, machine shops, etc., are using a large number of these engines with the most satisfactory results.

The carburetor on these engines has been pronounced superior to any used elsewhere on this type of engine. The engines run with very low internal friction, are easy to start, absolutely reliable and for ordinary service a more satisfactory engine has never been built.

Some of the outstanding features incorporated in our 9, 12 and 15 Horse Power Alamo Engines.

Crank Shaft—Is forged from a solid billet of open hearth steel heat treated, machined ground and polished.

Connecting Rod—I beam type. Piston end is provided with a bronze bearing and is adjustable so that wear can easily be taken up.

Cooling System—Open jacket type, eliminating circulating pumps and outside cooling tanks.

Cylinder Head—Thoroughly water jacketed. Water circulates around the valves keeping them cool.

Gasoline Pump—Has no packing whatever and, as it is placed above the level of the carburetor, there is no possible chance for any leak of gasoline.

Crank Shaft Bearings—Are large and lined with the very best grade of babbitt metal. Bearings set at an angle of thirty degrees. This is a very desirable construction, since the thrust due to the explosions is taken up with much less strain on the bearings.

Heavy Sub-Base—May be removed if engine is to be mounted.

Fly Wheels—Are large and perfectly balanced.

Large Valves—With cast iron heads and nickel steel stems.

Piston—Is provided with four expansion rings, also oil grooves to make certain of proper lubrication.

Lubrication—Connecting rod is lubricated by a wipe feed oiler. Main bearings are lubricated by large sight feed oilers.

Governor—Fly ball gear driven, hit and miss principle, recognized as the most satisfactory and economical.

Speed Changing Screw—Speed can be changed while the engine is running.

Ignition—Webster Tri-Polar Oscillator.

Equipment

All 9, 12 and 15 H. P. Alamo Stationary Engines are regularly equipped without extra charge with a Webster oscillating magneto, wipe feed oil system, muffler attached, wrenches, oilers and oil can. 9 H. P. has fuel tank in the base of the engine of sufficient capacity for one day's run. 12 horse power and 15 horse power engines are supplied with 60 gallon outside fuel tank. Plain or clutch pulley can be furnished as an extra if desired.

ALAMO ENGINES

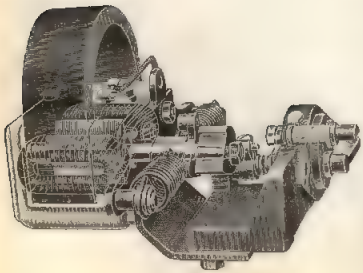
Engine With Fly Wheel Removed Showing Working Parts

Alamo Engines are the result of twenty-five years of gasoline engine experience combined with engineering skill and best factory practice. They are of the well known four stroke cycle type, governed by the "hit and miss" principle which is acknowledged the most satisfactory for general service and most economical in fuel.

The engines are all attractive in appearance, symmetrical in design and substantial in operation, with liberal bearing surfaces for all moving parts. They have large hopper jackets, require a minimum amount of water for cooling; have the highest type of oscillating magneto. They are manufactured by modern methods in our up-to-date factory equipped with the latest and most efficient machine tools. Nothing but the highest grade material enters in their construction and the workmanship is of the highest quality.

MAGNETOS

WEBSTER



Webster Magneto

Alamo engines are equipped with Webster magnetos because Webster low tension ignition is uniformly dependable over long periods of time and because it insures easier starting. A Webster equipped Alamo engine will perform flawlessly in wet weather or dry; during the long hot day of summer, through wet springs and falls, and on the coldest days in winter. Break downs due to faulty ignition are practically unknown.

The Webster magneto is dependable because it has no gears, no brushes, no moving wires, no rubbing contacts to be damaged by excessive speeds; because it has nothing to wear out and nothing to get out of order. The magnetos are of the finest magnet steel. The permanent, rigidly fixed windings are absolutely water proofed. The unwound inductor runs on a solid shaft in heavy bronze bearings. Every part is built to insure steady, sure spark action. The magneto functions only when there is a charge of "gas" in the cylinder to be fired. The Webster magneto works only part of the time that the engine is in operation. This accounts for the long life of this ignition unit. Thousands of Alamo engine owners swear by Webster ignition. They know there is no substitute for it.

ENGINE DRIVEN MOUNTED SAWING OUTFITS

PERFECTION

4½, 6½ AND 9 HORSE POWER

These rigs are built to supply the demand for a moderate priced high grade sawing outfit. They are unquestionably the most satisfactory outfits on the market today. As every piece that goes into their assembly is of the highest quality obtainable, they can be relied upon not only to do the most satisfactory work, but to outlast many times outfits of cheaper construction. The best is the cheapest in the long run.

Saw Frame—The No. 62 all steel saw frame embodies a number of improvements over other makes and has proven to be the most popular sliding frame ever made. The sliding table is mounted on rollers which slide easily on an angle steel track. Front part of saw table entirely covered with sheet iron and has a 10-inch extension at left of blade. Frame is fitted with a 1⅞-inch mandrel turned to 1⅝ inches for saw blade. Boxes on saw arbor are of the self adjusting type, lined with a high grade metal which makes a non-heating bearing that will last a life time if properly oiled. Balance wheel is carried on an independent shaft, located underneath the table, fitted with adjustable hangers to take up slack in belt. This is a very desirable feature as it permits cord wood or poles of any length to be cut. In addition to this, the location of the fly wheel gives the outfit balance and overcomes vibration, common to rigs of other construction.

Truck. All steel and of proper construction to withstand any vibration or strain to which it may be subjected. Fitted with 6 inch channel beams on which both engine and saw frame are mounted. The trucks have solid steel axles and wide tired wheel, channeled to prevent skidding. Braces for truck wheels are not required while operating as each outfit is individually balanced.

Engine. Regular Alamo Type M, with Webster Oscillating Magneto using either gasoline or distillate for fuel. Alamo Kerosene Engine can be furnished if desired. The Alamo is the highest grade engine obtainable, and is fully guaranteed.

Equipment

Engine fitted with friction clutch pulley of suitable diameter, complete with belting. Saw frame regularly equipped with 26 inch blade. Besides 18 to 30 inches in diameter can be furnished in place of 26-inch if desired. Outfit is absolutely complete and ready to operate. All outfits are shipped with pole, but doubletrees and neckyoke are not included.

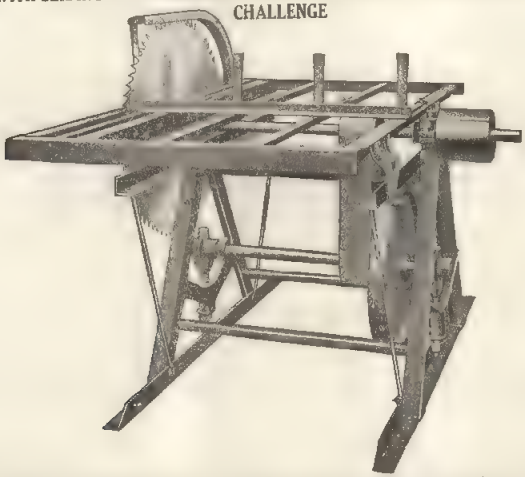
WOOD SAWING OUTFITS

NO. 62, ALL STEEL WITH SLIDING TABLE. COMPLETE WITH BLADE. EXTRA HEAVY DUTY. FOR GENERAL WORK

CHALLENGE



All steel frame, fitted with 1 7/8-inch mandrel turned to 1 3/8-inch for blade. The boxes on saw arbor are of the self-adjusting type, lined with a high grade metal which makes non-heating bearing that will last a lifetime if properly oiled. Balance wheel shaft is fitted with adjustable hangers to take upslack in belt. The balance wheel being located underneath table on independent shaft, permits of cordwood or poles being cut in any length desired, in addition to which its location gives the outfit balance and overcomes vibration common to frames of other construction. The front part of table is entirely covered with sheet iron and has a 10-inch extension at left of blade. These are not shown in illustration. Saw blade is protected by substantial steel guard and permits of using any size blade from 18 to 30 inches in diameter. Sliding table mounted on roller bearings which slide easily over angle steel track.

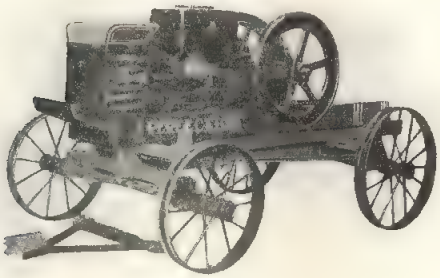
PORTABLE ENGINES

ALAMO



4½ AND 6½ HORSE POWER

The 6½ horse power portable engine is the favorite size for use for ordinary farm work where all kinds of work are to be done with one engine. These engines may be run on a minimum amount of fuel yet have power enough for all but the heaviest class of farm machinery. For an all around general purpose engine there is nothing better made.

The Alamo portable engine has been pronounced by the best critics as being the most perfect outfit yet produced for all around service. Its perfect balance, ease of starting in all kinds of weather and its simplicity and substantial construction is best appreciated by those who have used these outfits under the most severe conditions.

Engine—Alamo gasoline and distillate engines are standard equipment but kerosene engines can be furnished if so ordered. Alamo engines are built for hard work and continuous service and will deliver their rated horse power with ease under all conditions with a liberal overload capacity.

Pulley—Regular cast iron pulley will be furnished with each outfit without extra charge. Havana double grip friction clutch pulley will be furnished as an extra if desired.

Truck—The trucks are built of steel throughout and are complete with seat. They have solid steel axles and wide tired wheels, channeled to prevent skidding. Braces for truck wheels are not required while operating.

Equipment

All 4½ and 6½ horse power portable engines are regularly equipped with solid iron pulley, muffler, Webster oscillating magneto, and all necessary wrenches, oilers and oil can. Team trucks are supplied with doubletrees and neckyokes as an extra if desired.

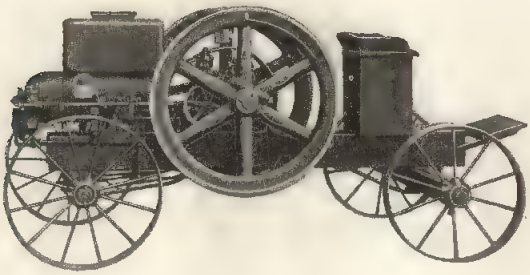
PORTABLE ENGINES

ALAMO



9, 12 AND 15 HORSE POWER

Alamo Portable Engines of the larger sizes furnish economical and reliable power for operating huskers, shellers, threshers, ensilage cutters and all classes of heavy machinery. The design of the engine and truck in combination so as to make everything perfectly accessible from one position, has done much to assist in establishing its reputation as being the easiest Portable Engine on the market to start and operate.

The engine frame is bolted direct to the steel channel beams of the truck and the center of gravity is therefore brought to the lowest possible point, making the outfit very steady when running.

Engine—The regular Alamo gasoline and distillate or kerosene engine is used. Each engine is individually balanced, with the result that the outfit will stand perfectly still running idle or under full load.

Pulley—All outfits are less pulley, but Havana double grip friction clutch or cast iron pulley will be furnished as an extra if desired. If possible always specify size and type wanted so that pulley may be properly fitted and adjusted in our shop before being shipped.

Truck—Made completely of steel and fully guaranteed. Have solid steel axles and wide tired wheels, channeled to prevent skidding.

Equipment

Each outfit is shipped complete with pole, tool box and seat, cylinder oiler, wipe feed oil system for connecting rod and main bearings. Webster oscillating magneto, muffler, all necessary wrenches and oil can.

Doubletrees and neckyoke will be furnished as an extra if desired

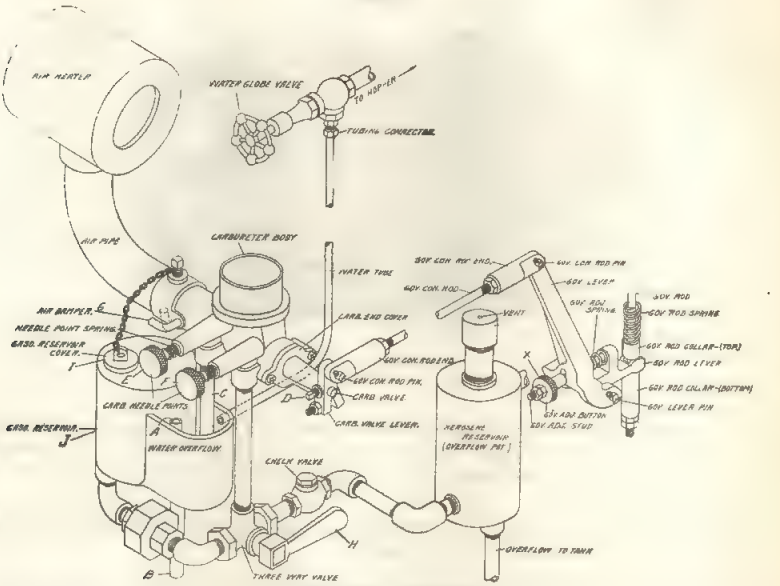
THROTTLING GOVERNORS

ALAMO



KEROSENE CARBURETER

The Alamo Engine Co. have spared no efforts in developing their kerosene carburetor to the highest efficiency possible. This carburetor will successfully handle kerosene, therefore almost entirely eliminating the smoke and obnoxious gas resulting from improperly designed carburetors.

Simplicity is the next important item, which is best illustrated by stating that our kerosene engine is entirely self-regulating. Fuel and air are drawn into the engine in proper proportion, varying from a weak to a rich mixture as required by load conditions.

The water spray necessary for successful operation of the larger size kerosene engine is also automatically controlled. Water spray is supplied only at times when needed for heavy engine loads.

We wish to emphasize the fact that this carburetor is not a make-shift proposition, but one that is scientifically designed for kerosene and we recommend it as being efficient, economical and reliable.

The Operation of the Alamo Kerosene Carburetor

Kerosene Reservoir. The carburetor used on the 9, 12 and 15 horse power kerosene engines is the pump feed type. Kerosene is pumped from the base of an outside storage tank into the reservoir which is provided with an overflow pipe for returning excess fuel, thus preventing flooding. The 6½ horse power and smaller is equipped with the suction feed carburetor and does not have the kerosene reservoir.

Three Way Valve. Used to switch from gasoline to kerosene after engine is warmed up. Turn lever "H" away from the engine on all sizes except 9, 12 and 15 horse power which lever must be placed in a vertical position for gasoline.

Gasoline Reservoir. Fill with gasoline for starting and after engine is warmed up switch to kerosene. Engine should be run on gasoline a few minutes before stopping to make sure there is no kerosene left in the carburetor, making it easier to start up again.

Air Heater. Fitted to the exhaust pipe and supplies hot air to the carburetor to assist in vaporization. The greater part of the kerosene can not be vaporized into a firing mixture without heating and exhaust heat is found to be of great assistance in handling low grade fuels.

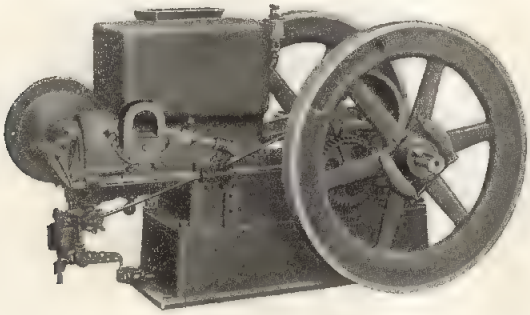
Air Damper. Close air damper while engine is in process of starting to insure a rich mixture. After first two or three explosions open and leave open.

Water Feed. Under heavy loads there will develop a knock or pound common to all the larger size kerosene engines that may be readily overcome by feeding a little water into the combustion chamber through the needle valve "E." Open water globe valve allowing the water to flow into the overflow chamber and is then drawn into the carburetor through tube "C." The water is automatically shut off as the load on the engine decreases, thereby overflowing through tube "B" until required again. Just enough water should be fed to stop the knocking, but in no case enough to sacrifice keen ignition. Water also keeps the cylinder free from carbon and prevents high temperatures which interfere with proper lubrication.

Governor Connecting Rod. Runs from the governor lever to the carburetor valve and regulates the speed and also the amount of fuel and water taken in by the engine.

THROTTLING GOVERNOR KEROSENE ENGINES

ALAMO



3½ HORSE POWER

The three and one-half horse power Alamo Throttling Governor Kerosene Engine is designed for long and continuous service, such as running small electric light plants and other machinery where a high degree of efficiency is required. For this reason special attention has been given to the general construction of the engine and nothing has been omitted that could add to their reliability and efficiency.

The Alamo Engine is properly balanced and it is not necessary to bolt it down. Having an engine in perfect balance eliminates vibration and wear of the working parts is reduced to a minimum.

Crank Shafts. The shaft is forged from a solid billet of open hearth crank shaft steel. Extra large diameter, carefully machined and ground to size.

Connecting Rod. I beam construction, with all necessary adjustments for taking up natural wear. Crank end fitted with interchangeable die cast babbitt bearing. The bearing in the piston end is phosphor bronze.

Piston. Is of the trunk pattern accurately ground to size, insuring a perfect fit. Each one is fitted with four expansion rings also oil grooves to make sure of proper lubrication.

Carburetor. Suction feed type, designed especially for this engine. Is not affected by climatic conditions and is noted for economy of fuel consumption. The water feed is not used on this size engine due to the special construction of the carburetor.

Governor. Throttling type insuring a steady speed at all times. It is very simple and never gets out of order.

Cylinder Head. Thoroughly jacketed and provided with large valves. Valves have cast iron head and nickel steel stems.

Ignition. Webster Tri-Polar oscillator.

Equipment

All 3½ horse power Alamo Stationary Engines are regularly equipped, without extra charge, with muffler attached, Webster oscillating magneto, solid iron pulley, wrenches, oilers, oil can and a fuel tank of sufficient capacity for one day's run.

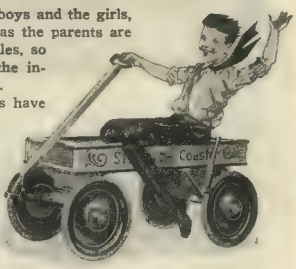
Three Factories Main Office: Toledo, O

The American-National Company

America's Most Popular Sellers

Young America, both the boys and the girls, are coming into their own—as the parents are finding pleasure in automobiles, so the children are satisfying the inherited, inborn desire to ride.

The three Diemer brothers have spent years in the study and perfection of wheeled vehicles. The American line as a result stands out as the leader in style, design, finish and color harmony. The line sells itself easily—it has instant appeal to the parents as well as the children.



American

THE LINE BEAUTIFUL

Make the Kiddies Your Life Friends

Show the American line on the floor and in the window—give the children a chance to ride in these wonderful vehicles—send in a trial order NOW—Get this quick turnover line. It makes the Kiddies life-long friends.

Juvenile Automobiles	Scooters
Coupes	Tricycles
Velocipedes	Hand cars
Coaster wagons	Kiddie bikes
Express wagons	Doll buggies
	Baby vehicles

Raise *the* Kiddies *on* Wheels

This heading used in our national advertising has taken big with the parents—they welcome these health and body building vehicles—and the mothers like the idea of the children being interested for hours at a stretch with this safe, sturdy line. Take advantage of the parents' acceptance of the American line—BUY NOW.

RANGER
REPEATING RIFLE

Advertised in the Saturday Evening Post

All-Year-'Round PROFITS

There's no special season for playing Indian, Cow Boy, Soldier, as there is for tops and marbles.

That's why the Ranger Repeating (cap) Rifle sells all-year-'round—with all-year-'round profits for dealers on rifles and repeat sales of ammunition.

The Ranger is a realistic shooter—looks like a real gun; takes 50 caps on a paper strip; feeds and fires with each trigger pull; and real smoke issues from the blued steel barrel.

It's *safe* too. Each shot occurs *inside the rifle*, protected by a special safety housing. That's the big feature that makes parents buy Ranger Repeating Rifles.

Stock Ranger Repeating Rifles now and see how fast they'll move off your shelves.

Packed 1 doz. in corrugated case—size 5¼ x 4¾ x 30 inches. Weight, 12 pounds.

SECTIONAL REVOLVING NAIL BINS

All Steel. Saves Time, Space and Nails

Occupies Less than 4 Square Feet of Space; Holds from 20 to 25 Kegs of Nails; Saves Much Time in Waiting on Customers, and Nails are Handled More Economically than with Other Devices, Because, Being Near the Scale, All Over Weight is Thrown Back into the Bin, Which is Not the Case Where the Clerk Has to Walk Some Distance for This Purpose; It is Also a Fixture Which Will Ornament and Add Tone to the Store.

Each Section is Hung on Finely Adjusted Ball Bearings and Turns Easily, Whether Full or Empty; Each Section Works Independently of Every Other Section; the Upright is Steel Tubing; Bins are Annealed Sheet Steel, Perfectly Finished and Hand Riveted; **Scales are Not Included,** Unless Ordered Extra. All Sizes, 4 feet in Diameter.

Bins

This is one of the first stoves made in America

America's first stove was built in 1767

Before 1760 very little was known of stoves, for they were a luxury for the wealthy only. The open fireplace was all that was known prior to that time. Although many of the smaller buildings and huts were comfortably heated in this fashion, many of the larger buildings could never be heated to any degree of comfort during the cold winter months.

What is probably the oldest stove produced in this country was made in 1767, nine years before the Declaration of Independence, and is owned by a Michigan stove company, which has had it on exhibition in various parts of the country. It is an old-fashioned box-stove, of the "10-plate" variety (so-called because made up of ten pieces). It stands on legs or end supports, similar to those of a sewing machine, except that they are about half as high and of much heavier casting. The total weight of this stove is 500 pounds. It is 3 feet long, 32 inches high, and 18 inches wide. There is no grate in the bottom, the fire being built directly on the bottom of the stove. The heat passes from below the oven, back of it, and over the top of the pipe.

The outside has scrolls, designs and crowns in relief, much after the fashions of many stoves of to-day, and on both sides, cast with the metal, are the words, "Hereford Furnace, Thomas Mayburry, 1767."

Invites cars to park in front of his store

When many of the retailers in the business district of a California town began to put out little signs that read, "Do not park here," a wide-awake dealer made capital of the opportunity and put a sign before his store with an invitation to cars to park before the store. As long as he knew that they were not infringing on any city ordinances he knew that only a few could park there; but he knew that many would read the sign and say to themselves that he was "a pretty white chap after all." The reputation for hospitality and generosity could do him no harm and might do him considerable good.

Vote early—use the colored card enclosed

Reaches parents by selling to schools

A New England hardware merchant did not overlook the schools as a method of increasing his business. He went after the trade of the schools and institutions that made a practice of planting gardens in which the scholars or the inmates did the work. These schools and institutions needed more garden equipment every year, so the wise hardware merchant got after them early, solicited them for this business, and tied it up.

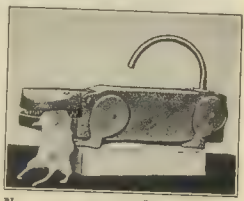
Worked through students

Also, where the schools instructed their pupils in the best methods of getting good garden results, it was quite natural that the students should talk so enthusiastically about gardens that their families wanted to have gardens of their own. The hardware dealer set out to get the names of all the students who did any gardening under the direction of the school supervisors, and then solicited the parents of these children to purchase garden equipment. He obtained the names of these pupils without much difficulty from the teachers and principals.

Of course, in soliciting the parents of the children he informed them that the store had sold to the school the equipment which was being used by the scholars. This information at once made the parents view the store and its proposition with considerable favor and helped in closing some sales, which otherwise might not have been made. In selling to the parents he emphasized the fact that the children were gaining in health by reason of their garden activities and that similar activities would be a splendid thing for the older folks. All this helped the store greatly in selling garden tools.

This rat-trap looks like a dachshund

A Mansfield, Ill., inventor has devised a trap for mice, which deserves mention for originality of structure if for nothing else. The mechanism consists of a wooden figure of a dog within which is a strong rat-trap. If the tail were changed, the mechanism would make a splendid alligator. Although the tail seems to serve only as an ornament, it is really the most important part of the trap. It must be moved down to set the trap. When the mouse touches the bait-plate, which takes the place of the dog's tongue, the upper part of the jaw comes down with a thud and the tail goes up. A strong spring operates it. The illustration shows how the trap "eats 'em alive."



No mouse can crawl out of this picturesque trap

NEW CARS AND MODELS

The Flint Six Introduced

ALTHOUGH the announcement that the Flint Six would soon be placed on the market was made some time ago by the Durant Motors, Inc., the first opportunity for the public to see this car was during show week in the Hotel Commodore, New York City. Three body types were announced and exhibited, the touring car at $1195, the coupe at $1895 and the sedan at $1985. These are mounted on a chassis of 120-in. wheelbase powered by an engine 3½ x 5 in., L-head type. The engine has 7 main bearings and the chassis incorporates one of the big features on the Durant Four, namely the Durant Tubular Backbone. The springs are long and underslung at the rear. The emergency brake is at the left and the gear shift lever in the center. The bodies are attractive and of sturdy construction. The car is built low and fenders are broad. Drum-type headlights and cowl lights, deep radiator and hood and the low permanent top on the open model enhance the appearance. Nickel trimming is used on the lamps, radiator and windshield supports. The permanent top is lined and side curtains open with the doors.

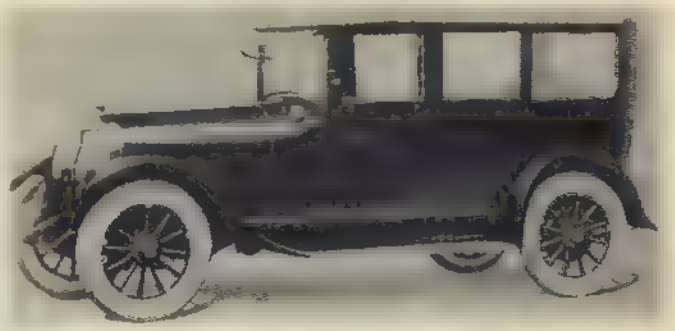
The sedan is finished in black above the molding line with the lower portion in blue. The upholstery is dark blue mohair and the windows are broad with molding in dark mahogany and equipped with blue silk curtains. The inside hardware is blue enamel and gold. There are arm and foot rests, floor heater, cowl ventilator, windshield wiper, etc., and other conveniences.

The 4-passenger coupe also has broad, low windows. It is finished with the upper portion of the body in black, and the lower in gray, and the interior body trim is Bedford cord cloth. This also has silk curtains and similar window trim to the sedan. The equipment includes clock, gasoline gage, windshield wiper, etc.

The cylinders of the Flint engine are cast in block and integral with the upper half of the crankcase. The cylinder head is detachable. Pistons have three rings above pin, and connecting rods are 10½ in. Lubrication is by force feed and splash, and cooling is by water pump mounted at the right of the engine, and a four blade V-belt-drive fan. Timing gear drive is by silent chain. The carburetor is Stromberg, mounted at the left, and the intake and exhaust manifolds are integral, forming a hot spot. The electrical system is Auto-Lite make. The clutch is a single dry plate and the gear set is a Warner, giving three speeds forward. The rear axle is semi-floating with spiral bevel gears, with a standard ratio of 4.7:1. Both brakes operate on 14-in. rear wheel drums. The springs are semi-elliptic, 36 x 2 and 54 x 2 in. In

Left: Flint Six Touring Model Which Lists at $1195 and is Finished in Military Tan With Black and White Stripes

Below: Flint Six Sedan Which Accommodates Five Passengers and is Finished With the Body Blue, and the Upper Portion Black Together With Black Running Gear.



addition to the Durant Tubular Backbone are two similar tubes, smaller in diameter and riveted to the first and second cross-members, which serve as a support for the engine and greatly increase the rigidity.

Chassis lubrication is by the Alemite system. Tires are straight side cords, 32 x 4½ in. Gasoline supply is carried at the rear in a 14-gal. tank and is fed to the carburetor by the Stewart vacuum system.

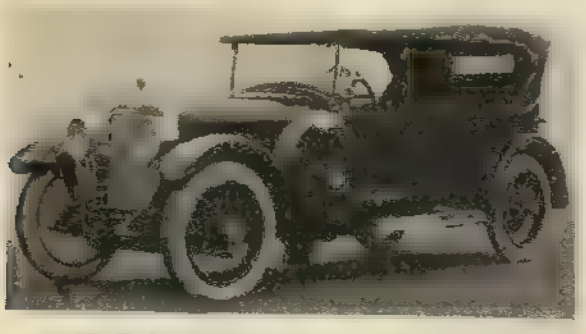
Six-Cylinder H. C. S. Line Announced

A NEW line of six-cylinder cars powered by a 3½ x 5 in. valve-in-head engine mounted on a wheelbase of 126 in. was introduced at the show by the H. C. S. Motor Car Co., of Indianapolis. In this new line is to be found the same type of workmanship and excellent finish that has characterized the Series IV, four-cylinder models. The bodies have a hardwood frame and heavy gage steel panels. Door frames are of one-piece malleable castings. The instrument board is solid walnut, polished and nickel trimmed, and hand buffed leather is used in the upholstery. The headlights are genuine nickel silver and the windshield has solid nickel alloy supports. The radiator is cellular type and has a shell pressed from nickel silver.

The car is powered by a newly developed six-cylinder engine which has a clean-cut appearance. It has developed 80 hp. at 2850 r.p.m. The cylinders are cast in block and the head is detachable. The rocker arms have brush type roller contact and are enclosed in an aluminum case. This engine is lubricated by the force-feed system throughout including the piston pins, rocker arms, and all bearings. The intake and exhaust manifolds are cast integral. The crankshaft has three bearings. Cooling is by force circulation of water and centrifugal pump driven from the generator shaft. The fan is aeroplane type two-blade, made of aluminum and driven by a V-belt.

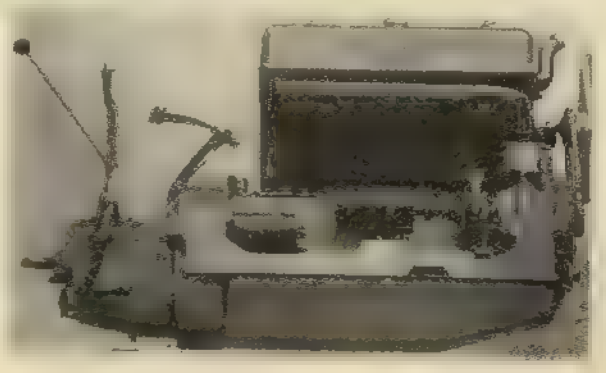
Ignition, starting and lighting are by the Delco system of special H. C. S. design. The spark control is automatic. The carburetor is a Stromberg 1½ in. Clutch is a disk, dry-plate type, and the transmission is a Brown-Lipe with three speeds forward and is enclosed in an aluminum case. The universal is larger and enclosed.

Connecting the transmission and the propeller shaft is an auxiliary shaft, which is stated to eliminate all possible misalignments of parts and to minimize road shocks. The rear axle is of H. C. S. design, ¾-floating, and has spiral bevel gears. The frame is channel section and has four strong cross-members. The spring hangers are drop-forgings and springs are semi-elliptic all around, the front 36 x 2½ in. and the rear 56 x 2½ in., with full



H. C. S. Series IV, Six

This is an illustration of the new 6-cylinder H. C. S., which was introduced at the New York Show. It is powered by an overhead valve engine and is attractively finished throughout and is of the same quality as the 4-cylinder cars.



Clean-Cut Appearance and Accessibly-Mounted Units Are Found in the Power Plant of the New H. C. S. Six

ASBESTOS SAD IRONS

No. 10 Tourist

Consists of No. 11 hood, No. 12 core and stand. One core with hood attached weighs 1⅜ lbs

No.	Core	Packed	Weight	Per Doz
10	1⅜x4¼ in.	1 doz.	18 lbs.	**$6.00**

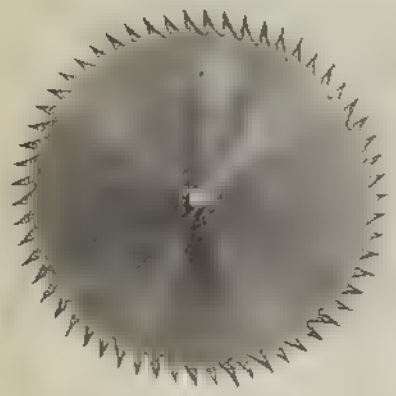
CIRCULAR CORDWOOD SAWS

ATKINS



SOLID TOOTH

Made of Special Analysis Steel, Particularly Adapted for Cordwood Sawing. Ground, Tempered and Polished.

Special Notice—Orders for Saws **Not of Standard Gauge or Hole,** as Described in List Below, or Irregular in Any Particular, will be Accepted **Only with the Distinct Understanding** that they are Subject to Delay in Making, **and are Not Subject to Cancellation** Under any Circumstances.

Using a Cold Chisel for Retoothing a Saw is Almost Certain to Crack the Plate, and Corners Filed Square in the Gullet of the Tooth will Frequently Produce the Same Result, Particularly in Frosty Weather; Our Warranty Does Not Cover Saws Breaking from Such Causes.

Warranty—Each Saw is Warranted Free from Flaws and Seams and as Nearly True as it is possible to Make it. If Found Defective in Above Particulars, it May be Returned (**Always Advise Us and Get Our Reply and Shipping Instructions Before Returning**), and if, on Examination, it is Found the Saw is at Fault, all Necessary Repairs will be Made or a New Saw Given in Exchange, Provided it is Returned Within 30 Days from Date of Shipment.

The Speed of Circular Saws is a Most Important Thing to Watch. If Speed is too High it Cannot do Good Work, as it Generates Heat, and the Centrifugal Force Causes it to Stretch and Become Limber and Not Cut Straight.

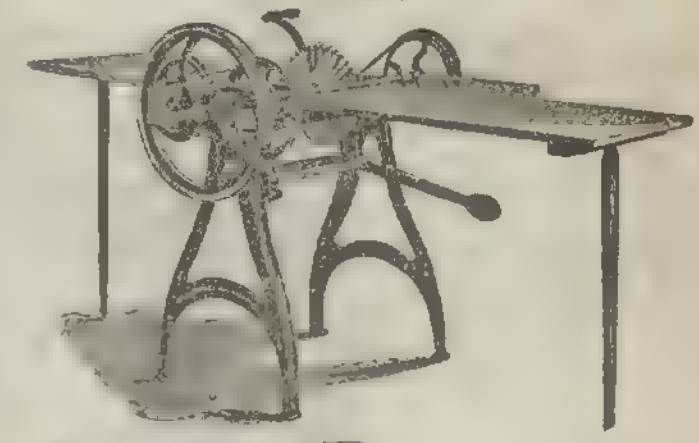
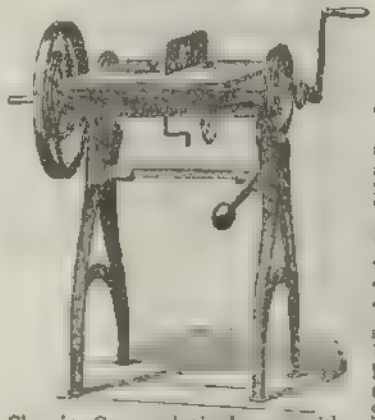
Circular Cordwood Saws Can Only be Furnished by Shipping Direct from Factory, F. O. B. Indianapolis, Ind.

CIRCULAR SAW MACHINES

BARNES





Showing Saw with Table Ready to be Placed Directly Over the Saw

Especially Adapted to Shops without Power. The Extension Shaft Permits the Use of Pulley when Desired; Painted Cast Iron Frame, Fly and Belt Wheels, Crank and Idler; Steel Axles and Shafts; Polished and Tempered Tool Steel Saws for Ripping Hard or Soft Wood of Any Thickness up to 3¾ inches and Any Width to 19 inches; Fitted with Two Self Adjusting Feed Rollers. The Table is Provided with Adjustable Gauge and Can be Lowered or Raised to Govern Depth of Cut, and by Using Two Saws Side by Side Grooving for Windows or Door Stops can be Done.

HAND POWER — Each

✣No. 20—With Two 10 in. Circular Saws, Rip Lumber up to 3¾ inches Thick, Diameter of Fly Wheel 18 inches, Height of Top of Table 25 inches, Height Over All 43 inches, Width of Tables 18½ and Width Over All 31 inches; Length Over All Including Tables 79 inches; Net Weight Complete 240 lbs.; Weight Crated 260 lbs. ... **$210.00**

Painted Cast Iron Frame, Gear and Table; Top of Table Planed Smooth; Patented Leather Belt from Drive Wheel to Mandrel Pulley. Running Over a Spur or Pin Pulley, Secures Great Speed and Power. Used for Rip or Cross Cut Sawing, Rabbeting and Grooving. The Self Feed Can be Regulated for Hard or Soft, Thick or Thin Lumber and is Self Adjusting for Different or Uneven Thickness up to 3½ inches. The Cut Off Gauge Can be Set at Any Angle. The Speed of Saw Can be Readily Changed. The Table can be Adjusted to Regulate the Depth of Grooves and Rabbets.

HAND AND FOOT POWER — Each

✣No. 4H—With Two Saws, One Rip and One Cross Cut, Height Over All 36 inches; Size of Top 30x30 inches; Length Over All Including the Front and Back Boards of Drop Extension Tables 90 inches; Floor Space Required 36x34 inches, Net Weight 450 lbs. Weight Crated in Crate, 500 lbs. ... **$370 00**

STEAM POWER

✣No. 4P—With Countershaft and Belt Pulley for Steam Power, Inside of Frame, Pulley 14x2 inches, Speed of Saw 200 Revolutions per Minute ... **370 00**

All Saws Filed and Set Ready for Use. Sizes 6 to 10 inches Wrapped in Paper; Larger Sizes Shipped on Boards.

NOTE: Saws 40 inches and Over are Filed and Set Ready for Use. **No Extra Charge for Saws One Gauge Thicker than Listed;** Saws 38 inches and Under Beveled One Gauge Without Extra Charge; Saws 40 inches and Over, Beveled Two Gauges Without Extra Charge; Saws 48 inches and Larger made Thinner than 10 Gauge, are Not Warranted, and 10% is Added for Each Gauge Thinner than 10 Gauge.

The Speed of a Circular Saw is a Most Important Thing to Watch. If Speed is too High it Cannot do Good Work, It Generates Heat and the Centrifugal Force Causes it to Stretch and Become Limber and Not Cut Straight.

Items Marked † Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory

CROSS CUT SAWS

E. C. ATKINS & CO.

Made of High Grade Crucible Steel, Evenly Tempered, Carefully Ground, Sharpened and Set; Polished and Etched; Segment Grinding Consists in Grinding Away the Central Portion of the Plate, Extending from the Back to Within about Two Inches of the Cutting Edge, Leaving the Saw Strong at the Ends and Allowing for Wear on the Tooth Side Without Making the Saw Thinner in the Center than at the Ends.

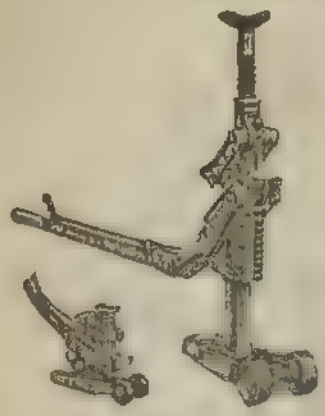
AUTOMOBILE JACKS

EXCEL



The Excel Jack is Made to Stand up Under the Continuous Hard Knocks of the Garage and Service Station, and to Meet the Demands for a Powerful, Substantially Built, Quick-Acting Device Capable of Doing Heavy Work Mechanically and Well. The Method Used in the Excel Jack, Relief [illegible] Jacks which are to Meet [illegible] Eye to Space [illegible] Lifting Jacks in which [illegible] Except for Large [illegible] Is the Way [illegible] Most [illegible] Handling of Heavy Work [illegible] Jack Can Even Be a [illegible] gn Time, Labor and [illegible] age of Small Jacks.

Made of High Grade, Semi-steel Castings—Drop Forgings where Necessary—with All Working Parts Case Hardened, it Will Last for Years Under the Most Severe Conditions.

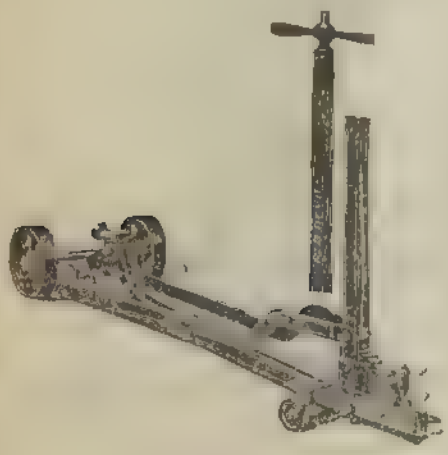
Length of Lifting Handle 50 inches, Wide Heavy Base; Fitted with Rollers for Easy Handling. One Downward Motion of the Handle Raises the Car Instantly; Can Be Adjusted to any Part of Frame or Chassis; Capacity for Cars Weighing up to 8000 lbs.

Each

No. EXCEL Weight 48 lbs $50.00

One in a Box

RED DEVIL



Crucible Steel Construction. Very Simple and Easy to Operate. No Stooping Required to Lift the Heaviest Car.

Required in Every Garage. Any Car can be Turned within its Own Length in a very Few Minutes.

Each

No. RD—Length of Handle, 4 feet 3 inches; Diameter of Wheels, 8¼ inches. Size of Base, 18x52 inches; Height Raised, 17 inches; Height Lowered, 8¼ inches; Weight Each, 120 lbs.... $66.00

One in a Bundle

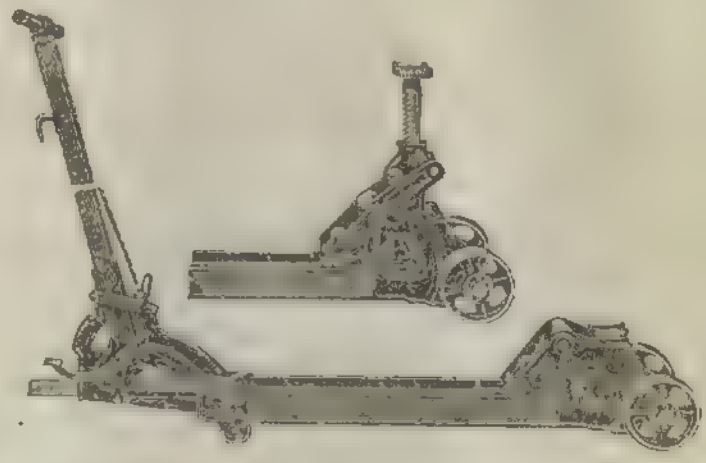
AUTOMOBILE JACKS

WALKER ROLL-A-CAR JACK

Indispensable for Modern Crowded Garages; All Parts Made of Highest Grade Materials [illegible] Steel Wheels, Raising Large Wheels off Floor, Allowing It to be Steered in any Direction.

Raising and Lowering Jack or Locking Handle is all Controlled by Small Lever at Top of Handle. A Foot Pedal is Provided to Quickly Raise the Rack Bar to Proper Height; Same Pedal Drops Rack After Jack is Removed.

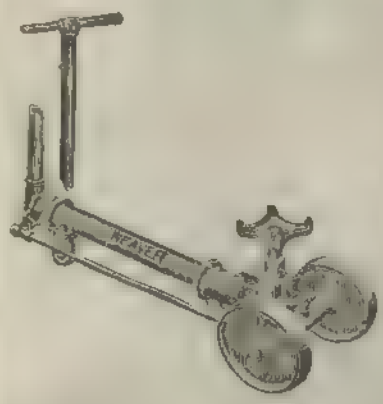
After Car is Raised the Handle Can be Placed in Upright Position without Lowering the Car.



Each

No. W725—Capacity 7500 Lbs.; Length 50 inches; Lowest Height 5 inches; Height Raised 18 inches; Weight 120 lbs $80.00

Loose



WEAVER

For Quick Action in Lifting or Moving Cars or Trucks in the Garage, Show Room, Service Station, Tire Shop, [illegible] Strong Compact Foot Operated, Quick Action Lifting and Lowering Jack.

The Short Construction of this Jack is One of its Greatest Advantages. The Length of the Frame and Wheels Over-all is only Forty inches, and this Enables it to be Easily and Conveniently Manipulated in Cramped Quarters.

Wheels Pivot and are Guided and Controlled by Handle; Enormous Leverage, Which makes it Possible for One man to Lift Five ThousandPounds with Perfect Ease. Equipped with a very Secure and Safe Ratchet Lift, with Ample Range So that any Car can be Lifted Sufficiently High in One or Two Strokes of the Handle.

The Lifting Standard is Composed of Two Sections, One Telescoping within the Other. Giving Extremely High Range of Lift, the Maximum Height Being Nineteen inches, While the Minimum is Only Nine Inches. A Release Latch on the Handle Provides for Lowering the Standard Quickly to the Minimum Height.

The Handle is So Designed, that the Weight of the Load will not Throw the Handle Violently against the Car.

Light Tension Balance Spring Draws the Handle into a Perpendicular Position When Released, Holding Handle Properly Parallel to the Floor, Although the Handle is Free and Can be Held in Any Desired Position when the Load is not being Lifted or Lowered.

Extremely Heavy and Well Constructed. The Lifting Mechanism is of High Grade Hardened Steel. Wheels are Mounted on Roller Bearings and the Front Caster Equipped with a Full set of Ball Bearings.

Each

No. WNW—Capacity 5,000 Lbs.; Weight 100 lbs..... $85.00

One in a Box

AUTOMOBILE JACKS

REES

These Double Worm Gear Drive Jacks Mark a Significant Advance in Jack Design. Authorities and Engineers Agree that this Method of Power Application is Most Efficient. Reduced to its Simplest Terms there are Only Four Moving Parts, Which are All Strong and of Rugged Proportion. This Making it a Powerful, Speedy and Safe Jack.

AUTO-SKI-SLEDS

This is a snow vehicle destined to reach the same popularity in America as it has attained in Europe where the demand is immense.

No directions are needed in learning to use the Ski-Sled, as it is easy to master; similar to the act of walking. With the hands resting on the handle-bars and standing on the foot-rest, the kick-off is made from the ground with either foot.

The long runners cause the load and pressure to be even distributed, and gives but a slight momentum, fifteen to twenty miles per hour can easily be covered, and this carrying a passenger as well.

The steel runners are especially designed, in connection with the body-structure, so that the steering handle of the Ski-Sled is an outstanding feature. Upon pressure being exerted on either handle side the rider secures instantaneous response, as the Ski-Sled is entirely guided by slight pressure on the handles.

Over thin or thick snow and on ice, the Ski Sled travels and glides with equal ease whether coasting down hill or on the level, and the Ski-Sled is ready to go where ever desired and always under full control.

The body construction is of strong birch and the mechanism permits the folding together of the entire Ski-Sled, by the simple removal of 4 small nuts and can be carried under the arm.

No. F100—Length 72 in., Width 20½ in., Height 29 in., Wt. each 16 lbs.,★.....Each $10.00

★All Items Marked Thus, ★, Are Shipped From Factory Only.

IRON BENCH PLANES

BAILEY ADJUSTABLE

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog.

It is also adjustablesidewise by lever located near the top and at the back of cutter.

The width of the mouth may be regulated and made wider or narrower as coarse or fine work may require. First remove the lever and cutter and loosen the two frog screws that fasten the frogs to the seat. With a screw driver turn the center adjusting screw (see cut) to the right to close the mouth and to the left to open it. When the frog is in the position desired lighten the frog screws and replace the cutter and lever.

SMOOTH

No. GB21—Length 24 inches; Width Iron 2⅝ inches; Weight Each 6¾ lbs.	10.00

One in a Cardboard Box

A Smooth Plane is for finishing or smoothing off flat surfaces. Where the uneven spots are of slight area, its short length will permit it to locate these irregularities, leaving the work with a smooth surface when finished.

A Jack Plane is used to true up the edges of a board in the rough and prepare it for the Fore or Jointer.

A Fore Plane is simply a short Jointer, and being lighter, is preferred by some workmen to the longer plane.

A Jointer is a finishing Plane for large surfaces and is invariably used to true up the edges of boards so that they can be closely fitted or joined together.

WOOD BENCH PLANES

BAILEY
ADJUSTABLE

The Frog is Held in Place by Two Machine Screws which Pass Through the Top Iron and Screw into Two Brass Lugs. These Lugs are Screwed and Securely Pinned into the Wood Bottom. This is Far Superior to Other Methods of Fastening, as it Holds Together Firmly the Wood Bottom, the Toe Iron which Strengthens the Wood Bottom, and the Frog.

SMOOTH

The Bottom, Handle and Knob are Made from Selected and Well Seasoned Beech. The Cutters are the Regular "Bailey" Type and are Adjustable Both Endwise and Sidewise.

DOUBLE END, ADJUSTABLE

Rosewood Knob; Japanned Trimmings; Combination Block and Bull Nose Plane. It has Two Slots and a Movable Cutter Seat. Use Center Cutter Seat and Slot for Ordinary Block Plane Work. For Use as a Bull Nose Plane Remove the Cap and Cutter, Reverse the Cutter Seat by Adjusting Screw, Which Leaves Two Parallel Lines in Cut, Replace the Cap and Cutter in the New Position. Has the "Hand-y" Feature, and the Cutter is Adjustable Endwise.

Each

No. 131—Length 8 inches; 1⅝ inch Cutter; Weight 1½ lbs. **$4 00**
One in a Box

NON-ADJUSTABLE

For All Kinds of Ordinary Work Requiring the Use of a Block Plane These are Excellent Tools. The Cutters in all Numbers are of a High Grade Steel, and are as Carefully Tempered and Ground as are Those in the More Expensive Planes of this Class. This is a Very Handy Little Plane for Household Use and Many Mechanics Carry One in their Kits for Odds and Ends of Light Work. The Boss on the Front Acts as a Finger Rest. **The Bottom is Ground and the Sides Japanned.**

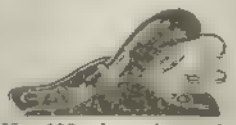
Each

No. 101—Length 3 inches; 1 inch Cutter; Weight ¾ lbs. **$0 65**
Six in a Package

With Iron Handle, Ground Bottom. Japanned sides. The Iron Handle Fits Nicely in the Palm of the Hand and Insures a Firm Grip.

Each

No. 100—Length 3½ inches; 1 inch Cutter; Weight ¾ lb. **$0 80**
One in a Package



Ground Bottom; Japanned Sides. Boss on Front Acts as a Finger Rest. This is a Light and Serviceable Plane for General All Around Work.

Each

No. 102—Length 6 inches; 1⅝ inch Cutter; Weight 1 lb. **$1 20**
One in a Package

Black Stained Applewood Knob. Both the Bottoms and Sides are Ground; Japanned Trimmings. The Most Popular of All Non-Adjustable Block Planes.

Each

No. 110—Length 7½ inches; 1⅝ inch Cutter; Weight 1½ lbs. **$1.70**
One in a Package

CIRCULAR SAW MACHINES

BARNES

COMBINED MACHINE

For Carpenters, Cabinet Makers and Wood Workers; Painted Cast Iron Frame, Gear and Table for Light Ripping, Cutting to Length, Cut Off Work, etc.; the Circular Saw while Remaining on its Mandrel Can be at Once Taken Out of the Way when the Scroll Saw is to be Used. WOOD SAWING MACHINES

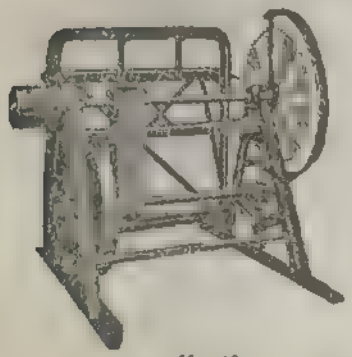
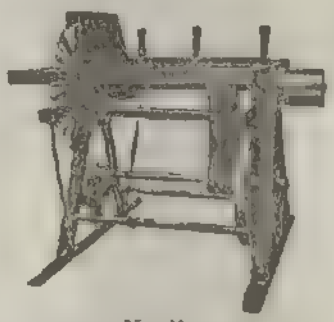
CHALLENGE



No. 40



No. 41

Two Styles of Machines are Illustrated Herewith, One with Tilting and the Other a Sliding Table, both Made of Steel, Very Rigid in Construction, with Fly Wheel Underneath on an Independent Shaft Out of the Way, so that Poles and Long Sticks can be Cut to the Best Advantage. Fly Wheel Shaft is Arranged With Adjustable Cranks to Take up Slack in the Belt. The Fly Wheel Being Located Within the Frame Near the Base, not Only Gets it Out of the Way but Tends to Steady the Whole Frame and Overcomes Top-heavy Vibrations.

Speed 1,000 to 1,600 Revolutions per Minute.

Each

†No. 40—Tilting Table Saw; without Blade; takes Blade 20 to 30 Inches in Diameter; Weight Each 360 lbs.....$64 00

†No. 41—Sliding Table Saw; without Blade; takes Blade 20 to 30 Inches in Diameter; Weight Each 420 lbs..... 68 00

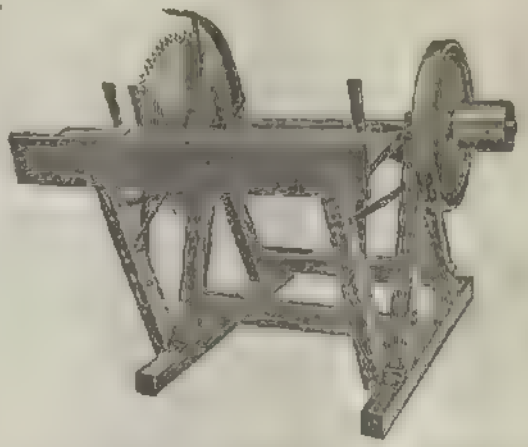
WOOD SAWING MACHINES

CHALLENGE



This Frame is Constructed of Thoroughly Seasoned Lumber of the Proper Size to Withstand any Strain that can be Placed on it in Sawing Wood and is Securely Bolted and Braced in Every Direction.

The Shaft is Cold Rolled Steel and the Bearings are Cast on a Solid Iron Beam Extending the Entire Length of Frame, which Holds them in Perfect Alignment with the Shaft at all Times. Over the Blade we Place a Substantial Shield to Protect the Operator Against all Possibility of Being Injured.

The Table is one of the Swing Type, Pivoted at Bottom on a Cast Bearing.

We can also Furnish this Frame with 4 foot Extension Table for Long Pole Sawing and when Wanted Fitted in this Manner Order No. 45.

Can be Used with Saws from 20 inches to 30 inches in Diameter. Pulley 6x8; Speed 1,000 to 1,600 Revolutions per Minute.

Each

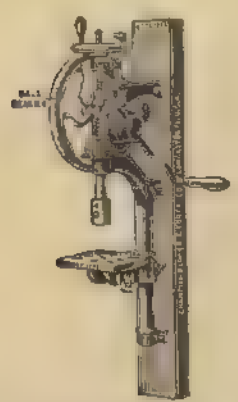
POST DRILLS

This drill has points of simplicity never found on a drill before at this price.

No. W97—Champion automatic self-feed and propeller wheel hand feed and quick return, two speeds, quick acting, end thrust ball bearings ground from solid metal, drills to center of 16½ in. circle and holes from 0 to 1¼ in., lathe turned slotted table, 1¼ in. spindle, 5½ in. up-and-down run, spindle takes ½ in. straight shank bits, w't 175 lbs., each $43 00

No. F97½—With tight and loose pulleys, 6 in. diam., 2 in. face for power, speed 250 R. P. M., w't each 180 lbs.★ .....each $49.10



No. W91—Champion, two speed ball bearing, full automatic self-feed, blacksmith's, with end thrust ball bearing cups and cones of tool steel, drills to center of a 14½ in. circle, bores holes up to 1 in., 1½ in. spindle up-and-down run of 3 in., spindle bored like "Never-Slip" chuck to take in ½ in. straight shank drill bits, slotted lathe turned table, w't 110 lbs. .....each $21.50

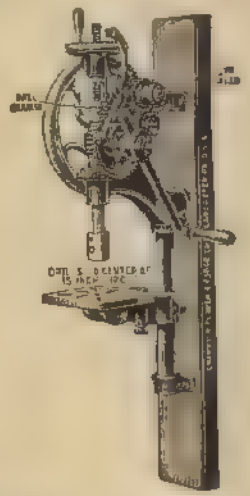
CHAMPION ball bearing, self-feed blacksmiths', made of best material bearings ground from solid metal, steel spindle bored like "Never - Slip" chuck, 3 in. up-and-down run, single speed, with back gear slotted lathe-turned table.

No. W101—⅞ in. spindle drills to center of 12 in. circle, holes from 1/64 to ¾ in., for ½ in. straight shank drills, greatest distance from table to spindle 8½ in., w't each 80 lbs., each $17.00

1 in. spindle drills, to center of 14 in. circle, holes from 1/64 to 1 in., greatest distance from table to spindle 10 in., w't each 100 lbs.

No. W98—For ½ in. straight shank drills .....each $20.20

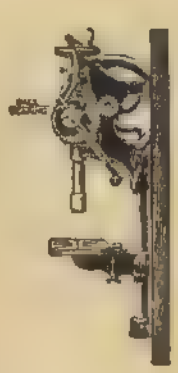
No. W198—For 41-64 in. straight shank drills .....each $20.20



This drill has a third gear to give the second speed the same turning direction of the crank as the first speed, and full back gears with two speeds to the crank.

No. W195—Champion, ball-bearing full automatic self-feed, blacksmiths', with cups and cones of tool steel, drills to center of a 15 in. circle, drills holes up to 1½ in., 1½ in. spindle, up-and-down run of 3½ in., spindle bored like "Never-Slip" chuck to take in ½ in. straight shank drill bits, slotted lathe turned table, greatest distance from table to spindle 10 in., w't 120 lbs., each $29.80

Drill Bits Not Included With Drills.

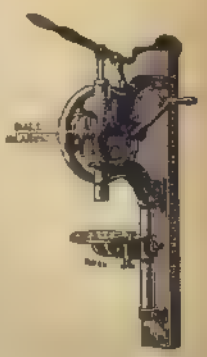


No. W93½—Champion, self feed, blacksmiths', made of best material, bearings ground out of solid metal, 1½ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 8 in. up-and-down run, drills to center of 15 in. circle, holes from 1/64 to 1¾ in., 2 speeds, full back gear, w't 115 lbs., each $26.60

No. F94—With tight and loose pulleys, 6 in. in diam., 2 in. face for power, speed 250 R. P. M., w't 120 lbs.★ .....each $36.70

This tool is designed for light and quick work, where tire drilling and counter-sinking is an object.

Our stock on above drills have spindles bored to take ½ in. straight shank drill bits. If specially ordered from factory, will be bored to take 41/64 in.



No. W100—Champion, lever feed blacksmiths', made of best material, bearings ground out of solid metal, steel spindle bored like "Never- Slip" chuck for ½ in. straight shank drills, 4½ in. up-and-down run, drills to center of 14 in. circle, holes up to ¾ in., with back gear, slotted lathe turned table, w't 110 lbs., each $22.80

BALL-BEARING POST DRILL

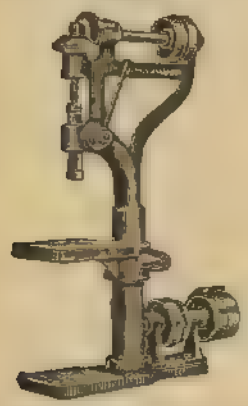
CHAMPION, ball bearing, hand feed, made of best material, bearings ground out of solid metal, ⅞ in. steel spindle bored like "Never-slip" chuck, 8 in. up-and-down run, drills to center of 12 in. circle, holes from 1/64 to ½ in., slotted lathe turned table, greatest distance from table to spindle 8 in., w't 50 lbs.

No. W92—For ½ **in.** straight shank drills . . . . . each $12 00

No. W92—For 41-64 **in.** straight shank drills . . . . . each $12 00

ONE IN A CRATE

CHAMPION POWER BENCH DRILL



The Champion No. 0 Power Bench Drill represents a powerful and well-built Power Bench Drill with every detail for completeness in design and workmanship taken into consideration. The top of the drill base is planed off to use as a table when the regular drill table is turned to one side, thus giving a space of 16 in. between the spindle and base-table. The upper cone pulley is between two bearings, thus equalizing the strain. Countershaft is supplied with belt shift on tight and loose pulley and feed lever is manipulated with spring arrangement to at all times automatically keep lever and bit up and out of work.

No. F0—Drills to center of a 9 in. circle. Bores holes up to 5/16 in. in diam. Up-and-down run of spindle 3½ in., up-and-down run of table 9 in., greatest distance from table to spindle 10 in., greatest distance from planed base to spindle 16 in., size tight and loose pulleys 4x1½ in., size of large cone pulley 4½x1½ in., size of small cone pulley 3x1½ in., spindle is bored with No. 1 morse taper hole, height 32 in., w't 115 lbs., each★ $50.70

ONE IN A CRATE

BALL-BEARING BENCH DRILLS

Particularly adapted for light automobile or bicycle repair work.

Strong and well built, for light accurate and rapid drilling. Driven exclusively by belt and with the aid of cone pulleys two separate speeds can be had. Countershaft has belt shifter on the tight and loose pulley and feed lever can be returned without affecting position of belt by a patent device in feed lever hub. The best possible drill and one guaranteed in every respect.

No. F50—Champion, sensitive bench drill, with Champion chuck, double flange top cone, table swings 180° horizontally, end thrust ball bearing, adjustable spindle stop, spindle has 2½ in. up-and-down run, table has 7 in. up-and-down run, diam. of table 8 in., drills to center of 10 in. circle, drilling capacity ½ in., size of tight and loose pulley 4x1½ in., height 27½ in., speed of driving pulley 550 R. P. M., w't 90 lbs., each★ $45 60

NEW PATENT TIRE BENDER

NEW PATENT TIRE BENDER

Its adjusting roll has an adjusting screw at each end, with a graduated indicator and double back gear, and worked with two cranks and two speeds, one for light and fast work and the second for heavy work. The center roll pulls out to take the tire cut.

No. F2—Champion, will bend any size up to 3x¾ in., w't 120 lbs., each★ $31.70

ONE IN A CRATE

CHUCKS

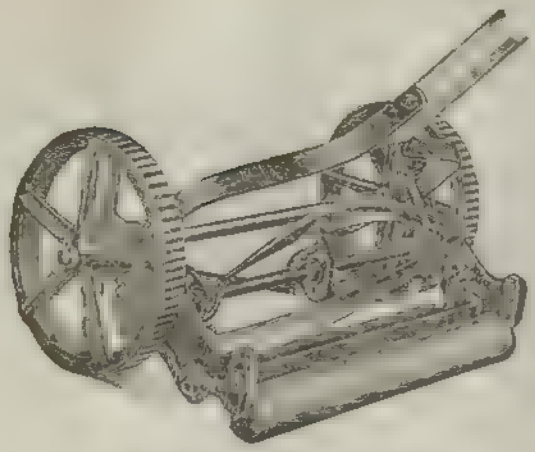
Extra Parts for Lawn Mowers Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory

Use Diamond Oil and *Diamond Edge* Lawn Mower Paste

LAWN MOWERS

★RED CLIPPER

PLAIN BEARING



Bed Plate Adjustment

This Mower is a Popular Design of the New Open Type Construction. Very Light and Easy Running, Yet Built with Refined Castings That are Thoroughly Strengthened. Holes are Drilled Through the Center of the Side Plates, by Two Operations to Insure Exact Dimensions, Through which a Piece of Accurately Rolled Steel Shafting Passes, Forming a Shrub Guard and an Axle for the Drive Wheels, Enabling them to Turn on Steel Bearings. The Fit Between the Shafting and Side Plate Holes is so Perfect that there is Absolutely no Play and with a Set Screw Passing Through a Lug on Each Side Plate and Fastening into Recesses in the Shafting, Makes a Strong and Immovable Frame Construction. These Recesses in the Shafting are Accurately Placed, so that the Side Plates will be at Right Angles with the Cutter Bar, Making a True "Four-squared" Frame. The Drive Wheels are Held in Place by a Malleable Lock Washer and Spring Cotter.

Adjustable Malleable Iron Roller Brackets. Reel Braces are of Malleable Iron Securely Riveted to the Cutting Blades and Steel Shaft, which Passes Entirely Through the Reel, Producing the Strongest and Most Rigid Reel that is Possible to Build. The Reel is Equipped with Adjustable Brass Bearings and Device for Taking Up all Wear.

Screw Adjustments Throughout. A Positive and Durable Ratchet Geared on Each Side. Good Quality of Materials and Workmanship, Fully Guaranteed. Far Better Quality and Value for the Money is Offered in this Machine than in any other Lawn Mower Made.

REPUTATION IN ADVERTISING

The manufacturer who advertises in the Transcript knows that his product gains thereby increased reputation. The Boston *Transcript* is a national institution. Its appeal knows no boundaries or circulation limit. That is why its columns are sought and appreciated by the leaders of industry to sell and market their commodities.

The *Transcript's* gain in National advertising for 1922 was greater than any other Boston paper. Its total of advertising was also larger than any other evening paper and was exceeded by but one morning and evening combination.

Boston Evening Transcript

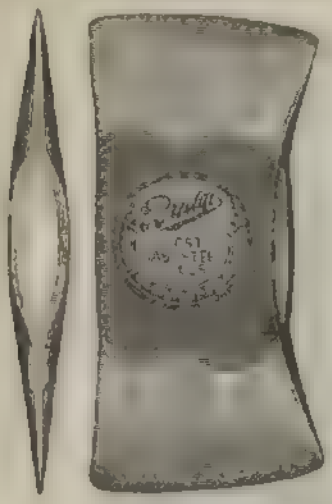
DOUBLE BIT AXES

* BRIDGE



Extra Quality **Crucible Steel** Bit, Carefully Tempered, Ground and Sharpened, Ready for Use, Soft Steel Body. The Eye is Punched from Solid Steel and will not Split or Break as Occurs with Wire Handling a Rolled or Welded Eye. **The Eye is Tapered from the Outer to the Inner Opening;** this Holds the Handle Firmly and Prevents its Splitting.

A First Class Axe in Every Respect, and we Recommend it Most Satisfactory for all Purposes.

IRON BENCH PLANES

STANLEY

"BED ROCK" ADJUSTABLE

The cutter frog and bottom are so designed, machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration. Particular attention is called to the shape of the side. This new and distinctive feature adds greatly to the strength of the plane as well as affording large bearing surfaces when the plane is used on its sides.

The frog may now be adjusted either forward or backward without removing the lever and cutter, simply slacken the tension of the two frog clamping screws "B," and with a screw driver adjust the frog as desired by means of the frog adjusting screw "C" in the center, and then tighten the frog clamping screws.

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog. It is also adjustable sidewise by lever located near the top and at the back of the cutter.

This is

The BROWNEE Fruit Press

It sells like Movie Tickets, Saturday Nights

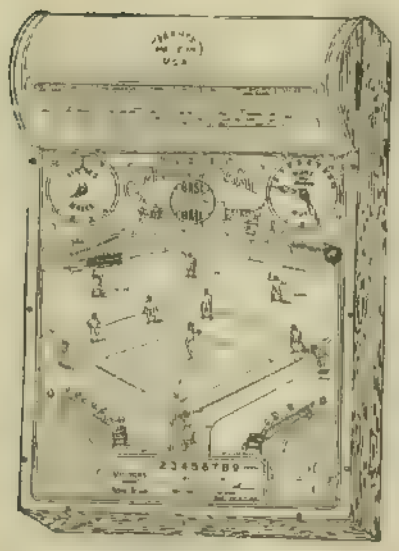
The Brownee is a success. It sells—and sells big in city and country. Last year we sold in Pennsylvania alone 8,000. The Brownee is something that people want. They buy it as soon as they know about it.

At five dollars retail (East of the Mississippi), it is a good buy for householders, because it is so staunchly made and so free from the objections of old-fashioned fruit presses. It's made from solid oak and aluminum. There's not a part that can rust. Fruit acids can't harm the Brownee. It hasn't a bit of paint on it.

The Brownee is made in only one size—eight-quart capacity. It is meant for home use. Anyone can use it. Don't you want some Brownee profits? Sold only through jobbers. If yours hasn't the Brownee, send us his name and address.

M. J. BROWN MFG. COMPANY
2671 Salmon St. Philadelphia, Pa.

BASE BALL GAME



Every play known to the "National Pastime" instantly recorded on revolving drum. By pressing on the push button the wheel is started to spin revealing the plays opposite the space, which shows condition on bases.

The plays that can be made on this board have been complied from the actual plays in the world games of a number of seasons.

Fans are enthusiastic about the game as it fills in the long gaps between regular games. It makes fans of the ladies and children who have never seen a game as it teaches them how the actual games are played. It is not only a fine thing for homes but for club rooms; news stands, recreation centers; Y. M. C. A'S, wherever a bunch of youths or men gather.

This is a product of quality and will last for years. It is not alone a holiday game but an all around seller. Finished in handsomely lithograph diamond in four colors.

No. 100—Size of board 9x13½ in.,
per dozen $30.00

EACH GAME IS PACKED IN A SEPARATE CARTON, SHIPPING WEIGHT TWO POUNDS. ONE DOZEN CARTONS IN A BOX

The Child's Dream Come True

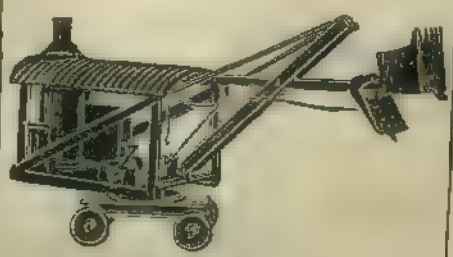
BUDDY "L" TOYS

Realistic and sturdy playthings of true educational value, **all steel construction throughout,** spot welded and riveted at every point and given two coats of baked-on automobile enamel finish in colors.

No. 200—"Buddy L" Express Body Truck; length 23¾ in., height 9¼ in. wheels 4¼ in. diameter; an exact minature of a standard truck, and steers exactly like one, with real steering knuckles and column, pressed steel farme, braced, riveted and finished in baked-on red enamel, 16 to 22 gauge sheet steel body, hood, fenders and running boards, all spot welded throughout and finished in baked-on glossy black automobile finish, wheels of solid aluminum, giving the appearance of real rubber tires the year round, weight but 9 lbs., yet will stand the weight of a man, equipped with hemp water proof non-curing pulling cord,

each $7.80

ONE IN A BOX



No. 220—"Buddy L" Steam Shovel; length overall 25¾ in., height 13 in., same all steel construction and finish throughout as all other "Buddy L" playthings, swings clear around, scoops, elevates, unloads and does just the same kind of work as the "big ones", w't 8 lbs.,

each $7.20

ONE IN A BOX

THE RONSON REPEATER

It FLASHES like a Real Gun in Action

The Safe Toy Pistol That Every Boy Wants

Strong and durable; made of steel; gun metal finish. Does not use caps or powder— absolutely harmless— complies with the laws of all states. It comes loaded ready for 5,000 shots. Any boy or girl can reload it in a jiffy.

At the pull of the trigger there is a bright flash and a cloud of smoke from a small steel wheel that automaticaly revolves against the Ronson Reload inside the gun. It's the most realistic toy pistol ever produced.

A strong, bright flash shoots out several inches beyond the muzzle of the gun—yet this flash is absolutely harmless since the sparks carry no heat and cannot possibly burn.

No. 35—W't per doz. 2½ lbs.,
per dozen $4.00

ONE IN A BOX TWELVE IN A OUTER DISPLAY CARTON WITH ADVERTISING MATTER

RONSON REDSKIN RELOAD

Nothing but Ronson Redskin Reloads will make the FLASH in the Ronson Repeater. Be sure you get the genuine.

EXHAUST HORNS

AERMORE

Can be attached to the exhaust pipe of any car between the engine and the muffler by means of a valve operated by the foot pedal. Constructed of brass and steel nickel plated; does not become clogged; no moving parts to get out of order. Each horn complete with pedal, cable, pulley, elbow and valve.

Guarantee—Every Aermore is tested before shipped. Its tone, material and workmanship are guaranteed. If, for any reason, the horn does not work satisfactorily, return to factory and we will correct the fault, free of charge

17-inch Aermore outfit complete. This horn is especially designed for large cars, trucks and tractors, gives a deep rich chord.

No.	Wt. each	Each
0	4½ lbs	$18.40

EXTRA VALVES FOR AERMORE HORNS

STYLE G

For attachment between engine and muffler, by cutting a section of exhaust pipe and inserting valve. Recommended as best position to install, where possible. Sizes, 1¼, 1⅝, 1½, 1⅝, 1¾, 1⅞, 2, 2¼, 2⅜ and 2½ inches.

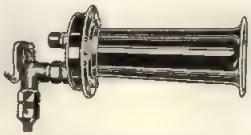
Style	Wt. each	Each
G	2¼ lbs	$2 80

One in a carton.

AUTO HORN

BUELL TURBO

FOR ALL PASSENGER CARS AND MOTOR TRUCKS



A distinctive new type of warning signal, utilizing the explosion pressure through priming cup opening in cylinder head, using the same valve mechanism which has proven so successful in the Buell Explosion Whistles.

The high pressure gas of the explosion is used to operate a small turbine which carries a cam engaging a diaphragm, as used in the motor driven electric horn. In other words, it takes its mechanical power direct from the explosion of the cylinder, instead of the devious circuit through engine, generator, battery and electric motor, each with its considerable loss of efficiency in transmission of power.

There is but one moving part in the Buell Horn, making it a signal with the maximum certainty of operation.

Comes complete with valve, steering wheel lever and enclosed wire control.

Size over all	Pipe thread	Wt each	Each
4¼x7 in.	⅛ in.	2¼ lbs	$10 50

One in a carton.

GRADOMETERS

FRENCH

Consists of a curved glass tube filled with spirits, and small steel ball, leaving a small bubble, as in a spirit level tube. The ball being very sensitive, enables one to ascertain the grade almost instantly. Nickel finish

	Wt each	Each
French Gradometer	2 ozs.	$2.30

One in a carton

AMERICAN

This is similar to the French make, but does not contain steel ball. The American is considered the most accurate type of grade meter made. It is very sensitive and gives quick accurate reading; Made of highly polished nickel plated brass and is an ornament to the car.

	Wt. each	Each
American Gradometer	2 ozs.	$3 20

One in a carton.

POST DRILLS

BUFFALO

Automatic Feed is Adjustable to Four Speed; Spindle Has Two Speeds. Machine Cut Gear; Capstan Four Arm Lever Hand Feed; "Sure Grip" Chuck Locking or Releasing Drill with a Half Turn of Chuck.

Multi-Compound Lever Feed; a 1 inch Hole can be Drilled with this Lever. This Feature is obtained by the Strong and Simple Rack on Feed Head, Operated by the Four-Arm Lever. By Maintaining a Light Pressure on the Latter, the Drill is Forced Through the Metal with Maximum Speed, Resulting in a Great Saving of Time.

Sliding Collars: One Sliding Collar is Arranged at Feed Head for Changing from Lever to Automatic Feed or Back. The Other is at Lower End of Fly Wheel Shaft for Change from Slow to Fast Speed or Back. The Collar Will Slide Regardless of Position of Key, and Seat Itself Automatically.

The Planetary Gears on the Automatic Feed are the Most Modern Reduction Gearing Known, Stronger and Simpler Than the Customary Worm or Screw.

Wheel Guard and Gear Guard Included with Each Drill.

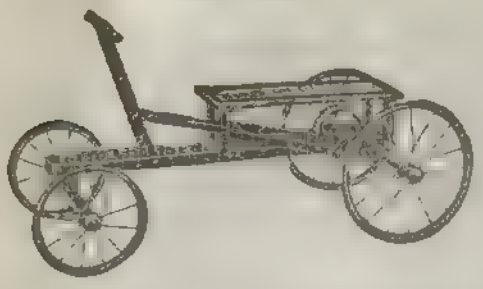
HAND CARS

★NORLEIGH DIAMOND



In Our Norleigh Diamond Hand Cars We Have Embodied All Essential Features in An Article of This Nature—Strength, Light Weight, Minimum Number of Parts and Ease in Running.

It is Constructed Entirely of Wrought Steel and Malleable Castings Except the Seat Board, Which is of Hard Wood, Firmly Bolted to the Frame.

All Parts are Either Bolted or Assembled With Cotter Pins, So That the Car May be Easily Set Up or Knocked Down for Transportation.

While the Gearing is of a High Ratio to Insure Speed, a Minimum Amount of Power is Required to Operate Owing to the Ingenious System of Levers, the Driving Rod Being Connected Low Down on the Lever Handle So as to Insure Ease in Operating.

Frame and Driving Mechanism Finished in Green.

Wheels and Handle Finished in Vermilion.

Seat Board Finished in Vermillion, Black and Gold, Gloss Varnished.

Wheels are Constructed With Extra Large Barrel Hubs With Outer Bearings; Ten Gauge Spokes are Used Instead of Fourteen Gauge, as On Ordinary Hand Cars.

Rubber Tires are Thoroughly Shrunk on to Prevent Opening Up at Joints.

Extra Large Steel Axles—Steel Tubing Handle; Wrought Steel Fifth Wheel With Extra Heavy Braces—Large Brass Plated Steel Automobile Hub Caps—Gearing Riveted in Two Places to Each Side Bar of Frame Instead of Only One Side as on Ordinary Cars.

Note—Our Object in Bringing Out the Norleigh Diamond Hand Car Was to Have a Companion for Our Norleigh Diamond Boys' Steel Wagon, a Car Possessing Distinctive Features and Without the Faults Possessed by the Old Style Cars; In This We Have Succeeded and Feel Sure That No Better Like Article Can Be Purchased for the Money; Every Thing in Its Construction is of Best Quality, Made by Skilled Mechanics and Built to Stand Hard Knocks.

	Each

5+6616 **Same as No 5+6614,** with engraving, water key, mouthpiece and inside of bell gold plated and burnished Each. . 59.35

American Made Mellophone

This instrument is the only logical substitute for the French Horn. It can take the place of the E♭ Alto in brass band. It is in "F" but crooks are furnished with the instrument to place it in F♭ D and C By using the "C" crook it makes an ideal horn for home or church use, as any music can be played with piano or organ accompaniment without transposition.

5+6617 **Made of Finest Quality Brass,** highly polished, artistically engraved, supplied with water key, pearl finger buttons, music rack and silver plated mouthpiece. Built in F, with crooks to E♭, D and C, both high and low pitch Each $64.20

5+6618 **Same as No. 5+6617,** silver plated, sand blast finish, with finger buttons, valve caps, water key, mouthpiece, engraving and inside of bell burnished. Each 86.35

5+6619 **Same as No. 5+6618,** with gold lined bell. Each 93.85

5+6620 **Same as No. 5+6618,** silver plated, sand blast finish, with finger buttons, valve caps, water key, mouthpiece, engraving and inside of bell gold plated and burnished. Each 103.25

American Made B♭ Baritone

Possesses a clean, well tempered scale, and a large round, far carrying tone Blows very easy Strongly and handsomely made throughout There is no other low-priced American-made Baritone which can compare with this one, either in appearance or playing qualities

5+6621 **Made of Finest Quality Brass,** highly polished, artistically engraved, furnished with triple silver plated mouthpiece water key, pearl finger buttons and music rack, high and low pitch. Each ..... $ 76.60

5+6622 **Same as No. 5+6621,** silver plated, sand blast finish, with finger buttons, valve caps, water key, mouthpiece, engraving and inside of bell burnished Each 107.90

5+6623 **Same as No. 5+6622,** with gold lined bell. Each 120.00

5+6624 **Same as No. 5+6621,** silver plated, sand blast finish, with finger buttons, valve caps, water key, mouthpiece, engraving and inside of bell gold plated and burnished. Each 128.65

American Professional Saxophones

A line of American made Saxophones of the very highest quality and provided with the latest improvements in mechanism and fingering. These instruments are of the best quality and are guaranteed to be the peer of any on the market.

Are American made throughout. They are built on improved models and proportions, giving great beauty of tone and faultless intonation. They are full keyed down to low B Flat and in addition, have an extra key enabling the player to pass the low B Flat to E Flat; B Natural to D Sharp, C Natural to E Flat and C Sharp to D Sharp by raising the second finger of the right hand, instead of sliding the little finger from C to E Flat key; an extra key to trill G to A Flat and a greatly improved form of Automatic Single Octave Key. All the standard fingerings, such as the Articulated G Sharp Key, the B Flat Plate for first finger of left hand, the F to G Flat trill key, etc., are included, and each instrument is supplied with fine rubber mouthpiece, carrying strap, music rack and plug to protect upper end when mouthpiece is removed. Workmanship and material are the finest possible.

Every American Professional Saxophone is equipped with music rack, strap, mouthpiece cap and hard rubber mouthpiece.

B♭ Soprano Saxophone

5+6625 **Brass, Highly Polished.** Each..... **$165.00**

5+6626 **Silver Plated,** Satin Finish Keys and Inside of Bell Hand Burnished. Each. . **202.00**

Peters

PETERS AMMUNITION is produced in the world's largest and most complete factory devoted exclusively to the manufacture of Small Arms Ammunition.

PETERS SHELLS embody clearly defined features: "*steel where steel belongs*" head construction, a tough, elastic and thoroughly waterproofed paper tube, Peters superior wadding, shot which is perfect in size, temper and finish, primers which develop correct ballistics with all standard powders, Peters exclusive method of loading, Peters "*watertite*" "*bevel crimp*," and the use of *Semi-smokeless Powder*" in the Referee Shell—features originated and perfected by the Peters Cartridge Company, and upon which Peters superiority is built.

PETERS METALLIC CARTRIDGES are loaded with the famous *Semi-smokeless Powder* and those Smokeless Powders which have proven by actual tests to be the best for their specific purposes. Special priming mixtures guarantee quick and uniform ignition. The metal cases and bullets are made of the finest materials and by the most modern processes. The loading of Peters cartridges is done with such absolute precision as to insure extreme accuracy and uniformity.

Experienced shooters recognize
in Peters what they look
for in ammunition
of quality.

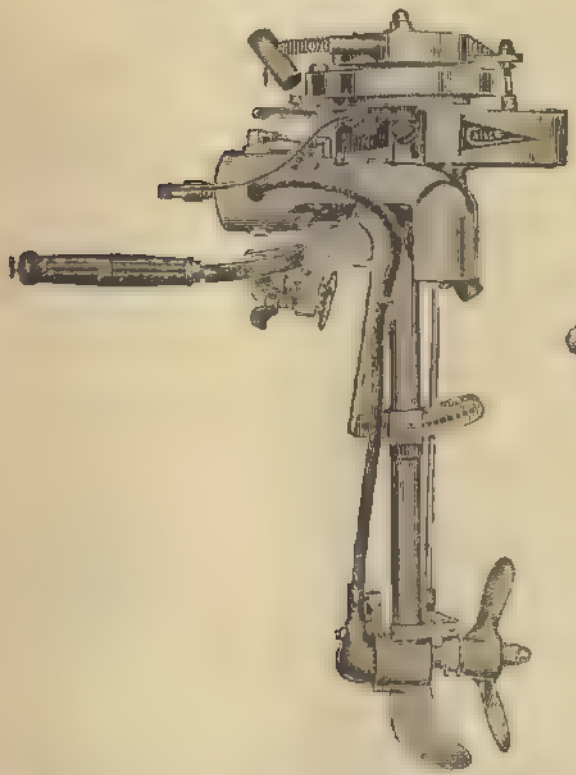
ROWBOAT MOTORS

CAILLE FIVE-SPEED



This is the only Motor built with a five speed Control; 2 speeds ahead; a trolling speed and a full speed at which the ordinary rowboat will be driven at about 8 miles per hour. A slow reverse is furnished together with full reverse. In neutral position, the motor runs idle while the boat lies still. This is the only motor equipped with neutral position. Can be reversed immediately without first going into a speed ahead. Equipped with mechanical starter. The starting device is furnished only with the 5 Speed Models. The extension shaft and adjustable horn permits adapting the motor to a high stern boat or to a boat with the stern cut at an acute angle.

Can be used in either fresh or salt water without any change in equipment. Parts are machined to measurements or limitations of thousandths of an inch according to S. A. E. Standard. A Cord is attached to each motor, requesting the ultimate purchaser to return the cord to the factory to register the motor so that they have on file the name and address of the owner of every motor, each motor being identified by the serial number. Each motor is fully guaranteed by the manufacturers.

SPECIFICATIONS

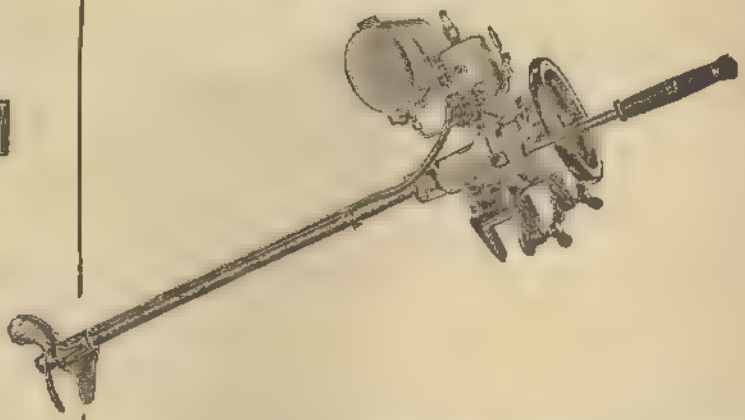
Bore 2⅜ in., Stroke 2¾ in., 750 R. P. M., 2 H. P.
Propeller 9½ in. diamter, 12 in. pitch.
Built-in Flywheel Magneto.
Weight each 85 lbs.
Weight packed for shipment 105 lbs.

No. T7640—No starter with Magneto Ignition, each $198.00

No. T7641—With starter Magneto Ignition only, each $234.00

ONE IN A CASE

CAILLE LIBERTY DRIVE



This is the only genuine tilting motor on the market. Will tilt automatically when passing over shoals, shallows or sunken obstructions. A strut or skeg protects the propeller from damage. The motor may be tilted by pressing down on the steering handle or tiller. Equipped with a weedless propeller. Weeds may wrap around propeller or shaft and can be quickly thrown off by tilting the motor and allow the propeller to revolve free of water for a few seconds. Equipped with knapsack form of fuel tank which is practically indestructible. Machined as carefully as the 5 Speed model. Not equipped with starting device. These motors will drive a boat faster than others due to direct drive from Crank shaft to propeller without passing power thru the medium of gears. Will give a speed of 2 to 9 miles per hour in a 16 ft. rowboat in quiet water. Furnished with battery or magneto ignition. Equipped with conventional type of Berling Magneto. This motor is fitted with bracket for square stern, adjustable bracket for pointed stern may be had on special order at an additional charge.

The Liberty Drive Motor develops about 2 H. P. The motor, complete, weighs 72 lbs. It can be taken apart and carried in two sections, if desired. It comes to you carefully crated and ready to run. It is fully guaranteed.

Weight each 75 lbs.
Weight Packed for shipment 105 lbs.

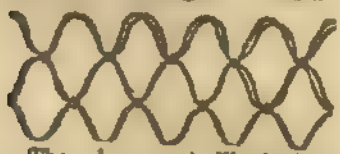
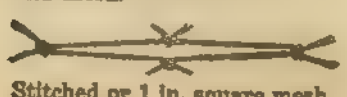
SUGGESTIONS IN ORDERING NETTING

Single Selvage. Double Selvage. Double Mesh.



The above cut illustrates the different styles of selvage and mesh.



Stitched or 1 in. square mesh.

When ordering or writing for estimates, regard the following suggestions as much as possible—

In Ordering, give full description of net in question, stating its length, depth, size of mesh and size of twine. If you are not acquainted with twines, state the kind of fish you want to catch, and the way you propose to fish for them.

How Measured—Always state dimensions given when on ropes, or is whether the netting is to hang the to measure those dimensions when stretched. We measure a mesh on square basis, if you give stretched measure, always say so.

Give Depth in Meshes—When convenient give depth of net in meshes.

Kind of Selvage—State whether you want double mesh, double selvage, or single selvage, as per cut.

Kind and Quality—State whether you want goods tarred, barked or white.

Net or Netting—Always state whether net is wanted complete or netting only.

We cannot consider claims for shortages or imperfections after seines or nets have been used.

All Mesh Sizes are "Square Mesh," Not Stretched Mesh. One Inch Square is Two Inch Stitched Measure.

6 tea cups,	1 salad [illegible] in
6 saucers,	1 bowl 5½ in.
6 plates, 4 in.	1 platter, 10 in.
6 plates, 5 in.	1 creamer
6 plates, 7 in.	1 covd. sugar (2 pcs.)
6 coupe soups.	1 covd dish (2 pcs.)
6 fruits, 4 in.	

Shipping weight about 50 lbs. SET (50 pcs.) **$9.25**

E19593—100 piece set.

12 tea cups,	1 baker, 7 in
12 saucers,	1 platter 8 in
12 plates, 4 in.	1 platter, 12 in
12 plates, 5 in	12 fruits, 4 in
12 plates, 7 in.	1 covd. sugar (2 pcs.)
12 coupe soups	1 creamer

Shipping weight about 90 lbs.

1 butter dish (3 pcs.)
1 casserole (2 pcs.)
1 covd dish, 7 in. (2 pcs.)
1 sauce boat (2 pcs.)
1 pickle dish

SET (100 pcs.) **$18.50**

"Geneva"—Light weight American semi-porcelain, [illegible] border [illegible] and [illegible] narrow tan and ivory border gold edges and traced [illegible] No Package Charge

E18990—42 piece set.

6 tea cups,	1 baker, 7 in.
6 saucers,	1 bowl, 5½ in.
6 plates, 4 in.	1 platter, 8 in.
6 plates, 5 in.	6 fruits, 4 in.
6 plates, 7 in.	1 covd. sugar (2 pcs.).
1 cream pitcher	

Shipping weight about 40 lbs. SET (42 pcs.) **$9.50**

E18996—50 piece set.

6 tea cups,	1 salad [illegible] in
6 saucers	1 bowl, 5½ in.
6 plates, 4 in.	1 dish, 10 in.
6 plates, 5 in	1 creamer
6 plates, 7 in.	1 covd. sugar (2 pcs.)

100 Pound Drums

No. 5. Carbic Cakes are used in Carbic Cadet and Hand Lights.

75 Pound Drums
40 Pound Drums

Carbic Lights represent the highest development in portable lighting equipment. They fill every exacting requirement of a powerful, portable light, the essential qualities of which are efficiency, portability, economy and simplicity—coupled with absolute safety.

They operate by the combined use of Carbic Cakes and the Carbic system of efficient, automatic operation, whereby the gas is generated only as required.

All Carbic Lights are equipped with storm, wind and weather proof burners and the flame from these lights is smokeless, sootless and free from sparks.

Carbic Cakes

Carbic Cakes are made from highest grade Calcium Carbide treated and compressed into briquet form and represent not only the most efficient and economical means of supplying gas for portable torches but by far the safest.

Quality of Gas. The gas from Carbic is exceptionally pure owing to the composition of the cakes and to the exclusive carbic system of generating gas at **low** temperature. The purity insures a clear, white smokeless flame of great illuminating power and eliminates the constant clogging of burner tips and sooting of reflectors.

Overtime and night work is safer and more profitable if you have Carbic Lights on the job.

TANKS DEPENDABLE PUMPS

BOWSER

Most Beautiful Visible is Bringing More Trade

This pump, the Sentry Visible, is so strikingly beautiful that it attracts trade by its appearance; it holds trade, and brings people back to you, because it is fast and accurate.

The Sentry Visible is self-measuring, like every other Bowser pump, but the measure is on top, instead of in the housing—"glass instead of brass." The graduated cylinder measures the gas mechanically, in other words, and with unfailing accuracy — you just can't serve more than you're being paid for!

Improved interlocking devices, sturdiness of construction, paint that stays on and stays bright, fast-running gears, absolute visibility of both cylinder and register dial—these are some of the reasons why you ought to have a Bowser Sentry Visible.

Ask for folder A-52, and we'll send you FREE our *new* booklet, "How to Sell More Gas and Oil."

Profits Speeding by Your Door How to Stop Them

The problem is: How to get them to stop at your door?

A Wayne Pump installed at the curb in front of your business place will do the work.

It will pay you in worth while profits from gasoline and oils. It will pay you in the good will it generates. Sales of gasoline are looked upon by motorists as a real service.

A Wayne Pump will pay you even better, however, by reason of the additional sales it brings you. These sales would have gone elsewhere were it not for the silent attraction it exerts.

It is obvious that many motorists who pass your place day after day need new cars. If you could talk with them, you might easily interest them in yours.

Many need tires, accessories of various kinds, batteries or garage service. When they stop in front of your place, a good man at the Wayne Pump can easily gain their interest,—and sell them

Order a Wayne Pump installed, and note the increased business which follows *if your store is intelligently merchandised through it.* Find out how little it costs to buy. Write us today.

Wayne Gasoline Pumps Are of Various Types and Sizes, and Are Sold at Corresponding Prices. There is one that will exactly fit your needs. They are Made by a Company which for More Than 30 Years Has been Noted for the Advanced Design and Goodness of its Products and which Today Is the Acknowledged Leader in Its Field.

A Profit-Making System—

Here are the details of an accessory selling system that gets profits.

Salesmen are instructed to sell accessories with every car.

A list of accessories is included in the car contract for the guidance of car salesmen so that no sales opportunities will be overlooked.

Suggested List of Accessories to be Included in Car Contract

Spare tire	Spotlight
Motometer	Kit of lamp bulbs
Rear view mirror	Kit of AC Spark Plugs
Bumpers	Tire pressure gage
Stop signal	
Windshield cleaner	

A commission is paid car salesmen on their accessory sales. This gets their co-operation in selling this equipment.

Commissions are also paid to the clerks in the accessory store or department, and to men in the garage who handle customers.

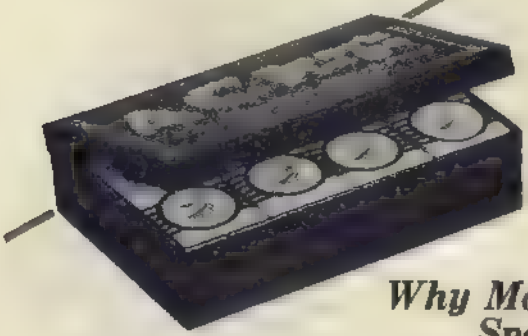
Every car entering the garage is checked over to find out what accessories are needed to complete its equipment. An effort is then made to sell the needed accessories.

Advantage is taken of display, manufacturers' selling helps and of the national advertising on products carried in stock.

A kit of AC plugs is sold with every car delivered.

This system is making profits for many dealers. It will make profits for any dealer who will adapt it to his business.

Dealers can get the biggest profits from this system by concentrating their selling efforts on the leader in each field. The opposite page proves why AC is the recognized leader in the spark plug field.



The AC Spark Plug Kit to carry spare plugs

The opposite page proves why AC is the leader in the spark plug field.

Why Motorists Should Carry Spare Spark Plugs

Spare spark plugs are insurance against trouble.

The AC Plug Kit makes it possible to carry spare spark plugs without damage.

The kit is furnished the motorist free with a set of four AC Spark Plugs.

The kits cost you nothing. Ask your jobber's salesman about them.

Sell AC Spark

ROLLIN

A New and Advanced Motor Car

Designed by R. H. White

In introducing the Rollin car we say much when we state that every part and piece of the mechanism was designed by R. H. White.

R. H. White needs no introduction to the automobile merchants of this country.

He was one of the founders of the White Motor Company, of which he was vice-president and chief engineer for years.

His direction and supervision of the White Motor Company's engineering department alone gives him an experience which is unusually vast and comprehensive.

His understanding of steels and precisely what can be accomplished with certain alloys qualifies him as a world authority on this scientific subject.

In designing high quality four cylinder motors and in the perfection of many major refinements Mr. White has had an experience, covering two decades, that has won enviable repute in the automotive industry.

Thus, when we say R. H. White has designed a new car, it is a foregone conclusion that the new product will represent a step decidedly in advance of everything else that has gone before.

For two years R. H. White and his associates have been developing this new car.

R. H. White's latest product is a very highly developed 4-cylinder car—designed strictly along European lines—small bore, long stroke, high compression motor.

For simplicity in design—rugged construction—snap, ginger and spirited performance—this new car is destined to appeal to a very large market.

Quantity production, of course That's the beauty of it. For large production makes it possible for us to market this car at a price under one thousand dollars.

We have an unusual proposition to put before dealers. For, not only is the car literally covered with selling features, but we have what we believe is the fairest sales agreement ever written.

We suggest dealers write immediately.

Authority Discusses Four-Wheel Brakes

Reserve Braking Power for Emergency Stops the Greatest Advantage. Skidding Danger Practically Eliminated

By GEORGE U. READIO*

THE adoption of four-wheel brakes by some manufacturers has resulted in discussion as to their merits and disadvantages. There is no question but what the four-wheel brakes add a great measure of safety especially in the unexpected emergency because it is practical to use them on slippery places and at high speed to either slow down or stop without skidding, impossible with rear brakes alone, without disaster.

The chief criticism against the four-wheel system appears to be the results of braking hard at the wrong time but we all know what occurs when rear wheel brakes are applied on a slippery turn. The four-wheel brakes can be used for a very quick stop where rear types cannot be used at all; that is, where a skid would result. Now regarding skidding with brakes it would seem to most of us that the place to drag a car, and keep the front end front, would be the rear end, but if we slide the rear wheels with rear wheel brakes, the rear end tries to get ahead of the front. It would do so unless we so steer as to keep the rear end balanced behind the front end so it cannot get around either way, and this is not practical if we are in a turn

With the four-wheel brakes it is impossible to make the rear end do anything but follow the tracks of the front end which shows there must be something wrong with our theory as to which the brakes should be on. A car with front wheel brakes can be stopped in half the distance it can with rear wheel brakes and without skidding, due to the center of gravity being thrown forward, making more weight on the front. The possibility of sliding the front wheels and losing steerage way is not as likely as it appears due to the throwing forward of the weight on to the front end. Any tendency to skidding can be instantly stopped with the front wheel brakes by a slight reduction of pressure on the pedal.

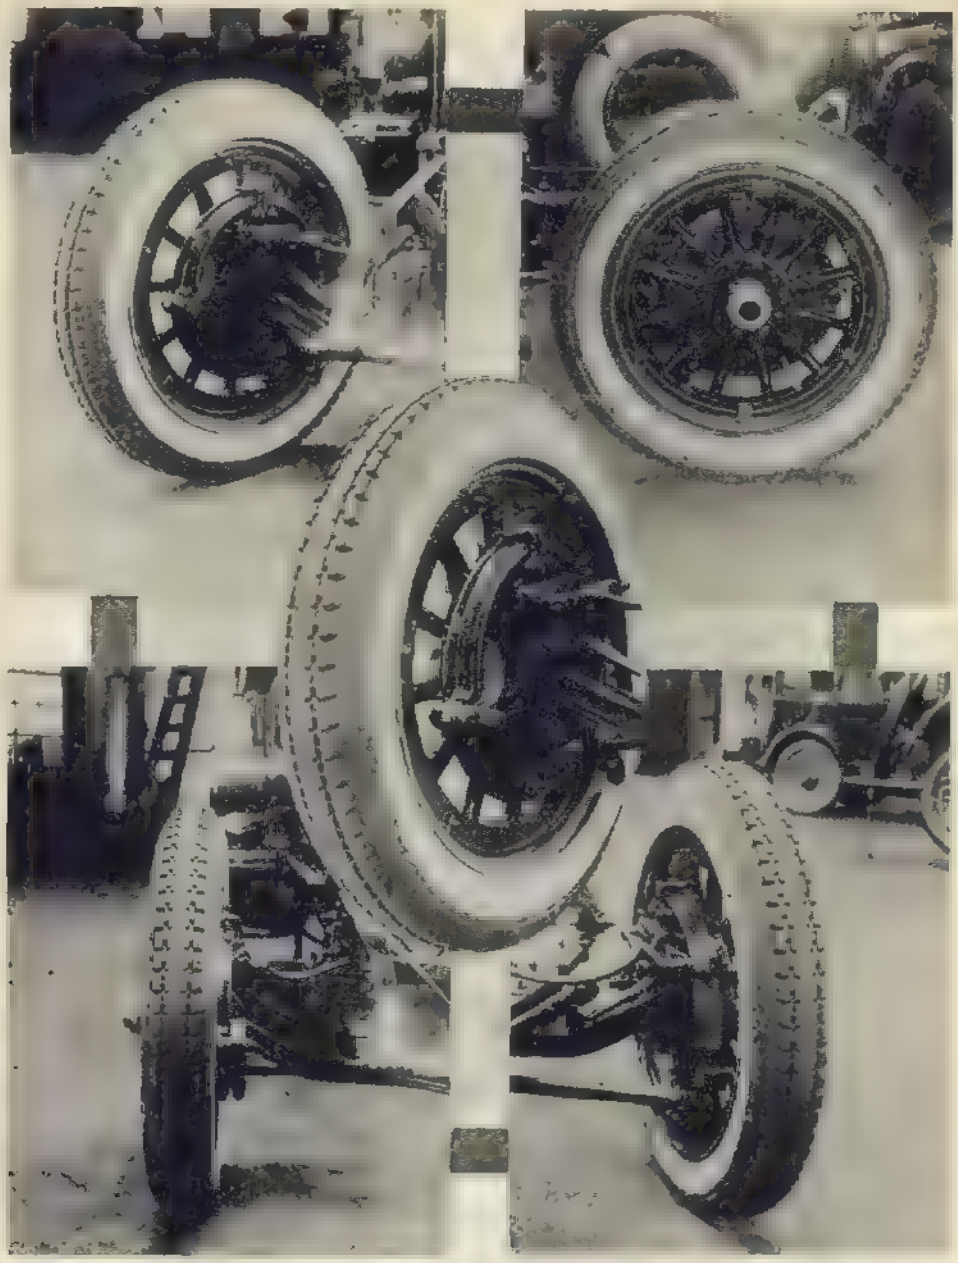
With brakes an all four wheels we have a much better condition. With equal pressure the distance required to bring the car to a complete stop can be reduced 25 per cent over the best rear wheel brake stop and there will be no skidding and very little liability of losing steerage way, because with an abrupt stop the car weight is shifted so hard to the front wheels that it is nearly impossible to slide both.

In making an abrupt stop on a turn it will be found that both front and rear wheels on the inside of the turn will slide but both outside ones will roll, due to the centrifugal force of the turn throwing the weight on to the outside wheels, and the rapid stopping throwing the weight forward. This means that the outside forward wheel sustains most of the car weight and holds the road, consequently there is little danger of the car sliding. If the front wheel rolls there will be no loss in steerage way but the front axle must be strong enough to stand the torque of the brake without twisting, and the front wheels must be sturdy enough to withstand the terrific side thrust on the outside wheel in the turn which is greater than any strain rear wheels have to withstand due to the car weight being thrown outward and forward.

I believe that a car with any arrangement to lessen the efficiency of the front wheel brakes, or to lessen their application on a turn, cannot be depended upon to brake as well as an arrangement whereby equal braking to all wheels under all conditions is given. Such a system when used with a little judgment will stop the car quicker, better and safer than rear brakes with considerable judgment in their application.

A factor to be considered is that with a low, heavy car with four-wheel brakes you can throw into a slippery turn at high speed and stop where you are without any danger.

*Superintendent and mechanical engineer of the Readio Company, Springfield, Mass. Has made a number of tests of the four-wheel brake system and services such a system for a well known make of car.



Views of the External Hydraulic Type Four-Wheel Brakes With Which the Author Has Had Considerable Experience

This is not true, however, with a closed car with a high center of gravity for an attempt to stop quickly will tend to turn the car over. But the driver must use some judgement. A car can be turned over on a curve without an application of any brake. It should be considered that even with the four-wheel brakes and on a slippery pavement that the driver, suddenly seeing a turn he knows he cannot negotiate at the speed he is going, can easily slow down before he makes the turn, even if the car be slipping If the car is slipping, and going at a rate of 40 m. p. h., he could not use rear wheel brakes without disaster, while with four-wheel brakes he can come to a full stop in 35 ft. If a driver be so careless as to not realize there was a turn ahead of him he couldn't make at 40 m. p. h. when within 35 ft. of it, nothing will prevent an accident.

Less Skidding Danger

Any arrangement of leverage to decrease the efficiency of the front wheel brakes below that of the rears only decreases the efficiency of the entire system for with four-wheel brakes stopping is so rapid if applied hard, the weight is so shifted forward, it does not take much to slide the rear wheels anyway. But the redeeming feature is that although both rear wheels slide they follow the fronts and do not skid. And if on a turn only the inside one can be made to slide.

There are internal and external brakes, mechanical and hydraulic methods of application. The internal make the neater appearance but the external is more efficient in that it holds better for a certain pressure. With either type the shoes should be of the heavy hinged type because with the four halves the brake shoe clearance must be small or the leverage to apply will be so long as not to give sufficient pressure. The hinged type can be adjusted very much closer without dragging than the band type. With only two wheel brakes a slight drag is not noticeable but with four wheels quite a loss of power follows with a slight dragging.

The mechanical brakes have a somewhat better action than the hydraulic in that the pedal moves faster and you can feel the pressure on the brakes whereas with the hydraulic the pedal action is somewhat slower and you have to judge how much pressure is required by the feel of the car. There are advantages, however, with the hydraulic. There is nothing to rattle. In released position the entire brake action is under tension from the release springs against the piston in the cylinder. The hydraulic is automatic in its adjustment for when the brake wears down the auxiliary pump puts more liquid in the cylinder compensating for play, this being accomplished by the auxiliary cylinder coming into action when the pedal is way down, and every time the maximum movement is made a little more liquid is added so that it automatically takes up the brakes. With this system the pressure is equal on all brakes or the proportion is the same between front and rear if the front cylinders are smaller, regardless of the position of the car or the load, which is not absolutely true of the mechanically operated brakes, and the equalization is nearly perfect.

However, I do not feel if the front axle is properly designed for front wheel brakes, that is, if the king pin is inclined so that if extended it would touch the ground in line with the center of the tire, which is equivalent to the king pin being in the center of the wheel as far as drawback is concerned, that equalization is nearly as necessary as with rear wheel brakes only. I have driven considerably with one front wheel brake and did not experience any feeling of draw or tendency to skid as one does when rear wheels only are not braking evenly. With the rear wheel brakes they have to be equal to help overcome the skid but with the four-wheel type the only trouble experienced from the brakes not being equal is that you cannot stop quite as quickly.

The inclined king pin is very essential to good front wheel brake operation for with the vertical king pin the center of the tire contact is some 2 or 3 in. outside of the king pin center, and if the brakes engage evenly there is a considerable strain on the tie-rod which makes steering with the brakes on, difficult. If the brakes are not exactly equal the draw on the steering gear is annoying although if the gear be irreversible it will merely be unpleasant holding it against the draw. With the inclined king pin, however, there should be no difference with the steering whether the brakes were on or not, equal or not. Vertical king pins without a good irreversible gear would be dangerous because sudden brake application might pull the wheels around if one wheel be on a slippery spot or if they were not equal. The steering gear, however, is not so important with the hydraulic system because of the brake equality.

In summing up, the front axle must be stronger with the four-wheel system to stand the torque; the king pin should be inclined, the steering gear irreversible, otherwise there is nothing more to four-wheel brakes than two-wheel except better operation and safer stops. If of poor mechanical construction, there will be more rattles.

The four-wheel system illustrated was designed by the writer. It is a hydraulic type. Inside of the main frame is a cylinder from which a copper tube leads to each brake cylinder, this main cylinder being connected to the pedal by a short connecting rod. When the pedal is depressed it pushes in the piston on the main cylinder forcing the liquid out and into the brake cylinders, pushing out the pistons and thereby applying the brakes.

All wheels have the same size cylinders and equal pressure. The maximum operating pressure is 65 lb. with 200 lb. pedal pressure which is about double that required to stop the car is 35 ft. at 40 m. p. h. The car brakes equally well in a turn and steering is not affected with the brakes on. An auxiliary cylinder is used so that whenever the pedal reaches the floor, or nearly so, this cylinder is brought into operation forcing a small amount of more liquid into the system. The liquid used is glycerine cut with alcohol. Too much glycerine results in sluggish action. Too much alcohol impairs lubrication and invites packing leakage but these will not result with correct proportions.

New Cars and Models

Olds Enters New Price Field With a Six

THE Olds Motor Works of Lansing, Mich., has just announced a brand-new Six in six models mounted on a 110-in. wheelbase chassis. The power plant is a highly efficient six-cylinder engine embodying modern engineering principles. The engine is L-head type with 169.3 cu. in. piston displacement. The cylinder head is removable and accessibility is a feature. Prices range from $750 to $1100.

The six models include a 5-passenger touring, 2-passenger roadster, 5-passenger sedan, 4-passenger coupe (all illustrated), and a 2-passenger cab and a sport touring car. The tires are 31 x 4-in. cords and the chassis is lubricated by the Alemite system. The bodies are stream-line, and the upholstery is duPont Fabricoid with the closed models trimmed in velour. The windshield is a two piece plate glass. The fenders are crown type and bodies are finished in black and the closed bodies are Orriford Lake below the belt line and black above. Lamps are drum type.

Accessibility a Feature

The touring model weighs 2150 lb. The bore of the engine is 2¾-in. and the stroke 4¼-in., giving it a rating of 18.15 hp. The cylinders are cast in block, and the crankcase extends to a point below the center of the crankshaft. This permits the webs which separate the crankshaft bearings to be so shaped that the maximum strength is attained. Nearly every cap screw, nut or bolt of the engine can be removed with a speed wrench and the spark plugs slightly inclined so that the radiator tie-rod will not interfere with the use of a speed wrench. The engine has three point suspension. The cylinder head has more than the usual amount of space for water. A dome-type of combustion chamber is used so formed that there is a high degree of turbulance. The crankcase is inclined with the cylinder block providing extreme rigidity. The crankshaft is rugged and it and the bearings are unusually large and strong. There are three main bearings employed.

The crankshaft main bearings are Chadwick type. They are bronze, lined with a special white bearing metal. The cam shaft is drop-forged, heat-treated and mounted upon three pressure-lubricated bearings. Cams are forged integral The camshaft is gear driven.

Connecting rods are I-beam type, drop-forged and heat-treated. They are 8⅛-in. long. The piston pin is hollow, hardened and ground, and of the full floating type. The piston is light weight and of cast iron. The valves have a diameter of 1½-in.; ¼ in. lift.

Lubrication is by the force feed system, oil being forced to the main, connecting rod and camshaft bearings. A gear type oil pump is built in the timing gear cover where it can be easily removed for inspection. It is driven from the front of the camshaft. A separate oil line leads to the timing gear and the oiling system has a pressure gage on the instrument board.

The water of the cooling system is circulated by a centrifugal pump at the front of the cylinder block. On the front end of the pump shaft is the fan, this shaft being driven off the crankshaft by a rubber cord belt. The electrical system is the Delco, two-unit, starting, lighting and ignition.

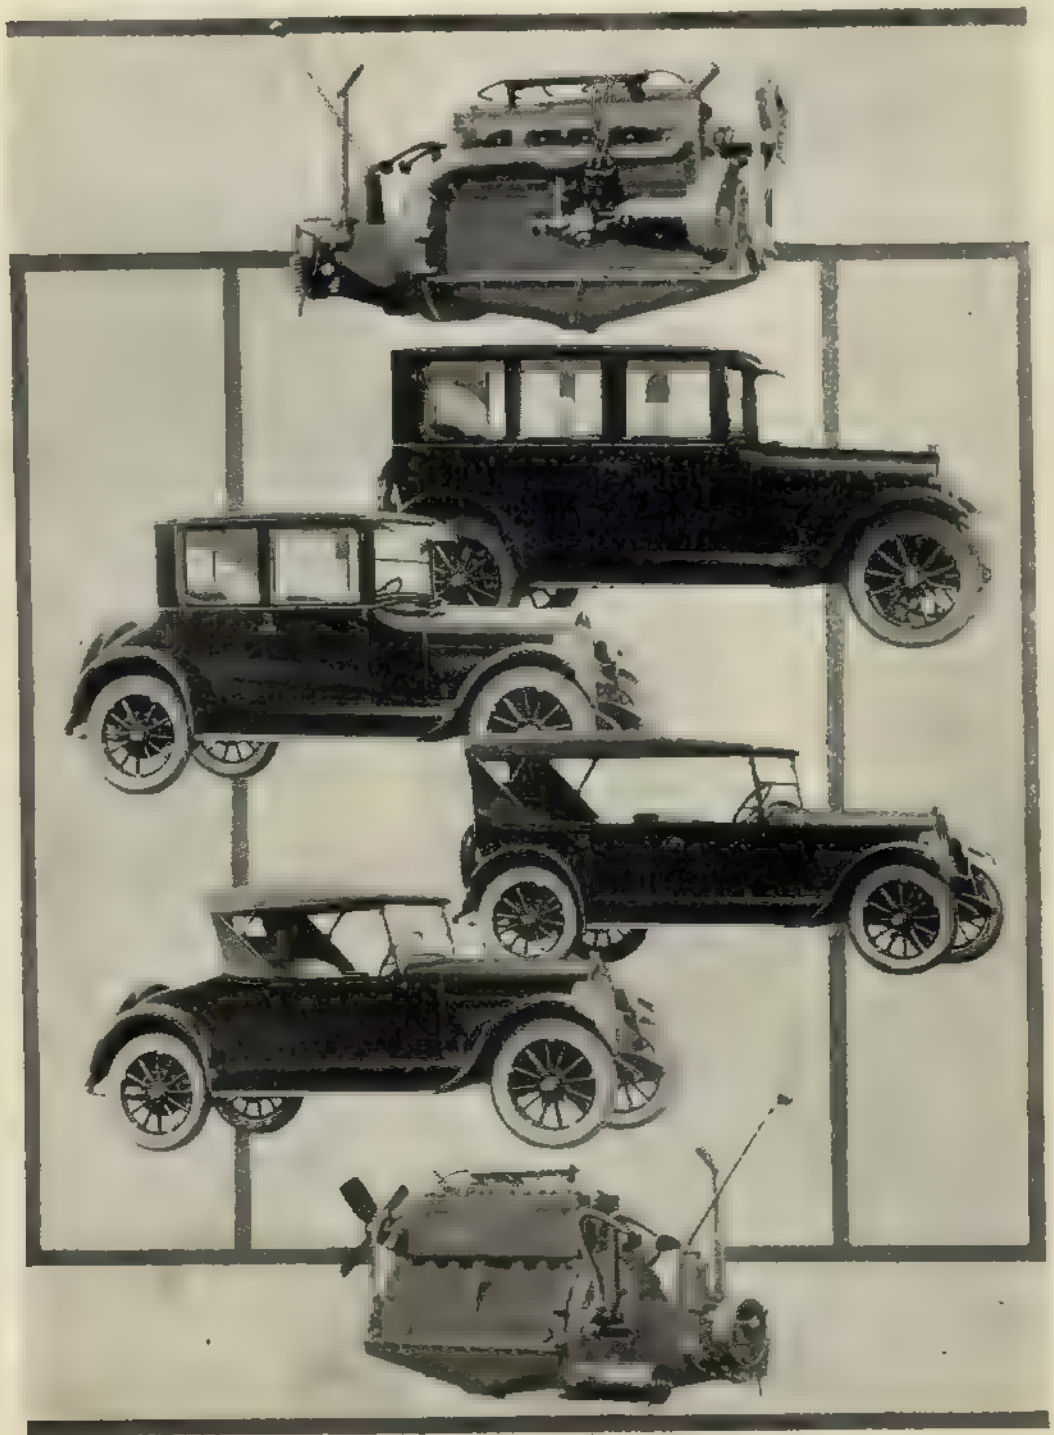
The fuel system comprises a 12½-gal. tank mounted at the rear on the chassis with vacuum feed to the carburetor which is mounted on the right side of the engine.

Power Transmitting Units

The clutch used in the new Olds Six has one driven member, a steel plate, with a woven facing of treated asbestos. The clutch is easily adjusted through the inspection window at the top of the fly wheel housing. The gearset is conventional, selective, sliding-gear type with standard control. The universal joints are Thermoid-Hardy flexible fabric universals. The propeller shaft is tubular and has a universal joint at each end.

The rear axle is semi-floating. The driving pinion and the ring gear are spiral bevel type The front axle is I-beam type with many of the parts drop-forged. The steering knuckle and spindles are of the reverse Elliott type. The steering gear is semi-irreversible, of the worm and gear type. Above and below the worm gear are ball thrust bearings with adjustable collar where gear teeth wear can also be compensated. The parts are lubricated by the Alemite system.

NEW CARS AND MODELS



Some of the New Six-Cylinder Olds Models, the Sedan and Coupe, Touring and Roadster, and Views of the Power Plant

The frame is of channel steel, is 42-in. wide at the rear doors and 28-in. at the front. The frame has a 5½-in. depth and is 1¾-in. channel and made of ⅛ in. stock. It has four cross members. The radiator is mounted on separate brackets.

The springs are semi-elliptic, underslung, the rears being 50-in long and the front 36-in. The foot or service brakes are external contracting on rear wheel drums, the latter being 12⅜-in. in diameter and 1½-in. wide. The brake mechanism includes an equalizer. The emergency brake is at the rear of the power plant, the drum is 6¼-in. diameter and 2⅛-in. wide. The prices announced are lower than former Olds models.

Reo Announces a New Line

A NEW line of Reo cars has been announced by the Reo Motor Car Co., the first one to be announced being the new high-power 5-passenger touring car. The first thing that attracts the eye is the lowered chassis. Further investigation, however, reveals changes of a mechanical nature in various parts. This new body is mounted on the standard T-6 chassis used for all Reo passenger cars, therefore this lowering of the chassis and the new rear axle which are features of the mechanical changes, are shared with all other Reo models as they are announced in the near future.

The lowered chassis has been obtained through the increased offset in the frame. Approximately 2 in. has been taken from the height of the car, greatly improving the appearance. The new rear axle is of the semi-floating type and combines the advantages of the full floating and the old style semi-floating types and also gives greatly increased braking surface. The brakes are 15 x 2½-in., the service brake operating from the clutch pedal being the external one, and the emergency operating from the second pedal being of the internal expanding type.

A feature included in all Reo models is the transmission lock approved by the Underwriters Laboratories and given a class A rating for protection against theft.

The Reo lock requires no key to lock the car, merely swinging a disk one fourth of a turn around the starter plunger, then depressing the plunger, locks the transmission. This causes a hardened steel pawl to lock both the disk and the starter plunger so they cannot be released until the proper key is inserted in the Yale lock. Since a key is necessary only for unlocking, the operator can carry his key on a ring.

Still another feature is the tool compartment under the front seat, from which tools can be taken without disturbing the passenger in the seat. Panel doors at each side give entrance to the compartment, the doors being fitted with locks which make the compartment an ideal storing space for small packages when the car is parked.

Extra seats giving the car seven-passenger capacity may be secured at a slight additional cost. The tonneau of the new Reo five passenger touring car is exceptionally roomy and the auxiliary seats can be used without discomfort to the passengers in the rear seat.

In general body style, the new model resembles the phaeton Reo with its cowl ventilator and other distinguishing features. The side wing windshield and nickel aluminum trim throughout are used, and two standard finishes for the car are provided, one being of Reo blue with white pencil striping running parallel with the trim rail, the other of Crane Simplex gray with the same striping.

The New "High-Powered" Reo Phaeton

This is the phaeton model which accommodates five and replaces the seven-seater in the old line. All the new Reo models are lower and improved in appearance.

NEW CARS AND MODELS

New Engine and Four-Wheel Brakes Feature Cadillac V-63

SEVERAL engineering refinements of marked importance are to be found in the new Cadillac, known as the Type V-63, which has just been announced. While the engine is entirely new it is still of the 90-degree V-type which has been used by the Cadillac Motor Car Company for the past nine years, and it retains the same outward appearance and the same bore and stroke as its predecessor. The refinements result in some increase in power and an entire elimination of vibration at all operating speeds.

Another epochal improvement in the Type V-63 is a carefully worked out four-wheel brake system which gives an increased margin of safety, extreme ease of operation and which requires minimum service attention.

The new Cadillac is built in 132-in. wheelbase only and is fitted with a new line of bodies including eleven different styles. The new bodies are even roomier than previous types, while appearing lower and more graceful. Included in the new body types are 4 and 7-passenger phaetons and a 2-passenger roadsters in the open models, and 5 and 7-passenger sedans, 5 and 7-passenger suburbans, 2 and 5-passenger coupes, limousines, and town broughams.

Engine

More perfect balance than attained in any previous type of engine, either V or vertical, is claimed for the new Type V-63 Cadillac engine. The secret of this balance lies largely in the crankshaft arrangement, which is entirely new. The crankshaft is still of the four-throw type, with two connecting rods from opposite cylinders attached to each throw or crank pin, but the four throws are now arranged in two planes at right angles to each other, as shown in the illustration. In addition the crankshaft is fully counterbalanced by means of compensating weights which "cancel out" all unbalanced forces, including the weight of the lower halves of the connecting rods. The result is that the entire revolving mass operates with the smoothness of a balanced flywheel.

This design, of course, gives an entirely new firing order, and in consequence the camshaft has been re-designed to provide a separate cam for each valve.

Full force feed lubrication, thermostatically controlled carburetor, double pump water circulation with thermostats and condenser device, and Delco starting, lighting and ignition are continued with but few changes to adapt these features to the Type V-63 engine. Front end drive chains are ¼-in. wider than heretofore, and this, together with the increased smoothness of operation of the engine, has made it possible to eliminate the chain adjustment, thus doing away with several parts subject to considerable wear. With the new design it is considered that chain replacement should only be necessary when a general overhaul is required.

Clutch, transmission, drive members, rear axle, spring suspension and steering gear also show but few changes, and these mostly of a minor nature. One noteworthy improvement, however, is that all transmission gears are now finish-generated by grinding, which results in quieter operation and longer life. The frame has two additional cross members, so that it is reinforced at every possible point of strain.

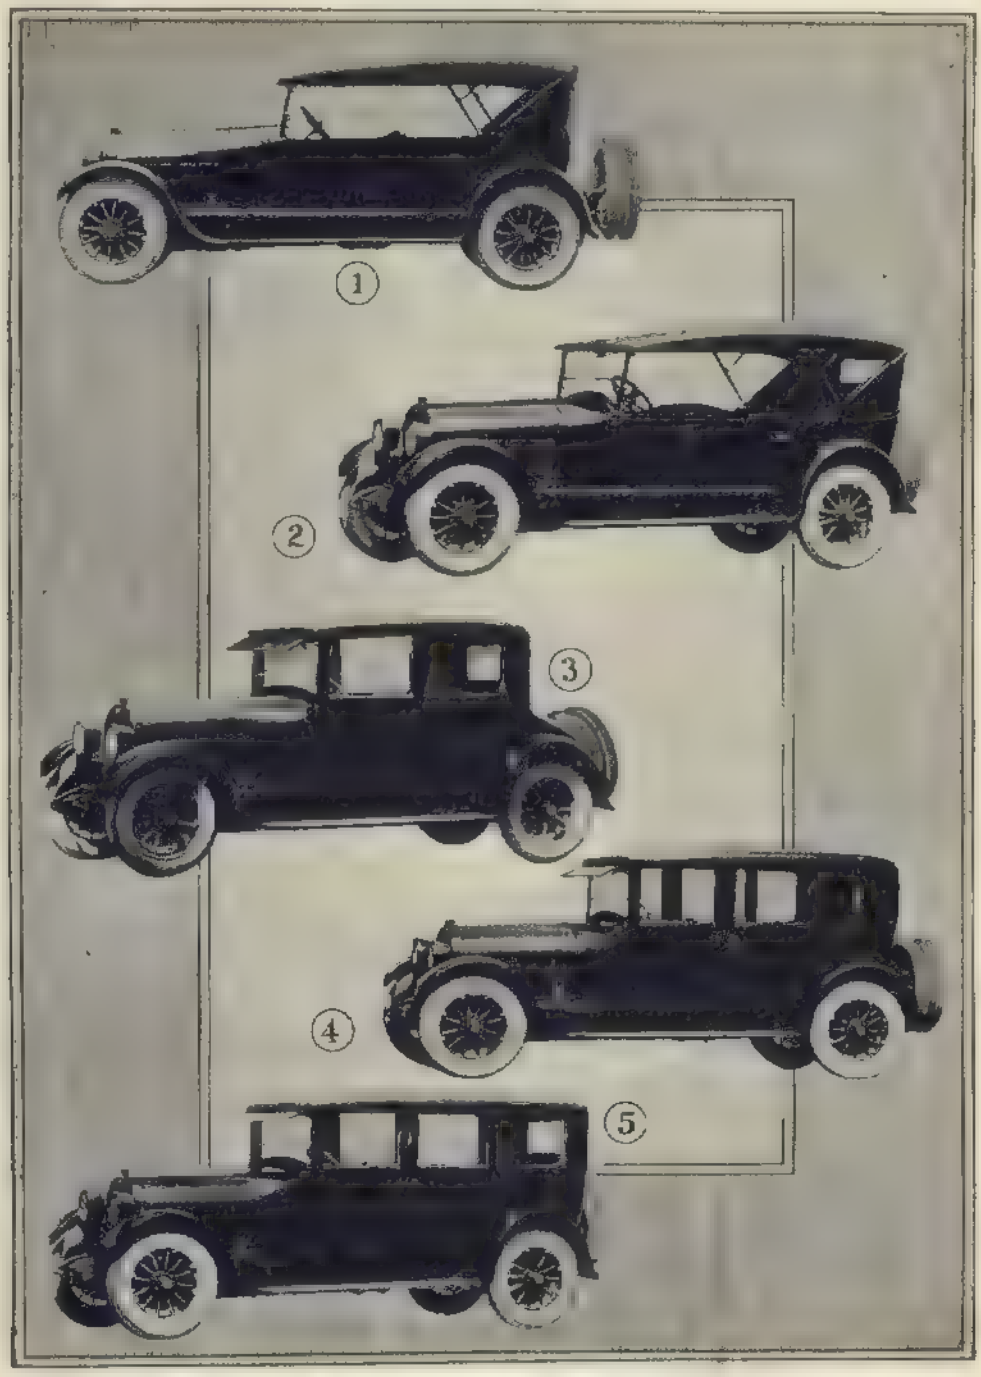
Brakes

In the design of the new four-wheel brake system three major considerations were kept in mind—first, absolute safety; second, ease of operation; and third, minimum service requirements. The new Cadillac layout differs from all others now in use in that it features internal expansion brakes on the front wheels and external contracting brakes at the rear, all operated by the foot pedal. This design is claimed to result in automatic or rather thermostatic compensation between front and rear sets. Under the most severe service that brake drums will expand somewhat, and in the Cadillac design this expansion of the rear drums forces the contracting brake bands out slightly, this motion being transferred through the linkage to the front brakes and expanding the internal brake shoes there to compensate for the expansion of the front drums.

Front wheel brakes are operated by pull rods and cross shafts with universal joints at their outer ends. The steering knuckle king bolts and the brake shaft universals are mounted at slightly different angles, so that the outside front wheel brake will always be progressively released when turning.

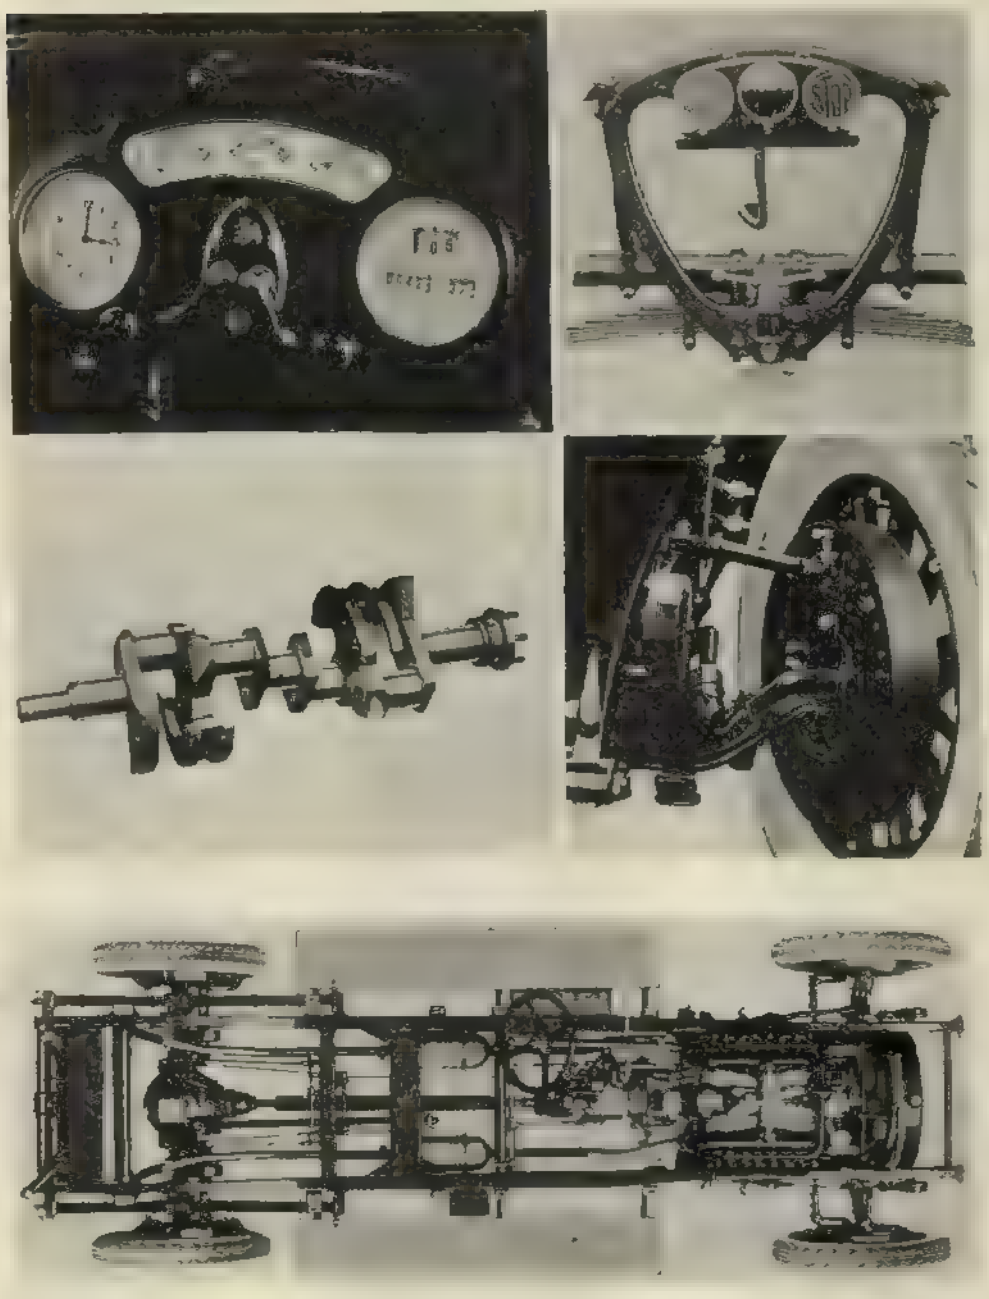
A double leverage link at the brake pedal provides quick take-up during the first part of the pedal travel and slower application at greater pressure, due to the greater leverage, during the latter part of the travel.

NEW CARS AND MODELS



Typical Body Types on the Type V-63 Cadillac

1. The four-passenger Phaeton. 2. The touring car, of seven-passenger capacity. 3. A comfortable five-passenger, two-door coupe. 4. The five-passenger sedan. 5. Seven passengers are carried comfortably in this suburban model.



Interesting Features of the New Type V-63 Cadillac

Upper Left—Refined instrument board with symmetrical grouping of gages, switch, carburetor and headlight controls etc. Upper Right—Spare tire carrier with combined tail lamp and "stop" and "back-up" lights. Left Center—The 4-throw, 90 degree, fully balanced or compensated crankshaft. Right Center—One of the front wheel brakes and details of the new front axle construction. Lower—The Type V 63 Chassis, showing the heavily braced frame and the four-wheel brake layout.

NEW CARS AND MODELS

Pressure is automatically distributed between front and rear brakes in proper proportion through an adjustable compensating bar. This is set at the factory to give the proper leverage according to body type and weight distribution between front and rear wheels. Approximately 35 per cent of the brake pedal pressure is utilized at the front brakes and 65 per cent at the rears. The compensating adjustment is located under the front floor boards and can easily be changed in case of necessity.

An entirely separate emergency brake system is provided, consisting of internal brakes on the rear wheels only and operated by the hand lever.

Several changes have been made in the front axle to provide for all additional strains imposed by the front brakes. In addition the steering knuckle cross tie rod is now located back of the axle.

Bodies

While all the Type V-63 body styles are new throughout, they retain the characteristic Cadillac lines. Rounded roof lines at the rear feature the closed bodies, and a recessed belt around the inside edges of window frames, painted to match the lower body panels, relieves the top-heavy appearance of solid black above the belt line. The closed models, though built by production methods, embody materials and workmanship of a quality usually associated only with the custom-built bodies.

Instruments are grouped more effectively and quick acting flush type cowl ventilators are used on all body types. Matched walnut mouldings set off the interior window frames in the closed models. The glass partitions between front and rear seats in the imperial sedan, limousine and similar models can be lowered completely out of sight.

Mounted on an improved type spare tire carrier at the rear is a combination light which includes besides the tail lamp a white "back-up" light and a "stop" or warning signal, both operated automatically.

Altogether the new Type V-63 Cadillac represents a distinct advance in American motor car engineering and manufacture.

New Paige Sedan Accommodates Seven

A new closed model on the 6-70 chassis has been introduced by the Paige-Detroit Motor Car Co., of Detroit. It is the 7-passenger sedan, resembling the 5-passenger sedan in many respects, but having a striking difference in the bead line immediately below the windows. This has been replaced in the new model with a double bead, forming a belt rail all the way around the body from the cowl. The streamline effect of this Paige model is further enhanced by this bead which also reinforces the body. Between the beads of the belt rail are gold stripes which form a pleasing combination with the coach blue of the body. The interior is finished in the usual complete manner of the Paige cars. The list price f. o. b. the factory is $3235

Balloon Tires Optional on Cole Cars

Word has been received from the Cole Motor Car Company of Indianapolis to the effect that Balloon tires with all the necessary wheel equipment are now obtainable on all current Cole Master models. The tires used are those produced by the Firestone Tire & Rubber Co. These tires are standard equipment on the new Cole Aero-Volante model.

The adoption of the Balloon Tires has only come about after a thorough investigation and test, according to the president of the company, J. J. Cole. Tires used are 7½-in. and only 25 lb. air pressure is carried. The riding is greatly improved and the braking efficiency is increased. The low air pressure greatly reduces danger of air leaks and blow-outs.

This is the Paige 6-70 Seven-Passenger Sedan, Which has a Double Bead, Forming a Belt, as the Most Striking Change in the Body.

—"AND HERE'S A 10 GALLON AMERICAN VISIBLE"—

More than ever before, the motorist buys his gasoline in ten gallon quantities. And it's MIGHTY EASY to SELL him TEN gallons when he asks for five.

This American Visible Pump makes both the sale and the serving of ten gallons a WHOLE LOT EASIER AND QUICKER.

American Visible Curb Pump

The 10 gallon pump has all of those desirable features and superior qualities that have made the American Visible the leader among visible pumps. Its action is positive and quick—it is hand operated, absolutely safe—no danger from breakage, fire or explosion. All the gasoline is filtered, and an accurate meter, furnished without extra charge, registers all gasoline pumped into container.

Write us for full information and our VERY REASONABLE prices.

PUMP No. 404-V

CONTAINERS

Either five or ten gallon visible containers for other makes of pumps furnished complete with full instructions for attaching.

THE FORD SECTION

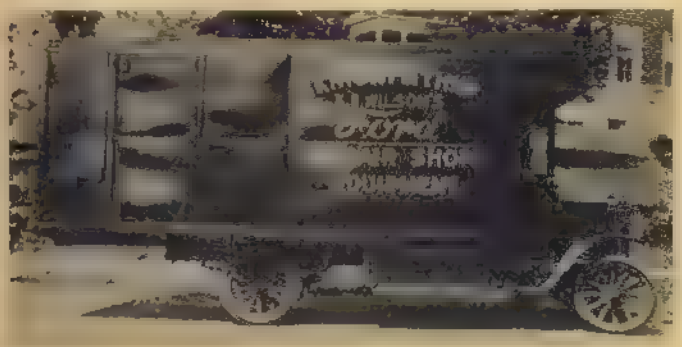
Traveling Demonstrator Sells Service Equipment

Knight & Thim, New Haven, Conn., Send Truck to Call on Small Service Stations and Show Equipment in Use

Have Sold Over 90 Per Cent of Prospects by This Method

Salesman Can't Carry Heavy Machine and Prospect Can't Always be Induced to Visit Show-Room, so Traveling Demonstrator "Takes Mohammed to the Mountain"

ONE of the sales problems of the manufacturer of heavy service station equipment is reaching the small shop and garage located away from the main traveled lines and not easily accessible by the common carriers. The salesman, be



This Concern Employs a Truck to Demonstrate Ford Service Equipment and Makes a Specialty of Calling at Small Places.

he manufacturer's or jobber's representative, cannot carry the sample machine. If the equipment is what the small shop deems a large investment it is difficult to interest the prospect with printed matter and illustrations. The most successful sales method is to show the machine and demonstrate its operation and its profit and time-saving features.

These facts have been well established by Knight & Thim, New Haven, Conn., which concern is merchandising the K. R. Wilson Ford repair shop equipment, particularly the engine rebuilding machine. To overcome sales resistance, and to exploit the product in the small places above referred to, this

concern hit upon the idea of employing a truck with gas engine power to drive the machine, and to visit the small places to demonstrate the service and profit features.

Accordingly, a 2-ton Nash chassis was purchased and a special body constructed. The body has large side doors on the right side, also doors at the rear so that the truck can be driven up to the curb or shop and plenty of light be obtained. The method of merchandising is as follows: The truck is driven to the Ford garage or shop, and the owner invited to come out and look at the outfit. Its novelty, of course, appeals to him.

Then an offer is made to the prospect to rebuild a Ford engine completely for the small sum of $10. This includes rebabbitting, reboring, fitting new pistons and rings, etc. The work is done by Knight & Thim, who use, of course, all the special speed tools and equipment. Having the operations down pat, plus the right equipment, the work is turned out so fast that it opens the eyes of the prospect and his mechanics. It is claimed that the rebuilding has been done in as little as three hours.

Reaches Small Town Service Stations

Having shown what the machine can do the sales angle is injected. If an order is given for the machine the $10 is credited. Now as to results. The writer met the truck at a Ford shop in a very small town where the owner of the Ford shop gave an order. The writer was informed by one of the firm of Knight & Thim that the truck had been on the road ten months and that 176 engines had been rebuilt in demonstration. Over 90 per cent of the prospects had been sold. Some of these were ordered later after the demonstration. The truck averages three calls a day.

Showing Equipment From Rear and the Gas Engine Supplying Power to Operate the Repair Machine

An interesting story is told of a visit to a small place in the woods, where it looked as if the call was waste time. But the one-man shop owner had an engine and after it was rebuilt he placed an order with the remark he guessed he could find plenty of work for the machine.

In discussing the cost of the demonstrations one of the firm stated that it was less than the conventional sales methods and the volume of sales was greater. After visiting all small places in Connecticut, it is planned to tour South this winter. In addition to the K. R. Wilson machine other Ford service station equipment is carried. Provision is made for sleeping and living in the truck.

The carrying of the goods to the prospect, as is done by this concern, opens a big field of possibilities in sales of heavy service equipment.

Large Side Doors Are Thrown Open to Admit Light and Permit View of the Operation of the Service Machine. Ford Engines Are Entirely Rebuilt.

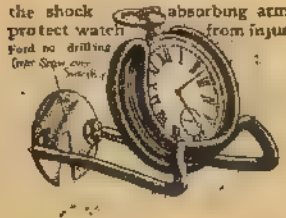
Resilient Rubber Finger Grips

F. D. Farr Co., Perry, N. Y.

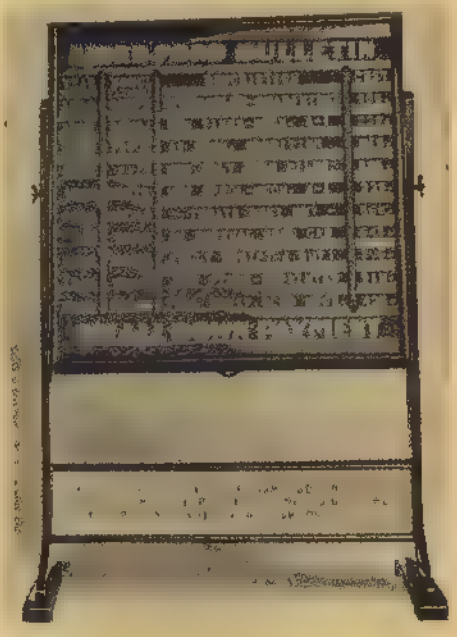
Resilient Rubber Finger Grips are made from a high-grade rubber, black in color to match the standard Ford wheel and fittings. In the outer ends of the Grips there are two cavities, diagonally placed slightly below center so that the tips of the fingers rest naturally in them when the hand is on the wheel in driving position. With the aid of these cavities, it is possible to move the throttle lever several notches either way, merely by bending the fingers and without sliding the hand along the wheel rim. The rubber also serves to insulate the fingers from the cold levers during the winter months. Retail price, 25c per pair. Mounted 12 pairs to the display card.



Burleigh's Patent Watch Carrier

George K. Burleigh
Penacook, N. H.

This watch carrier is made of steel wire, covered with woven linen thread. It holds a 16 or 18 size watch firmly, and shock absorbing arms protect the most delicate watch from injury. It is easily attached with one screw above the switch key. Price $1.



"Fordex Illuminated Used Car Bulletin"

Sales Equipment Co.
5981 Woodward Ave., Detroit, Mich.

The "Fordex Illuminated Used Car Bulletin" stands 49 in. high, in its most frequently used position, has a depth of four in., and weighs complete, only 25 lb. It is easily and quickly adjusted to any position in the salesroom. The frame into which is fitted the cabinet body of the sign itself, rests on two ornamental leg bases, and both sides are notched in three places, for adjusting the sign to the desired height. Across the front of the cabinet are slats set 1 in. apart, which are grooved to accommodate slides. The edges of the slats are beveled, and it is a matter of seconds to insert slides. The back of the cabinet opens, dropping to a horizontal position, where it is held by chains, concealed when closed, providing easy access to slide compartments, lights, etc., and providing for the insertion of slides into the grooved slots. With every "Fordex Illuminated Used Car Bulletin" there is provided an assortment of more than 145 slides, properly classified under headings, "Year," "Model," "Description" and "Cost." The slides are contained in metal compartments inside the cabinet and a printed list showing every Unit Slide furnished is also provided so that you can instantly select the ones wanted. Twenty-five slides for the years from 1914 to 1923 are provided and 15 for Ford models. Twenty-five descriptive unit slides are also supplied, reading as follows "Run only 4,000 miles," "Overhauled-Guaranteed," "Mechanically A-1," "Special Used Car Guarantee," "New Tires—Repainted," "Fully Equipped A Buy," "Today's Best Buy" and many others, offering descriptive material to adequately describe any used Ford in stock. Unit slides for prices are provided, starting with $50 and running in $5, $10 and $15 steps, up to $595. The slides are durably constructed. They can be renewed at any time, or additional ones can be secured, at the nominal price of 5c each for the small ones, limited to 5 letters, and 10c each for the large ones, limited to 21 letters.

FORD SECTION

Multi-Power

Multi-Power Steering Method, Inc
1721 Prairie Ave., Chicago, Ill.

Multi-power replaces the single Ford steering lever without the necessity of machine work or making changes in the car. The steering lever comes off the bottom of the steering post and is replaced by compound lever "A." Steering arm "B" is moved by compound lever "A." The ball and socket "C" is the fulcrum for "B." There are no gears used and turning around, backing up and turning corners sharply can be done with entire confidence as a positive stop prevents front wheels locking under the car. Can be installed with a monkey wrench in a few moments.

Ruxton Oil Gauge

Ruxton Engineering Co., Ruxton, Md.

The illustration shows the Ruxton Oil Gauge as it looks when mounted on the dash of a Ford. The gage itself consists of a small glass cylinder containing a plunger. From the bottom of the cylinder a copper tube leads back under the dash and through the space between the floor boards and the dash, and is connected to the upper petcock, which opens into the crank case. The principle of the Ruxton Oil Gauge is in reality a miniature pump which brings up oil from the crank case with one motion of the plunger. The Ruxton Oil Gauge is neat and attractive in appearance. Made of highly-polished aluminum, it is practically wear-proof and weather-resistant. When the plunger is pulled upwards to its full extent, a partial vacuum is created in the cylinder. If the oil level in the crank case is at the proper height, oil will immediately flow into the cylinder until it is one half or two-thirds full. If the oil level is below the top petcock none will rise into the gage. Additional oil should be added until it appears in the gage. As the oil is plainly visible, its condition may be readily determined. Price, $3 50.

Angelus Ford Rain Aprons

Parker & Waterman Mfg Co.
1203 West Washington St.
Los Angeles, Cal.

The Angelus Rain Cover protects the coils and ignition parts from rain. A unique feature is the two piece idea. One-piece clamps under the windshield and the other snaps onto it with glove fasteners. In dry weather the cover can be readily removed and rolled up, and put under the seat. The windshield strip is left permanently in place. Price each, $1.75.

"Pal" Packing

Libby Mfg. Co.
111 Watchung Ave., Plainfield, N. J.

"Pal" Packing for rear axles, keeps the oil from leaking out of the rear wheels on to the tires and brakes. It is put up in cylinders about 7 in. long. Price, per cylinder, 50 cents each. Comes packed 12 cylinders to display container. "Pal" tool (necessary for Ford cars only) made of cast steel, for installing, $2.

You can't feed too much gas!

$3.00 Buys it

The new Air Control feeds the gas just as fast as the engine can use it—but no faster. Your motor accelerates swiftly, smoothly—and without choking or bucking.

3 Min. Installs it

Nine times out of ten, engine choking is caused by too sudden acceleration.

The foot jams down the pedal. Through rigid metal connections, the carburetor is shocked open, and the engine is choked with gas before it has a chance to speed up.

With the M P C Pneumatic Accelerator, every touch on the foot bulb is cushioned before its effect is felt by the carburetor

Little jiggling taps are never felt by the carburetor at all. Quick, hammer-like blows are transformed into swift but steady pressure.

The result is steady, even carburetor control—and consequent steady, even acceleration. The engine speeds up as quickly as it can utilize the gas—with amazing smoothness

More than this—the M. P. C. Pneumatic Accelerator can instantly be placed anywhere on the floorboards. It is immediately adjustable to suit the driver. No extra footrest is required. Only three minutes are needed to install it, without the use of screws, or holes in the floorboards. It is simple in design, well made, and it is absolutely guaranteed by its makers, one of the most important part makers in the whole automotive industry.

Users of this new appliance are rapidly mounting into the thousands. Try to replace an M. P. C. Pneumatic with any other type of accelerator. Then you'll hear of its advantages from men who know

Their opinions will tell you, better than any advertising of ours, how important it is that you be in position to offer this increasingly popular device to your many customers who will buy an M. P. C. Pneumatic from some one soon. Write, today, for prices and discounts. Order a sample. You'll need it, and hundreds more!

(27)

Hit the ordinary accelerator! The rigid, metal connection to your carburetor will "shock" it open. Your engine will either race, or choke. That's what happens when bumps cause your foot to jolt the pedal.

Motor Products Corporation
11803 Mack Ave., Detroit, Michigan

M.P.C. Pneumatic ACCELERATOR

But strike the M P C Pneumatic both and the carburetor never knows it. The air cushion it responds instantly to pressure, but cushions shocks. Jolting can't cause uneven acceleration

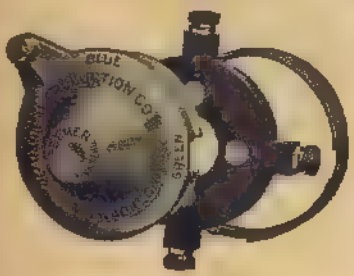
"LIFE TIMER"

For Fords *For Fordsons*

Made in Milwaukee



Shortproof
Foolproof
Requires No Oil

Do You Know

Why

The "LIFE TIMER" is a dominant factor in the timer field, and sales have passed all expectations.

Because

We believed that a quality product at a fair price would obtain immediate acceptance and approval.

Fords predominate the automobile field because they are serviceable, low in price, and all parts are replaceable at a small cost.

In "LIFE TIMERS" the same policy is carried out; it is serviceable, low in price, and all parts are replaceable at a small cost. In addition to this the commutator is made of molded "Bakelite" and is reversible, which permits turning it over should one side become worn.

Fords are not discarded because parts are worn out and timers should not be either, but the construction of most of them will not permit doing otherwise.

In "LIFE TIMERS," however, any part can be purchased separately and replaced, and the cost of all parts totals the same as the price complete.

$2.00 Complete

Shipped in attractive colored display carton, twelve to the carton. This quality product at its low price is worthy of your consideration. Write for our liberal proposition.

Mechanical Production Company, Milwaukee, Wis., U. S. A.

"COLPIN"

Superior Charging Service

If you could see the hundreds of enthusiastic letters from authorized Ford dealers and other COLPIN Magneto Recharger users!

They state the COLPIN is the quickest and most reliable charger they have ever used.

Recharges Ford magnetos without removing a single nut or bolt. Recharges any kind of magneto. Nothing to wear out. No upkeep expense.

For three years now the COLPIN has given dealers throughout the country splendid money-making service.

Why not write for the convincing evidence?

THE FORD SECTION

Traffic Signs Expedite Service

Efficient Handling of In- and Out-going Traffic Enables This Ford Dealer to Handle Quick Service Jobs Readily

Service Follow-up Keeps Owners in Touch and Satisfied

Stores 100 New Cars in Space Usually Taken by 25. Sells Accessories But Does Not Overstress Them

WELL-ROUNDED departmental organization of the business and an unusually good quick service layout are two of the reasons for the success of Hill & Tibbitts, Ford and Lincoln dealers of Washington, D. C.

The business of selling Fords and giving service to the numerous Ford owners has attracted or developed dealers whose investment runs into large figures. And the very size of the establishments makes good business organization imperative. Because everything is running smoothly, everything taken care of, such establishments often do not have any one prominent feature but closer insight into them shows, always, things of interest.

Hill & Tibbitts' sales and service station is located at 14th St. and Ohio Ave., N. W. The location is but a short distance from Pennsylvania Ave., well known to every Washington visitor, and is well toward the southern end of 14th St., which is Washington's automobile row.

The Hill & Tibbitts Establishment at Washington, D. C.

The building, of brick and concrete, is three stories high and attractive in appearance. On the first floor are the salesrooms, parts stock and the quick service depart-

FORD SECTION

Three Wide Doors With Traffic Signs in the Outside Court, Eliminate Congestion of Incoming and Outgoing Cars

ment. The second floor is taken over by the shop and the third floor is used for new cars and storage.

Needed Information Always Ready

The office is located on a small balcony in the rear of the first floor sales room. The office is not large, compact describes it, but furniture and equipment is well arranged and all needed information for the conduct of the business is there—ready at all times. The answers to my questions about the business were given very quickly. The importance of office system and management is as great in the automobile field as in other lines, but does not always receive the attention it deserves.

The departments of sales, stock, service, accounting and tractor and Lincoln have been established in the Hill & Tibbitts business. There are four members in the firm and each has charge of one department.

The salesroom is attractive in many ways. The end and one side are all glass. Awnings over the show windows, an evergreen hedge between the sidewalk and the building and individual writing desks inside, all help toward creating a favorable impression. Salesmen are paid a straight commission. Prospects turned in by salesmen are reserved for the man reporting them for sixty days. After that time any salesman may go after the prospect to get the order. Government employes furnish the large bulk of prospects and present car owners. Having a set and definite income, sure whether general business be good or bad, these persons are as a class a "good risk" for time sales. Hill & Tibbitts reported that about 50 to 60 per cent of their sales were made on time. Financing is done by a local finance company. This company takes entire charge of the transaction after the notes are signed and the car delivered. They make all routine collections and also take the necessary steps to collect if payments are not met when due.

Convenient Stock Room Location

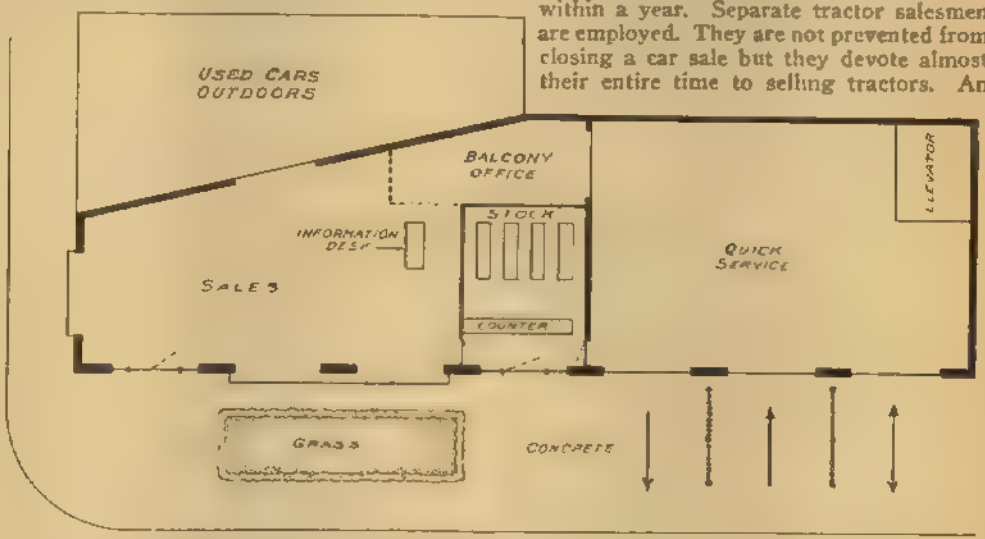
The stock of parts is located on the first floor at about the middle of the building. It is easily reached from the sales room and also from the quick service department. A long counter makes the front of the stock room and parts are kept in steel bins directly back of the counter. All of the bins are in plain sight from the counter, an arrangement which saves time if the customer is not sure of the name of the part wanted but does "know what it looks like when I see it."

The service system is well thought out. Quick service and all inspecting is done on the first floor or on the concrete pavement just outside the building. The building is set back some distance from the property line. In front of the sales windows the extra space is planted in grass with a hedge around it. In front of the service department the space is concreted and is used for outdoor inspection and adjustment. There are three wide doors in the front of the service department. Chains supported on pipe standards divide the three driveways, just as police departments mark safety zones. These chains extend from the building out to the property line. The arrangement of the three doors and three separate driveways avoids any interference between cars going in and coming out. And by using any door

FORD SECTION

for either entrance or exit a passageway in and out of the building can be kept open at all times. This gives a very effective means of traffic control for service stations.

The service department is open from 7.30 in the morning until midnight. After inspection the work needed to put the car in order is listed on an order blank made in triplicate. One copy goes to the customer, one on the car for the shop and the third in the book for record. The service salesman takes care of the blanks and the customer does not have to leave the car and go in the office. He simply signs his name and is free to go. When he calls for the car the papers are brought to him.



Following Up Service Customers

A record is kept of every service customer and every job is recorded. If the customer does not call for more work within three months a letter is sent to him calling his attention to the fact. This plan shows the customer that the firm is taking an interest in him and brings in quite a lot of additional work for the shop.

The shop on the second floor is lighted with factory steel sash in the side walls. The equipment includes a complete electrical test bench, rear stands, engine bearing reaming set, crankshaft jig, drill press, lathe, power grinder, burning-in and running-in stand and an overhead track. Individual steel lockers are provided for employes and there is a well-fitted clean washroom.

During the winter months a stock of new cars is kept on the third floor. By making a frame of 4x4s about four and a half feet high Hill & Tibbitts found that chassis could be stored partly on end, i. e., with the frame at an angle with the floor. Stored in this way with the bodies over the chassis 100 cars can be put in the space formerly taken by 25 cars.

There is a separate department for used cars. A lot next to the building is owned by the company and is used for an outdoor car mart. The lot is fenced and the cars are displayed side by side in a big U-shaped line. Intensive work on sale of used cars moved twenty of them in ten days recently.

Rather to our surprise we learned that some twenty-five tractors had been sold within a year. Separate tractor salesmen are employed. They are not prevented from closing a car sale but they devote almost their entire time to selling tractors. An unexpected sale for tractors came during the heavy snowfall of February a year ago, during which the roof of the Knickerbocker Theatre collapsed. The local traction company made effective use of Fordsons in clearing their tracks of snow. They bought up about all of the tractors and plows to be found in the city.

Car Sales Most Important

Hill & Tibbitts do not push the sale of accessories to extremes. They have found that it is a mistake to recommend too many accessories to car owners, especially those buying a new car. In sales work they emphasize the utility of the car as a means of transportation and avoid any suggestion that a lot of "trimmings" are needed to insure satisfaction. They have a stock of well-selected accessories and they sell them, but sale of cars and service comes first; sales of accessories second in this establishment.

In the near future the lot now used as the used car mart will be used for an addition to the present building. We need bring no further proof of the successful management of the business of this dealer.

FORD SECTION

The E-vap-O Crankcase Heater

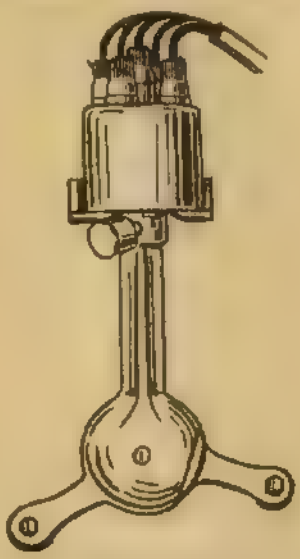
Harvey E. Mack Co.
1229 Harmon Pl., Minneapolis, Minn.

Improper lubrication, due to the oil becoming diluted through condensation of moisture in the crankcase can be avoided by the use of the E-vap-O Crankcase Heater. As shown in the above view this device consists of a long cylindrical drum, half submerged in the oil, brazed into the crankcase and connected with the exhaust manifold directly back of the engine. The hot exhaust, right from the engine passing back and forth through the drum, radiates sufficient heat to vaporize any moisture.

The D. & D. Steering Column Brace

L. H. Daley & Co., Columbus, Ohio

By stabilizing the Ford steering column, this brace eliminates vibration of the steering wheel, and in general insures comfort in driving and better steering control. It attaches securely around the steering column and to the dash as shown in the above view. It is made of a special alloy of aluminum and steel, with an enhancing nickel finish. List price, $1.50.



The Schroeder Ignitor

The John F. Fant Mfg Co.
Bridgeport, Conn.

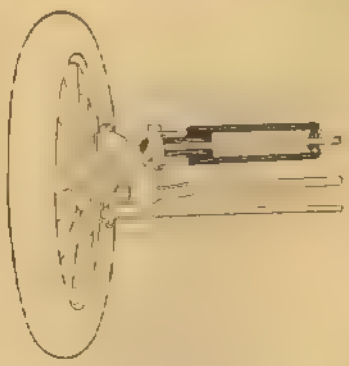
manufacturers of this device, describe it as an improved one-coil ignition system, which is designed to be operated in conjunction with the Ford fly wheel magneto, and also to give satisfactory results on either a storage battery or dry cells in case the flywheel magneto should become inoperative. With this system a large high-conductivity brush and large low-tension contact segments are employed, allowing plenty of radiating surface to carry the excess amperage or heat which is generated at the higher speeds by the Ford flywheel magneto. The device is enclosed in a single casing of bakelite of relatively small size and is operated by a single shaft carrying a rotor, which is provided with a primary and secondary circuit conductor. The Schroeder Ignitor is elevated by a bronze bracket and driven by bevel gears at its base

New Ford Roadster Body

Lima Sheet Metal Products Company
Lima, Ohio

have added a new Ford Roadster Body to their Limaco line of Ford and Fordson sheet metal parts. It is stated that very little work is necessary to assemble this job as all holes are drilled to coincide with the standard Ford chassis. The body is made in two units entirely from sheet steel and assembled by the welding process over frame or base plates of 14-gage sheet steel. The instrument-board supports dash board and seat-back supports are made from 16-gage sheet steel. All outer sheets are of 20-gage special body stock. Provision is made in the rear of the body to take the standard Ford round tank an extension filler cap being furnished. The back cushion is mounted on a removable board making easier access to the large rear engage compartment. The hood is of the three-hinge type with the rear semi-exposed top hinge. The tail gate sheet of 16 and 18 gage sheet steel has aluminum molding trimming in the front. The fender equipment consists of a complete set of deep crown rolled fenders with irons and with large front splasher covering the front axle. The drop forged interslung front axle of high grade steel is heat treated and the necessary fixtures for lowering the frame at the rear end are included. The body is finished in two coats of rich gray baked-on enamel and all other parts are finished in two coats of black baked-on enamel. The entire assembly is shipped in two crates.

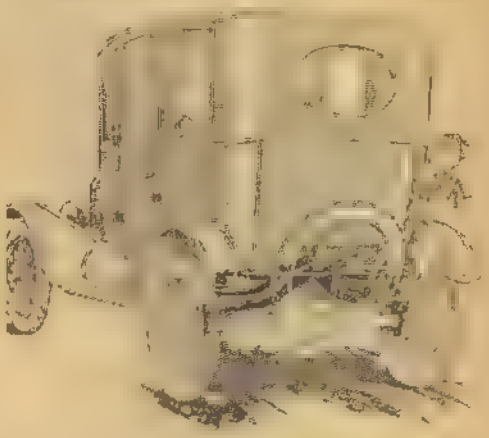
FORD SECTION



Campbell Anti-Rattlers for Ford and All Cars With Open End Rods

Campbell Wire Specialty Works
South Bend, Ind.

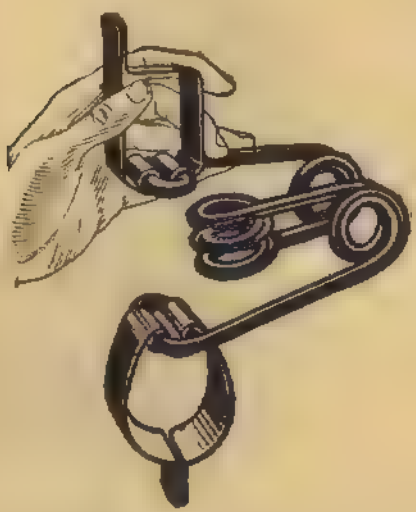
The Campbell Anti-Rattlers are for the purpose of providing better control of the car in the steering and braking action, as they are applied on the brake rod, steering arm and steering rod. The above view shows it installed on the steering rod. They are well made, japanned (except brake rod anti-rattlers) and packed in individual attractive two-color cartons—one set per carton. Steering rod, two per set—brake rod, four per set—steering arm, one per set. Prices of steering rod and brake rod—one gross at $21.60 per gross sets, ten gross at $20.10 per gross sets. Prices of steering arm—one gross at $18.70 per gross, ten gross at $17.25 per gross.



A New Spring for Ford Cars

Detroit Approved Spring Co.
Detroit, Mich.

The outstanding feature of the new Detroit Approved Spring is its criss-cross construction. The system consists, in reality, of two complete springs, each running from the perch on one side to the shackle on the other, intersecting at the center. At the latter point there is a slide or "glance" bearing on which the body of the car rests and through which each of the springs slides, thus increasing the swing of the shackles and, as the manufacturers say, "shooting the shocks into the air." Either one of the two springs comprising this system is equivalent to, and has both the length and strength of the regularly installed Ford rear spring system. Either spring will carry a maximum Ford load. Hence the system is said to impart not only more comfort and flexibility, but great strength as well. An interesting feature is their ease of installation. Neither the rear wheels nor perches have to be removed to make the installation.



The Stopshock; a Shock Absorber

Multi Mfg. Co.
343 S. Dearborn St., Chicago, Ill.

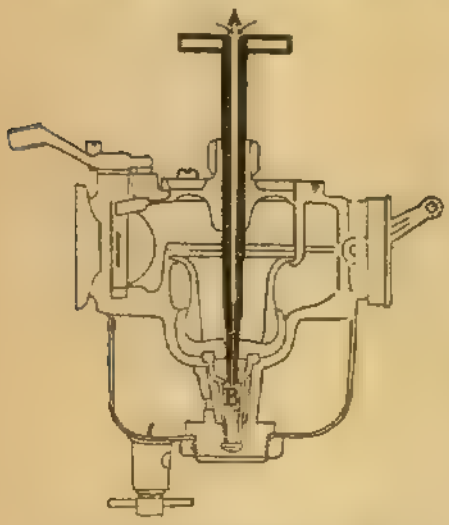
The Stopshock is a strong, steel, triple-action spring shock absorber. A set of four placed between the Ford spring and axles in front and rear are specified to impart better riding qualities and steering control. Prices, set of four, for Ford passenger car, $7.50; set of two for Ford delivery cars, $4.

The New Mutual "Multi-fit" Demountable Replacement Wheel

Mutual Wheel Co., Moline, Ill

The specially designed steel felloe of this new demountable replacement wheel is so constructed that it will take the various types of demountable rims now used on Ford cars as original equipment. It embodies the desirable feature of fitting many rims. With this wheel the old rim, hub, demountable rim bolts, nuts and wedges are used. The spokes are of high-grade wheel hickory. These wheels are finished black and crated in standard crates of eight wheels each.

FORD SECTION



The Pre-Mixing Needle Valve

Embler Carburetor Co
303 Fifth Ave., New York City

The Pre-Mixing Needle Valve is a device for breaking up the heavy fuel into small particles. This is accomplished by means of a small air passage that runs through the Pre-Mixing Needle Valve. One end (A) is open to the atmosphere, and the lower end (B), extends below the gasoline level in the needle valve seat. The suction created by the engine brings to bear a vacuum upon this needle valve seat. This in turn draws a certain amount of gasoline through the seat by the needle valve point (B). This vacuum also draws air from the atmosphere through the opening (A), which travels down and out at opening (B) and comes up through the gasoline around the seat at a very high velocity, and breaks the gasoline up into a very fine spray.

The Apco Dash Oil Gauge

Apco Mfg. Co., Providence, R. I.

This solid cast aluminum gage fastens to the Ford instrument board. A hollow wire leads to an air pressure chamber which is threaded into the lower petcock hole in the Ford engine. The indicating liquid in the body of the gage is controlled entirely by the air pressure in the tube through which no oil or liquid passes. List price, $3.

Storm-King Roller Swinging-Door Enclosure for Fords

Storm King Mfg. Co., Inc., Hortonville, Wis

is now offering for Fords a roller swinging-door enclosure, known as the Storm King and which operates on spring rollers. Door rods are permanently attached to the front and rear door curtains and roll with them. Thus the door curtains swing with the doors when they are opened. By simply lifting the front-door rod from its socket the front door curtain rolls up automatically into a metal container attached to the windshield. In a like manner the rear-door curtain is rolled on a roller, which after releasing a spring catch, is swung into a metal container under the top. The center and rear curtains are rolled up and strapped. This enclosure is always available when required and when in use gives good protection to the passengers against the elements. It is easily attached and complete instructions are included in every set. Each enclosure is packed in a solid fiber container.

The Improved Rush Timer

W. B. Rush & Co., Los Angeles, Cal.

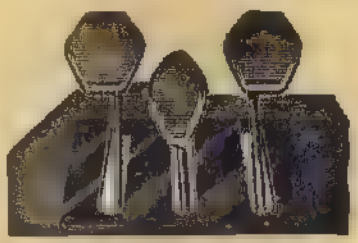
The main feature of this new timer, other than the presence of the Rush Timer Roller, is the detachable fibre contact ring which fits inside the timer case. This ring is reversible as well as detachable, insuring even wear and long life. It can be replaced without removing the timer wires. All parts, the case, the contact ring, and the timer roller, are interchangeable and are sold complete or separately. This means greater economy as one needs to renew only the particular part that is worn. All materials used are high grade. Price, complete, $3

FORD SECTION

Van Auken Tops for Converting Ford Touring and Roadster Cars Into Closed Models

Van Auken Co., Pontiac, Mich.

In outlining the construction of this top emphasizes the fact that 95 per cent of the material used is steel and glass. The wide glass windows afford clear vision at any angle, and they together with the doors are set in a rubber channel, eliminating any chance of rattle. The windows slide to any desired position, thereby providing ventilation. The doors and windows can be removed without tools, if desired. The all-metal panels are finished in baked enamel. The roof, which is constructed of metal and wood, is covered with seamless one piece, black enameled duck. The coupe top embodies the same advantages as the top for the touring car, in that the windows are instantly removable. Retail prices: All touring model tops, $95 f. o. b. Pontiac, Mich., war tax extra; roadster top, $80 f. o. b. Pontiac, Mich., war tax extra. This company has also developed a new mail man's window. The regular one-piece window is removed and the two-piece carrier window substituted. The new window has a sliding lower section, which when raised in position is held by a steel spring catch. A slight pressure releases it, and it drops back into place, where it is said to be air-tight and rattle-proof.



"Perfection" Ford Extension Pedal Pads

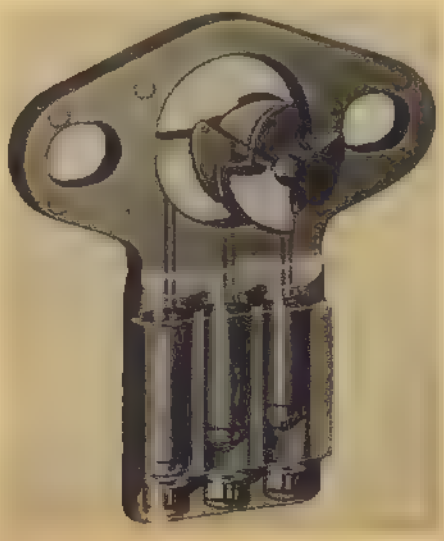
Auto Pedal Pad Co., Inc.
318 W. 52nd St., New York City

"Perfection" pads are a safeguard against the foot slipping and an aid to driving comfort. They are moulded from high-grade solid rubber. The upper surface with deep corrugated ribs, insures a firm suction grip for the foot. The pad is firmly secured in a cold rolled steel frame, which is attached to the pedal with metal prongs. The frame is handsomely nickeled.

The Thor Manifold for Ford Passenger Cars and Trucks

Thor Manifold Co.
1842 Ash St., Detroit, Mich.

The Thor Manifold is designed so as to enable the Ford engine to operate at maximum efficiency on even low grade fuel, states the manufacturer. It combines in one casting the inlet and exhaust manifolds. A single wall of metal separates the hot burnt gases from the incoming gasoline and air, imparting the necessary heat to dry and gasify the engine fuel. The manufacturer also calls attention to the smooth outline and properly proportioned inlet and exhaust apertures of this manifold.

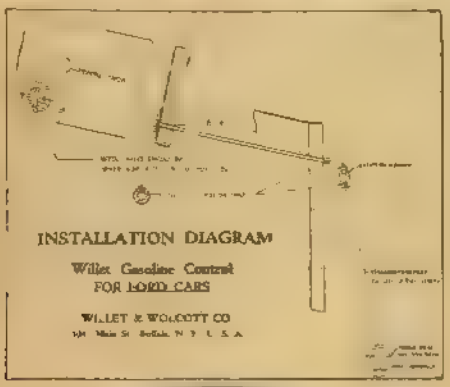


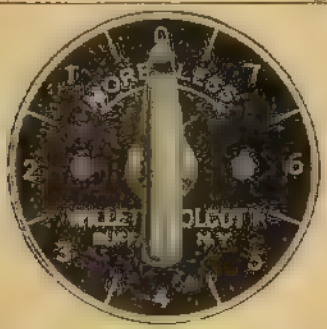
Unique Gas Saving Device for Fords

Fyrac Mfg. Co., Rockford, Ill.

Announces a unique type of gas saver for Ford cars, which is claimed to effect a saving of from 25 to 40 per cent in the amount of gas consumed. The Fyrac Gas Saver embodies two principles, namely, the admission of air in the proper quantities in the intake manifold and the breaking up of the gasoline thoroughly after it has been mixed with the air. It operates on a three-speed basis: At slow speed, one of the chambers admitting air is opened through the upward air pressure against a bullet-like weight, at medium speed, the second chamber opens. The air and gas are then mixed and passed through three vanes, as shown in the illustration and are thoroughly mixed, and the combination broken up, or vaporized. From there the gas passes into the intake manifold and into the engine. This Gas Saver, which, it is said, requires only fifteen minutes to install, is guaranteed to give satisfactory results.

FORD SECTION





The Willet Carburetor Control for Ford Cars

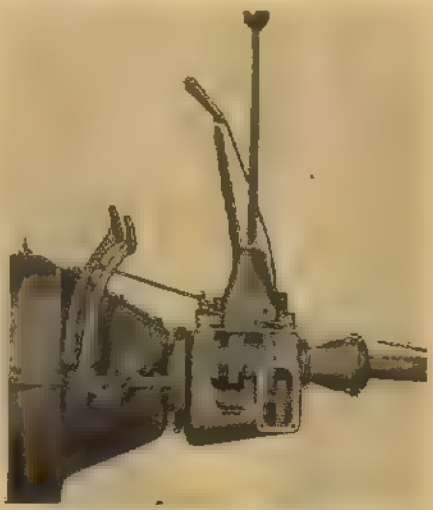
Willet & Wolcott
1461 Main St., Buffalo, N. Y.

The Willet Carburetor Control has been developed to enable the driver to adjust the carburetor directly from the seat while the car is being driven. It is mounted on the instrument board so that it is not only easy to reach, but can also be easily seen. Price, $1.50. West of the Mississippi, $1.60.

Bruno Two-Wire Timer for Fords

The Bigelow Bruno Mfg. Co.
537 South Dearborn St., Chicago, Ill.

A distinctive feature of this timer is that it employs only two wires, both of which are placed on the side opposite to the fan belt, where they are less subject to wear. Its case of bakelite is said to be proof against short circuits, rust, moisture and oil. The revolving contacts and the stationary contacts are made of pure copper. The brush holders are of brass, thus making a complete electrical circuit composed entirely of brass and copper.



Brooklyn Three-Speed, Sliding-Gear Transmission Equipment for Ford Cars and Trucks

The Brooklyn Mfg. Co.
7804 Carnegie Ave., Cleveland, Ohio

is manufacturing a Ford auxiliary transmission which gives the Ford a control consisting of left pedal, clutch; right pedal, service brake or drums; and a standard gear shift of three speeds forward and one reverse, with the emergency brake lever affixed to the transmission next to the gear control and operating internally on the drums in the regular Ford manner.

Snap Exhaust Relief Valve (Cut-Out) for Ford Cars

Morse Mfg. Co.
325 West Fayette St., Syracuse, N. Y.

Simple in construction, light in weight and sturdily made of high-grade materials summarize the merits of this cut-out. The valve, with big opening 3½ in. long, is securely clamped with steel bands over the opening in the exhaust pipe. The valve operates lengthwise of the pipe without obstructing the outlet and is controlled by a tempered steel spring which is free from the heat of the exhaust and holds the valve either fully open or tightly closed. The simple rocking pedal with no hooks or catches operates the valve through an adjustable steel rod. Packed in individual cartons 1½ x 3 x 12 in., a convenient size for shelf and shipped in substantial cases containing 100 outfits weighing 170 lb., and 60 outfits weighing approximately 100 lb., or minimum freight weight. List price, $1.50.

FORD SECTION

Double Snub, Auxiliary-Spring Ford Snubber

Disco Electric Mfg. Co., Detroit, Mich.

A spring snubber completely checking every shock, and the auxiliary spring to catch the rebound, is the simple principle involved in this Ford Snubber. The spring-base of the Double Snub rests freely on the leaf-spring of the car, allowing free action. It does not crimp or bind the springs. At the downward shock, the slightest movement of the leaf-spring is instantly checked by the main spring of the snubber. On the rebound, the upward throw of the leaf-spring is caught and absorbed by the auxiliary spring of the snubber. Thus the car is cushioned against rebounds sideway bumps and shocks. It is installed without removing wheels or changing perches, or construction of the car in any way.

Snap Foot Accelerator for Ford Cars

Morse Mfg. Co
325 West Fayette St., Syracuse, N. Y.

Simplicity, easy installation, direct action on throttle with no lost motion, comfortable foot rest and finish in brass and nickel, are the features of the Snap Accelerator. The foot rod is supported independently of the floor board by a substantial bracket held by the tranmission cover screws. The lower end operating in a small lever is held by a throttle adjusting screw and lock nut. A small free fitting lever on the hand throttle shaft of the steering column provides an independent action of hand and foot control. A foot rest of most standard and comfortable type is included and a long tempered steel spring cushions the foot action. List price, $1 50.

The New Defender Door Handle Lock for Ford Closed Cars

Defender Auto Lock Co.
Allegan, Mich.

The lock in this new Defender Door Handle is so constructed that any sagging that might occur in the Ford door does not interfere with the proper functioning of the lock. The locking device is designed to give positive protection, without adjustments. The plunger must positively release the locking pin and none but the correct key will unlock this brass jacketed cylinder. For the left door, a dummy handle to match is supplied. The left door can be opened from the inside only. For locking no key is required as the locking cylinder is built into the right door handle. After closing the door, the plunger is simply pressed. This automatically releases the locking pin. The key is not required until the car owner wishes to re-enter the car. The correct key instantly unlocks the cylinder. Several hundred key changes are used with Defender Door Locks. The door handle has a sturdy nickel-plated finish. A small screw-driver is the only tool needed to install this door handle lock. Price, $4 00 per pair, complete with two brass keys.

Inland Grease Retainers

Inland Products Co., Inc., St. Louis, Mo.

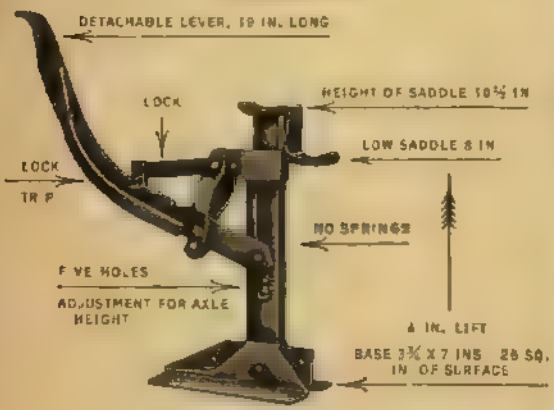
Inland Grease Retainer, when installed in the rear axle prevent leakage of grease. They are made of three extra high-grade felt washers, one composition rubber washer, steel cup and two retaining rings. They remain stationary—and two rivets in the present axle housing keep them from turning. It is mentioned that they do not cause wear on the axle. Price, each, $0.75.

FORD SECTION

Aetna Differential Thrust Bearing

Aetna Ball Bearing Mfg. Co
213 Institute Place, Chicago, Ill.

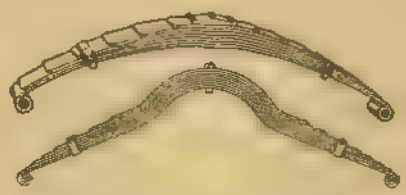
The Aetna Differential Thrust Bearing is a heavy-duty bearing for Ford and Chevrolet 490 cars. It is designed to replace the two metal washers originally installed in the car. The thrust plates are made of heavy steel, properly hardened and ground. The ball retainer is of the manufacturer's own "staggered" ball construction, causing each ball in rotation to travel a separate circular path on the flat ground surface of the thrust plates. This, it is said, gives a wide bearing surface and great load carrying capacity.



The "Henry" One-Lift Auto Jack

Wolverine Specialty Mfg. Co.
Battle Creek, Mich.

The "Henry" One-Lift Auto Jack enables the user to avoid dirt and injury to hands and clothes, as the jack is simply placed in position, and the elevating and lowering is done with the foot. One pressure of the foot raises the load and another lowers it. It has five different adjustments as to height, and a straight lift of 4 in. It is also adaptable for other light cars, such as Chevrolet, light Overland, Gray, Dort, etc. Steel is used in its construction.



Titanic Springs for Fords

Tuthill Spring Co., Chicago, Ill.

The Titanic unbreakable "hump center" front spring is especially adapted to the Ford passenger cars and trucks because of its ability to withstand hard usage and overloading. It is made of a special quality of alloy steel, oil tempered, carefully tested and is easy to install on either double or single spring-clip cars. The top illustration shows the No. 102 7-plate "hump-center" spring and the lower the No. 105 8-plate, bolt-center spring

Cook 2-in-1 Timer

Cook Commutator Co., Brooklyn, N. Y.

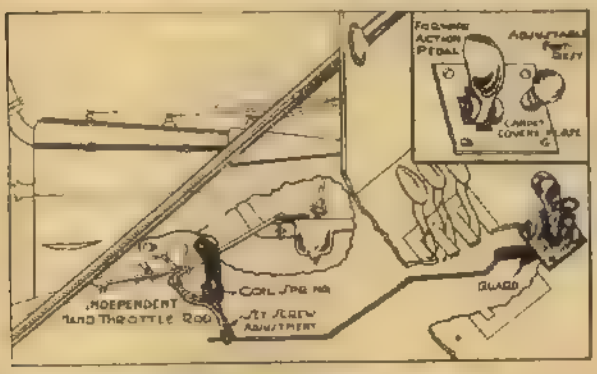
The Cook 2-in-1 Timer has double contact points which work in combination with double brushes traveling over a highly polished surface. All wires are concealed and consequently protected from grease, oil, water and the fan belt. The contact points are securely moulded in condensite.

The Lowery Freewheel

Lowery & Blakeman, Mfrs., Atlanta, Ga.

The Freewheel is operated by a special quarter turn Yale lock conveniently placed on top of the wheel. The special tilt feature, as illustrated, is operated by a spring catch and has nothing to do with the locking mechanism. Parts are enclosed in case-hardened steel. Price, $15.

FORD SECTION



The Stoner Accelerator

Stoner Equipment Co.
1902 S. Western Ave.
Chicago, Ill.

The accompanying illustrations clearly show the installation of the Stoner Foothrottle which lists at $1 50. The parts are malleable castings and nickel plated steel. It has a spring to insure proper tension and a balcrank action with a set screw adjustment

Ne-To Ignition for Ford

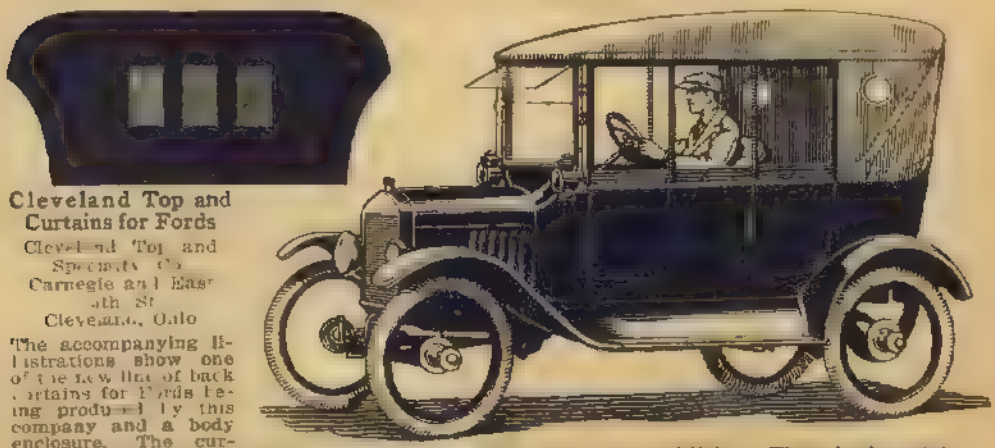
The Ne-To Company
201 J. M. Studebaker Bldg., South Bend, Ind

This outfit comprises an ignition system using current from the Ford magneto doing away with the vibrators. It has a standard make and break system operating mechanically, a high tension distributor and effective condenser. This device will also operate successfuly on the battery

Disteel Wheels for Fords

Disteel Wheel Corp., Detroit, Mich.

This concern is marketing a set of its well-known wheels made especially for Fords at the price of $75 f.o.b. Detroit. This equipment includes five wheels with rims, two each front and rear hubs, a spare wheel carrier bracket and a license bracket. The wheels are painted.



Cleveland Top and Curtains for Fords

Cleveland Top and Specialty Co.
Carnegie and East 55th St.
Cleveland, Ohio

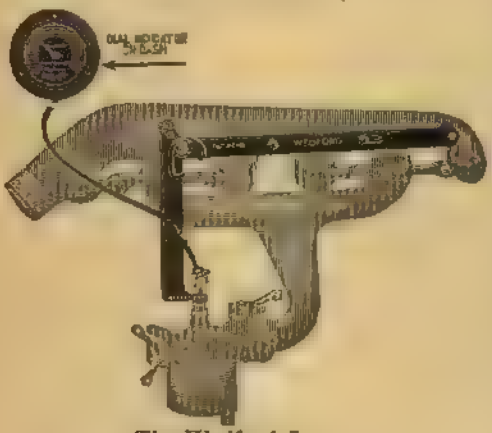
The accompanying illustrations show one of the new line of back curtains for Fords being produced by this company and a body enclosure. The curtains can be had as shown with three lights or with one or two oval lights. These back curtains are made of first quality rubber drill The top enclosure provides exceptionally clear vision for the driver and passengers.

FORD SECTION

Tip-Top Top for Fords

Tip-Top Mfg. Co., Los Angeles, Calif.

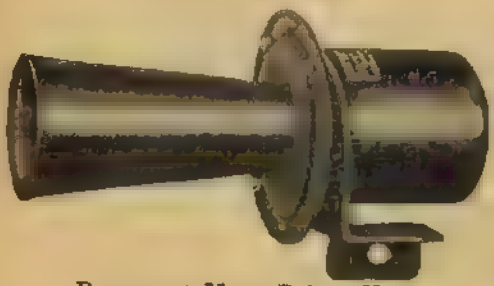
This illustration shows this one-man top attachment for the Ford touring car. The manufacturer states that this requires but little work to attach and can be installed without removing the cover. Lists at $6 00



The Wedford Savex

The Wedler-Shuford Co.
3540 Olive St., St. Louis, Mo.

This device is a novel outfit. It regulates the richness of the mixture according to the temperature of the engine and moreover has an indicator dial on the dash to show the temperature of the engine. The expansion of the manifold as it heats up is very slight, but this is multiplied by the levers as can be seen. Thus as the manifold expands the spray nozzle gear furnished, is moved so as to cut down the richness of the mixture. The lower end of the perpendicular arm has teeth which mesh with the small gear mounted on top of the carburetor. Connection is also made from the nozzle control to the dial indicator on the dash. This device lists at $7 50.

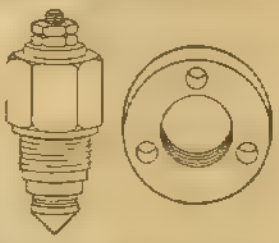


Paramount Motor-Driven Horn

Auto Metal Products Co., Inc.
432 East 71st St., New York City

This illustration shows the Model 5U Paramount Horn designed for the Ford car. It is known as the Ford Model and lists at $5 00 in baked black enamel finish. It is 9½ in. long.

E-Z-2-Kleen Magneto Plug



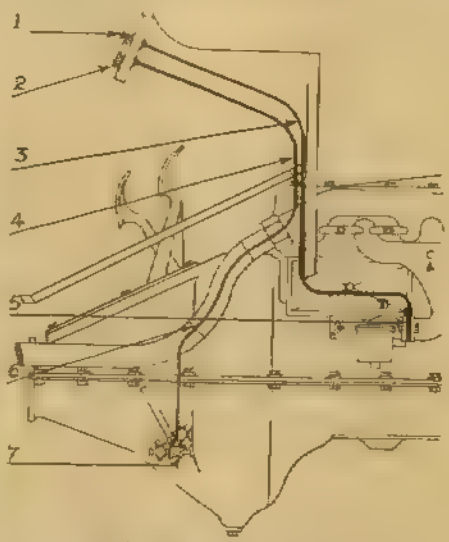
The Hazle Specialty Company
Hazleton, Pa

This handy device comprises a gasket for the transmission cover and a new plug. Its purpose is to provide an easily-cleaned magneto plug. The gasket is screwed on permanently and the plug itself screws into the gasket. The plug is made of such a size that the Ford spark plug wrench can be used to tighten and remove it. The plug is made of steel and the adapting flange is of steel also. The spring anchor, spring and contact points are made of steel. The insulating bushing of hard rubber

Ford Valve Tools

Liberty Metal Products Company
Berea, Ohio

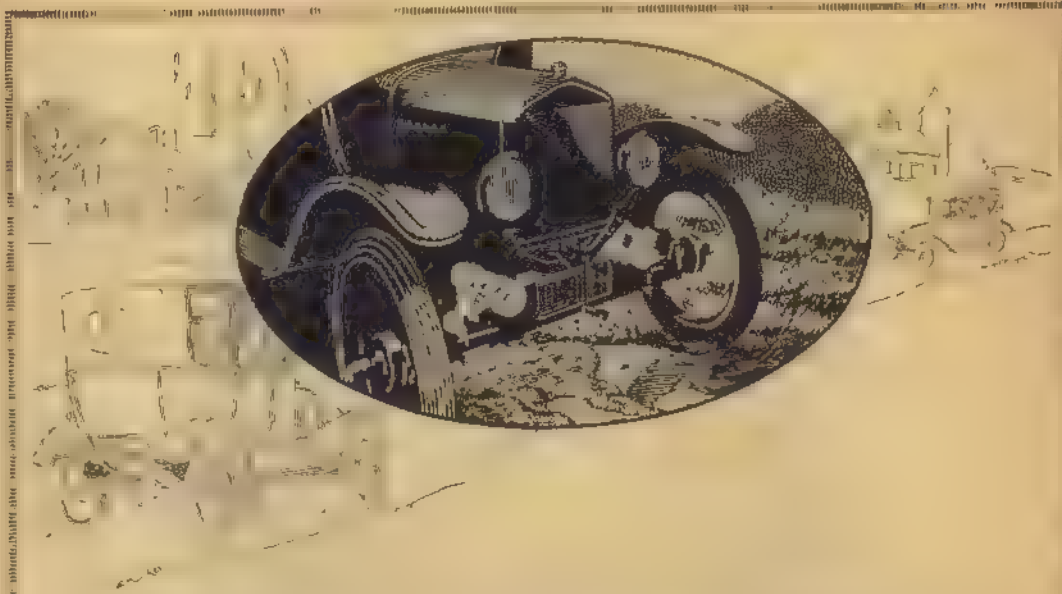
The accompanying illustration shows a Ford Valve Resurfacer and Reseater. The Resurfacer is accurately made and will do its work quickly. The cutter has eight cutting edges and lists at $0.65. The Ford Valve Reseater lists at $1.00. It has a detachable pilot and spiral cutters. Over sizes can be used if desired



Perfection Sight Oil Gage

North Chicago Machine Co.
North Chicago, Ill.

The accompanying sketch illustrates the installation of this device. It includes all the fittings necessary to install it and also a nickel plated indicator for the instrument board. The vacuum of the intake manifold is utilized to draw the oil up the gage. If the oil shows back of the glass face of the gage the petcock on the dial is closed and the oil returns to the crankcase. If no oil is drawn up it is an indication that oil will soon be needed. The price of this device is $5.00.



You Know the Hassler is Right!

YOU also know that devices you are sometimes urged to sell for various reasons in place of Hasslers do not equal them in riding comfort, in economy, or in the satisfaction your customer gets.

Experienced dealers who have sold Hasslers have seen their Hassler business grow and grow until the profits have often been sufficient to pay the rent.

When they have tried to push something else they have sold a few sets with great effort and have seen the business fall off rapidly while selling got harder all the time.

The public accepts Hasslers. They have a wonderful standing—a wonderful record for efficiency and satisfaction.

Hassler distributors are able to fill your orders the day they receive them. You never have to wait.

You turn your stock fast; you are supported by the finest service from the manufacturer. You sell a product the public really wants. And it pays!

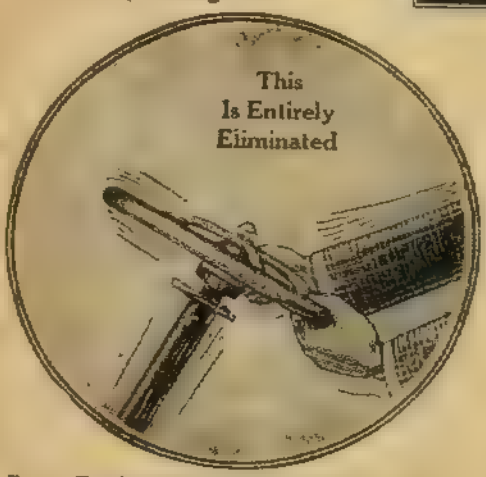
Every Sale Brings a Dozen New Customers

D & D Steering Column Brace

HERE'S an accessory that customers are *buying*—the D & D Steering Column Brace for Fords.

Wherever it's introduced the story is the same—large sales, quick turnover and good profits for dealers.

The reason is simple. It's because the brace is needed by every Ford owner and priced 'way down so he can buy—a combination which is what every wide-awake dealer is looking for.



Every Ford Owner Contends With This
D & D Stops It!

Price, Only $1.50

Over 100,000 Sold in Two Years

The D & D Brace is made of beautiful aluminum alloy—rust-proof, strong and handsome. Can be attached in two minutes without drilling and with only a wrench (this is a big selling asset when you show it to customers). Absolutely stops all vibration in the steering column.

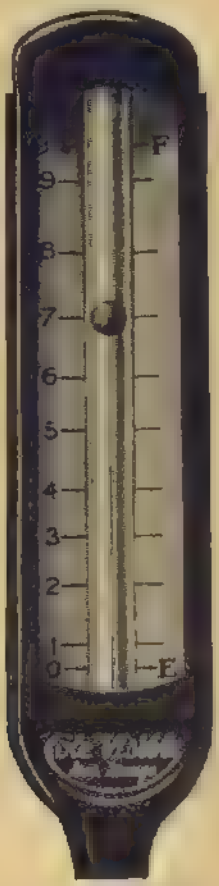
So satisfactory and so serviceable that out of over 100,000 sold in two years not one has been returned. Our sales are increasing, so will yours.

DEALERS: A sample order of D & D Braces will only cost a few dollars. It's worth a trial on an article that has already sold over 100,000. For *your* customers will want it as surely as have others. And the commissions are liberal.

JOBBERS: Get a sample order of this proven device. Let your salesmen take it on their next trip, for *it's a money-maker.*

L. H. DALEY & CO. **Columbus, Ohio**

Actual Size



The Cole Visible Gasoline Gauge Tells

1. How much gasoline is in the tank. The red indicator is always visible.
2. How much gasoline to order at the filling station.
3. How much gasoline the Ford owner gets when he buys.
4. How many miles to the gallon.

$6.00 Guaranteed for One Year

Big Profit for You —Sell Every Ford Owner

Sell them all. Every Ford owner sees the need of the Cole mechanically operated gasoline gauge. Dealers and jobbers who now sell it say the Cole Visible Gauge is a fast mover and a big money maker.

The Cole Gauge attaches to the instrument board and is always visible from the driver's seat. Fits any Ford model and can be installed in less than an hour.

Demand Increasing Daily

The Ford owner is quick to see the advantage. He knows his exact gasoline supply at all times. He does not forget to refill.

Made by the company now furnishing special model gasoline gauges to sixteen automobile manufacturers as standard equipment. The Ford owner wants the same refinement and convenience. You can sell it to him at low cost—and good profit.

Send back the coupon or write us. Read our illustrated literature and complete terms of the money-making offer to live dealers and jobbers.

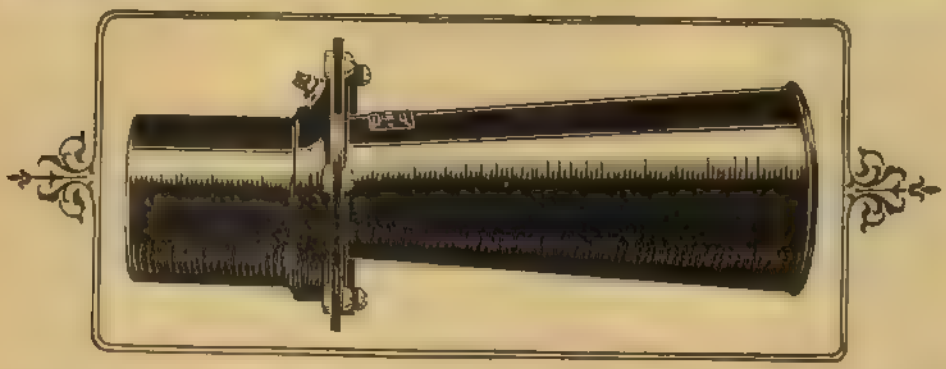
SPARTON MOTORHORNS



Do your customers' cars speak Sparton? —Sparton is the language of *safety*

ANYWHERE, at any time, the clear, resonant voice of the Sparton sounds a message of safety, safety for the driver and his passengers, safety for pedestrians and occupants of other machines.

Point this out to your customers. Convince them that once their cars are Sparton equipped, once they have learned to rely on Sparton's authoritative voice—always so thoroughly dependable—they will find new peace of mind, new pleasure in motoring.

The price of the Sparton Model AJ for Ford cars is now only $5.00. This is not a new horn—not changed in any way, nor lowered in quality. It is the same dependable Model AJ Sparton which for years has given such satisfactory service to thousands of car owners.

This new low price on the Model AJ offers you an opportunity to increase materially your sales and your profits. The safety insurance of the Sparton is within the reach of every one of your customers. Get them to make their cars speak Sparton and you will build bigger business without increasing your overhead.

Let Sparton speak for itself

This attractive display board, complete with wiring, given free of charge with your initial order for six horns, the three on the board and three others. Just tell your customers to press the button and let the Sparton speak for itself. If you are not now handling the Sparton, write for details of our sales policy.

The Open Secret of
Red Star Timer
Success

Is Due to the Perfect Combination of Working Parts

EXHAUSTIVE tests and years of hard wear prove that the Red Star Timer is made right. Each part is made of the highest grade material. This gives Red Stars the perfect combination of working parts, vital to the life and success of a timer.

The weakness of ordinary timers is caused by lack of scientific knowledge in selecting material, a disregard for the necessity of having parts that work properly together and a false idea of economy in making timers.

The Roller and Race Work Perfectly Together

After months of the hardest kind of heavy duty the Red Star Roller will continue to make a perfect contact. The Race and Roller will be smooth and even—without pits or bumps.

The Red Star is Scientifically Correct

Ford owners all over the United States have recognized the outstanding superiority of the Red Star 100 point carbon tool steel roller.

The roller revolves on a chrome-nickel steel bushing. Both are tempered to exactly the proper hardness. Exhaustive tests determined this to be the best possible construction.

For years Ford owners have used and insisted on Red Star Timers because they stand up. Be sure you get a Red Star—the Red Star is on the box and stamped on the shell.

Look at the Red Star Roller!

(Illustrat ons show magnified cross sections)

The ordinary roller, surface hardened, quickly wears uneven, gets bumpy and pounds the race. Causing poor contact, loss of power and endless motor trouble.

The Red Star Roller is made of 100 point carbon tool steel. Uniform throughout. Ground and polished to a mirror surface. Always makes a perfect contact.

CONNECTICUT 190-Y

Replacement Switch

Here is a high-grade Ignition and Lighting control, a single unit that will replace practically any of the various round-type standard equipment switches.

Mechanical Features

Handsomely finished beveled aluminum and black enamel face plate, size to cover space taken by regular round-type switch.

Complete with studs long enough for mounting on either wood or metal dash.

Switch block of CETEC, a high dielectric of great mechanical strength.

Toggle action (crosswise) for both ignition and lighting controls.

Lever, with Bright, Dim, and Off positions for lights—

Pin tumbler lock (with changes) with On and Off positions for the ignition.

Merchandising Advantages

The universal adaptability of the CONNECTICUT 190-Y switch not only enables you to meet practically every replacement order you get, but eliminates the necessity of carrying a large assortment of switches.

Packed in individual cartons with wiring diagram and mounting instructions. Price, $4.50.

How You Can Get the Most Business From Ford Drivers!

There are a large number of Fords in your locality, and most of them need spark plugs frequently. The only way for you to get a lion's share of this enormous replacement business is by offering something better. No Ford driver is interested in changing brands, unless he gets better plugs, but for these he is looking—AC 1075's are not only better, they are the best.

They may sell for a trifle more than ordinary plugs for Fords; but, built as they are to end most motor ills, they are more than worth the difference, and they afford you a fair margin of profit.

You can, therefore, replace at a good profit the plugs on Fords, simply by showing their drivers why AC 1075's—as illustrated—have the biggest advantages of any plugs ever made for the requirements of Ford engines.

A nation-wide advertising campaign has been started and will be carried on throughout the year to tell Ford owners everywhere of this better plug for Ford engines.

Put an AC 1075 Quick Seller on your counter. It makes a special department of your Ford plug business, holds your stock conveniently, ties up with AC national advertising, and acts as a constant reminder to the Ford driver that AC 1075's are the plugs he should use.

You are overlooking the biggest field of profit in spark-plug selling, if you are not yet pushing AC 1075's among Ford drivers.

AC Spark Plug Company, FLINT, *Michigan*

U. S. Pat. No. 1,186,727, April 18, 1916

Why not 10 Gallons Instead of Five?

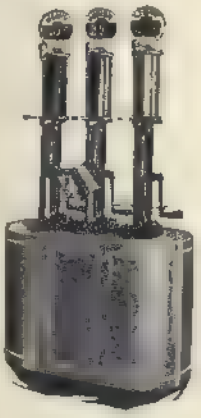
It's just as easy to sell ten with this 10 Gallon American Visible Pump—and your SALES and PROFITS are both increased. And it SAVES your customer ANOTHER STOP.

American Visible Curb Pump

The 10 gallon pump has all of those desirable features and superior qualities that have made the American Visible the leader among visible pumps.

Its action is positive and quick it is hand operated, absolutely safe –no danger from breakage, fire or explosion. All the gasoline is filtered, and an accurate meter, furnished without extra charge, registers all gasoline pumped into container.

Write us for full information and our VERY REASONABLE PRICES.



American Visible Lubricating Outfit

Serves clean oil *quickly.* Pump forces oil into measure—no dripping—no waiting for gravity flow. Holds three grades of oil—mounted on casters to roll in and out of garage. Convenient, attractive and more than *doubles* the sales of oil.

PUMP No. 494-V

CONTAINERS

Either five or ten gallon visible containers for other makes of pumps furnished complete with full instructions for attaching.

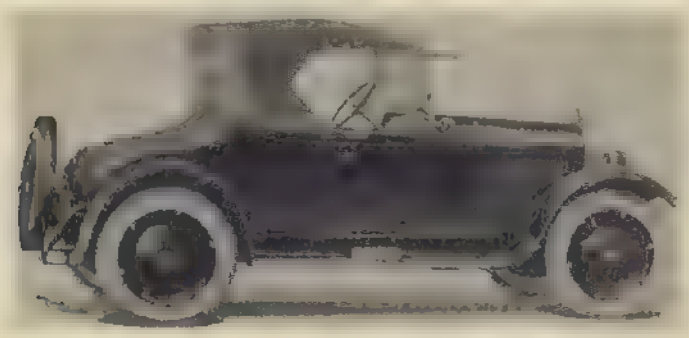
F. o. b. factory

Buick Introduces Four Sport Model

THE exhibit of Buick cars introduced a sport roadster model mounted on the 4-cylinder chassis, illustration of which appears herewith. It is smartly trimmed with nickel, including radiator, windshield wiper, emergency brake lever, gear shift lever, running board guard plates, deck rails, etc. It is equipped with drum headlights and cowl lights, Moto-Meter with special radiator cap, adjustable windshield wings and rear vision mirror, also a ventilator. This new model uses the standard 4-cylinder chassis of 109-in. wheelbase and has tires 31 x 4 in. It is known as Model 39 and lists at $1025 f.o.b. the factory. The steering wheel is walnut. Door pockets provide storage space for the side curtains, and a large compartment for packages is in back of driver's seat. A luggage compartment is also located in rear deck.

The engine of the 4-cylinder chassis has a new feature in connection with the camshaft to reduce noise at low engine speeds. This feature is described elsewhere in this issue.

Improvements in the Buick Six are to be noticed as follows: Wheels are made stronger, the rear springs are longer and the pivot has been moved toward the rear, stronger frame, higher radiator, gear-set lock, standard on all Buicks, full force feed lubrication of the engine to all bearings and the use of composition push rods of steel and aluminum, so calculated that their elongation under heat exactly compensates for cylinder expansion, thus maintaining valve clearances constant under all running conditions. This latter feature makes it possible to give the proper running clearance in the valve mechanism when the engine is cold.



Buick Four-Cylinder Sport Model, Two-Passenger Roadster Which Lists at $1025.

Wills St. Claire Introduces Two New Models

The C. H. Wills & Co., of Marysville, Mich., exhibited two new open models on a longer wheelbase chassis, namely, 127-in. These models are the 7-passenger touring car listing at $2790, and the Gray Goose Special, 4-passenger, close-coupled model listing at $2875. This latter model comes with the trunk mounted at the rear, tonneau windshield and visor. The bodies are Fisher make and the top on the 7-passenger is of the permanent type. The 4-passenger model was exhibited at the show and the 7-passenger at the New York agency.

The Wills Sainte Claire Gray Goose Special

This is a car for touring and general practical use. It is mounted on the 127-in. wheelbase chassis. It is of the close-coupled type and accommodates four passengers.

NEW CARS AND MODELS

Haynes Exhibits New 57 Sport Brougham

In addition to the other new models of the Haynes cars described recently, the Haynes Automobile Co., of Kokomo, Ind., introduced the new Haynes 57 sport brougham, a 5-passenger enclosed job with all modern refinements and equipment, which includes bumpers, head lamps and cowl lamps, etc. Other features of the equipment are six disk wheels with six cord tires, the spare wheels being mounted on either side, individual steps, full crowned fenders, a trunk and trunk rack at the rear with polished bars on the rear of the body, visor, etc. The equipment in the interior includes vanity set, smoking set, dome light, heater, window regulator, curtains, floor carpet and such appointments. This model is mounted on the 121-in. wheelbase chassis

The Haynes 57 Sport Brougham

This is a new 5-passenger sport brougham model exhibited for the first time.

Hupp Introduces Three New Models

Three new models were announced by the Hupp Motor Car Corp., of Detroit, in the New York Show and two of these were on exhibition. These new models are the special touring, Model "RS", the special roadster, Model "RRS", and the standard coupe. The latter is built along usual Hupmobile lines and the two first mentioned with special equipment. There are many attractive features of the finish and equipment which enhance the appearance of these two models. Disk wheels are used in an attractive color combination, and equipment includes imported Burbank top, aluminum scuff plates, nickel plated radiator, radiator cap and bar, cowl lamps and drum headlights.

The roadster, in addition to having these features, has nickel plated bars on the rear deck. These models are mounted on the standard Hupmobile chassis of 113-in wheelbase, powered by a 4 cylinder engine, 3¼ x 5 in. The coupe model is a practical, small enclosed car with standard finish

The Hupp Special Models

The accompanying illustrations are the special roadster and the special touring car, two of the three new models introduced in the Hupmobile line.

splash with pressure gage on the dash and cooling is by the thermo syphon system with a cellular radiator. The carburetor equipment is a Zenith with hot air attachment, and the ignition, lighting and starting systems are Auto-Lite make.

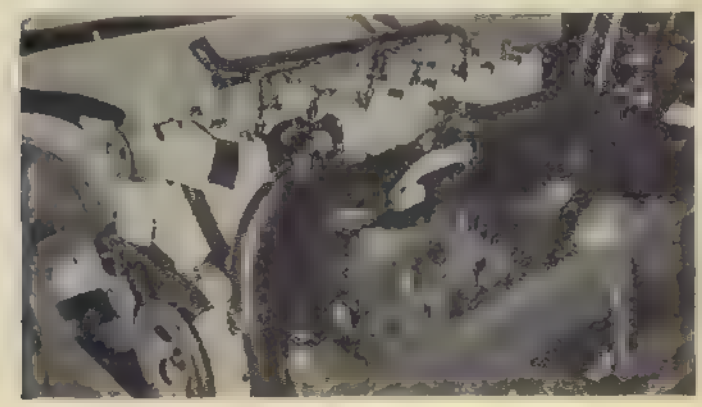
Front axle is an I-section and the rear is ¾-floating with bevel gears and a four-pinion differential. The gear ratio is 4.7:1. Both brakes operate on rear wheel drums, 12 in. in diam. The wheels are disk wood equipped with Firestone demountable rims and tires 30 x 3½ in.

The springs, as shown in the illustrations, are what is referred to as the reverse cantilever type, this construction being used both front and rear. The frame is pressed steel 4 in. deep, with 1½-in. flanges. The gasoline supply tank is mounted at the rear of the chassis and fuel is fed by the Stewart Warner vacuum system. Fenders are full crown and aluminum steps are provided.

Chandler Models Improved

THE 1923 line of Chandler cars present a number of improvements and mechanical changes so that the chassis may be termed a new one. The power plant has been redesigned, and while the bore and stroke remain the same, there are a number of improvements which result in better performance. Among the alterations are the cylinders being cast in block and the reconstruction of the combustion chamber, which makes it practical to increase the compression 13 lb., or to 84. The combustion chamber approaches the Ricardo type, the piston coming close to the head over a considerable part of its area, and the clearance space tends toward hemispherical in form and about one-half of the volume is directly over the valve in the L. The valves are slightly inclined so that considerable turbulence is set up at the time of ignition. These features and an improved piston design keep piston temperatures low, check carbon formation and, it is claimed, eliminate detonation.

The crankshaft is mounted on four bearings, instead of three, is 20 lb. heavier, and the diameters at bearing points increased The entire crankshaft support has been stiffened. The main bearings are heavy bronze backed and are line bored in the crankcase, with the latter bolted to the cylinder block. The camshaft and crankpin bearings have been increased in size. The crankcase is deeper and has been strengthened by webs and four main bearing bridges. A new feature is the provision for easy draining of the crankcase, the drain plug having an extension and a valve with handle under the hood, making for accessibility. The oil pump



Above: The Chandler Four-Passenger Royal Dispatch Which Mounts Spare Wheels Forward on Either Side.

Left: The New Chandler Power Plant

This illustration shows the new engine used in Chandler cars. The cylinders are now cast in block and have a detachable head, having formerly been cast in threes and with solid heads. Portions of the engine are cut away to show the interior construction.

is more accessible, is of the gear type, and is bolted to the left side of the crankcase. The camshaft, pump, generator, etc., are driven by a single Morse chain, having an eccentric on the outside for adjustment. The cooling fan now has six blades and is driven by a V-belt at a lower speed than formerly. The Bosch battery system is now used for ignition with magneto listed as extra price equipment.

A lower front axle is used. Taper roller bearings are mounted in the steering spindles and ball joints, while springs on the tie rod make steering easier.

While the design of the bodies is similar to last year many detail refinements appear. The 5 and 7-passenger models have seats greater in depth in the front and rear compartments. The Chandler Royal Dispatch, the sport model which is illustrated herewith, has a single-piece windshield and is equipped with side wings. It has individual steps with a grid-like arrangement of six bars connecting the two steps on each side. The touring car and the Chummy sedan, which was described in our last issue, both have ¾ running-boards and individual front fenders. The 7-passenger sedan and the 4-passenger touring roadster have individual steps, as does also the Metropolitan sedan, but these do not have the connecting grid feature.

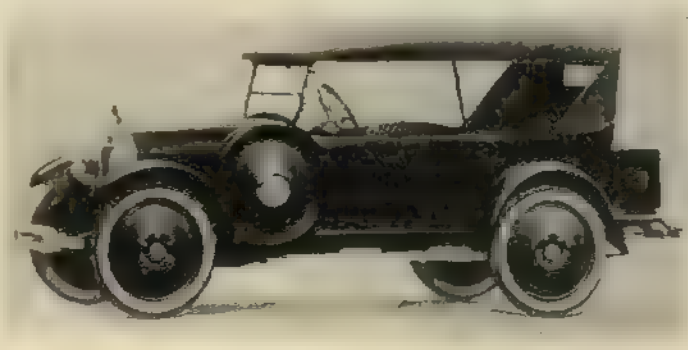
The Royal Despatch, 4-passenger sport model, is an attractive model. It has a clear-vision khaki-top and spare wheels, mounted close to the front fenders. Disk wheels and oversize cord tires are standard equipment. Trunk rack and body bars are polished aluminum. The upholstery is Spanish leather gray green color and the instrument board is mahogany.

Nash Introduces Two New Models

A 4-cylinder sport model and a 6-cylinder 4-door coupe were introduced at the show by the Nash Motors Co., of Kenosha, Wis. The sport phaeton 4-cylinder lists at $1195

The 6-cylinder coupe is equipped with five disk wheels and is finished in maroon with black running gear. It mounts a trunk and rack at the rear of the body which is protected by guard strips. The equipment includes a heater, robe rail, foot rest and windshield wiper and interior appointments include vase, smoking set, lights, and vanity case. The upholstery is mohair.

The 4-cylinder sport model carries 5 disk wheels and mounts a trunk at the rear of the car. There are bumpers front and rear. Many of the parts are nickel trimmed including such items as Moto-Meter, windshield standards, drum type headlights, radiator shell, etc. Upholstery is Spanish leather.



Two New Nash Models

These illustrations show the two new Nash models which were introduced at the show. These are the special phaeton on the 4-cylinder chassis and the 6-cylinder 4-door coupe.

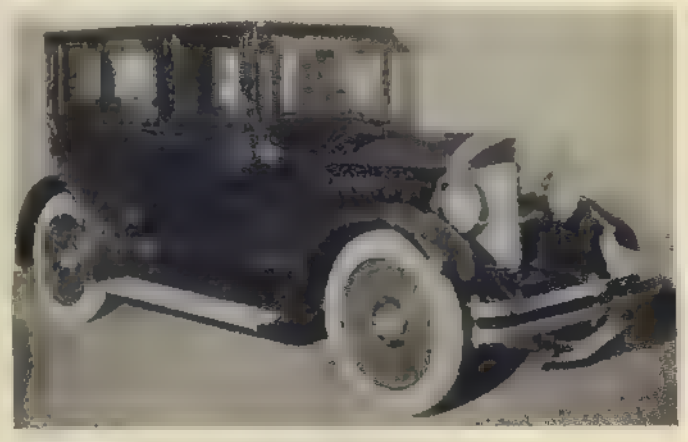
NEW CARS AND MODELS

Handley Introduces Two New Sixes

THE display at the New York Show of two distinct 6-cylinder chassis, powered by valve-in-head engines, by the Handley Motors, Inc., of Kalamazoo, Mich., came as a surprise to the trade. The smaller six is known as the 6-40 and is powered by an engine 3⅛ x 4¼ in., and the larger one is known as the 6-60 Deluxe and is powered by an engine 3⅜ x 5 in. The wheelbases respectively are 115 in. and 125 in. On the smaller chassis are the 4-passenger open model, the 2-passenger roadster and 2- and 5-passenger enclosed models.

The 6-40 engine is of the high speed type with cylinders cast in block, with a detachable head. The crankshaft has 3 main bearings and the engine is lubricated by force feed. The clutch is a dry disk and the gear set is of conventional design. The electrical equipment is 2-unit, 6-volt. Drive and torque are taken through the springs. The front axle is an I-beam and the rear is equipped with Timken bearings, and is sturdily constructed. The frame is a heavy section channel steel, strongly cross braced and reinforced. The springs are semi-elliptic all around, 37½ x 2 in. and 57¼ x 2 in. Novel spring shackles are used, these being of a special fabric composition and known as the Belflex type. They have no shackle plates or bolts. The service brakes operate on rear wheel drums and the emergency on the propeller shaft back of the gear set. The steering gear is of the sliding-block type and has an 18-in. wheel. Tires are 34 x 4½ in., non-skid cords. Steel disk wheels are used.

Cooling of the engine is by the thermo-syphon system, and the radiator is of the V-type with cooling assisted by a fan. The 15-gal. fuel tank is mounted at the rear of the chassis with fuel fed by the vacuum system. Equipment includes nickel-trimmed head, side and tail lights of the same design, Moto-Meter, windshield wiper, and all the usual instruments mounted on the instrument board. The tire carrier is so constructed that it accommodates two tires.



Above: The Handley 6-40 Sedan
An entirely new light six introduced in addition to the big six

Left: The Handley 6-60 Touring Car Which Lists at $2150 and is an Entirely New Car.

The large model, known as the 6-60 Deluxe, does not have the pointed radiator used on the smaller six. It has an especially attractive finish, which together with the nickel radiator shell, large headlights, and full crowned fenders, help to enhance the general appearance. The frame is deep and rigid and the springs are long and wide, which helps make this car strong and easy riding. The bodies on the chassis are the 7-passenger

touring, the 7-passenger sedan and the 4-passenger sedan-coupe. The touring model has an ash frame and aluminum body and is upholstered in genuine leather. The body is finished in blue and the chassis and fenders in black, with the wheels dark blue. The top edge of the tonneau on the 7-passenger touring car is trimmed with polished aluminum. The use of aluminum is noticeable at other points such as the side rails, the steering wheel quadrant, crankcase, valve cover and hub caps. The sedan is a roomy car and has broadcloth upholstery, silk shades, satin-silver finished fixtures, domelight and quarter lights, toilet set and smoking outfit, and the doors are wide. A Perfection heater is built-in. This body is also of aluminum.

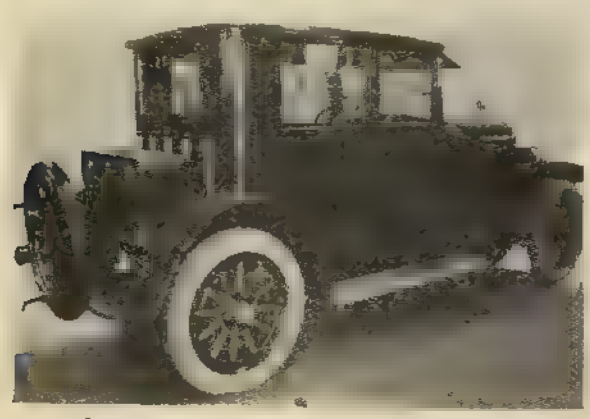
The power plant of this large 6-cylinder car has the engine, clutch and gear set in a unit. The crankshaft diameter is 2½ in. Pistons are gray iron, reinforced, and the valves in the detachable head are alloy steel 1½-in. in diameter. Push rods are enclosed inside the cylinder block and the entire valve mechanism is lubricated by a bath of oil. A feature of the engine is the lubricating system. There is a self-priming oil pump which forces oil to all bearing surfaces, with pressure automatically regulated according to the load on the engine. The manifolds are on the left side of the engine and on the right side is the water pump and electrical units. The drive shaft is tubular and has two universal joints. The Hotchkiss form of drive is used. The rear axle is semi-floating with Timken bearings. Both brakes operate on the rear wheel drums, 15½ x 2½ in. Chassis lubrication is by special oil cups and Empress gun, which forces the oil or light lubricating grease throughout bearing surfaces under a high pressure. Springs are semi-elliptic all around and the channels and shackle bolts are extra large. The gasoline tank is mounted at the rear, with fuel feed by the vacuum system.

The springs measure 38 x 2¼ in. on the front and 60 x 2¼ rear. The 6-40 cars list as follows: runabout, $1350; 4-passenger open model, $1350; coupe, $1750; sedan, $1750. The 6-60 open cars list at $2150, and the closed cars at $2850.

King Sedanette

ONE of the outstanding models at the King exhibit was the Model L Sedanette, a 5-passenger enclosed car on the 124-in. wheelbase chassis. This model lists at $2295 and the other models on this chassis range from $1795 for the touring car up to $2625 for the sedan. Complete equipment is a feature of all models on this chassis. The body color of the sedanette is blue, similar to the coupe and sedan. The other models come in blue or maroon, carmine or khaki, and the sportster in sport colors. There are seven models on the 124-in. wheelbase chassis and the same number on the 120-in chassis, known as the Model LL.

The King Sedanette is a 4-5-passenger body with the upper part of the body of sheet metal. At the rear is a trunk with suit cases and mounted on a rack. The windows operate by cranks. A cowl ventilator is used and the leather-covered visor adds to the comfort of the passengers. The headlights are drum type and there are miniature side lights. Front bumper, snubbers all around, windshield cleaner, and a spare tire with tube and cover, a Moto-Meter and mirror are features of the equipment. The lower half of windshield is stationary. The floors are carpeted and rear window has a roller curtain. Upholstery is broadcloth and the appointments have satin silver finish. A silent chain with the Link Belt pulley is used at the front end of the engine.



The King Sedanette

The Sedanette on the 124-in. wheelbase chassis comes completely equipped as shown. This body is in the nature of a two-door sport sedan and the trunk, bumper, visor, etc., are included in the price which is $2295. The body is finished in blue.

Mitchell Improved for 1923

A COMPLETE line of new bodies and refinements in chassis was shown by the Mitchell Motors Co., Inc., Racine, Wis. The new bodies have round lines instead of the square, as were used last year, and the V-shaped windshield has given place to the straight. The closed models have a lath type of top instead of the veneer to eliminate the possibility of rumbling noises. Bodies and fenders are constructed of 18-gage metal

The engine presents new features. The crankshaft is interesting in that it is an advance in forging, the counterweights being forged integral. It is a three-bearing shaft, and each bearing is checked with an indicator. The engine develops 50 hp. at 2000 r.p.m., but the peak is attained at 2060 r.p.m., with 52.4 hp. Statement is made that due to the design of crankshaft that the engine can be throttled down to 1½ m.p.h. on high gear, at which speed the shaft makes but 67 r.p.m

Another improvement is the employment of oilless bushings in the transmission hanger links. More sturdy hub spring saddles are used. A new feature is a one-piece, drop-forged flange and axleshaft with Timken roller bearings. The design provides an unusual factor of safety. The axle design is noticeable for its sturdiness and the absence of keys in the shaft. The transmission case is now equipped with a lubrication plug for indicating proper level of the lubricant.

The frame in this car has seven cross-members and the rear cantilever springs are stated to be exclusively designed. Shock absorbers are supplied for the front and rear.

Standard equipment on all De Luxe models includes front and rear double-bar nickel bumpers; spare tire, tube and cover; cowl lights; cowl ventilator; windshield wiper; rear view mirror; combination tail and stop signal; aluminum step plates De Luxe Moto-Meter and bar radiator cap

One of the Open Models in the Mitchell F-50 Line for 1923 Which Features Full Equipment.

Standard colors of the new F-50 Mitchell are blue with gold striping and maroon with white striping. All painting and trimming of the coachwork is executed complete in a new Mitchell paint shop.

Oakland to Continue Performance Guarantee

The "performance" guarantee on all Oakland models is to be continued through 1923 by the Oakland Motor Car Co., so successful has the plan proven through 1922. It is estimated that the guarantee inaugurated over a year ago will cost the company only one cent a car to back up.

One of the Open Cars in New Tarkington Line

This illustration shows the touring model in the Tarkington line just being put on the market by the Tarkington Motor Car Co., of Rockford, Ill. Details of this car will be published in an early issue. It is powered by a six-cylinder engine. A news note of this new concern will be found in the news section.

INTERNATIONAL DEALER SUCCESS *Based on 5 Big Points*

1 —*A Complete Line of Quality Trucks*—International Motor Trucks are built in fourteen sizes, ranging from the 2,000-lb. Speed Truck to the 10,000-lb. heavy-duty model. There are Speed Sedans, Ambulances, Busses, Funeral Cars, Fire Trucks, Street Flushers, Power Sweepers, Oil Trucks, Dump Trucks, Lumber Units, Log Rollers, Tractor Trucks, and Hauling Units for every commercial purpose—a line offering the International dealer an unequaled sales opportunity.

2 —*A Liberal Financing Plan* — Our financing plan enables International Motor Truck dealers to do a large volume business on a comparatively small investment. It appeals at once to both the dealer and the prospective buyer.

3 —*Forceful Sales Promotion Campaign*—Our nation-wide advertising in leading general publications and farm papers is creating new business for the International Motor Truck dealer. A direct mail compaign is sent to a selected list of prospects in each territory. Bill posting (including the dealer's name) completes an advertising campaign that gets results for the dealer.

4 —*Personal Sales Help* —At each of the 93 branch houses of the Harvester Company there is a complete organization consisting of trained motor truck men. These men are always available to help the International dealer close sales. Our organization not only helps locate and develop new business but it directs that business to the dealer.

5 ## *Life Insurance for Transportation*

Each International Motor Truck carries an Inspection Service Policy which provides free inspection at regular intervals for the life of the truck. This Inspection Service is absolutely free to both dealer and user. Factory-trained road engineers make written reports to the owner and the dealer showing the exact condition of the truck. It is after-sale service like this which saves International owners many thousands of dollars every year and brings repeat business to the established International Motor Truck dealer.

NEW CARS AND MODELS

New Series Moon Car

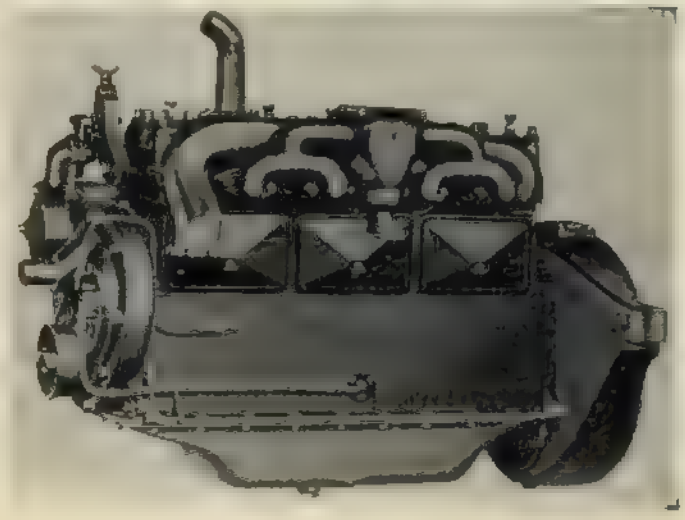
A NEW series of six-cylinder cars has been announced by the Moon Motor Car Co., of St. Louis, known as the Series "U" 6-40. It embodies refinements in the engine, manifolds, gear set and rear axle but retains the distinctive body lines and the familiar radiator contour. The outward appearance is identical with the cars in the previous series. The new series Moon, however, is powered with an improved Continental engine which has several refinements incorporated. There is a new type of connecting rod together with a spun bearing to ensure a perfect fit to the crank shaft and the pistons are a new type of casting machined by a new process. The bearings are spun on a centrifugal machine which gives a very dense bearing. Lubrication of the wrist pin has been improved by oil holes and grooves and the bearings and the crank shaft have been made extra deep. A new type of valve tappet is used and a new type of plunger and spring. Another feature of the Series "U" is the water manifold which controls the supply of water to the cylinders, assuring a more uniform temperature on the top of all the cylinders in hot or cold weather.

The intake manifold is improved, operating in connection with a hot exhaust thereby pre-heating the mixture on its way to the engine.

Another important change is in the rear axle. A new Timken axle of the centralized carrier type that permits the use of a flat bevel ring gear instead of the bell type is now used. The brakes are more efficient since the new design operates on the multiple leverage system and operates quickly and efficiently. The gearset gears are heavier and stronger and improvements have cut down the noise when the car is driven at high speed in second gear.

All models of the Series "U" are upholstered in genuine Spanish leather. The prices are as follows: Touring, $1295; sport touring, $1495; roadster, $1295; coupe, $1585; sedan, $1695; sport sedan, $1895.

The Moon Company is now going into quantity production on the new 6-40 and 6-50 coupe models. An accompanying illustration shows one of the new coupe models



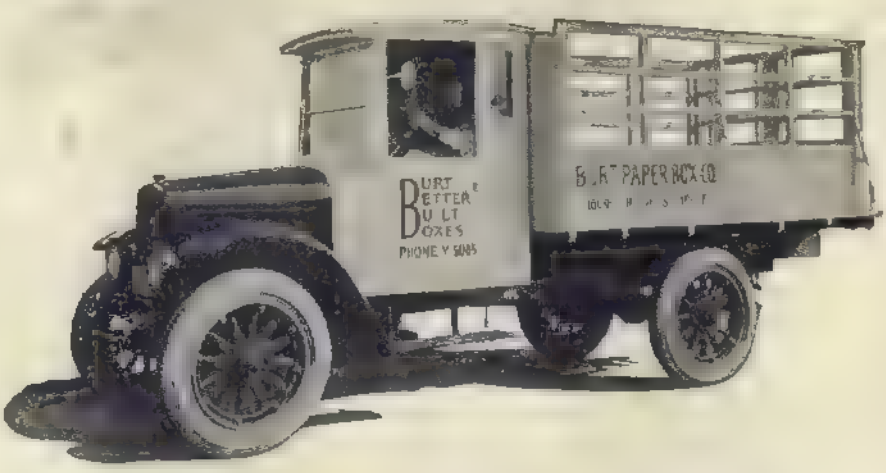
The Moon Coupe With Balloon Tires

This illustration show the new Moon coupe equipped with Balloon tires, these being optional on this model. The 6-58 sport touring model has Balloon tires as standard equipment.

Engine of the New Moon

New connecting rods, valve tappets, pistons, manifold, and a water control which keeps the engine at practically the same operating temperature in winter and summer are the outstanding features.

Dealers' Contracts Available at a Few Points. Write or Wire for Information.



International Speed Truck

is as profitable an asset as any merchant could have working for him. Famous for swift, dependable, low-cost hauling—for light delivery service—a snappy, constant advertiser for business. The International Speed Truck hauls 2,000-lb. loads, and can be fitted with regular and special bodies for all hauling needs. The International line of trucks ranges from this Speed Truck up to the 10,000-lb. heavy-duty truck.

All International Motor Trucks are protected in operation by the INTERNATIONAL FREE INSPECTION SERVICE POLICY, which guarantees expert inspection at regular intervals, for all trucks, and for the life of each.

Such a popular, complete line of trucks offers unusual opportunities for the enterprising dealer. It will be decidedly to your advantage to make inquiry regarding your territory. Get in touch with one of our 93 branch houses, or write or wire to the address below.

INTERNATIONAL HARVESTER COMPANY
OF AMERICA
(INCORPORATED)

606 So. Michigan Ave. Chicago, Ill.

NEW CARS AND MODELS

Other features of the open models are outside door handles, cowl ventilator, gasoline gage, foot and robe rails, lenses, windshield wiper, etc. The tops are khaki material. The 5-passenger and roadster sport models have front and rear bumpers, rear view mirror, Moto-Meter and bar radiator cap, visor, windshield wings and scuff plates.

Oakland Touring Car Front Compartment

The convenience of the controls is well illustrated. The ignition, throttle, choke, headlight (bright, off and dim), and the horn controls are in the center of the steering wheel. Speedometer, oil, and ammeter readings are under the single glass, and are illuminated by a light beneath

The roadster has the luggage compartment in the rear deck and a small package compartment in back of the seat. The sedan has silk velour upholstery and door locks. Windows are controlled by regulators. The sedan also has a heater, silk shades, dome light, etc. The 4-passenger coupe has a staggered seating arrangement and an auxiliary seat of the folding type facing forward at the driver's right.

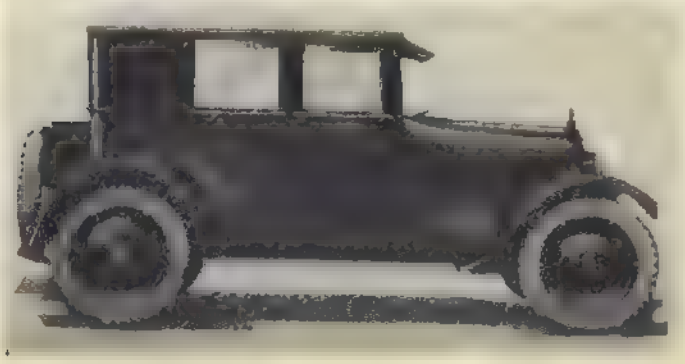
The business coupe has a black leather upholstery that is very durable and the upper interior is blue automobile cloth. It accommodates three-passengers and has generous luggage compartments.

One of the features of the new Oakland car is the controls. All the instruments are grouped under a single glass on the dash and the control levers are in the center of the steering wheel. A concealed dash light illuminates the instruments under the dash.

The prices of the new Oakland models are as follows: Standard touring and roadster, $945; sport touring and sport roadster, $1095; business coupe, $1195; 4-passenger coupe, $1345; sedan, $1395.

The New Gardner Three Door Closed Model

The three door brougham just being introduced by the Gardner Motor Co., Inc., of St. Louis, accommodates five passengers and has a solid straight across front seat which accommodates two people, the rear accommodating three. The doors are wide and entrance and exit are thereby facilitated. There is ample space for five passengers even with the tire carrier and trunk mounted at the rear The body has a hardwood frame with 20-gage steel sheet panels. The roof is non-rumbling and the upholstery is 20-oz. all-wool cloth. The hardware is Colonial with silver finish. The door window lifts are rotary type and the doors are equipped with locks. The exterior finish is Lake color below the belt line and black above with black fenders and sheet metal parts. The windows and windshield are plate glass. The rear of the body has aluminum rails which add a touch of finish and protect the body. A gold stripe around the belt line of the body adds to the appearance. Standard wheel equipment is artillery type and anti-skid cord tires 32 x 4-in. are standard. It is mounted on the standard Gardner chassis.



The Gardner Three-Door Brougham

This new close-coupled, 5 passenger closed car in the Gardner line has three doors, two on the right side. The front seat extends straight across and accommodates two and the rear accommodates three passengers.

New 1924 Models

New Low Prices

A Wonderful Dealer Opportunity

The new 1924 Auburn line is attracting new buyers—just as it won Auburn distributors who viewed it several weeks ago. Reports from various parts of the country point to record-making increases in sales. Auburn is truly going strong!

There is something contagious about enthusiasm. And especially when founded upon an honest product, honestly made, rightly priced and generally appreciated.

New sales opportunities and larger profits are being opened up by the new 1924 line of Auburns. New values in automobiles are established. The Auburn Franchise is exceptional!

To those dealers who are looking ahead, Auburn offers outstanding advantages. Each Franchise is fully protected, written for dealers as well as the factory, and carries intensive factory co-operation far out of the ordinary.

Look over the prices below and write us for complete information.

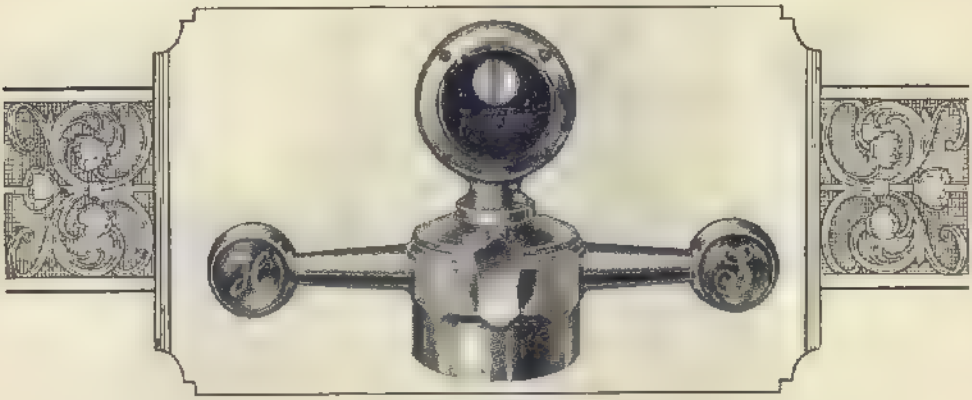
ANNOUNCING A NEW SALES POLICY



The Aristocrat Model

BOYCE MOTO METER

DESIGNED for installation on the Ford car—but it may now be adapted for use on such other good cars as:

OVERLAND		STAR
MAXWELL	CHEVROLET	GRAY

The Aristocrat Model BOYCE MOTO-METER as furnished by this company is for use on the Ford car. Your jobbers can now supply you with *special inserts* which will *instantly adapt* this model for use on all cars mentioned above.

Special Feature

Effective immediately, we will furnish with the Aristocrat Model, special name plates for the cars mentioned above—in any quantity without extra charge, when so ordered.

In addition, the post card packed with each Aristocrat Model BOYCE MOTO-METER will entitle the owner to his choice of initials or fraternal insignia, *without charge*, for inserting under the bull's-eyes at ends of the arms on the cap.

Ask your jobber for full particulars today, as this important change means that dealers will be able to very greatly *reduce their investment*, and at the same time *increase turnover*, which of course means *increased profits*.

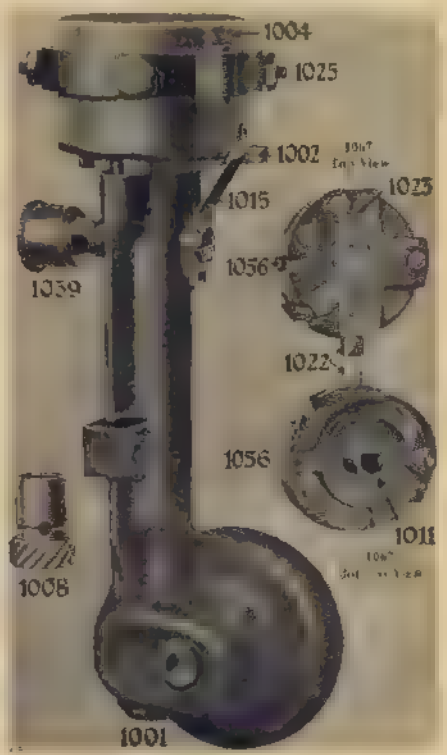
NEW PRODUCTS AT NEW YORK SHOW

Bullard Process Carburetor

Bullard Machine Tool Co
Bridgeport, Conn

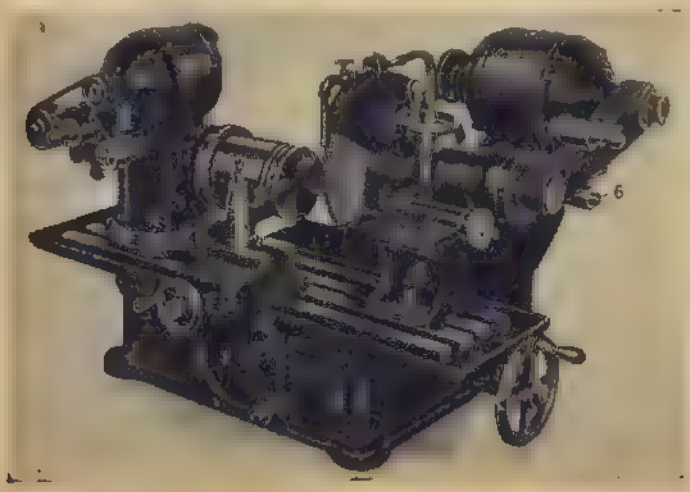
In this carburetor the liquid fuel is sprayed through an atomizer orifice where it is violently projected into a super-heated gasification chamber and there converted into a super-heated dry, hydrocarbon gas. The gasification chamber consists of a baffled passage, jacketed for surrounding circulation of hot exhaust gases. This chamber provides two stages of gasification for the fuel. The fuel in a dry, gaseous state is drawn through the main venturi and meets the air at this point. The air inlet valve is operated mechanically by connections to the throttle Air drawn in is taken directly from the atmosphere which provides a cool mixture and makes for high volumetric efficiency. It is stated no condensation takes place before compression or combustion occurs



K-W Timer

K-W Ignition Company
2811 Chester Ave., Cleveland

A new timer for Fords was exhibited by this concern, the installation of which requires no changes in the Ford. It lists at $6 and is stated to give unusual service without adjustment or replacement. All parts are tightly enclosed and the contact points are so made that oil cannot reach them. It is equipped with a grease cup which lubricates the drive shaft and the arm in which the brush is held is made of Bakelite.



Franklin T-G Grinder

Franklin Machine & Tool Company, Inc.
Springfield, Mass.

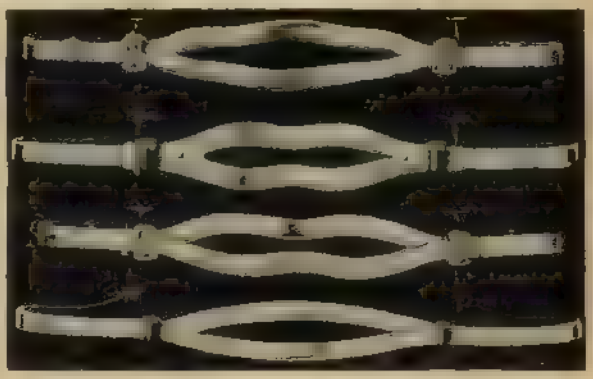
This is a grinder built for speed, accuracy and precision. It has a tool post for standard tool holder and can be used as a cylinder grinder it is especially useful on oversize piston jobs. It is not necessary to remove the grinding wheel and guide to do a turning job. A graduated, swiveled work head is operated by a ¼-hp. motor with belt drive. The turning tool is clamped in a regular tool post, set operated by a cross slide feed screw. A ½-hp. motor drives a 10-in. wheel which operates at the proper speed to make a good cut and a mirror finish. The work is kept cool by a continuous stream of water. There is an improved idler arm used for the belt tightening which is stated to operate very satisfactorily.

NEW PRODUCTS AT NEW YORK SHOW

The Ajax Shock Absorber

The Brewer-Titchener Corp.
Cortland, N. Y.

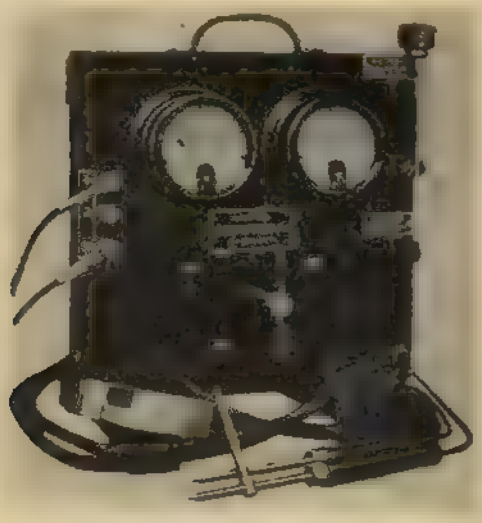
This shows a phantom view of the Ajax Shock Absorber. It has a lower primary spring which absorbs the initial shock and the upper or secondary which checks rebound. The spring tension is adjustable. The arms of this shock absorber are forged and the housing is finished in black metal with nickel-plated cap.



New Lyon Bumpers Exhibited

Metal Stamping Co., Inc.
Long Island City, N. Y.

From top to bottom the new Lyon bumpers are the Broadway, Dreadnaught, Guardian and the Vanguard. The Broadway and the Guardian have just been developed with a shackle bolt fitting that does away with the interference of shock absorbers and splash pans



The Miho Electrical Testing Set

The Miho Company
12 East Third St., Cincinnati, Ohio

The accompanying illustration shows the Miho high-rate discharge battery testing set Model A. This set enables the service station to make a complete test of batteries, generator and starting motor without delay. It is light weight and conveniently handled and can be taken to the car if desired. The price is $53.50, which includes meters, cadmium prods and test leads with clips.

Model D, Recording Devices Steering Gear

The Recording Devices Co.
Dayton, Ohio

This is made in two sizes, identical except in dimensions. Model D-1, the smaller, is suitable for cars up to 3000 lb. and D-2 up to 4000 lb. The accompanying illustration shows the working parts assembled with the housing cover removed. The gear is simply constructed and is built with a wide margin of safety. The balancing, which is a big feature, is accomplished by applying the turning force to the teeth on both sides of the trunnion-shaft.

Standard of the World

Many Cadillac Dealers have been engaged for a business lifetime in marketing Cadillac cars, because they are convinced that Cadillac principles of merchandising promote the secure prosperity and progress of individuals comprising the Cadillac institution.

The Move Towards Chevrolet

Our mails contain a great many letters from automobile dealers seeking Chevrolet selling franchises.

We are pleased to receive this added evidence that "the eyes of the world are on Chevrolet."

With the wonderful increase in our sales due to public appreciation of Chevrolet's unsurpassed value, has come such a broadening of our market that new and valuable dealer opportunities are apparent in every State—often at points that appear to be closed, yet are not up to our standard.

Every application is given very careful consideration, not only out of courtesy to the inquirer, but also because the standards we have set for Chevrolet representation are such that only the best class of dealers can qualify as direct dealers.

The profit opportunity for the Chevrolet dealer is so superior and our firm policy of fair treatment is so well established, that we are able ultimately to secure for every territory the best grade of representation.

Chevrolet Motor Company, Detroit, Michigan

Division of General Motors Corporation

Dealers and Service Stations everywhere. Applications will be considered from high-grade dealers only, for territory not adequately covered

CHEVROLET

for Economical Transportation

The Value of a Franchise

The value of a retail franchise in the automobile business depends on:

1. Salability.
2. Margin.
3. Relations with the manufacturer.

Statistics prove that salability is largely affected by price; about 80% of all cars in use sold for less than $1000.

Value per dollar is the second most important factor in salability.

Public knowledge of the value is the third.

Chevrolet is within the price class of the great 80% market.

Chevrolet offers the most per dollar in value in this class.

Chevrolet Motor Company is seeing to it that the public knows the facts.

In the entire automobile field, Chevrolet has within a year jumped from seventh to second place in sales.

The significance of these facts should be apparent to the trade.

To display the BOYCE MOTO-METER SERVICE STATION SIGN is to attract trade, not only on our line but all other nationally known brands of automobile equipment. We earnestly solicit the support of every good dealer in the country to use this means to build more prestige both for himself and for us.

Announcing the NEW SPECIAL FOR THE FORD MODEL

THE new Boyce Moto-Meter which has been designed for use especially on Ford cars, is a distinct feature of the Boyce Moto-Meter line.

This new instrument is merely a small reproduction of the larger models—doing the same work with the same high standard of efficiency.

The Special for the Ford Model Boyce Moto-Meter has a heavy nickel frame, beveled crystals both front and rear, and comes equipped with a special composition cap.

Aside from protecting the Ford owner against over-heating and subsequent costly repair bills, it adds an attractive touch to the appearance of any car. The list price of this new instrument is $4.00.

Dealers, do not miss this new opportunity to reach a tremendous market. Write today either to your jobber, or to us, and we will send you full facts on the new Special for the Ford Model without obligation.

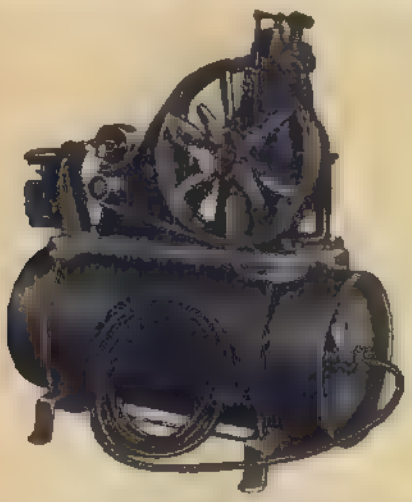
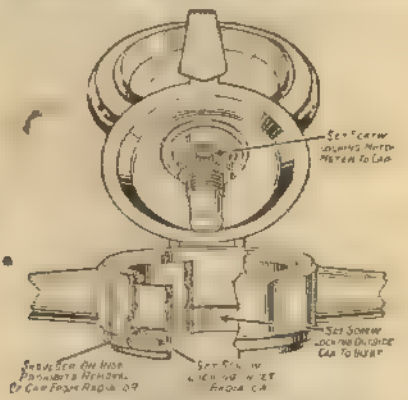
NEW PRODUCTS AT NEW YORK SHOW



Curtis Two-Stage Air Compressor Outfit Shows Improvements and Refinements

Curtis Pneumatic Machinery Co.
St. Louis, Mo.

The general improvements and refinements of the Curtis two-stage air compressor outfit for 1923 consist of a lighter base, therefore a lighter outfit; more compact on account of the tank being shorter in length and larger in diameter; less floor space required; copper tubing from the compressor to the tank, with long sweep bends; a more compact mounting of the compressor, motor and belt tightener, due to an improved type of self-adjusting, non-spring-type belt tightener and a more expensive finish. The controlled splash oiling system is used.



The New Schlaich Cap Lock

The J. C. McAdams Co.
145 W. 53rd St., New York City

Due to its simplicity, the Schlaich Cap Lock can be installed in a very few moments, but can be removed only by the owner. The caps themselves are drilled to fit the Standard and Universal Model Boyce Moto-Meters and may be reamed to fit the De Luxe Model, while special adaptors are furnished on request for the Midget and Junior Models. It is made in three sizes only, to fit all makes of cars. Special brass insets are furnished to fit each size of radiator filler neck.

Preferred Auto Lock

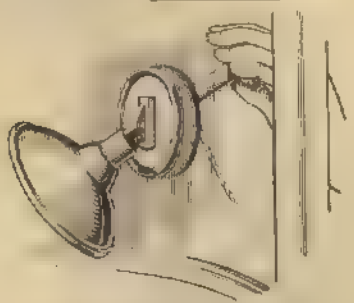
Lampman Tool Co., Mfr.
Angola, Ind.
Preferred Utilities Co.
Sole Distr.
Broadway at 57th St.
New York City

The Preferred Lock is attached under the steering wheel. When locked, two plungers firmly hold a spoke of the steering wheel between them. To unlock it the key is inserted, releasing the plungers. It is made of drop-forged, case-hardened steel, heavily nickeled and equipped with a Yale cylinder.

Manley No. 410 Portable Grease Pan

Manley Mfg. Co., York, Pa.

This portable grease pan and truck is run under the car when the crank case is removed and catches all the oil, grease, dirt, etc. It is large enough to receive the whole crank case for washing off the dirt, etc., and is also used in the same way when taking down and washing off other units. By removing the metal pan it may be used as a truck for moving around the garage complete units, or anything else desired. The removable metal pan also facilitates the dumping and cleaning out when loaded. The handle, which is provided with a full universal joint, swings in all directions.

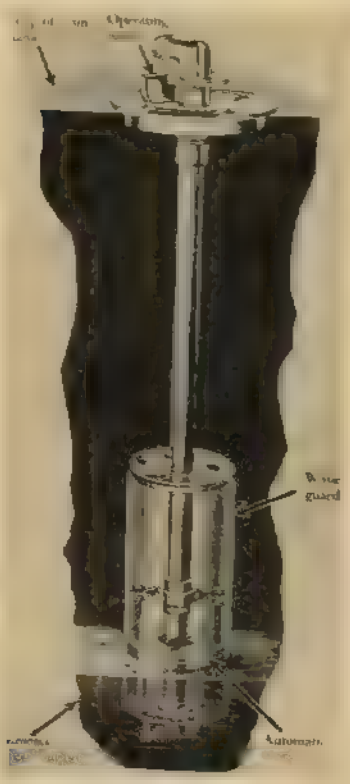


Inside-Control Light

Stewart-Warner Speedometer Corporation
Chicago, Ill.

As the illustration shows this light is controlled from the inside of a closed car. Its special design is specified to give greater light range up and down, or to either side of the road. Even distribution of weight on each side of the windshield keeps the light steady. It is turned on or off by a small switch on the instrument board and is attractively finished in moisture-proof black and nickel. The reflector is silvered and highly polished.

New Products at New York Show



Stewart Gasoline Reserver

Stewart-Warner Speedometer Corp.
Chicago, Ill

In the Stewart Gasoline Reserver a small cork float with loose attached sleeve provides the automatic feature that insures a reserve of gasoline in tank. This reserve is retained with the valve handle in either position and without the need of any attention from the car owner.

New Cox Hylo Bumper Model 30 and Bumper Arm for Dodge Rear

Cox Brass Mfg. Co., Albany, N. Y.

The new Model 30 Cox Hylo Bumper retains all the features of the full loop spring bumpers manufactured by this company. The bumper has two impact bars the full width of the car, and in addition it has the single bar in back, which comes into action when the blow is heavy enough to depress the two front bars. The upper and lower front bars are further reinforced by an attractive Cox monogram or a special monogram for the popular makes of cars at $1.00 extra. The two rails have wider faces than ordinary, ¾ in. each, and the space between them is narrower, only 1 in. The Cox Hylo "30" weighs only 35 lb., due partly to its design and partly to the high ratio of strength per lb., possessed by Mo-lyb-den-um steel of which it is made. The same Cox attachments, custom-built for each particular make of chassis, are included in the price of every Model 30. Prices: nickel plated, $23; black enamel, $20; special monograms, $1 extra. The new type of bumper arm shown above bolts rigidly to the frame by using a bolt through the snubber hole, and the outside rear bolt, which fastens the spring to the frame. The brace which fastens to the outside rear body bolt is extended toward the rear 6 in. so as to give greater leverage, and bring the support as near the bumper rail as possible. This extended brace also prevents side vibration. This bumper arm can be used with snubbers by using the cap screw furnished with the snubbers instead of the bolt and nut furnished with the bumper. Prices: $13 50 to $26 for complete bumper depending on type of bumper rail.

A New "Manzel" Hydraulic Shock Absorber

Manzel Brothers Co.
335 Babcock St.
Buffalo, N. Y.

Introduced a new shock absorber of the hydraulic type for practically all models of cars. It is attached to the frame, and connected to the axle by means of a strong webbed strap and clamp. An exclusive feature of the "Manzel" is its automatic control by means of double acting valves, which open and close according to the severity of the shock and control the passage of the oil between the inner and the outer chambers. The valve action may be regulated for any weight of car by means of an adjusting screw. List price, $90 per set of four

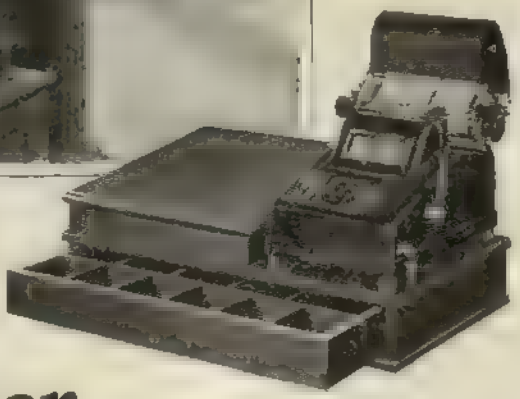
"DOUBLE ACTION"



Think of a departmental, multiple clerk detail printing cash register. Think also of the famous Sundstrand Adding and Figuring Machine. You get BOTH—get DOUBLE service—from the Sundstrand Combination Cash Register, with its new sput carriage, automatically controlled. Besides, the *cost is less* than you would expect to pay for either service alone.

Cash Register Adding Machine

TWO Services at ONE Low Cost From the Sundstrand

As a Cash Register the Sundstrand gives positive protection to your cash—clerk or department indicators must be set or cash drawer will not open. Indicators are provided for several clerks and nine departments, such as oil, accessories, towing, battery, labor, vulcanizing, washing, polishing, etc. Automatically separates paid out and charge items from total of cash receipts. All records are rewound and held in register, totals under lock and key. Ends guesswork by giving a complete and permanent record of each day's business. Range 1c to $99,999.99.

As an Adding Machine. Just move over the carriage and you are ready for adding and multiplying on a separate tape. You have Sundstrand 10-key speed and ease of operation—for footing ledger, bank balance, checking extensions, figuring inventory, costs, mark-up, depreciation, profit, etc. You have the same adding machine of which Standard Oil Company, Texas Company and many other dealers use 10 to 100 each. To change to cash register work, just shift the carriage back. Your cash register record tape has not been disturbed.

Stop the Leaks! End losses. Be sure you are getting all the profit in your business. Write for details and low price. No obligation. Address Dept. E.

Let This Jack Sell Itself

Leave It on the Counter

Customers always like to handle things that are left on the counter—why not take advantage of this habit and let them "play" with one of these No. 46 Reliables? When they see how easy it works they are sure to want one.

A Reliable No. 46 on the counter will sell itself while you are busy with another customer. This handsome, bright red jack will appeal to every motorist. Its sturdiness, its easy and sure action, as well as the special auxiliary foot, are features which will make this jack a fast seller and good profit maker for you.

The No. 46 is only one of the reliable line comprising thirty-five different models, ranging in capacity from one to ten tons and covering the entire field of automobile jacks.

Ask to see this jack at your jobber's. He has a complete line of Reliable Jacks, or will get them for you. All Reliable Jacks are enameled red. Be sure you get only red jacks.

WARNING TO DEALERS: When you buy Reliable Jacks —be sure you get the product of the Elite Mfg. Co., Ashland, Ohio. The Reliable line is being widely imitated, and this notice is given for your protection.

"Who Has That *Little Giant* Pipe Wrench?"

Shops that have only one *Little Giant* are badly handicapped, for the demand for the *Little Giant* is constant. There's hardly an hour passes that one of the boys does not shout for it, and if it is not forthcoming, he has to search around for it, which wastes many valuable minutes.

If you have ever used a *Little Giant* Pipe Wrench you will understand why it is one of the most popular tools in the shop. The *Little Giant* will get into places where other pipe wrenches can't go. It slips into holes and corners and works well in cramped quarters.

And there's no barked knuckles, either. The end-opening jaws work like a pair of pliers, and when they close—they are on to stay.

It will pay every garage and repair shop to equip its men with a *Little Giant* each. You don't have to worry about replacements, for the *Little Giant* is practically indestructible. Only three simple parts—that cannot get out of order. Let us tell you the nearest jobber to you who sells *Little Giant*.

Speed Means Profits

If you can get more work done per hour you can handle more jobs per day—and that means more profit.

If your equipment is up-to-date and dependable you will not need to add time and labor for its maintenance to your overhead—and that, too, means more profit.

Electric drills, grinders, air compressors, gas and oil pumps, etc., are necessary equipment for the modern automobile repair shop—and they are dependable and long lived when equipped with G-E Fractional Horsepower Motors, backed by a quarter-century of motor manufacturing experience.

Manufacturers who make quality the first consideration supply G-E motors on their machines as standard equipment. The names of such manufacturers will be furnished by any one of our sixty sales offices, or address

ESSEX

A mine owner in a town of one hundred and nineteen people up in the Wisconsin copper country recently bought a LaFayette Torpedo. He knew its longer life, range of performance, deferred depreciation, and maximum service would well warrant its initial cost. A fine car to own is a fine car to sell.

A letter to us will bring you a LaFayette catalog giving specific reasons for LaFayette quality, as well as the information as to whether or not your territory is open

ENLARGE YOUR OPPORTUNITIES WITH THE MERCER

THE MAN who would be interested in buying a fine car like the Mercer would not be interested in the cheaper car you represent.

If you also hold a Mercer Franchise you do more than just sell the fine-car buyer. *You make a considerably better profit than on your low-priced car.*

By all means push the line on which you have put much time and energy. But make the pushing *easier*—by enlarging your opportunities and profits with the prestige-building Mercer.

Inquire whether the Mercer Franchise is still open for your territory. *Write at once.*

MOON

in Clarksburg

The Success of a Live Wire!

Ray Cuppet is a live wire of the Clarksburg, W. Va., automobile field. He has made this city of 27,000 a *Moon* town. He knows what's what in motor car value and is making a few thousand others know it.

Read his own words of what he has accomplished:

> *"During the first six months of this year I sold 79 Moon cars. In the one month of May alone I sold 39! I'm going to make it 150 for 1923. Watch me!"*

Again, it's a case of doubling sales with the Moon.

Are you doubling *your* sales in 1923?

The New Series "U" Six-40 Moon has been received enthusiastically by dealers everywhere.

MOON MOTOR CAR COMPANY, ST. LOUIS, U. S. A.

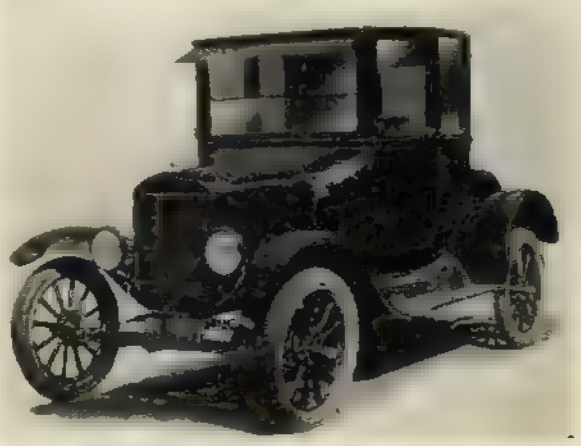
Stewart McDonald, President

New Coupe Model and Improvements in Ford Line

THE Ford Motor Company has recently introduced a new coupe with improved exterior appearance, more comfortable seating arrangement, increased luggage carrying capacity, etc. In addition to this some of the improvements to be noted in the coupe have been made in the other models of the Ford line.

The new coupe doors are large and heavily framed, open outward, and better rear vision is afforded by the large rear window. The front of the car is more attractive with the cowl having a graceful curve in to the higher hood and radiator. In addition there is a visor over the windshield and a cowl ventilator. The deck at the rear gives considerable luggage space, being larger than in the previous model. The gasoline tank is under the seat and the split seat cushion facilitates filling the tank from the right side, so that it is unnecessary for the driver to leave his seat The rear fenders are built more sturdily. In back of the seat is a small recess shelf for carrying parcels. The seat is deeply cushioned. The door windows are equipped with revolving type window regulators and door locks are provided. The side windows have lever type window lifters.

The four-door sedan introduced about a year ago has been improved in appearance also. This has a new cowl and the same graceful sweep from the radiator and hood which change also affords increased leg room for the occupants of the front seat. The touring car and runabout also have the enlarged cowl and flowing lines. The radiator in all the models is larger, giving increased cooling capacity. This new radiator is also used on the Ford truck chassis.



The New Ford Coupe
This body varies considerably from the former coupe, having a larger radiator, more sloping hood, wider cowl, and it is more spacious. Some of the other models have also been improved

New Cleveland Models Feature Many Refinements

CONSIDERABLE of the efforts of the engineering personnel of the Cleveland Six Laboratories and experimental departments has been concentrated to better the all-around performance of the Cleveland car and at the same time retain quietness and smoothness. The Cleveland model for 1924 incorporates sound mechanical improvements which include a highly perfected valve actuating mechanism and a better distribution of gas. The body lines of the new Cleveland Six remain unchanged except for the new radiator design. Aluminum kick pads are used on the models equipped with running-boards, and the touring deluxe and sport models now carry a wide stripe of contrasting color edged with gold. There are nine models in all. The two-door special sedan is furnished in five colors: Brown, blue, green, maroon and red. The roadster is surrey green with cream wheels and the balance of models are blue.

The feature which is said to contribute to the rapid pickup of the engine, is the automatic spark advance on the Bosch system Vaporization of the gas is improved through the use of a new Stromberg carburetor coupled with a refined method of heat appli-

Here's the Car You've Been Waiting for!

The True Blue Oakland "6"

Brand-New Engine—Four-Wheel Brakes
Beautiful New Bodies—Disc Steel Wheels

This True Blue Oakland was deliberately built to be the finest of light-sixes.

From axle to axle—it's new! It embodies features of mechanical superiority, beauty and performance heretofore unheard of in cars of its price!

Two years have been devoted to its design, manufacture and test plus the wealth of Oakland experience in light-six manufacture and the great resources of General Motors.

It carries the same written 15,000 mile engine performance guarantee and the same mileage basis gauge of value that have proved the quality and value of Oakland cars.

The New Oakland line and our 1924 proposition, offer an opportunity which we confidently believe is unsurpassed. Wire us—your territory may be open.

OLDSMOBILE

DO you know that the engine of the Oldsmobile Light Eight is the most powerful of all automobile engines of like dimensions built in this country? This fact, Mr. Dealer, has been corroborated through exhaustive tests by the great General Motors Laboratories, which rank first in American automotive research.

This is just another way of saying that Oldsmobile dealers are supplied with cars which are as *good under the hood* as they are *good looking*. That means Oldsmobile cars sell easily.

Be an Oldsmobile dealer. Start the new year with a ready-selling line of cars — fourteen distinctive body types — both Eights and Fours—built by a strong, permanent company. Send in your application today.

A new GENERAL MOTORS *achievement~ a* SIX *at*

The Lowest Price in History

OLDSMOBILE - SIX

An Oldsmobile and a SIX at an amazingly low price. Here is the car that offers you what you have long been waiting for—the opportunity to sell six-cylinder flexibility, smoothness and power, and at a low four-cylinder price.

And—it is an Oldsmobile. In spite of its amazingly low price, it has the beauty and refinement which have always characterized Oldsmobile cars. This highly developed automobile is the result of Oldsmobile's twenty-six years of manufacturing experience, reinforced by the unmatched engineering, research and purchasing facilities of the great General Motors Corporation.

Inspect the new Oldsmobile Six at the nearest dealer's. You will find an achievement in motor cars, which is General Motors' answer to the public's insistent demand for a good, but very low-priced six. Here is your opportunity!

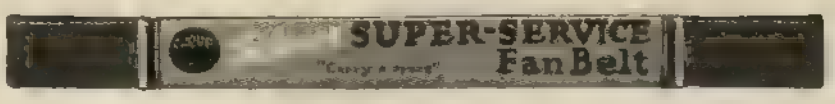
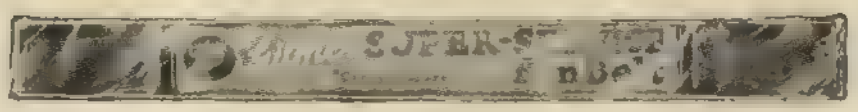
This Belt Goes on the Car and



This One Goes in the Tool Box



The Package that "Carries a Spare" to Sell a Spare

The Package

This new Gilmer package for the new Gilmer belt puts the "Carry a Spare" idea over stronger than ever. It allows you to sell *two* belts where you sold but one before.

Here are two new Gilmer Super-Service Belts held together by narrow gold bands. The first belt goes on the car. The second is the spare. It is attractively sealed in a glassine envelope to keep it clean until used

The New Belt

The new Gilmer Super-Service Fan Belt is built on a new principle. It is light in construction. Exceptionally flexible. True in performance. And the toughest belt that ever drove a fan.

It is designed for those motorists who want an ultra-fine belt—and are willing to pay a trifle more for it. The new Gilmer belts plus the old Gilmer belts give you an assortment that meets all requests.

The metallic finish that adds so much to the appearance of the new belt is a result of the new process of manufacture. It is an engineering achievement, giving the belt greater resistance to heat, oil, and water.

LIST PRICES: For Ford Cars, 60c; For All Other Cars, 90c.

For *All* the Bumps

The Gilmer Bull Dog Bounce Absorber works so fast that it absorbs all the bumps—big and small. This is the simplest of absorbers. Only two working parts. Neither is metal. Nothing to get out of order. Easy to install, and instantly adjustable.

CRAMP

CRAMP'S HARD-ROLLED BEARING BRONZE

BUTT-JOINT AND STEEL-BOUND, BRONZE-LINED TUBING AND BUSHINGS

Cramp's Hard-Rolled Bearing Bronze—cast, rolled and drawn—is the highest grade bronze composition that has ever been used for bearing purposes. It is superior to any other metal on the market for durability and homogeneity of structure, whether made by the Cramp Company or any other company.

All-bronze tubing and bushings of the butt-joint type are furnished in various diameters—wall thickness 1-16".

The steel-bound, bronze-lined tubing and bushings are furnished in various diameters and thicknesses of wall.

The outstanding features of these products are

Durability ***Adaptability***
Accuracy ***Low Cost***

They can be purchased in tubing and cut to exact lengths as required, or in standard size bushings ready for use. No machine work necessary—very little reaming—often none at all. Can be used for every bearing in the car except the main and crank-pin bearings or where ball bearings are necessary.

Eager dealer acceptance proves Stephens' exceptional value

To our 1924 announcement of finer Stephens models at new and lower prices, the dealer response has been cordial and country-wide. In these eight custom-built body-types, with their distinction of design, abundant power and notable service records, dealers recognize a profit-opportunity further enhanced by the *new prices.*

Typical of Stephens ingenuity—value unrivaled at $1475—is our new Phaeton-Sport. It identifies a line that, point for point, outclasses any six-cylinder fine car in the field between $1295 and $2250. Behind that line is a franchise we believe to be the most generous any motor car builder can offer . . . If you contemplate bigger things for 1924, investigate the 1924 Stephens. Write for our terms—base your decision on *facts.*

1924 Models and Prices

Touring Car, 5-passenger, $1295; Roadster, 2-3-passenger, $1295; Phaeton-Sport, 5-passenger, $1475; Touring Sedan, 5-passenger, $1595; Standard Sedan, 5-passenger, $1995; Sport-type "Foursome," 4-passenger, $1750; Touring Car, 7-passenger, $1595; Sedan de Luxe, 7-passenger, $2250.

Bodies for every line of business

The Stewart 1-Ton Truck

Biggest Selling Opportunity

In the Truck Field

Model 10X—3½ to 4 Ton—With Stake Platform Body

Model 9—1½ to 2 Ton—With Stake Platform Body

Model 7X—2½ to 3 Ton With Under Hoist and Combination Dump Body

With the Stewart 1-Ton Truck you undersell any truck of like size and quality by $300 to $700.

Prove that to yourself by comparing the specifications. You will find the Stewart matches trucks costing up to $1800.

Buyers want that kind of value. That makes it profitable for dealers to handle as their success everywhere proves.

And the Stewart 1-Ton Truck typifies the price and quality advantage of the entire Stewart line. Stewarts cost from $300 to $900 less than comparable trucks in all sizes. Eleven years of manufacturing success and financial stability is a guarantee of permanence offered by few other truck builders.

Some desirable territories are open. Write today. Liberal Discounts to dealers in small territories.

Owners Praise Its Economy

Take particular note of the Stewart 1-ton truck illustrated above. It gives in service 14 to 17 miles on a gallon of gasoline—10,000 to 12,000 miles on a set of tires—500 to 700 miles on a gallon of oil.

Compare this Stewart with any 1 ton truck on the American market.

Five bearing crankshaft, multiple disc clutch; electric starting and lighting, truck type bevel gear axle. Body and equipment complete, it costs less than the chassis alone of many trucks it will out-perform and out-last.

Atlas Ball Quality

The Closest Approach to Perfection

THE successful performance and life of steel balls in their various applications ranging from use in ball bearings for high-speed instruments of precision to supporting the most massive structures such as gun turrets, swing bridges, etc., is dependent upon ball quality—accuracy, uniformity of composition, hardness and *resistance to fatigue*.

There is only one grade of Atlas Steel Balls—those made to the highest standard of perfection. Every Atlas Ball is perfectly finished and guaranteed to be round and true to size within a tolerance of plus or minus ½ of 1/10,000 inch. Furthermore, Atlas Balls are made of the highest grade chrome steel obtainable, so treated that they are really remarkable for their extreme hardness, toughness and durability—having a resistance against shocks and the repeated application of loads that is not approached by any other commercial ball.

Nowhere in the world will you find a ball that embodies every one of these essentials to the same extent as Atlas. This has been proven to the satisfaction of the best engineers in this country and for this reason Atlas Balls have the enviable reputation of being "The Premier American-Made Balls."

Sunoco is a business opportunity

CONCENTRATION on Sunoco Motor Oil is the *business policy* of hundreds of progressive oil merchants.

Concentration means cutting out the "ordinary oils"; getting away from the fear of price competition, handling only the oil that is of real value as a lubricant and is sure to bring repeat business.

Sunoco Motor Oil is that kind of a lubricant—pure, clean, wholly distilled; not a drop of cylinder stock in it; therefore, *nothing to form hard carbon.*

Sunoco absorbs water, overcoming scored cylinders and other troubles due to the presence of free water in the crankcase.

It flows freely at low temperatures, avoiding hard starting.

Repeat business follows the sale of Sunoco—quicker turnover higher profits, lower selling expense

Sell Sunoco and *concentrate* on it. It will make you a reputation as a lubrication specialist. You will find it one of the *best business opportunities* in the whole automotive industry.

300%

You'd like to increase oil sales 300%. Who wouldn't.

This man did it in seven weeks:

"I have increased my oil sales 300% since taking on Sunoco Motor Oils and Greases seven weeks ago. This increase is so remarkable I felt sure you would like to hear about it.

"Best of all, I have gained a great number of satisfied customers, who will use nothing but Sunoco, and who come to me for it."

Increased sales mean a bigger business. Satisfied customers mean a better business. They're the two main things every business man wants.

They're also the two main principles in the Sunoco Merchandising Plan. It's a plan that will help any oil business become bigger; and better.

The facts about it are interestingly told in our booklet, "Making More Money Out of Motor Oil." Write us for a copy.

Announcing the

TARKINGTON MOTOR CAR

A successful and large organization of fine machinists and drop forgers, long making precision machine tools and forgings for the best automotive manufacturers, have developed a new motor car. They have set forth in tangible form their principles and ideas of simplicity lightness and sturdiness, ever bearing in mind at each point of design that such a car must be easily, quickly and cheaply serviced, and yet meet the first demands of speed, power, economy and ease of riding.

This car is built primarily for the man who can own a good car, but who loves to drive and care for it himself.

Thus the marketing of this car will fall to those dealers who will be attracted naturally by the make-up of the car itself, and who reach the logical class of buyers. There is now a market of more than three-quarters of a million cars of this class, with a replacement every year of 18%. Sixty per cent of this number can be sold in towns under 25,000 population. The advanced closed car policy of this company will enable the dealer to widen his natural market by reaching into other classes.

The men of this organization earnestly wish and expect their dealer force to be built upon the same principles built into this car, and upon which their own successes have been founded.

Therefore, though you should be greatly pleased with a careful and minute inspection of the car itself, you will be even more interested in the dealer agreement which has been written from the standpoint of direct, permanent connection, liberal compensation, and close co-operation in each dealer's personal territory.

At your request, photographs and specifications will be mailed and all questions fully answered.

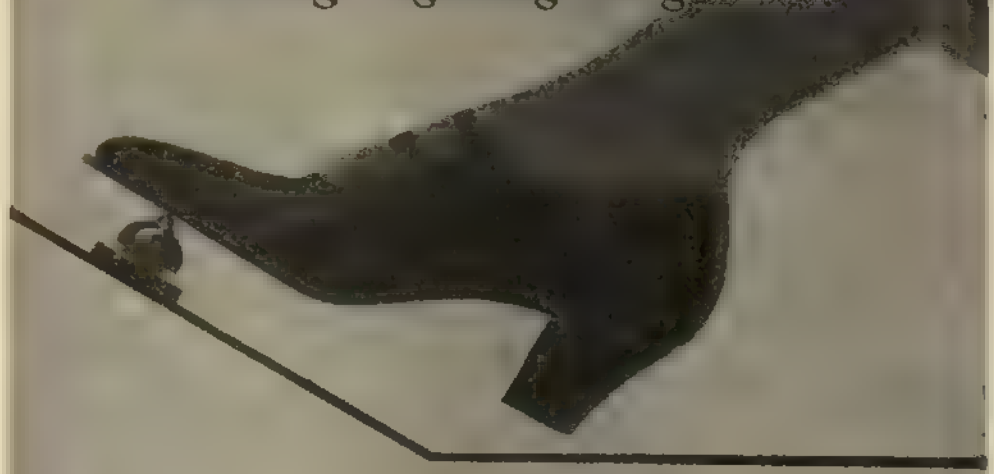
Auto-Lite

Starting, Lighting & Ignition



IT need not follow that the manufacturer who builds the *most* also builds the *best*. Quantity does not necessarily prove quality. But in the case of the Auto-Lite we believe it does.

Owners of large and small cars, and trucks, all over the country are daily demonstrating the superior excellence of the Auto-Lite System. From zero to a heat of equatorial climes, and from the western plains to metropolitan boulevards, the reports are the same; Auto-Lite functions faithfully and efficiently; and that is the final test in which every car builder and engineer is most interested.

Owners' satisfaction is the keystone to every manufacturer's success. More car owners have learned to place utmost confidence in the Auto-Lite System because of its reliability and maximum long life with minimum service attention.

NEW CARS AND MODELS

Cole Reduces Prices and Introduces New Model

THE startling announcement by the Cole Motor Car Co., of Indianapolis, of big reductions in prices on all its models came at the beginning of the New York show. These vary from $600 to $800 on the different models. In addition to these price reductions the suburban model was announced and put on exhibition. The prices are now $1885 for the touring, phaeton and roadster, $2585 for the coupe, $2685 for the sedan, $2885 for the suburban and Berline-limousine. The new prices should considerably increase the market for Cole cars. Ultra equipment on any of these models is furnished at $250 additional and disk or wire wheels for $35 additional.

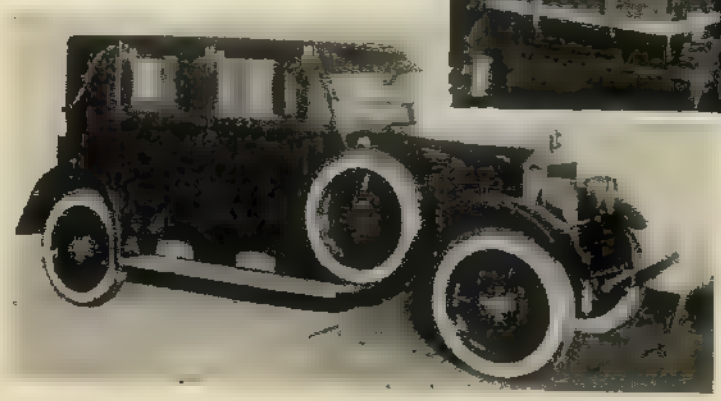
The suburban was shown with ultra equipment. It is a close-coupled 5-passenger car with four doors and nickeled bumpers front and rear. It was shown with disk wheel equipment, the spare wheels being mounted on either side at the front. This model has individual front fenders, and ¾-running boards. The rear of the body has body bars.

The doors are wide, the top is of the soft type and the car is built low. The frame of the Cole models has been made heavier and stronger. Equipment includes drum headlights, visor, ventilator, heater, footrest, dome light, corner lights and shades for rear-compartment windows. The lower half of the windshield is stationary and the seats have arm rests.

The Cole Ultra-Equipped, Four-Door Suburban Model. The Price is $3135.

The Moon 6-58 Sport Sedan

This is the model that is sometimes referred to as the Petite Touring Sedan. Descriptive details were published on page 72 of the January issue. An illustration of the trunk shows the novel means of fastening it in place.



The Most Completely and Conveniently Lubricated Car in America

BELIEVING that the more progressive type of automobile merchandiser is looking for a car with which he can fill the demand for a car that will meet the requirements of the buyer who wants to express *his* individuality and who wants distinction in the car he drives, in addition to dependable and carefree service, we are suggesting that you investigate the new Courier.

The new Haynes 57 Standard Touring Car—trunks furnished at extra charge

A NEW HAYNES CAR

Now ready for display at local Haynes Showrooms

THE new 1923 Haynes Model 57 Touring Car is one of the handsomest automobiles ever produced in the great Haynes factories at Kokomo.

Its rich Burgundy Wine color—a tint created by our own decorative experts—enhances the artistic lines of the body and lends even more dignity to the beauty of the fittings and finish.

The new, improved body has wider and more resilient seats, greatly increasing the comfort and ease of the passengers The upholstery is in a refined, plain, club style black leather with no plaits. Full length running boards with polished scuff plates, newly-designed crown fenders of sport type, and a new style instrument panel are 1923 features. 32 x 4½-inch cord tires; wooden wheels—with Harvey disc wheels optional.

READY: Factory production was planned when the new models were designed and we are ready to make delivery immediately on these sales-winning cars.

Write, telephone or telegraph for confidential interview regarding attractive open territory. Address Dept. 250.

The Walker Jack Merchandiser fairly shouts this reminder to all motorists who come in. It magnets their attention and "Asks 'em to buy."

Only one motorist in three has a jack of any kind. Half of those who have jacks need a new one. This rich field of profit for dealers is only about half covered. Why?

We decided it was because busy dealers could not find time to "merchandise" jacks. The public did not buy more because it was not asked to do so. So we brought out this new Walker Jack Merchandiser which over 6,000 live dealers are now using with sensational results.

A Walker Jack for Every Car

You can remember when speedometers, horns and windshields, for example, were accessories on the finer cars. Now they are necessities on all cars. A jack is an essential every motorist should have. Sooner or later every man gets one. Sell them Walker Jacks as they come in. That's what the Merchandiser does.

A Salesman Always on the Job

Every motorist who comes in is *asked* to buy a jack when you have this Merchandiser and it costs you no time or trouble. Your prospect can't get away from the question. It slaps him right in the face at the door. Dealers report their Walker Jack sales doubled and tripled the first month. One multiplied his sales by four.

Free With Standard Assortment

The Walker Merchandiser, costing over **$7.50** to make, comes free with a standard assortment embracing seven types of Walker Jacks, 15 in all. Ask your jobber's salesman for prices and discounts.

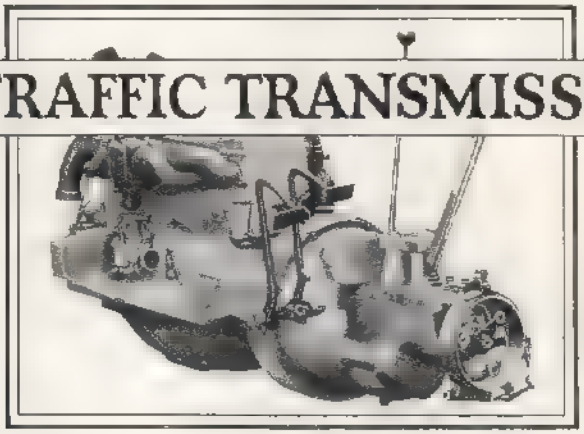
Announcing the Biggest Advance in Automobile Design Since the Self-Starter

The TRAFFIC TRANSMISSION



as an Exclusive Feature in the

1924 CHANDLER

As an exclusive feature of its 1924 models, the Chandler presents the biggest advance in motor car construction since the self-starter

THE TRAFFIC TRANSMISSION

Involving a totally new principle. The Traffic Transmission makes its first appearance on a passenger car in the 1924 Chandler.

It is absolutely clash-proof. It can be shifted at any speed by the most inexperienced driver with the pressure of a little finger.

The shift is made without noise and with perfect surety and safety. For braking purposes it is possible to change noiselessly from high gear back to second, and from second back to low at all normal driving speeds.

No sliding gears in the Traffic Transmission! No trying to force two rapidly spinning gears into mesh. For all gears of the Traffic Transmission are always in mesh. That is what insures the positive, silent, instantaneous shift and prevents chipped and shattered gear teeth.

In addition to the Traffic Transmission, the 1924 Chandler contains the now famous

PIKES PEAK MOTOR

with an important oiling system improvement and with its operation made flawlessly smooth and noiseless.

If you want to make big money next year, write at once for complete information about the revolutionary idea involved in the Traffic Transmission.

The dealer who goes into 1924 selling the only car employing Traffic Transmission will enjoy an exclusive sales advantage so powerful that the profits he makes will depend entirely on the number of demonstrations he gives! For the man who drives a 1924 Chandler will buy!

NEW PRODUCTS AT NEW YORK SHOW

The New Volco Bumper

Volator Co., Inc.
600 N. Michigan Ave., Chicago, Ill.

The Volco patented rubber surfaced bar of drawn steel tubing is light in weight, powerful in resistance and covered with a heavy coating of live rubber. The rubber-steel bars are attached to the car with specially built steel spring arms. It comes in an assortment of finishes, including black, white, yellow, baby-blue, green and a rich maroon, each color pigment ingrained in the material.

A New Pep "Safety First" Bearing Grinding Compound

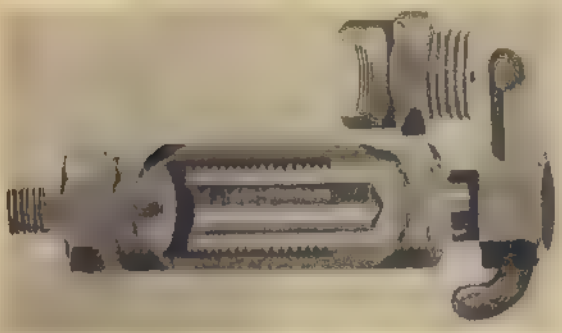
Pep Mfg. Co., Inc.
33 W. 42nd St., New York, N. Y

has placed a new bearing grinding compound on the market. The new compound, which may be mixed with either oil or water, is said to be absolutely safe and does a smooth job at greatly increased speed. Price, 4 oz. can, $1.

Spillman Engine Stand; Revolving and Adjustable

John C. Hoof & Co., 159 W. Illinois St. Chicago, Ill.

In the Spillman Engine Stand a right and a left-hand slotted bracket are bolted on each revolving ring. These brackets support side angle irons upon which the complete engine or engine base may be bolted or clamped and then revolved and secured at any angle or assembly for repair. By turning the brackets inward the side arms may be spaced as closely as 8 in., or moved outward to the extreme width of the revolving rings. This range will accommodate most of the automobile engines. For engines of greater base width up to 34 in., it is merely necessary to reverse these brackets, so that they project beyond the revolving rings.



Strickler High-Pressure Grease and Oil Gun

Bowen Products Corp
Auburn, N. Y

The Strickler High-Pressure Grease and Oil Gun, consists of a hexagon steel barrel chambered internally, and threaded for a heat-treated steel plunger which is provided with an air chamber. The lower end of the hexagon barrel is internally threaded to receive nozzles which are threaded on their outer end to screw into grease cup openings. These nozzles are interchangeable and are made in standard sizes, both male and female to fit all standard openings. All guns are provided with ⅛ in. pipe thread nozzle which takes care of grease cup openings on over 90 per cent of all cars. This gun which is said to exert a pressure of from 15,00 to 18,000 lb. at the nozzle, will force rust, corrosion and old hard grease out of a clogged bearing and leave it filled with fresh grease. Price complete, with standard ⅛ in. nozzle $15. The garage extra nozzle outfit consists of 18 pieces, including one ⅛ in. I. P. nozzle and one elbow in a neat case. This makes a complete high-pressure grease and oil gun outfit which will take care of almost any car made. Complete set, including gun, $18

Weaver New-Way Jack Model B

Weaver Mfg. Co., Springfield, Mass

This new Model B jack is a very compact, easily operated and efficient jack for lifting and transporting cars and trucks in the garage, show room, service station and at the curb. All the popular features of the Model A jack, including the pivoting wheels, which permit the jack to be guided by the handle, are included in this new Model B, together with various refinements in construction that add materially to its ruggedness and durability.

You can easily reach any axle with this Model B WEAVER New-Way Jack

New Features you'll be interested in

TELESCOPING STANDARD can be dropped to minimum height of 8 inches, sufficiently low to be inserted under any car axle, and raised to a maximum height of 17½ inches, high enough to reach unusually high axles

STANDARD SLEEVE supports standard rigidly when drawn up to its maximum height and prevents binding under heavy loads

ROLLER BEARINGS are located within axle housing instead of within wheel hubs, preventing undue friction and wear under side thrust

REAR CASTER is clamped to jack by heavy bolt and can easily be replaced if damaged. Two sets of ball bearings reduce friction and prevent binding

UNUSUALLY HEAVY, DURABLE WHEELS that will stand up under the hardest service. Can be had with heavy rubber tires at a slight additional cost

IT'S an easy matter to get a car out of a tight place in your garage or repair shop in a hurry if you have a Model B Weaver New-Way Jack. If you haven't room to operate from the front or rear of the car, you can insert the jack from the side of the car as illustrated above. The long body of the jack enables you to reach the axle with ease, and the fact that the wheels of the jack pivot and are controlled by the handle, makes it easy to guide the jack into just the right position under the car the "first crack out of the box."

The wheels of the jack can then be cut in line with the car axle, and the car drawn directly sideways without having to raise it high enough to permit the rear end of the jack frame to pass directly under the car.

This is only one of a number of exclusive features of this new Model B that will enable you to give quicker, better service that will increase your profits. We have prepared a special folder describing this jack in detail. Your copy is waiting to be mailed. Won't you write for it today?

another Reason—

Another reason probably for this great pump's great success is the fact that its operation requires no foot valves or check valves!

Fry Guarantee measuring is accomplished automatically. There are no extra contrivances to cause trouble.

Hence, faster work, also maintenance and service reduced to bedrock minimum!

There are other reasons—innumerable reasons. Ask us some.

The Greatest Achievement of a Great Organization

The new Willys-Knight Coupe-Sedan—an innovation—an entirely original body creation of steel, combines the chummy sociability of the Coupe with the convenience of the Sedan. A modish enclosed car for five. Its doors both front and rear avoid the inconvenience of folding seats and provide equal comfort for host and guests.

The new Willys-Knight Seven-Passenger Sedan and Touring Car are seven-passenger in fact as well as in name.

Four new Willys-Knight body styles on the five-passenger chassis introduce numerous improvements. In all these cars the motor improves with use.

The new low-priced Overland is wonderful value. The body of the Touring Car is entirely of steel. Its finish is hard baked enamel. Its tires are oversize. The hood is higher. Body lines are longer. Seats are lower. Triplex springs give comfort and add to the life of the car.

The new Overland leads in low cost of gasoline and upkeep; styles—Five-Passenger Sedan and Touring, Roadster, Coupe.

The enthusiasm of those dealers who have seen this new line of cars, justifies the confidence that Willys-Overland dealers have an extraordinary opportunity for profit-making this year.

FIVE—PLUS

HERE are five outstanding advantages which the Royal Typewriter possesses—advantages which have a direct bearing on the quality, volume and cost of your typing.

The most responsive and swiftest key action to be found in any typewriter today.

The "touch" of all the keys is absolutely equalized. And the stenographer herself can adjust them all by turning a single, conveniently located thumbscrew.

A greater accessibility of all working parts.

The elimination of friction in the two parts subject to the most wear in other typewriters—the carriage tracks and escapement.

A longer period of service, because of simpler and more rigid construction, less vibration and less friction of moving parts than any other typewriter offers.

We don't expect you to share our enthusiasm for the Royal until you have seen it actually operated in your own office and had the above practical advantages demonstrated to your satisfaction. May we arrange to do this at your convenience?

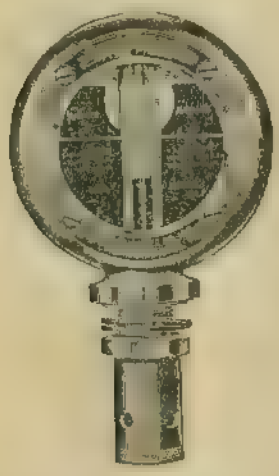
BOYCE MOTO-METERS

Indicates when unseen parts lack lubrication, when cooling water is getting low, or when there is an overheated condition anywhere throughout the mechanism of the car—a great trouble preventer and repair bill saver; can be attached to any radiator cap. Black dials with white letters.



Designed for the highest grade passenger cars. The temperature tube is ⅜ in. in diam., having a broad column of red liquid, readable at a great distance. This case is triple plated, and the finish of the entire instrument is of the highest quality of workmanship, equipped with Schlaich Lock

No. 5623—De Luxe, size 3⅝×5⅝ in., w't each 29 ozs. .....each *$15.00*

ONE IN A CARTON

Designed especially for severe service conditions, such as for use on trucks and tractors, diam. of thermometer tube is ⅜ in., making breakage practically impossible. Frame of the instrument is very substantial, and the thermometer tube thoroughly protected. Casing is nickel-plated, and the tube has a broad red column of indicating liquid, easily seen regardless of dust conditions so often met with in truck and tractor service.

No. 5624—Truck and Tractor, size 2¾×4¾ in., w't each 16 ozs., each *$10.00*

ONE IN A CARTON

No. 5625—Standard. A perfect heat recording instrument of the highest type with extremely broad ribbon bore thermometer tube. **Regular equipment on America's leading cars.** Both sides protected by thick glass crystals. Casing finished in beautiful black enamel. Size 3⅝×5⅛ in., w't each 1 lb.....each *$10.00*

ONE IN A CARTON

No. 5628—Universal, slightly smaller than the standard, protected with bevelled crystals, beautifully finished in all-nickel, size 3×5 in., w't each 14 ozs.....each *$7.50*

ONE IN A CARTON

New Midget Model, designed especially for use on small cars, polished nickel frame and is finished with bevelled crystals both front and rear. This instrument, except for its size, is identical with more expensive Boyce Moto-Meters for larger types of car.

No. 5627—Midget, w't each 18 ozs. Each *$3.50*

New Special for Ford Model, designed especially for use on Ford cars. Broad thermometer tube, which is easily readable even at a distance. Provided with bevelled crystals both front and rear, is finished in polished nickel. Special Ford cap with which it is equipped makes it an ideal instrument.

No. 5629—Special Ford, w't each 20 ozs. .....each *$4.00*

Aristocrat Model for Ford Cars.

Moto-Meter itself is identical to Special for Ford Model.

Equipped with special Schlaich Lock Cap which not only prevents theft, but also serves as handsome ornament.

Can be installed on any Ford in five minutes, but can only be removed by owner.

At either end of cross bar are crystals under which can be shown owner's initials, fraternal insignia, club emblems and a variety of designs which are listed on a return postcard packed with each instrument. Any of these designs will be supplied free of charge, upon receipt of card by factory.

No. 5622—Aristocrat, w't each 30 oz. each *$7.00*

ONE IN A BOX

HEAT INDICATORS

BORG AND BECK

The Borg & Beck Heat Indicator accurately inricates on the dash motor temperature of the motor at all times.

Purely mechanical in operation—no electrical connections, nothing to break or get out of order

Indicating hand on the dial is actuated through flexible, dental type shaft by a small but very efficient thermostat of novel design mounted against motor block by special clamping device. Each instrument is simply, quickly and permanently adjusted for running temperature of the individual motor at time of installation.

A precison instrument made of best possible materials, fully guaranteed by the manufactures and should be on the instrument board of every car.

Can be installed in one hour or less. One model for all cars.

It shows you how hot or how cold your motor is-not the temperature of your radiator.

You adjust this instrument to your motor. Whether the normal running point of the motor is low or high, you always know its exact condition.

By being attached to the motor it is not exposed to rain, snow or weather conditions.

The gauge is placed on the instrument board-and is easily read day or night. The large white pointer and novel dial makes it readable at a glance.

It is theft proof. Its location is such that it is not liable to breakage.

The design is simple and the best workmanship and materials available are used in its construction.

The universal clamp for attaching the unit to the motor makes the installation easy. Full instructions accompany each instrument.

No further attention is necessary after the instrument is once installed and adjusted.

No. 5965—W't each 1 lb., each **$12.70**

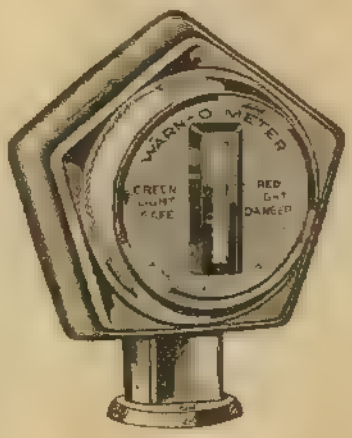
ONE IN A BOX

STEWART WARN-O-METERS

The Stewart Warn-O-Meter prevents engine troubles resulting from overheating. It is an electrically operated instrument and may be installed on the radiator, fender, or on the hood of cars that are air cooled. It is wired to a thermostat installed on the engine. When the engine is cold, no light shows in the Warn-O-Meter. As soon as the engine reaches a normal and efficient operatmg heat, a green light appears. The red light, or danger signal, flashes on when the motor is becoming overheated, because the temperature is taken where the heat is generated, the motor cylinder.

The Warn-O-Meter is not affected by the water or air of the radiator. It is electrically operated direct from the engine, assuring the driver of an accurate indication of the motor's heat.

The design in the Warn-O-Meter that faces oncoming cars is illuminated from within the instrument, and may be replaced by a car name-plate, lodge emblem, owner's initials, or some special design.



No. 5615—**Standard** Model 173A—Nickel plated finish, highly polished. Complete with all fittings, w't each 2½ lbs. .....each **$13.35**

No. 5616—**DeLuxe** Model 172A—nickel plated finish, highly polished, silver etched dial. Complete with all fittings, w't each 2½ lbs., each **$16.70**

AUTO CLOCKS

Keyless Auto Clocks are the most practical auto clocks made. This unique way of winding and setting by the rim, thus eliminating the use of a key or a projecting stem, has made them very popular with the trade. They run eight days with one winding, are fully guaranteed, and are, without doubt, the handsomest auto clock on the market. They are built especially for automobiles and will stand the hardest vibration, and keep time under the most trying conditions. Dust and moisture proof.

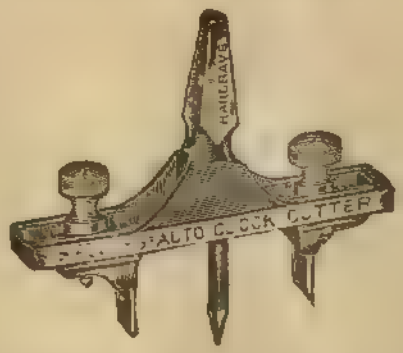
COWL BOARD CUTTERS



A practical tool for cutting circular holes in metal or wood.

A steel center punch is screwed firmly into the cast iron frame and holds both cutting tools steady.

The two specially hardened crucible steel cutting edges can be adjusted to cut holes from ½ inch to 4½ inches in diameter.

The Cowl Board Cutter can be used in either a hand brace and bit or in an electric drill.

No. 7360—W't each 4 lb. .....each $3.40

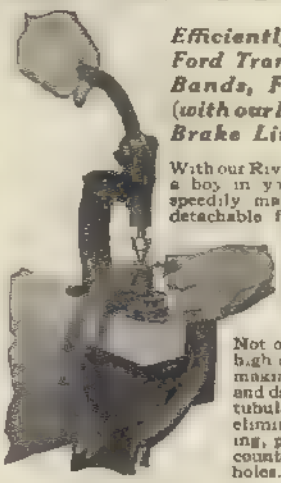
LAKEWOOD

Hand-Lever Rivet Setter



Efficiently Handles Ford Transmission Bands, Fan Belts (with our Fasteners), Brake Lining, Etc.

With our Rivet Setter even a boy in your shop can speedily make or repair detachable fan belts—flat or V-type—(with our Fan Belt Fasteners described below).

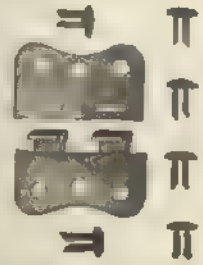
Not only does this high class, money-making tool hold and drive split and tubular rivets—it eliminates drilling, punching and counter-sinking of holes.

You can rivet on a full set of Ford Bands *in less than 4 minutes*—with the Hand Riveter

Furthermore, it curves or spraddles back into the work the prongs or shanks of the rivets—so that a proper clinch is positively insured. Ask your jobber, or write us direct at the factory.

Q. A. Fan Belt Fasteners

"Make Both Ends Meet"



Handy little fasteners that enable you to make quick, profitable belting repairs—on any flat, V or small shop belt.

You can get these Quick Attachable Fasteners from your jobber, in small slide boxes for shop use. Also put up on cards and in individual-set envelopes for resale to car owners—at worth-while profits.

Jobbers: There is a big, all-the-year-'round demand for Lakewood Rivet Setters and Fan Belt Fasteners. Write for our proposition—*now.*

Miles From a Repair Shop With a Leaking Radiator—

But the modern motorist is undaunted by such a "fix." With Kester Acid Core Wire Solder and heat the leak is fixed in a jiffy—*permanently* if it's minor—and if the damage is serious, any novice at soldering can patch it securely enough to reach the nearest garage, where a mechanic with the proper tools—*and Kester Solder*—can easily make a permanent mend.

For the motorist and occasional user, Kester comes coiled in one-pound cartons or on one-pound spools, while the garage owner and mechanic find it more economical to buy on five- and ten-pound spools.

Every Boy and Girl In Your Community Will Want a

"CENTURY" BICYCLE

Better bicycles—just read our specifications and you'll realize that no better parts or equipment can be obtained. That's why "Centurys" stay sold and give satisfaction.

Here's Why The "Century" Is Such a Good Bicycle

Construction

FRAME—20 gauge seamless tubing.
JOINTS—Flush reinforced fishtail.
CRANK HANGER—Drop forged, 1 piece.
SPROCKET—Special design, machined, polished.
SPOKES—Standard Co's best.
CHAIN—Roller, ½ inch pitch, easy riding.
CUPS AND CONES—Lathe turned from solid bar, polished.
MUD GUARDS—Steel, braced, enameled to match frame.

Equipment

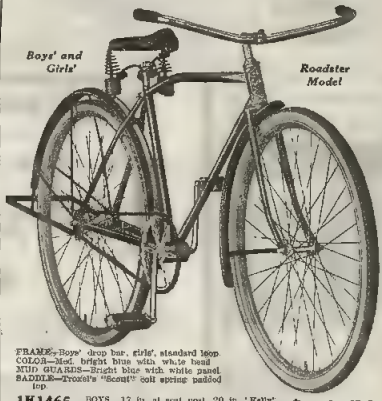
COASTER BRAKE—"New Departure."
FRONT HUB—"New Departure."
TIRES—U. S. chain tread.
SADDLE—"Troxel."
HANDLE BARS—"Kelly" triple plated, motorcycle rubber grips.
PEDALS—"Surplus," rubber tread, ball-bearing.
STAND—Channel iron, latches to mud guard.

Finish

The "Century" rich, smooth, lasting finish is obtained from anti-rust and primary coats, hand rubbed and sanded, then finished with deep rich enamels, applied with air brush and oven-baked to a hard china-like surface.

Trim

All "Century" bicycles have a white head with spears, outlined and striped in harmonizing colors.



FRAME—Boys' drop bar, girls', standard loop.
COLOR—Med. bright blue with white head.
MUD GUARDS—Bright blue with white panel.
SADDLE—Troxel's "Scout" coil spring padded top.

1K1465—BOYS', 17 in. at seat post, 20 in. "Kelly" handle bars 9 in. extension, 26 in. tires 5½ in. crank hanger. 1 in crate. Each **$24.50**

"UNIVERSAL" CAMERAS

Made for Butler Brothers by Burke and James Inc makers of the famous "Rexo" Camera. There is no maker of cameras in America that stands higher in the opinion of scientific men. That is why among all the Camera makers of Europe and America they were selected to build Aeroplane Cameras for the British Army Universal Cameras are sturdily built. The frame is more solid and stronger than other makers. Each camera in the Universal line is a beauty fully finished in every detail and perfect in every respect and is guaranteed to work. No camera leaves the Burke and James Inc factory until it has withstood the company's laboratory tests. This means that every camera shipped is a perfect one Butler Brothers are pleased to say that this is the first time the old and reliable corporation of Burke and James Inc., has ever sold a camera through any other than its own agents.

Five distinctive features found in every folding "Universal" camera.

1—Focusing device
2—Improved speed shutter
3—Finish back locked film tight.
4—Microscope focusing device
5—Rigid standard and broad track

Box Cameras—Wood and metal construction covered with very durable imitation embossed leather universal focus meniscus lens, 3 diaphragm stops, automatic shutter for bulb, time and instantaneous exposure, new metal spool holding device insures quick loading and smooth winding of film, bound by Black view finders of a large size (except 1K5170), absolutely light tight. 3 in pkg.

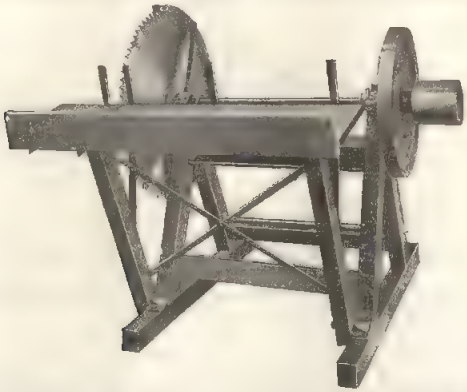
Each, **$5.00**

WOOD SAWING OUTFITS

CHALLENGE

NO. 46, ALL WOOD, WITH TILTING TABLE. HEAVY DUTY. FOR CORDWOOD SAWING



All wood frame, fitted with mandrel turned to 1⅝-inch for blade, and reinforced with steel braces. Frame is constructed of thoroughly seasoned lumber, of the proper size to withstand any strain that can be placed on it a sawing wood; and is secured bolted and braced in every direction.

The shaft is cold rolled steel; and the bearings are cast on a solid iron beam extending the entire length of the frame, which holds them in perfect alignment with the shaft at all times. Substantial shield, placed over the blade, to protect the operator from injury. The table is of the tilting type, pivoted at bottom on a cast bearing.

Can be used with saws from 20 inches to 30 inches in diameter.

Complete with Blade

No.	With size blade	Size pulley	Speed R. P.M.	Wt. each	Each
46	26 in.	6x6 in.	1250	800 lbs.	$76.00

Loose.

SAW MANDRELS

Style 2 consists of a 1⅞-inch main shaft, 3 feet 10 inches long, one end fitted with 1⅝ inch arbor and flanges, the other end fitted with a 6x6 inch pulley and heavy balance wheel. The boxes are cast on a solid iron beam extending from saw flanges to balance wheel which holds them in perfect alignment with the shaft at all times. This style is recommended to parties who wish to build their own frame.

No. 3 Saw Mandrel is constructed same as No. 2, except the two boxes are intended to be bolted on a timber or support of some kind and are of the self-adjusting type, same as used on our saw frames. This style is especially designed for fastening to frames of trucks, and used in connection with gasoline engines.

NO BLADES

No.	Wt. each	Each
2	132 lbs.	$45.00
3	132 lbs.	34.00

CROSSCUT SAW BLADES

CURTIS

A saw is a delicate tool. When you stop to think of the thinness of the metal and the severe work that a saw performs, you can readily understand what we mean when we say that a saw is a delicate tool.

To manufacture a saw that will give satisfaction out of such a thin piece of steel requires a combination of the best talent, widest experience, large facilities and the most improved machinery. The makers of our saws have been manufacturing saws and sawmills for over 63 years, and the experience thus gained has taught them just how to put into a saw those qualities that make a good blade. They are the only saw manufacturers who have made sawmill machinery, and therefore have obtained a wider experience than others.

The best steel is used in the manufacture of the saws. The steel is made to their own analysis, selected by repeated tests in their own chemical and physical laboratories. By the use of the latest in heat-recording instruments, they are able to give saws a uniform and tough temper, even to the very points of the teeth.

Every saw, before being shipped, is examined by an expert, to see that it has been properly made.

Diameter	Thickness gauge	Size hole	Wt. each	Each
24 in.	11.	1⅝ in.	18 lbs.	$ 8 50
26 in.	11.	1⅝ in.	21 lbs.	10 00

Champion X is the one spark plug recognized as the standard for Ford cars, trucks and tractors. Millions are in daily use. They are a sure profit maker for you.

CHAMPION

Champion Double-Ribbed Core for your protection

Fewer Champion Types Mean Greater Dealer Profit

Progress in motor standardization has made possible the reduction of the Champion Blue Box Line to *seven numbers*. These seven types cover the requirements of every engine made in quantity. The Champion X and Champion X Long meet the needs of Ford cars, trucks and tractors.

With the very minimum investment, the Champion dealer can now carry stock to meet absolutely all calls. His stock turns faster and makes him more profit if he carries the full line of dependable Champion Spark Plugs.

Champion Spark Plug Company,
Toledo, Ohio

Champion Spark Plug Company of Canada, Limited, Windsor, Ontario

Only One Spark Plug is Entitled to the Name Champion. You Can Identify It by the Double-Ribbed Core.

The Cleveland Newspaper Situation

The Press Is Cleveland's Most Popular Newspaper

THE circulation statements of the Cleveland daily newspapers for the period ending September 30, 1922, was as follows:

The Press - 182,548
The News - 106,601
Plain Dealer - 192,712

These are daily figures only, as The Press does not publish a Sunday edition.

143,041 of The Press total circulation of 182,548 is in Greater Cleveland, representing one of the most highly compact and intensified circulations of any daily newspaper.

Possibly this is one of the reasons why The Press carries more local advertising than any other Cleveland daily newspaper.

"SUGGESTION" Will Sell Lawn Mowers

Use our handsomely illustrated seven color Window Display. Every Tom, Dick, Harry and Martha seeing it, whose "Grass Cutter" is on its last legs, will be reminded that there, in your store, are the new Lawn Mowers they need.

One Coldwell dealer doubled his sales by using this efficient, seven color Display. By doing what he did, you will sell more machines and increase your profits.

If you have this Display, take it out, dust it off and place it in your window with a Coldwell Lawn Mower on each side.

Start it working!

If you haven't this Display, write or telegraph immediately and we will rush it to you, together with our other Aids-to-Merchandising. You want it—you need it. Remember—you're going to sell more Lawn Mowers this season. ON YOUR TOES!

COLDWELL LAWN MOWER CO.

Features which sell the Auto-Wheel No. 1

Think of the hit which a coaster wagon with rubber-tired, steel disc wheels would make on a boy. Think of being a boy yourself and of having a wagon with wheels just like the snappiest sport model automobile.

Steel disc wheels can be obtained on all Auto-Wheel Coasters rubber or steel tires as the boy wishes or artillery-type wood spoke wheels. All wheels are interchangeable Three largest models have over-sized rubber tires.

Many boys know this about Auto-Wheel Coasters. Many more are being told about it through our national advertising. This and other distinguishing and unusual features of the line make it easy for you to sell the

Auto-Wheel

Besides steel disc wheels or wood spoke wheels, Auto Wheel Coasters offer self-contained roller bearings, hound brace, hand brake, special auto type hub cap and locking pin, and mortised joints in body. Body of seasoned ash; bolsters of hard maple—a construction superior to any other type and one which has not failed to give utmost satisfaction

And the Auto-Cart (Auto-Wheel's junior companion for little brother and sister) has rubber-tired disc wheels, too. Also self-contained roller bearings, and the same high grade material and finish.

If you are not handling this profitable, quick-turning line of coasters and carts, get started now so that you will share in the spring and summer business. Write to your jobber, or to us about the wagons which sell themselves.

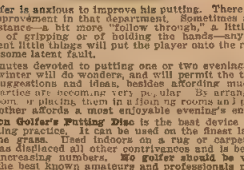
Wilson Patented Putting Disc



Every golfer is anxious to improve his putting. There is generally room for improvement in that department. Sometimes a slight difference in stance—a bit more "follow through," a little change in the manner of gripping or of holding the hands—any one of the dozen different little things will put the player onto the right method and correct some latent fault.

A few minutes devoted to putting one or two evenings each week during the winter will do wonders, and will permit the trying out of numerous suggestions and ideas, besides affording much pleasure.

Putting Parties are becoming very popular. By arranging several holes in a room or placing them in adjoining rooms and putting from one to the other affords a most enjoyable evening's entertainment.

The Wilson Golfer's Putting Disc is the best device yet brought out for putting practice. It can be used on the finest lawn without injury to the grass. Used indoors on a rug or carpet, it has no equal. It has displaced all other contrivances and is being used by golfers in increasing numbers. **No golfer should be without one.** Nearly all the best known amateurs and professionals practice putting with the Wilson. **5+7585** Each..... **$1.10**

The "Little Jack" Golf Ball Marker

Every ball should be marked—not merely because it may be returned to its rightful owner, but because it avoids many an argument on the course and also avoids much of the lifting and replacing of the ball. 5 initials.

5+7584 Marker complete with any 5 initial type. Be sure and mention initials desired
Each..... **$0.75**

COLTS AUTOMATIC PISTOLS

The action of these pistols is automatic, except that the trigger must be pulled to fire each shot, the cartridges being supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell extracted, and a new cartridge loaded into the chamber, all thes operations taking place automatically. This automatic operation of the pistol is effected by the recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has no disturbing effect.

All Colts' Automatic Pistols are equipped with safety devices.

COLT AUTOMATIC PISTOLS IN CASES

Special cases, of the highest quality, made by the Colt Patent Firearms Mfg. Co., for Colt Automatic pistols, calibers 25, 32 and 380, that will appeal to the purchaser, of one of these pistols, who has in mind using the arm as a home defence or office weapon, or for presentation purposes. These cases are sturdily constructed of wood, covered with a high grade black leatherette. They are lined with velveteen and sateen, with a recess provided for the firearm. Two colors of lining are offered: dark blue and maroon. These cases will not be sold separately.

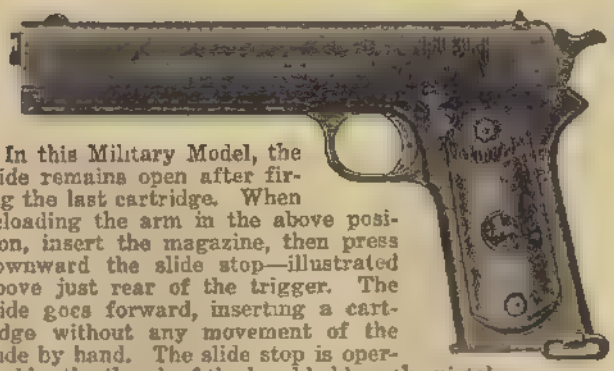
COLT AUTOMATIC PISTOLS



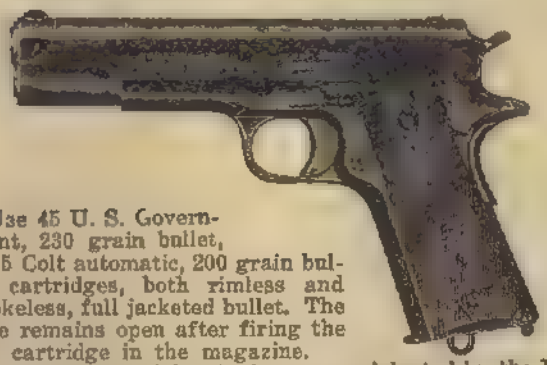
In this Military Model, the slide remains open after firing the last cartridge. When reloading the arm in the above position, insert the magazine, then press downward the slide stop—illustrated above just rear of the trigger. The slide goes forward, inserting a cartridge without any movement of the slide by hand. The slide stop is operated by the thumb of the hand holding the pistol.

Military Model, Hammer.

No. 7—38 cal., center fire, 8 shots, blued, 6 in. barrel, length over all 9 in., w't 38 ozs. .....each $69.60

Extra Magazines, 38 cal., for Colt's automatic military pistols .....each $2.50

ONE IN A BOX



Use 45 U. S. Government, 230 grain bullet, or 45 Colt automatic, 200 grain bullet cartridges, both rimless and smokeless, full jacketed bullet. The slide remains open after firing the last cartridge in the magazine.

Government model 1911, hammer. Adopted by the U. S. government as the service side arm.

No. 45— 45 cal., center fire 7 shots, full blued, checkered walnut stocks, 5 in. barrel, length over all 8½ in., w't 39 ozs. .....each $58.70

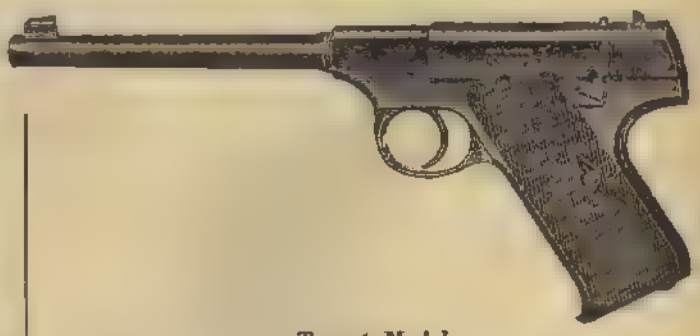
COLT AUTOMATIC PISTOLS



Target Model.

No. 22G—22 long rifle rim fire caliber, 10 shots, 6½ in. barrel, blued finish, check English walnut stocks, adjustable bead front and rear sights, lenght over all 10½ in., w't 28 ozs. .....each $52.20

ONE IN A BOX

Chambered for 22 Long Rifle Rim Fire Semi-Smokeless cartridges—lubricated cartridges only.

Extra Magazines, 22 long rifle rim fire caliber, for No 22G pistols .....each $4.00

With its long barrel, light trigger pull, splendid balance and adjustable target sights—the front sight adjustable for elevation and the rear for windage—it possesses all the advantages of a single-shot target pistol, with automatic action in addition, obviating the inconvenience of reloading for each shot and allowing rapid fire and snap shooting.

The pistol has a slide lock safety which when the hammer is cocked may be pushed upward, thus positively locking hammer and slide. This cannot be done when the hammer is down. The safety acts as an indicator, showing whether or not the arm is cocked

SAVAGE AUTOMATIC PISTOLS

Use 32 cal. automatic smokeless cartridges.

The .32 Savage Automatic is a powerful, accurate and rapid fire pistol, which carries 10 cartridges in the magazine. An extra one may be placed in the chamber, giving the arm a capacity of 11 shots. The mechanism is semi-automatic or self-loading, in which the recoil of firing the cartridge extracts and ejects the empty shell, also cocks the pistol, reloading it in readiness for the next shot, to fire each of which the trigger must be pulled.

Pocket model, new style hammer or cocking lever.

Blued automatic, 11 shots (including one in the chamber), length of barrel 4 in., length over all 6½ in., w't 19 oz.

No. 15— 32 caliber .....each $30.50

No. 16—380 caliber .....each 30.50

Extra Magazines, for No. 51, 380 cal. automatic pistol, each $2.00

ONE IN A BOX

Self-Aiming and Completely Safe.

Capacity of magazine, seven cartridges; an additional cartridge can be carried in the chamber, ready to fire instantly when the safety lever is forward. This is two more cartridges than can be carried in any revolver of similar caliber.

Hammerless, with side ejection. Automatic grip safety prevents firing unless handle is grasped and trigger pulled. Permits carrying full cocked with similar safety.

Thumb-operated safety lever adds safety when pistol is laid away or carried. Also serves as an indicator, it and grip safety both showing whether or not hammer is cocked.

Magazine-removal automatic safety rear lock prevents firing if a cartridge is left in chamber when magazine is removed.

Breech remains positively locked until bullet has left the muzzle—not a blow-back action. Positive prevention of shellhead blowouts and breech escape of powder gas.

Each time trigger is pulled, fires one shot, automatically ejects empty shell, and reloads ready to fire. Accuracy and stopping power above police requirements. Especially designed for quick straight shooting—the first self-aiming pistol.

HARRINGTON & RICHARDSON AUTOMATIC PISTOL

No. 32H—.32 caliber, hammerless, 8 shots, 3½ in. barrel, length over all 6½ in., blued finish, w't 22 oz., each $27.00

Extra Magazines, for No. 32H, 32 cal. ....each $1.70

Use 32 cal. automatic smokeless cartridges.

ONE IN A BOX

Simplicity of construction, strength and reliability of mechanism, coil or spiral springs throughout reduce liability of breakage to a minimum.

Three safety devices are provided, one operated by the thumb of right hand and two are entirely automatic, thus insuring absolute safety in handling and carrying.

When the safety lever is in the down or normal position the word "Safe" is visible and the pistol cannot be discharged. By throwing the lever up with thumb the "Safe" is obscured and the pistol is ready for instant use.

The handle must be firmly grasped, compressing the grip safety, when the trigger is pulled to discharge the arm.

The grip safety positively locks the sear and the firing pin cannot be released until the grip safety is pressed in. It is impossible to fire the pistol by a jar of any kind.

The third safety, operated by the magazine, makes discharge impossible when the magazine is removed from the pistol. In all automatic pistols the hammer or firing pin is cocked after first shot has been fired and three is always a cartridge in the chamber until the last cartridge contained has been shot. In this pistol the possibility of unintentional discharge after removal of magazine is eliminated.

COLT AUTOMATIC PISTOLS

The Action of All Colt Automatic Pistols is Automatic, Except that the Trigger Must Be Pulled to Fire Each Shot, the Cartridges Being Supplied from a Detachable Magazine, Inserted in the Handle of the Pistol; After the Pistol is Charged With a Filled Magazine, One Opening Movement is Made by the Hand, Bringing the First Cartridge into the Chamber; On Pulling the Trigger the Cartridge is Fired, the Empty Shell is Extracted, and a New Cartridge Loaded Into the Chamber, All These Operations Taking Place Automatically Without Any Manipulation of the Arm. This Automatic Operation of the Pistol is Effected By the Recoil of the Moving Parts, and, As a Consequence, the Recoil is So Absorbed in Being Utilized That It has No Disturbing Effect; The First Shot Can Be Discharged More Quickly Than from Any Arm Made, as This Pistol Can be Carried with Perfect Safety While the Hammer is At Full Cock.

POCKET MODEL

Hammerless

Safety Besides the Safety in the Action, Which Does Not Permit Hammer to be Released Unless Action is Fully Closed, this Arm has Two Additional Operating Safeties.

(1) The Slide Lock Indicates When the Arm is Cocked and, when Engaged in the Slide Cut, Disconnects the Trigger from the Operating Mechanism but Can be Readily Drawn Down by the Thumb When One Desires to Shoot.

(2) An Automatic Safety, also Acting as an Indicator, Locks the Action Until the Handle is Firmly Grasped when Pulling the Trigger.

It Will Thus be Seen that Here are Two Indicators Showing When the Hammer is Cocked; and There are Two Safeties, Either of Which is Absolutely Positive, One of Which is Automatic.

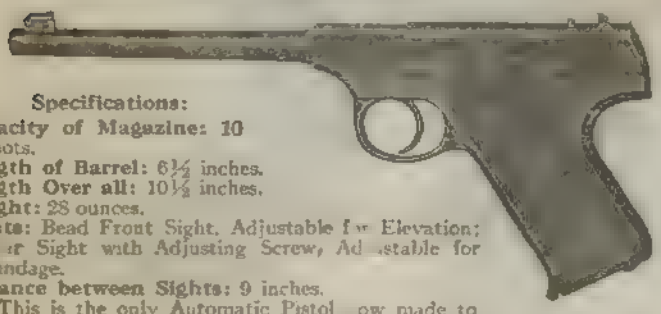
NEW TARGET MODEL



Specifications:

Capacity of Magazine: 10 Shots.
Length of Barrel: 6¼ inches.
Length Over all: 10½ inches.
Weight: 28 ounces.
Sights: Bead Front Sight, Adjustable for Elevation; Rear Sight with Adjusting Screw, Adjustable for Windage.
Distance between Sights: 9 inches.

This is the only Automatic Pistol now made to handle the Standard Caliber .22 Long Rifle Cartridges and will prove most popular with Shooters, Sportsmen, Target Shots and others desiring a High Grade Pistol adapted for this economical and readily obtained Ammunition.

The Pistol is equipped with Safety Lock which when Arm is Cocked may be locked on Safe, thereby holding Hammer and Sear. The Magazine is provided with a Follower or Pin which projects on the Right Side and enables the operator to compress or relieve the Tension of the Magazine Spring by hand in loading the Magazine, a feature that will be appreciated by those who know the difficulty of handling small Cartridges.

Cartridges .22 Caliber, Rim Fire (Greased Lubricating Bullet. Semi-smokeless Powder. Greased Cartridges are Slightly Longer

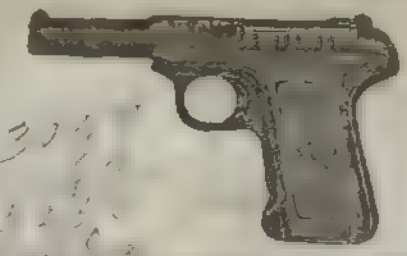
AUTOMATIC PISTOLS

SAVAGE



The Savage Automatic Makes the Shooting of the Novice Sure and Deadly when in Combat for His Life. It Puts into His Hands Eleven Shots at Once and the Ability to Reload **"10 Shots Quick"** in One Second's Time. The Savage is of the Automatic Type in which the Recoil of Firing the Cartridge Extracts and Ejects the Empty Shell, Cocks the Pistol, Re-loads it in Readiness for the Next Shot. The Trigger Must Be Pulled to Fire Each Shot. **The Savage Possesses Many Points of Superiority Over Other Pocket Arms, Namely: Aims Easy as Pointing Your Finger; Fires Ten Shots Quick; Action Unusually Simple; Entire Arm Can Be Easily and Quickly Taken Completely Apart and Put Together with the Hands; Weighs from Three or Four Ounces Less than Other Automatics; Operation is Always Positive and Can Be Operated with Thumb of Firing Hand. The Only Automatic that Has an Indicator which Tells at All Times Whether Pistol is Loaded.**

PIKIE MINNOWS

The new Nature Lure so closely imitates the pike minow in shape, color and movement that the combativeness of the bass is aroused and they strike it to kill.

Gives best results when reeled slow but does not revolve if reeled fast. It's a near surface wiggler, or by turning up the screweye a few turns and reversing the mouthpiece you have a surface splatter.

Slim body 4¼ in. long; weight ⅞ oz.; rust-proof bronze hooks to blend with color of body; all hooks including the tail hooks set in sockets to hold same away from the body.

No. 700—Scale finish,
Per dozen.

No. 701—White, blue head $16.00
No. 704—Natural perch color .. 16.00
No. 705—Green back, scale finish 16 00
No. 706—Yellow shiner 16.00

BABY PIKE

Thoroughbred from the Famous Pikie Minnow.

This lure 8¾ in. long is a smaller bait than the now famous Pikie Minnow, which has been making the record catches of game fish in every part of the country. It has a wicked wiggle and all the good qualities of the larger lure. A light, strong killer.

No. 900—Natural Pikie, per dozen $15.20

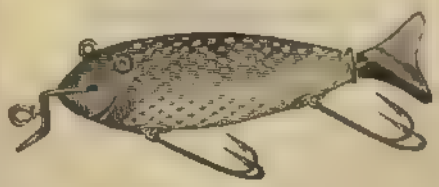
CRAWDAD NATURAL CRABS

Natural shaped body and tail, black bead eyes, rubber legs, bronze hooks, movement backwards, same as a crab. Wiggle mostly in tail. Rubber legs give more movement. ONLY BAIT WITHOUT NICKEL PLATE; fine for use on bright days, in clear water and along stony shores.

Floats until started. Tail guards hooks from snags and bottom. Length of body 2¾ in.; w't ¾ oz. Casts like a bullet.

No. 300—Shell finish,
per dozen $15.20

CHUB WIGGLERS



DE LUXE WAG TAIL

A bait which apparently swims with its tail. Looks like a live minnow, swims like one and is a Real Fish Getter. Has a nickel plated tail which swings back and forth as the bait travels through the water, and the flash of the nickel makes a more attractive lure. Body 2¾ in. long, w't ½ ounce, double hooks so placed that the fish get hooked when striking and at the same time the bait is practically weedless.

No. 800—Natural Creek Chub, scale finish .....per dozen $16.00

Always floats when at rest. Does not revolve. Practically weedless.

Per dozen.

No. 801—Natural chub . $16 00
No. 804—White, red head . . 16.00
No. 806—Yellow shiner . . 16 00

ONE IN A BOX

PFLUEGER DEVON MINNOWS

The spring brass wire frame permits of quick attaching or detaching of the hooks which might have become broken or damaged and also changing of one size hook for another. With this device there is no fraying of the gut or gimp mounts as formerly used and is practically indestructible. Extra strong best quality treble hooks, bright nickel plated, brass barrel swivels and bronze wire leaders bright nickel plated.

No. 289—

Sizes	3	4	5
Per dozen $10.60	12.00	12.00

No. 7009J—Frog Scale finish, per dozen 16.00

ONE IN A BOX

MINNOWS

BABY CRAB WIGGLERS

This bait is painted in close resemblance to a fresh water crab or crawfish, floats when not in motion, dives under water when retrieved, the movement being a pronounced wiggle, simulating movement of crab when moving backwards, away from danger; bait is drawn through water tail first. Has patented variable line fishing device to regulate action of bait. Is a floating, diving, darting minnow.

3¾ in. body, two nickel plated treble hooks w't ⅝ oz.

	Per doz.
No. 1900—Fancy green back..	$16.00
No. 1900S—White body, red and green spotted effect	16.00

No. 1909C—Imitation Crab ...	16.00
No. 1909D—Scale Finish	16.00

ONE IN A BOX

HEAD-ON-BASSER

Possesses certain subtle improvements in balance, stream outline and had-planes that intensify the erratic swimming movements associated with baits of similar type.

Casts straight and true and floats on the surface until retrieved. Under the line pull, it drops to an average depth of 18 inches below the surface, and comes in with an undulating, weaving motion, interrupted by short, quick darts that excite the curiosity of any bass in the vicinity. Equipped with three treble hooks. Length overall 3¾ in., w't ⅝ oz.

No. 8502—White body, red head .....per doz. $13.60
No. 8509D—Green scale finish, per dozen 13.60

In selling OHB articles there is a profit for you and satisfaction to your customers.

TRAPS

NEWHOUSE

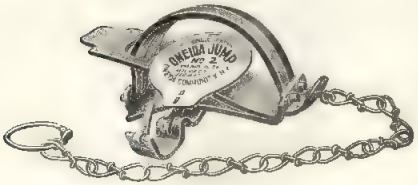
WITH OFFSET TOOTHED JAW

Heavy double spring. ⅜-inch offset jaw allows spring to rise, and prevents severing of animal's leg.

No.	Kind	Spread jaws	Wt. doz	Per doz.
14	Deer	6½ in.	40 lbs	$36.60
15	Bear	11¾ in.	234 lbs	270.34

Loose.

ONEIDA JUMP



Traps lie flat on the ground and can be secreted in runways of animals. Jaws have wide meeting faces, which prevent breaking animal's leg. Construction of springs causes trap to jump up and take a high grip on the animal's leg instead of the foot. Steel wire chain and ring.

No.	Kind	Spread jaws	Wt. doz.	Per doz.
J0	Rat or Gopher	4 in.	5½ lbs	$ 4.14
J1	Muskrat	4¾ in.	8 lbs	4.78

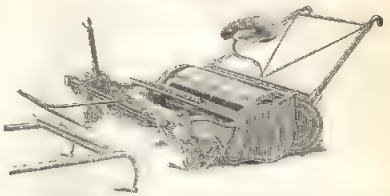
HORSE LAWN MOWERS

*FENDEN



Four revolving blades ⅛-inch thick, made of the best knife steel, vanadium crucible analysis, oil tempered. Drive rollers, 15 inches; reel, 8 inches diameter.

Frame construction is the strongest that is possible to build and is reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with the only graduated raising and lowering device, enabling the operator to instantly adjust the cutting height from ½ to 2¼ inches, or allow the knives to pass over a stone.

The bottom knife, revolving reel, and iron roller are demountable without disturbing the frame of the mower. Reel bearings turn in adjustable split brass bushings. Double riveted malleable iron braces throughout.

Fitted with a train of three gears and durable triple pawl ratchets. Reel is quickly adjusted to bottom knife.

Can be furnished with five revolving knives and bottom knife with upturned edge or lip.

Fully equipped with drivers seat, shafts and side-draft attachments.

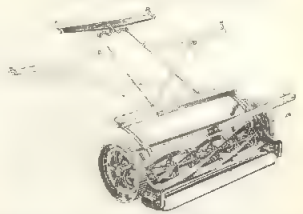
Finish, dark green and empire red; decorations, gold.

Width cut	Gross wt.	Each
30 in.	645 lbs	$344.50
35 in	710 lbs	367.00
40 in.	760 lbs	387.00

One in a case

*Factory shipment only

*CRESTLAWN PONY STYLE



Four revolving knives of finest crucible steel, oil tempered and self-sharpening. Drive wheels, 11 inches high; width of cut, 30 inches; reel, 6 inches in diameter; reel axle, ¾-inch. Double riveted malleable reel braces.

Has an automatic interlocking adjustment which cannot be jarred nor twisted out of alignment. The reel has self-adjusting ball bearings.

Patented horse attachment that can be adjusted quickly and in such a manner that in operation the mower is held to the ground. The draft of the mower is just the same as when operated with the handles.

Finish, light green and gold bronze; decorations red.

Ship wt	Each
150 lbs.	$110.00

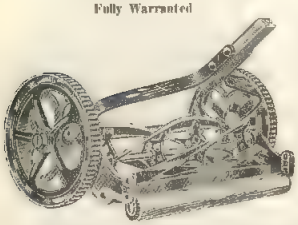
One in a case

*Factory shipment only.

LAWN MOWERS

BALL BEARING

Fully Warranted



Five blades, 10½-inch drive wheels, open spokes. Finish, egg shell enamel, gold bronze and brilliant colors.

Shrub guard forms a center shaft or axle on which the wheels revolve.

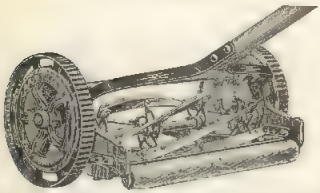
The design is the most attractive that is possible to produce and permits of mower being so lightly constructed where strength is not needed that its weight is materially less than other high grade mowers, adding to the easy running qualities of the ball-bearing features, parts and joints carefully machined and reinforced shoulders are turned on the shrub guard forming a strong frame construction. On the ends of this heavy shaft or shrub guard, which pass through the side plates, are mounted the ball-bearing drive wheels. Hence, the strain caused by the wheels in motion falls on the shaft and not on the side plates, as in the ordinary type of mower where the wheel spindles are a part of the cast sideplates. Self adjusting. Five revolving blades of vanadium crucible steel. Oil tempered stationary blade has upturned lip or edge, cutter bar adjusted by top and bottom screws, extra wide case-hardened pawls.

Size	Gross wt.	Each
14 in.	59 lbs.	$32.50
16 in.	62 lbs.	34.00
18 in.	65 lbs	35.50
20 in	68 lbs	37.00

One in a case, handles separate

CRESTLAWN

BALL BEARING



Five blades, 11-inch drive wheels, 6-inch reel. Finish, silver and gold bronze; decorations, empire red.

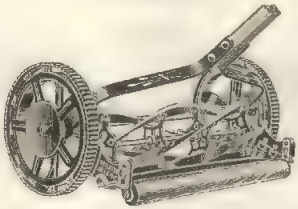
The wheels as well as the revolving knives turn on ball-bearings. Cutter bar is secured to the four-squared rigid frame by a patented interlocking adjustment that is absolutely impossible to be knocked or twisted out of alignment. Blades of razor steel, tempered in oil and self-sharpening. A ⅝-inch reel shaft and double riveted end spiders prevent the reel from being sprung and add increased momentum.

Size	Gross wt.	Each
14 in	62 lbs.	$35.00
16 in	64 lbs.	36 50
18 in.	66 lbs.	38.00
20 in	68 lbs.	39 50

One in a case, handles separate.

HERCULES

BALL BEARING



Five blades, 10½-inch drive wheels, 6-inch reels. Finish, white enamel frame and reel, gold enamel wheels with green center and green handle irons; decorations, red.

This mower is attractive and permits of being lightly constructed where strength is not needed, and its weight is materially less than that of any high-grade mower on the market. Each point of construction has been tried out individually in other styles and is combined with patented features, such as self-adjusting ball bearings and steel wheel mountings.

Blades of vanadium crucible steel, oil tempered. Stationary blade has upturned lip or edge. Cutter bar adjusted by top screws on each side of pivotal point. Extra wide case-hardened pawls, insuring a ratchet of long life and durability

Size	Gross wt.	Each
14 in.	62 lbs.	$26 00
16 in.	64 lbs.	27 00
18 in.	66 lbs.	28.00

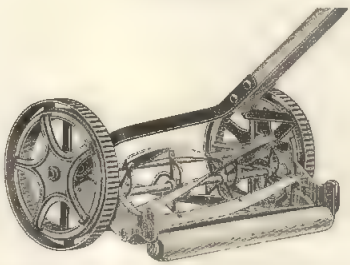
ADMIRAL

BALL BEARING



Four blades, 10½-inch wheels, 6-inch reels. Finish, gold bronze and blue; decorations, silver bronze and blue.

A strictly high grade mower, and one of the most beautiful and graceful designs ever produced. The shrub rod runs through the center of the mower, forming an axle for the wheels. All wood parts are of carefully selected stock and lacquered to protect from weather. Accurately fitted and adjusted throughout. Screw adjusting.

Blades of highest grade crucible steel, oil tempered, spirally formed and self-sharpening.

Size	Gross wt.	Each
14 in.	48 lbs.	$23.50
16 in.	51 lbs.	24.50

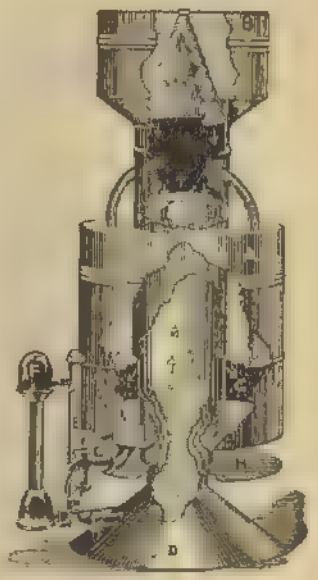
For No.	64	66
W't, lbs.	8	11
Each	$1.80★	2.00★

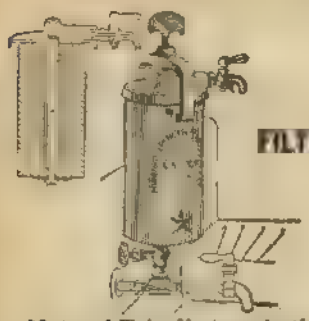
WATER STILLS



In operation vessels A and B are filled with cold water. Set still on fire, just like an ordinary tea kettle, and in a very short time pure, aerated distilled water will collect in reservoir C. The water feeds automatically from supply reservoir A to boiling chamber D, and when water has reached proper height, it is shut off by automatic valve at F. Gauge E indicates height of water in boiling chamber and gauge G shows distilled water in reservoir C.

NOTE—Deflector H prevents heat from stove or boiling chamber striking distilled water reservoir to drive off oxygen.

No. F11—Rose Automatic, heavy copper, nickel plated outside, all parts exposed to water are block tin lined, height 25 in., diam. of bottom 10½ in., capacity ½ gal. per hour, each $72.00



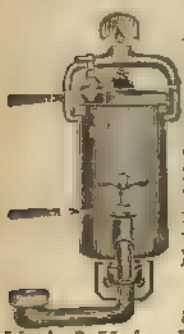
FILTERS

Natural Tripoli stone in this filter is regarded by science as the very best filtering medium known.

The wonderful formation of this stone is such that, while allowing the water to pass freely through the pores, all impurities of every description contained in the water are arrested on the extreme outer surface, from which they can be easily removed, the stone remaining white and pure.

The adjustable tee is threaded so one end fits the thread on the faucet and the other threads in the faucet wall piece. The filter is connected to tee and requires no brackets or screws to hold it in position. Does not interfere with porcelain or enameled sink backs. With this arrangement the unfiltered water is drawn off through the regular faucet just as before. Capacity 15 to 30 gallons per hour, depending upon pressure and condition of water.

No. T96—Germ-proof Tripoli filter block 3×5¼ in., height over all 12 in., heavy galvanized iron cylinder, nickel plated brass tee with adjustable thimbles to fit, ½, ⅝ or ¾ in. standard fuller bibb, nickel plated valve and filtered water faucet, w't per doz. 150 lbs., per dozen $132.00



The filter block in the Advance water filter is very similar to that used in the one described above. The filtered water is drawn from a small faucet at the top of the filter, and the unfiltered water from the large faucet below.

ADVANCE, Tripoli germ-proof filter block 3×5¼ in., heavy galvanized cast iron cylinder, diam. 4 in., with polished brass faucets, height over all 12 in., w't per doz. 150 lbs.

No. T94—With attachment to fit any size **smooth faucet** ..doz. $132.00

No. T95—With attachment to fit ¾ in. **threaded faucet** ....doz. $132.00

EXTRA FILTER BLOCKS

No. 93—Extra Tripoli Blocks for above filters ....per dozen $21.60

ANTI-SPLASHERS

THE DAZEY PRINCIPLE AND WHY IT IS BETTER

The principal butter-making property of cream is butter fat, which is an oil contained in a tiny delicate tissue and best compared to a soft-shell egg. The principle of ordinary churns is to break these tiny butter fat tissues, allowing the fat to gather in a mass at the top of the cream; but with the DAZEY, it is different and better.

As the cream is rolled along under the wings of the patented DAZEY Dasher, the whole fat globules are **rolled-up** in their natural condition, in uniform sized grains.

Cream contains other valuable butter-making properties which are usually lost with ordinary churns, but by the DAZEY System are **rolled-up** with the fat globules. This is the reason the DAZEY produces more and better butter.

Just sufficient working to salt evenly is all that is necessary, because the **rolling-up** of the whole globules has squeezed out all milk from inside of grains. This means saving of labor.

The powerful dasher produces a scientific agitation that results in the production of butter in from five to twenty minutes.

The receptacles are non-absorbent; no cracks to harbor the cream and become rancid. The receptacle lifts out of frame and can be cleaned as easily as an ordinary pail. There are no complicated parts in the DAZEY.

MATERIAL AND FINISH

Frame strong, and rigidly constructed of steel and iron, and finished with double coat of pure aluminum bronze; receptacle of triple plated charcoal dairy plate, enameled outside, covers and dasher of hard, white maple.

DESCRIPTION

This is a highly practical, common sense Tool and a good investment for any Blacksmith whose shop is not already equipped with a more expensive machine.

It has a Rack for starting the Thread on the Bolt instantly and, with the Long Leveraged Crank which can be shortened or lengthened according to the work, the mechanical eye at once discerns that the machine is built on exactly the right principle to do its work quickly and well.

HUNTING KNIVES

MARBLE

It Has the Weight and Strength as Well as the Sharp Penetrating Point Necessary for Sticking; the Curved Blade is Just the Right Shape for Rapid Skinning; the Back of Blade Close to Handle is Checkered to Give a Firm Grip with Thumb or Finger; the Back of Point is Beveled for Chopping, Breaking Bones, Etc.; the Thick Back, with Tapering Bevel Blade, Carries the Strength from Handle to Point, Allowing it to Serve the Purpose of a Thin Blade, and Yet it Has a Surplus of Strength Ordinarily Found Only in Much Heavier Knives.

Per Dozen

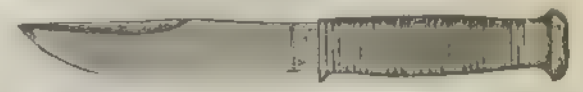
No. 50—Genuine Stag Handle; Blade, 4½ inches; Handle, 3¾ inches; Weight Each, 6 ozs.; Complete with Russet Leather Sheath. **$61.00**

Half Dozen in a Box



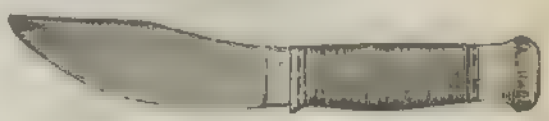
These Knives were Particularly Designed to Meet the Requirements of the Professional Hunter, Trapper and Guide Who Requires a Thin, Keen Edge for Dressing Skins and Furs. The Back of the Blade is Designed for Scraping Skins While on the Forms.

Per Dozen

No. 545—Leather Handle; Aluminum Tip; Blade, 5 inches, Handle, 3¾ inches; Weight Each, 5 ozs.; Complete with Russet Sheath.. **$49 50**

Half Dozen in a Box

WOODCRAFT



The Great Advantage of this Knife is That it is Designed for All Purposes; Some Knives are Adapted for Sticking But are Not Much Good for Skinning or Cleaning; Some are Adapted for Skinning or Cleaning But are Not Satisfactory for Sticking.

It Has the Weight and Strength as Well as the Sharp Penetrating Point Necessary for Sticking; the Curved Blade is Just the Right Shape for Rapid Skinning; the Back of Blade Close to Handle is Checkered to Give a Firm Grip with Thumb or Finger; the Back of Point is Beveled for Chopping, Breaking Bones, Etc.; the Thick Back, with Tapering Bevel Blade, Carries the Strength from Handle to Point, Allowing it to Serve the Purpose of a Thin Blade, and Yet it Has a Surplus of Strength Ordinarily Found Only in Much Heavier Knives.

The 4¾ inch Blade is the Length Desired by Most Experienced Hunters; Handy to Carry and Handle, With No Superflous Weight to Tire the Hand or Inconvenience the Worker When Cleaning Inside An Animal.

Per Dozen

No. 40—Laminated Leather Handle; Blade, 4½ inches; Handle, 3¾ inches; Weight each, 5 ozs.; Complete with Russet Leather Sheath..... **$44.55**

Half Dozen in a Box

HUNTING KNIVES

MARBLE

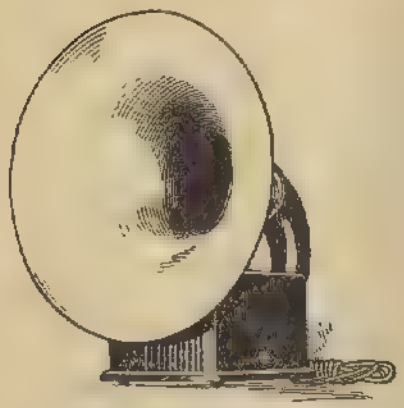
DIAMOND BRAND ~ QUALITY COUNTS
SPORTING GOODS

DESIGN U

RADIO EQUIPMENT

LOUD SPEAKERS



DICTOGRAPH

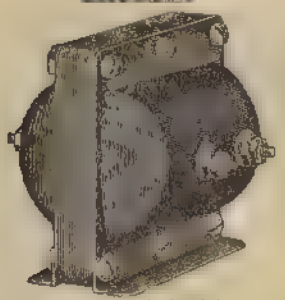
A beautiful instrument! Finely constructed, richly finished. Its handsome appearance harmonizes with any home. Highly burnished, French lacquered, eleven-inch spun copper bell horn attached to die cast black enamel tone arm, finished with nickel trimmings. Cabinet containing dictagraph receiver unit 6x5 in. base, 4 in. high, of solid, ebony-finished hardwood, mounted upon rubber knobs. Furnished complete with 5 ft. flexible cord. No extra batteries required.

No. 9928E—W't each 7 lbs. complete with 5 ft. of flexible silk cord, each $28.00

ONE IN A BOX

TRANSFORMERS

CROSLEY



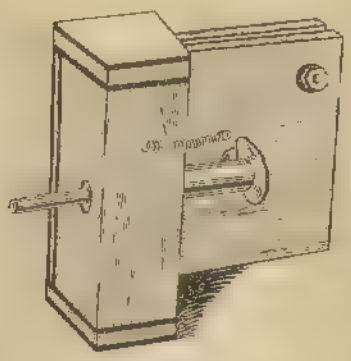
9 TO 1 RATIO

This is a completely shielded transformer. The high grade materials used in its construction, combined with excellent workmanship, give it that high efficiency and attractive appearance so often lacking, except in the most expensive types.

No. 9947E—Length 2⅛ in., height 2 1/16 in., width 2 1/16 in., base area 1¼x2⅛ in., w't each ¾ lb. each $4.00

ONE IN A CARTON

VARIABLE CONDENSERS



Model "A"

CROSLEY

Depends upon a thin sheet of mica as insulation between the plates. As there is no friction from the opening and closing of the plates, the mica will last as long as the condenser.

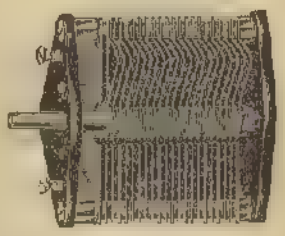
Moreover, the mica will stand up under much higher voltage than the average air condenser, without puncturing breaking down or showering.

Therefore, the CROSLEY VARIABLE CONDENSER can be used safely for C. W. work or modulated C. W. work. Anyone who has experimented with radio telephone will readily recognize the advantage of this feature. There is no danger of short circuiting. The slightest bending of one of the plate will make other condensers absolutely worthless.

No. 9946E—Capacity .0005 M. F. size 3¾x3¾x1¾ in., w't each 2 lbs., each $1.25

ONE IN A BOX

VARIABLE CONDENSERS



Plates are made from 22 gauge hard aluminum and accurately spaced with flattened washers. Held to .00010 of an inch. The insulated ends are made of Condensite Celleron which insures against warpage. Contact point, combination friction, and cutting which insures a clean absolute contact.

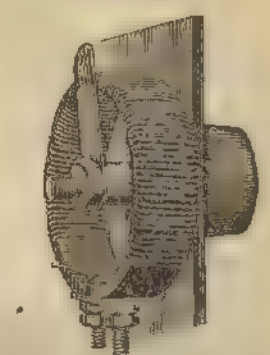
No. 9950E—43 plate, capacity .001 mfd, size 3½x2⅛x4⅛ in. w't 2 lbs. each $4.20

No. 9951E—23 plate, capacity, .0005 mfd, size 3½x2⅛x3⅛ in., w't 1⅛ lbs. each $3.60

No. 9952E—11 plate, capacity, .00025 mfd, size 3⅛x2⅛x2⅝ in., w't 1 lb. each $3.10

ONE IN A BOX

RHEOSTATS



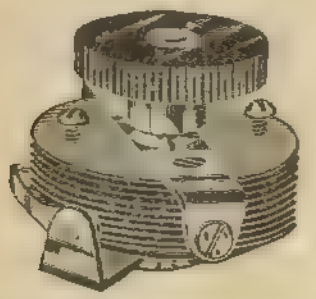
CROSLEY

No. 9949E—Overall diameter 1⅝ in. resistance 6 ohms and will carry one ampere without heating suitable for detector or amplifier tubes; can be mounted on panels up to ⅜ in. in thickness, w't 2 oz., each $0.85

ONE IN A BOX

RADIO EQUIPMENT

JENKINS VERNIER RHEOSTAT

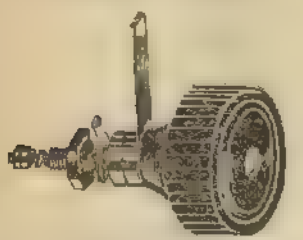


No. 9929E—Can be used on any circuit and is necessary where precise or minute adjustment is required; Current can be disconnected at any setting and reconnected at exactly the same setting, by pushing in and pulling out the knob; diameter overall 2½ in. w't per doz. 43 lbs.,

each $2.40

ONE IN A CARTON

SWITCH LEVERS



One inch knurled bakelite knob with one and one-half inch radius lever, furnished with bushing for panel mounting.

No. 9918E—W't each 1 oz., each $0.90

LOOSE

RUBBER DIALS

With Knobs.

No. 9924E—Size 3 in., ¼ in., shaft hole, w't each 4 oz. . . . . each $1.00

LOOSE

VACUUM TUBES

CUNNINGHAM

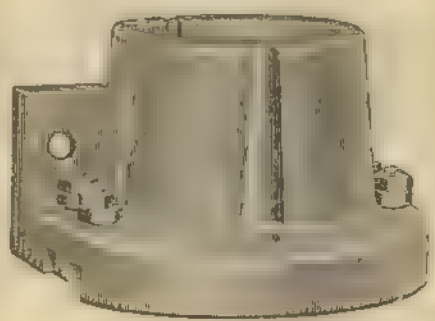
Each tube is built to the most rigid specifications. Liscensed only for amateur or experimental use. Any other use will be an infringement.

No. 9940E—C300—Detector Tubes, same as No. UV200 radiotron, filament voltage 5 volts, plate voltage 18 to 25 volts, size 1¾×4 5/16 in., w't each ¾ lb. . . . . each $7.50

No. 9941E—C301—Amplifier Tubes, same as No. UV201 radiotron, filament voltage 5 volts, plate voltage 40 to 100 volts, size 1¾×4 5/16 in., w't each ¾ lb. . . . . each $9.70

SECURELY PACKED, ONE IN A CARTON

VACUUM TUBE SOCKETS



CROSLEY

Made of porcelain, designed to prevent short circuiting of high voltage "B" battery current accross filament contact. Thus eliminating the danger of burning out the filament through careless inserting of the tube.

Can be mounted on a base or on the side for panel mounting.

No. 9948E—2½×2½×1¾ in., w't each ½ lb., ... each $0.40

ONE IN A BOX

KAPACITON CONDENSERS

One piece metal foil, making permanent, positive and direct contact with terminal eyelets, insuring permanent capacity.

Fine insulating paper is used, free from cracks. Tightly wound, compressed and baked making them non-hygroscopic, and not subject to changes in capacity due to atmospheric influences.

No. 9930E—Grid Condenser, capacity .00025 microfarods, ... each $0.25

No. 9931E—Grid Condenser with detachable leak. The leak is built into the condenser, yet is quickly detachable by means of special snap fasteners. Leak can be varied at will. Cap. .0005 Mfd. . . . . each $0.40

No. 9932E—Phone condenser, capacity .001 Mfd. . . . . each $0.35

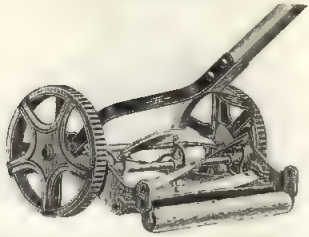
LAWN MOWERS

DIRECTOR

BALL BEARING



Four blades, 9-inch wheels, 5½-inch reels. Finish, red and gold; decorations, gold and silver.

This mower is very graceful in outline, and very easy running. Perfectly machined and fitted and parts are interchangeable. Screw adjusting cutter bar. The ball bearing cones are made of best quality tool steel and tempered glass hard. Automatically adjusted.

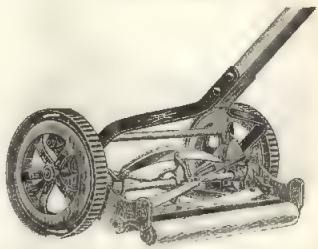
Blades of highest grade crucible steel, spirally formed and self-sharpening, which are attached to the reel shaft by means of malleable iron spiders. Shaft is made of cold rolled machinery steel.

Size	Gross wt	Each
12 in.	40 lbs	$19.50
14 in.	42 lbs.	20.50
16 in.	45 lbs.	21.00
18 in.	50 lbs.	22 00

One in a case, handles separate.

PARAGON

BALL BEARING



Four blades, 8½-inch wheels; 5½-inch reels. Finish, gold and aluminum bronze; decorations, green.

Semi-open type. light and easy running. A smaller ball bearing mower that would give better satisfaction could not be built. Every bearing is accurately machined and all material is carefully selected. Blades of high-grade crucible steel, oil tempered and water ground. All ball bearing parts automatically adjusted.

No. 16¼/124 Sidewalk Sulky. Each.. $5.96

No. 16¼ 124

TOT BIKES—For Little Children

EXTRA WIDE REAR AXLE

Will Not Tip Over Backwards.

No. 28 124

Seat Board—18 in. long by 7¼ in. wide. Finished red with transfer.
Wheels—8 in. front and rear, ¾ in. rubber tires, red enamel, nickel plated hub caps. Cranks tin plated and riveted to front wheel axle. Front wheel is removable from the fork.
Handle—As shown, 8½ in. long, red.
Rear Gear—Is made with the rear standard straight up and down and is set under the extreme back end of the board. This permits a child to sit far back on the board without tipping over backwards. Rear gear is attached to seat board with four nickel leaded bolts.
Rear Axle—The rear axles of both the No. 28 124 and No. 30 124 are the extra length that makes an extremely wide rear axle for both of these cycles which will prevent tipping over sideways.
Front Fork and Handle Bar Port—Black baked enamel.
For children two years of age.
Packed two in a carton; weight, 22 lbs. We do not break packages.

No. 30 124

Seat Board 21 in long by 7¼ in wide. Finished red with transfer.
Wheels—12 in. front and rear, ¾ in. rubber tire nickel plated hub caps. Cranks, tin plated and riveted to front wheel axle. Front wheel is removable from the fork.
Handle—16 in. long, red.
For children three years of age.
Packed two in a carton; Weight, 34 lbs. We do not break packages.

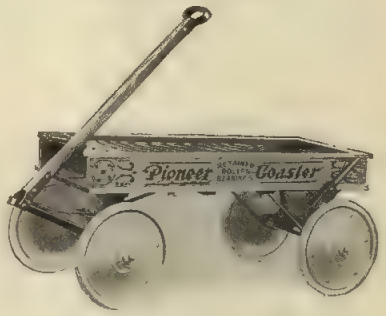
No. 8¼W/124 Scooter. 8 in. wire wheels. Plain bearings. ½ in. rubber tires. Weight, 12 lbs. Price $5.10

Packed one each in a carton.

PIONEER COASTER WAGONS



Nos. 2-DR 124, 3-DR/124 and 4-DR/124

Disc Wheels with Large Rubber Tires. Retained Roller Bearings.

After 3 years experience with disc wheels on coaster wagons, we believe, judging the opinion of all our customers when we say that in not a single instance have our disc wheels proven unsatisfactory in any manner whatever. There is no question but what the disc wheel rubber tire coaster wagon has come to stay. It has proven a very ready seller on the retail floor in all sections of the country.

Every dealer is urged to stock liberally of these disc wheel rubber tire coaster wagons, as there is every indication that for the year 1925 this will be a very big selling item.

Made in Three Sizes

No. 2-DR/124 Body, 14x34 in. Wheels, 10 in. Rubber tires, ¾ in. Weight per carton, 34 lbs. Price $14.10

No. 3-DR/124 Body, 16x38 in. Wheels, 10 in. Rubber tires, ¾ in. Weight per carton, 38 lbs. Price $15.50

No. 4-DR/124 Body, 18x40 in. Wheels, 10 in. Rubber tires, ¾ in. Weight per carton, 42 lbs. Price $16.20

Packed for shipment in sealed dust proof cartons.

Bicycles

No. 79/123	28 in.	wheels, 20 in. frame, for girls 9 to 12 years	67.00

IT STARTS PROMPTLY
IN THE COLDEST WEATHER

The behavior of Dodge Brothers Motor Car on zero days is a fair example of its fitness the year round.

You turn the switch, step on the button, and the motor starts—without undue noise or delay.

The reasons are readily understood:

The coordination of the power plant is well nigh flawless. The slightest impulse sets it in motion. The battery—6-cells, 12-volts—is unusually large.

A high-vacuum carburetor so thoroughly vaporizes the gasoline that it ignites instantly under the spark.

The electrical system is remarkably efficient and cuts to a minimum the usual voltage loss between battery and starter.

Finally, the starter, itself—an admirable example of its kind—is directly united with the engine by a chain drive which is always in mesh—a fact having much to do with the promptness and quietness of its action.

DODGE BROTHERS

The price of the Type-A Sedan is $1440 f. o. b. Detroit

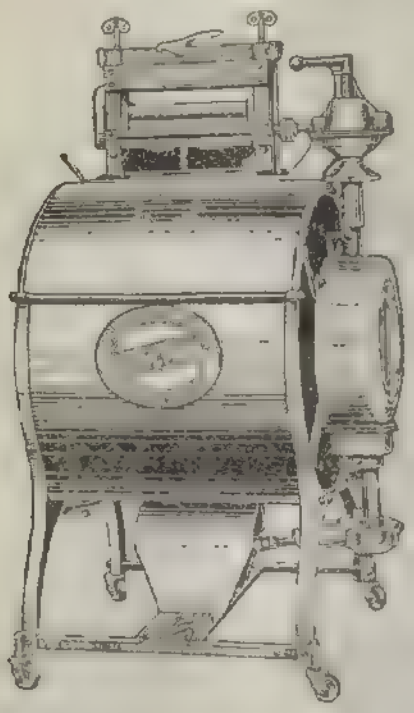
ELECTRIC WASHING MACHINES

HUMANITY

The Humanity Electric Clothes Washer has Combined the Two Best Known Ways of Washing Into One, Namely the Oscillating and Cylindrical, and Affords the Most Desired Results.

The Humanity Washes the Daintiest Garments Without the Slightest Wear or Tear.



The Cylinder is Made of Aluminum—The Holes are **Cupped Out**, which Strengthens the Cylinder and Acts the Same as a Suction Pump, Forcing the Water Through the Clothes Both Ways.

All Units are Self Lubricating with Oilless Bearings which has Sufficient Oil to Last at Least a Year.

All Units are Interchangeable and any Part can be Replaced in a Short Time.

Swinging Wringer, is Electrically Operated, is Rigid Self Supporting and Swings in Complete Circle, has Four Locking Positions. Has 12 inch Rolls and a Safety Release. Both the Wringer and Washer can be Operated at the Same Time or Separately.

Motor—Be Sure to Specify Alternating or Direct Current.

Motor—110 Volts, 60 Cycles, ¼ Horse Power.

No Springs—No Belts; All Moving Parts are Enclosed; Water can not get into Gear Case; Gearings are Made of Cut Steel and Run Noiseless.

The Humanity Machine itself has the ⅛ Movement, which Gives the Cylindrical Effect, and as it Reverses on a ⅜ Movement, it Gives also the Advantages of the Oscillating Type, and this ⅛ Movement Prevents the Clothes from Turning Over, which is the Only Disadvantage of the Full Cylindrical Type.

	Each
No. HGT—Galvanized Tub, Aluminum Cylinder.	$135.00 **$202.50**
No. HLT—Copper Tub; Aluminum Cylinder	150.00 **225.00**

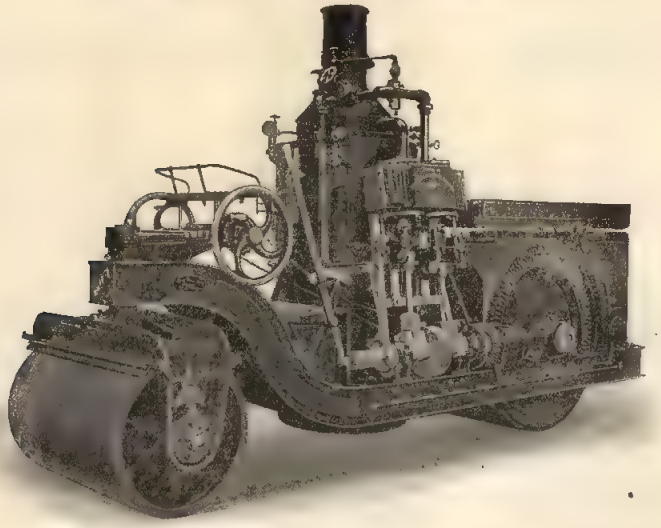
Erie Tandem Rollers



Built in all standard sizes. There is a size that will meet your requirements

The characteristic features of Erie rollers are strength, durability, simplicity of construction, easy and economical operation, perfectly balanced and positive motion of all actuating parts.

All parts are made in duplicate, so that in case of accidental damage, the required part may be quickly and easily replaced. The rollers are of the highest grade, the World's Standard, will give more absolute satisfaction, and Actual Service wear years longer, and incur less expense for their maintenance and upkeep than any other roller on the market.

It is a matter of pride that we are able to state that the first Erie roller built in 1887 is still in actual service, doing first class work, and the owners of the roller advise us that it is good for many more years of hard service.

Wrought iron and steel are used practically throughout, which enables us to guarantee for five years against breakage or wear resulting from imperfect material or workmanship.

The mechanical details and design can be distinguished from all other machines by the following features: All rolls on Erie rollers are turned in a lathe, and are perfectly true, giving them a smooth surface. Erie rollers are so constructed that the weight is chiefly on the large roll not as most makes of rollers, where the weight of the machine is equally distributed on the steering and the driving rolls, thus giving considerable lighter compression than by having the weight centered on the one large roll.

We call attention of intending purchasers of roller equipment to the construction of every "ERIE" roller. The Factory's aim has never been to compete in price alone, in their construction, but on the contrary, they have succeeded in producing the very best construction and workmanship.

Guarantee

Every "Erie" roller is guaranteed for a period of five years against faulty material or imperfect workmanship of any kind.

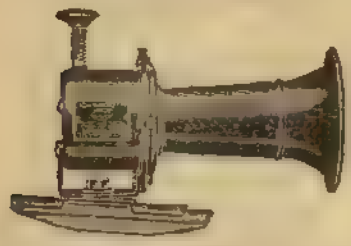
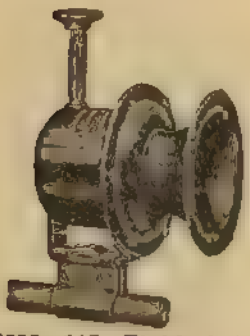
STEWART HAND-OPERATED WARNING SIGNALS



One push of plunger creates 192 distinct sound impulses—more than any other signal. This, together with its exclusive, large-sized vibratone steel diaphragm, accounts for the Stewart's wonderfully effective warning. No matter how installed, signal can always be pointed straight ahead.

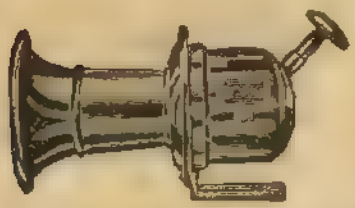
No. T6034—114—Double-supporting adjustable bracket and is self-lubricating. Finished in black enamel, w't each 5 lbs. .....each **$6.70**

ONE IN A BOX



No. T6038—115—Finished in black enamel with nickel plated bell, complete with brackets, w't each 4 lbs. .....each **$6 70**

ONE IN A BOX



This model is efficient in results. The push rod is set at a forty-five-degree angle, making possible a simplification of interior mechanism. One stroke of the plunger creates 84 sound impulses. It has a vibratone steel diaphragm.

No. T6036—151B—Black enamel finish, complete with bracket, w't each 3½ lbs. .....each **$4.70**

ONE IN A CASE

STEWART MOTOR-DRIVEN WARNING SIGNALS

A slight pressure on the large push button sends out a flood of commanding sound waves.

It is economical in current consumption. Brushes are large, rear bearing provided with ball thrust, shaft can never get out alignment, felt-packed oil well gives perfect lubrication.

Has one-piece, seamless projector and back-cover. No solder, parts are riveted and bolted. Finished in hard-baked black enamel. Variety of brackets to fit any car. Outfit includes bracket, push button, terminals and five feet of double-strand electric cord, w't each 7 lbs.

No. F6039—186B—Each★ **$11.35**

ONE IN A BOX

Specify Make, Year and Model of Car When Ordering.

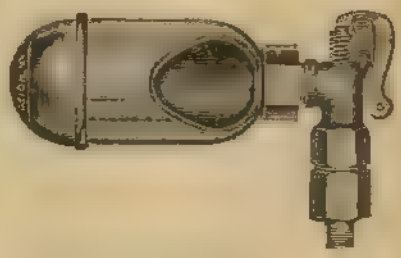
Motor is Stewart-built and embodies a new, improved design of magnetic circuit. Armature is large, gives greater power with less current, diaphragm is made of high grade tempered steel.

This new model is slightly smaller than the DeLuxe Stewart Motor-Driven Signal, No. T Model 136, being two and one-half in. shorter in length and having a diaphragm half a inch less in diameter.

No. F6041—163D—For Underhood installation, complete with bracket, push button, terminals and five feet of electric cord, w't each 3 lbs., each★ **$8.70**

ONE IN A BOX

BUELL EXPLOSION WHISTLES



No. 6070.

No. 6071.

A powerful, practical and perfect warning device, fits in priming cup opening, thereby getting the explosion direct instead of through the exhaust valves. It can be installed on practically all cars without any other parts. On engines not fitted with priming cups such as the Ford, a special spark plug with an opening on the side to accommodate the whistle is furnished.

No. 6070—Single tone, whistle complete, ready for installation, w't, each 1 lb. .....each **$6.70**

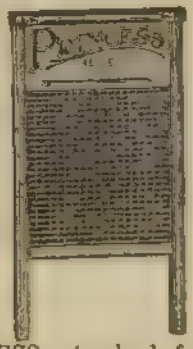
Hibbard
HARDWARE for HARD WEAR

WASHBOARDS

All our washboards are made of white bass wood and poplar Anyone familiar with the nature of this wood knows there is none better to stand the different conditions which material in a washboard has to withstand. They will not warp and get out of shape.

The important part of a washboard is the rubbing surface, and we use nothing but first class, heavy gauge stock in all our boards.

Composition metal is a sheet steel coated with a composition of zinc, tin and lead and as to wearing qualities, we find it to be equal to zinc. Do not confuse this metal with tin plate, as we absolutely do not use tin plate on any of our brands.



PRINCESS, standard family size, double rubbing surface, composition metal, globe crimp one side, plain V on the other side, wide grooved head and soap board inserted deep, all selected material and extra finish, ventilated back, rubbing surface 11×12 in., size over all 13×25 in., w't per doz. 40 lbs.

No. NN12—Half dozen bundles, per dozen $11.30

No. N12—Less than bundles, per dozen $11.30

HALF DOZEN IN A BUNDLE

LIBERTY BELL, laundry size, single globe crimp heavy zinc rubbing surface, selected stock and neatly finished. Size of rubbing surface 12×13½ in., size over all 14×26 in., ventilated back, popular priced laundry board, w't per doz. 20 lbs.

No. NN25— Half dozen bundles, per dozen $13.90

No. N25—Less than bundle, per dozen $13.90

SUPERIOR ZINC, large laundry size, single globe crimp heavy zinc rubbing surface. Selected stock and neatly finished, ventilated back, size 13×14 in., size over all 14½×28 in., w't per doz. 55 lbs.

No. NN26—Half dozen bundles, per dozen $16.60

No. N26—Less than bundles, per dozen $16.60

HALF DOZEN IN A BUNDLE

SOAP SAVER, standard family size. Size 11×12 in., size over all 13×25 in., metal top and soap rest, improved design, all drainings will return to washing surface, w't per doz. 42 lbs.

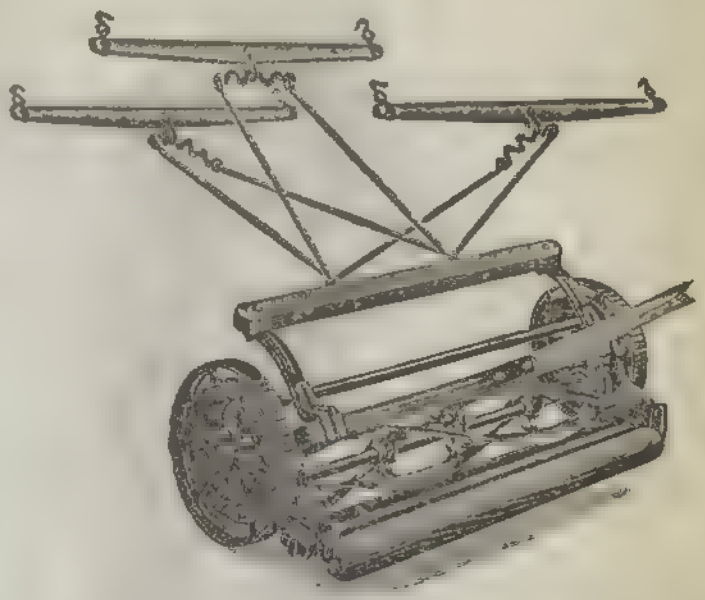
TELL THINGS IN ADVERTISING

IT IS WELL TO MAKE IT A POINT TO "TELL THINGS" IN ADVERTISING, AVOIDING "GLITTERING GENERALITIES." TALKING RATHER IN A STRAIGHTFORWARD, EASILY UNDERSTOOD MANNER, TELLING CUSTOMERS JUST WHY THEY SHOULD PATRONIZE YOU. ABOVE ALL, DON'T TAKE ANY CHANCES OF BEING SOLD OUT, AND COMPELLED TO OFFER EXCUSES. KEEP YOUR STOCK UP BY MAIL ORDERS AND BE ALWAYS PREPARED TO CARE FOR THE TRADE WHICH YOUR ADVERTISING BRINGS.

PONY LAWN MOWERS

CRESTLAWN

BALL BEARING



The Construction of this Machine is Positively the Very Best on the Market and is as Near Perfect as Can be Made. The Parts Making the Frame are all Lathe Turned and the Cast Bed Plate is Machined into the Side Plates, Forming an Automatic Interlocking Adjustment which Cannot be Jarred or Twisted out of Alignment.

Pony Mowers are Often Used by Hand Power and the Crestlawn is Particularly Good for this Purpose, as it has **Ball Bearing Drive Wheels.** This Makes the Machine Easy-running and very little Harder to Operate than Many Hand Machines.

The Reel is Made with Four Revolving Cutters and is Ball Bearing. The Ball Bearing Parts are Automatic in Action and Never Need to be Touched by the Operator. The Revolving Cutters are, Therefore, Held in Position Under all Conditions and will Give a Clean Shear Cut at all Times.

[illegible] Steel Bed Knife is Made with Raised Lip, which Adds Strength and Rigidity.

All Material is First Grade and the Very Best that Money Can Buy.

Drive Wheels [illegible] inches high. Diameter of Reel 6 inches. Reel Axle [illegible] Adjustable to Cut Grass to Lengths of ¼ to ½ inch. Cuts Grass Standing 7 inches High.

Handle and Roller of Hardwood Maple, Thoroughly Seasoned and Finished.

Horse Attachment

Each Mower is Equipped with our Patented Horse Attachment. This Can be Adjusted Quickly and in Such a Manner that in Operation the Mower is Held to the Ground and the Disagreeable "Tipping up" of the Rear of the Mower is Impossible. The Draft of the Mower is Just the Same When Operated by Either Horse or Hand. Without Attachment the Horse Can Walk in the Middle, Front or to Either Side of the Mower and Yet Maintain a Central Draft at all Times.

ONE ON A CARD, ONE DOZEN IN A BOX

FROG HARNESS

The most practical and satisfactory live bait made, frog is so held without hooking that it will remain absolutely alive, allowing free use of body and legs, thus making bait most attractive, unlimited number of casts may be made without injury to frog.

No. 42—U. B. Live Frog, front hook size 4/0 sproat, rear hook size 6/0 Carlisle, nickel plated wire holder, per dozen $9.00

ONE IN A BOX; ONE DOZEN IN A CARTON

PORK RINDS

AL. FOSS, these pig skins have had the grease removed, are punched and perforated ready for the lure. Especially adapted for the Al Foss baits.

No. 1939—12 strips per bottle, per dozen bottles $7.00

ONE DOZEN IN A BOX

PERFECTION

A New Thin Pork Rind Bait.

No. 1937—It rides upright just like a minnow. Wiggles like everything. Fish just can't resist it. For use on any lure. One piece lasts all day. A pork rind bait with lasting qualities that is a perfect imitation of a live minnow. One dozen pieces in each jar, per dozen $6.40

ONE DOZEN IN A BOX

PORK RINDS

No. 1938—Lutz Pork Rind. About one dozen strips in screw top bottles, per dozen $6.40

No. 1941—Pork rind, 2½ in. long, slit down the sides, giving a life-like and animated motion, practically non-fouling .....per dozen $8.00

ONE DOZEN BOTTLES IN A CARTON

PRESERVED BAITS

MINNOWS

The composition used in preserving the minnow does not affect shape or shininess, will not toughen or harden the bait, and gives all the appearance of a live shiner.

No. 1935—About 5 doz. in a bottle, assorted, per doz. bottles $3.80

TWO DOZEN IN A CASE

FROGS

Selected sizes for Bass, Pike, Pickerel, Muskies, etc. Preserved to retail natural colors. Not rubbery, but will remain on hook much longer than live frogs, when casting or trolling. A popular seller.

No. 1936—One dozen in a screw top glass jar, per dozen $7.10

ONE DOZEN IN A CASE

SALMON EGGS

No. 1940—Every Egg a Perfect Bait. Guaranteed to have no poisonous substances used in preparation, w't per doz. 4 lbs., per dozen cans $6.00

ONE DOZEN IN A BOX

AL FOSS PORK RIND

AL. FOSS SHIMMY WIGGLERS

As used with Al. Foss Buck-Tail Streamers, with or without Pork Rind.

Showing method of attaching Fly or Hook to lure.

With Eyed Weedless Fly and Small Strip of Al. Foss Pork Rind on Curve of Hook.

With Plain Eyed Hook and Regular Al. Foss Pork Rind.

With each bait an extra fish hook is packed. Any ringed fly of any size can be attached.

No. 530—Size 1/0 hook, assorted Red Ibis and Parmachene Belle Flies, w't ¼ oz. ...per dozen $16.00

No. 730—Size 3/0 hook, assorted Red Ibis and Parmachene Belle Flies, w't ½ oz. ....per dozen $16.00

MINNOWS

FLAT SIDE CHUB

Represents an injured minnow which is laying on its side about all in, but still able to make a little fuss on the surface and should be pulled in a series of small slow jerks or very slowly to properly imitate a struggling minnow. Bass will instantly take a lure which they believe to be a minnow in trouble and therefore easy to catch.

Loose vibration spinners give to strike or weeds, etc., and are superior to rigid kind. When pulled through water they spin just right and have a buzzing vibration which is very attractive. Bending of shaft will not stop them form spinning and small grass and moss do not clog them.
Easily cleaned.

No. 1500—A beautiful blend of dark green, silver and red in large scale finish, length of body 3¾ in., w't ¾ oz. .....per dozen $16.00

[redacted]

Looks like a nice little meal for the fish. Has two double hooks which can be reversed so hooks point up and when so used gives a bait that can be pulled over the surface weeds and pads without fouling.

No. 1600—A beautiful blend of dark green, silver and red in large scale finish, length of body 3¾ in., w't ¾ oz. .....per dozen $15 20

"WALTON" FEATHER-TAIL

This new feather tail lure is a sure getter a sporting killer bound to awaken the unstinted praise of any angler. Sinks rapidly and the combinaton of spinner and feather is very effective. Practically weedless, it is ideal for use in lily pads and weeds where the big ones lie.

Equipped with No. 3/0 'OShaungnessy hook, length of body 3 in. over all, length of feather tail, 2¼ in., w't ¾ oz.

No. 42—Red and white, per dozen $16.00

No. 49G—Black body, orange tail, per dozen $16.00

No. 49P—Shiner scale, gray tail, per dozen $16.00

No. 49M—Pike scale, green and yellow tail .....per dozen $16.00

NEW HEDDON "GAME FISHER"

Flexible, triple acting body-liveliness that out-natures nature. Floats while at rest, runs deep when retrieved, casts easily. This lure is sturdily built to withstand the most savage attacks of large game fish.

Equipped with two trebles, length of body, 4¾ in. w't ¾ oz.

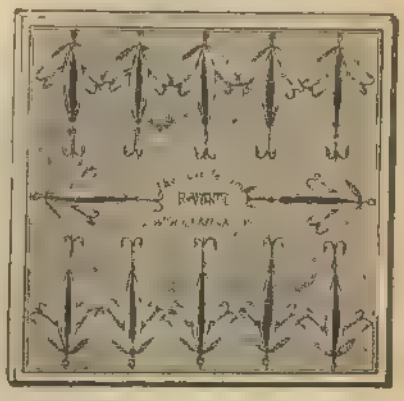
No. 5501—Rainbow, per dozen $16.00

No. 5502—White body, red head and tail, ...per dozen $16.00

No. 5509D—Green scale, per dozen $16.00

No. 5509P—Shiner scale, per dozen $16 00

LITTLE IMP ASSORTMENTS



No. 33X [redacted]—Assorted green back, yellow belly and green back, white belly, three treble hooks, wood body 2½ in. long, w't about 1 oz. each minnow, 12 on a card, per card $4.00

Highly polished metal head, all silk body, covered with waterproof varnish, mounted on brass box swivel and spring steel treble hooks.

COASTER WAGONS

Bright paint and sturdy construction make these wagons the first choice of boys and girls who see them — that's one reason why we are the biggest jobber of wheel goods in America. Another reason is our ability to name prices like these.

FAMOUS "FLEET-FOOT" COASTER WAGONS

Distributed Exclusively by Butler Brothers

Selected hardwood removable bodies, well varnished, natural finish, red trimmed, wing nuts, strong cleats across bottom of bed, heavy braces and "V" front bound, axles fastened securely by eye bolts to heavy 1 pc. bolster, pressed steel fifth wheel, direct bolster braces, strong King bolt, metal brake, steel "D" grip on wood handle.

15×8½×6½ in., w't per doz. 25 lbs.

No. N416—Full half dozen crate, per dozen $15.60

WE DO NOT BREAK CRATES

23×13½×7 in., w't per doz. 70 lbs.

No. NN422—Full sixth dozen bundle, per dozen $24.00

No. N 422—Less than bundle, per dozen $24.00

Coppered iron wire, sheet steel ribs self-closing tin trap door with flanged edge

The lace wires are rigidly held in place by the heavy flanged sheet steel ribs and the trap is almost indestructible. There is a patent flange around the opening of the trap door, which prevents a rat from pulling it down after getting inside. Each trap is thoroughly lacquered to prevent rust.

HIBBARD—RAT, 17×9½×7 in., No 17 wire 9 flanged steel ribs, w't per doz. 34 lbs.

No. NN417—Full half dozen crate, per dozen $18.00

HIBBARD—RAT, 19×10½×8 in., No. 16 wire, 11 flanged steel ribs, w't per doz. 41 lbs.

No. NN419—Full half dozen crate, per dozen $22.00

No. N419—Less than crate, per dozen $22.00

HALF DOZEN IN A CRATE

GOPHER

TRIUMPH

The easiest and safest trap to set. Jaws take a high grip, killing quickly. Well constructed, cannot get out of order. Gripper Jaws act independently adjusting themselves to uneven ground.

No. 51—W't per dozen 2 lbs., per dozen $3.00

ONE DOZEN IN A BOX

O. K.

Quarter-hour strike and call
WALNUT CASE
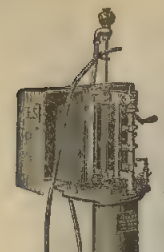
Large size G. K. movement.
Front of case made of three layers of wood

✣GASOLINE STORAGE OUTFITS

WESTERN ROADWAY FILLING OUTFIT



Cabinet—The Cabinet Encasing Pump is Built of 5/16 inch Iron; the Doors Overlap, Making it Weather Proof; Doors are Fitted with Best Corbin Six-Tumbler Lock; a Small Door at Bottom of Pedestal Gives Access to Drain Cock of Filter Chamber and to Pipe Union

Pump—Is of Our Long Distance Type, Adjusted to Measure gallons, half gallons, quarts or pints at a Stroke, is Built Entirely of Metal with Cylinders, Valves, Plunger Rod and Stuffing Box of Brass; Cut Steel Gears, Balance of Pump is of Heavy Cast and Wrought Iron, Requires but Two and One-Half Turns of the Handle to Discharge a gallon, Giving an Actual Pumping Capacity of 13 gallons per Minute.

Gallon Meter—Keeps an Accurate Check on All Gasoline Drawn up to 9999 gallons, at Which Point it Reverts to 0000. Making it a Continuous Meter, Built with the Precision of a Watch and Finished in Full Nickel.

Gravity Filter—Is Attached Below the Pump Cylinder and Made an Integral Part of the Pump. It Strains the Gasoline from Water and Other Impurities, Which Gravitate to Settling Chamber and Can be Drawn Off Through Drain Cock at Bottom.

Discharge Register—This Device Automatically Tallies Every Gallon Pumped from 0 to 10 gallons and is Reversible from Any Point. It is in Plain View of Both Customer and Operator.

Independent Discharge Nozzles—Pumps is Fitted with Discharge Openings on Either Side, One for Attaching Hose, the Other for Filling Cans, the Cocks Being Entirely Independent of Each Other. The Can-Filling Cock is Attached to Swivel Quadrant so when Not in use is Swung Back and Out of the Way.

Hose and Filling Nozzle—The 1 inch Discharge Pipe Extends 20 inches Above Pump and Terminates in an Automatic Air Vent Valve that Allows the Oil in the Hose to Drain; to this Vent Fitting is Attached 8 feet of Our 1 inch Steel Lined Hose with Brass Filling Nozzle. When Pumping Ceases the Supply is Automatically Shut Off in Valve and the Contents of Hose Drains out Clean. Pipe is Fitted with Fork for holding Nozzle when Hose is Not in Use.

Automatic Door Stop—Holds Door Rigid while Operating Pump.

Removable Pump Handle—Handle Can be Slipped Off and Carried in the Building, Making Pump Fool and Meddler Proof.

Quantity Stops—Are Located in Front on Pump Standard, To Change Measurements, it is but Necessary to Push in the Nickeled Disc Stamped with the Quantity Desired, Give One Stroke of the Handle and the Exact Amount is Obtained.

Finish—Pump and Cabinet are Highly Polished in Vermillion Enamel with Gold Lettering and Nickel Trimmings.

Dimensions of Pump—Height, 54 inches. Height to Top of Discharge Pipe, 75 inches, Height to Top of Light Receptacle, 87½ inches, Width Open, 24 inches; Width, Closed, 17½ inches, Depth, 11 inches; Diameter of Base, 14 inches, Net Weight, 310 lbs.; Shipping Weight, 400 lbs.

Tanks—Are Built in any Capacity of Either 12 or 14 Gauge Galvanized Steel, Riveted and Soldered, Equipped with Double Brass Foot Valves, Double Fill Pipes with Strainers, Lock Cap, Lock and Keys, Measuring Stick to Determine Number of gallons in Tank and Pipe Unions. Tanks are Tested, Labeled and Approved by the National Board of Fire Underwriters.

EXTRA ATTACHMENTS

Electric Lamp—When so Ordered and at an Additional Cost, we can Equip Lamp with Electric Light Attachment as Shown. Entire Cabinet is Wired to Bottom, Ready for Connecting to Local Circuit, All Wires Being Concealed.

Geyser

"The World's Most Efficient Washer"

The Geyser Electric Washing Machine With Swinging Power Wringer

Approved by the Good House Keeping Institute

Equipped with a ¼-horsepower Electric Motor, vertically mounted and protected by a cast iron hoo

...ver working operating noises. There only moving parts—a motor and two-blade propeller—work smoothly and quietly with a low, pleasing hum.

NO EXPOSED COGS OR GEARS

Baby may play around an operating "Geyser." There are no exposed moving parts.

ELECTRIC WELDED DIRECTLY GEARED, NO BELT OR CHAIN DRIVE

The unique "Geyser" principle of washing enables the **entire** tank and cylinder space to be used, instead of one-third to one-half of it as in all other machines.

Most Compact Electric Washer and Wringer Ever Built.

The Washer Tank is all metal, and the steel frame is **electrically welded,** assuring rigidity and long life. The **baked enamel** finish gives an exceedingly pleasing appearance and is very durable.

The Perforated Rinse Cylinder and the inside of the galvanized steel tank are both copper plated and then nickel plated as an **exclusive** Geyser feature. This **special plating** is a positive protection against rust and corrosion and assures absolute cleanliness.

The cylinder is very light in weight, but very strong and durable. It is provided with a very convenient handle, so that it may be easily removed. When taking the clothes out, the cylinder can be raised to a higher level, thereby eliminating the necessity of bending way over.

The cost of operation is nominal. It pays for itself in a few months.

The Geyser Electric Washer

Relieves you of the hardest work in your home.

THE RIGHT PRINCIPLE

A **Powerful Circulation** of hot suds is **forced through** the clothes by means of a high-speed **propeller** in the bottom of the tank. The water is also drawn back through the clothes by **suction.** This **double** washing action assures quick, thorough washing. There is **no wear** on the clothes, as they always remain under hot water in a constantly revolving cylinder.

Very Noiseless In Operation—It is As Quiet Running As An Electric Fan.

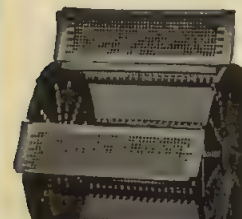
THE ELECTRIC WRINGER

is reversible, has a positive **safety release,** and can be used at same ... washer or independently. ... swinging wringer types, the wringer swings to **three** different positions, making it unnecessary to move washer during entire washing and wringing operation.

The Geyser effectively demonstrates that a highly efficient washer need not be a cumbersome, unwieldy machine.

...e Geyser can be used in the kitchen or bathroom, if desired. It will pass through the smallest door, can be attached to the ordinary electric light socket, and is **as quiet running** as an electric fan.

Guaranteed in every respect. Your money back if not entirely satisfied.



The light weight but very durable all metal cylinder used in the Geyser washer.

The High Speed Propeller under the cylinder which forces hot suds through the clothes, also revolves the cylinder this propeller does not come in contact with the cylinder. It is the force of the water, agitated by the propeller, that revolves the cylinder.

No Exposed Cogs or Gears. All moving parts enclosed in grease tight boxes. While the machine is in operation, a baby can play around the machine with no possible chance of getting hurt.

Try out one of these washers and convince yourself of the wonderful merits this machine possesses and which are not to be found in any washer. One machine will sell another. The reputation of the manufacturer as well as our own stands behind the guarantee under which every one of the washers are sold. If this washer isn't the superior of any on the market, you are not obliged to keep it. This is a wonderful proposition, and a wonderful opportunity. So take a hold of it and reap the harvest.

The "Geyser" principle of washing is entirely different from that used by any other manufacturer. It actually drives hot, soapy water through and through the fabric of the clothes by means of a high-speed propeller placed in the bottom of the tank. The water is also drawn back through the clothes by suction. This double washing action assures quick, thorough washing with no clothes-wear. By utilizing the entire tank and cylinder space instead of only one-third to one-half of it, the "Geyser" effectively demonstrates that a highly efficient electric washer need not be a complicated, bulky machine. For the same capacity it is the most compact electric washer made, as well as the most efficient. Due to its compactness, quietness in operation and absolute safety, the Geyser Washer can be used in the kitchen or bathroom of an apartment, if desired. The 6-sheet size is equivalent to about 50 mixed pieces, and 9-sheet to about 75 pieces.

THE FINISH

These Washers can be furnished either in copper or steel. The steel washers are finished in gray baked enamel. The finish is beautiful and very durable. The inside is copper plated and then nickel plated, giving it a smooth hard finish and is very easily cleaned.

The above is a sectional view of the Geyser Washer, showing the propeller inside in the bottom of the tub.

Waltham Sewing Machines

The Machine that at all times gives the very best of satisfaction. Guaranteed in every respect by the manufacturer and ourselves. It's the machine that you can sell with the utmost confidence. Here are the most popular, best selling Waltham Sewing Machines we have been able to find. In actual sales they are far ahead of any other style.

The Waltham "Leader" Sewing Machine

GUARANTEED FOR TEN YEARS

Consider the Merits of This Machine, Its Quality and Then Its Price. Your Verdict Will Be: "It Can't Be Beat."

We handle only Sewing Machines of which we are positive that they will give the best service, therefore, a sincere belief that a cheaper machine is inferior in workmanship and quality and is therefore mutually beneficial to let alone.

HEAD—Three-quarter size. Has more convenience, time and labor saving improvements than any other Machine of like grade on the market. Working parts are made of fine quality hardened steel.

WOOD WORK—Substantial and attractive are the two words that best describe this case of this great little Machine. Has four large supply drawers and a handy center drawer. 18 inch tape measure on front of table.

STAND—Ribbon pattern—Not a Dust Collector. Finished in glossy black enamel same as head. Is rigidly braced and secured. This stand is equipped with a patented Belt Replacer, which automatically belts Machine ready for sewing, when head is raised. This is one of the greatest time saving improvements yet put on a Sewing Machine.

ATTACHMENTS—The Attachments are exceptionally good for a machine of this grade. Most machines of this price do not have nickel plated attachments. A complete set of this well known Griest Make in a Velvet-lined Box, furnished FREE with this Machine. They consist of the following: 1 Tucker, 1 Ruffler, 4 Hemmers (different widths), 1 Foot Hemmer, 1 Binder, 1 Braider, 1 Feller, 1 Quilter, 1 Shirring Slide and 1 Gauge.

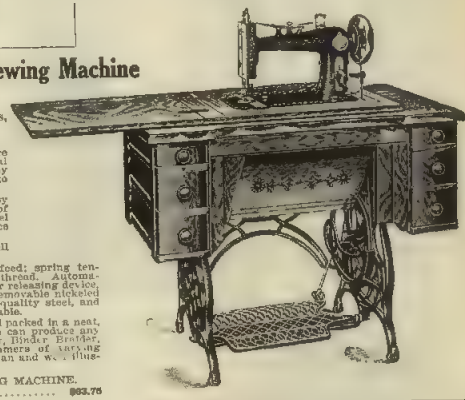
ACCESSORIES—Furnished without extra charge, consisting of 1 Oil Can filled, ½ dozen assorted Needles, 1 large Screw Driver, 1 Shuttle Screw Driver and 4 Bobbins. Simple Instruction book in English, German, French, Spanish or Scandinavian goes with this Machine.

No. 3473/668 WALTHAM "LEADER." List price . . . $51.00

The Waltham "Special" Ball Bearing Sewing Machine

FULLY WARRANTED FOR TEN YEARS

Beautiful Cabinet of Solid Oak, With 6 Full-Size Drawers, Finely Finished, Perfectly Constructed, Easy Running



CASE is a novel design constructed of oak, finely finished. There are six full length side drawers with wood pulls and an ornamental drop front, which is raised to give knee room for the operator by the automatic lifting device, which also raises the sewing head to position.

STAND—Ball bearing and attractive in design, strong and easy running in operation. The stand wheel revolves on two sets of hardened steel balls operating in micrometer ground hardened steel cones. It is quiet, smooth and fast, and is fitted with a device which prevents the machine from becoming unbelted.

SEWING HEAD forms the reliable time-tested lock stitch, full size arm, clear working space underneath, 8¾x3½ inches.

FEATURES—Positive double width, steel forge, four-motion feed; spring tension on top of arm with handy device for releasing pressure on thread. Automatic bobbin winder, gear releasing device, thread take-up, self-threading shuttle, self-setting needle, perfected take-up and removable nickeled steel face plate. All working parts throughout are made of first quality steel, and are so built hardened in oil so they are practically non-wear-out-able.

The steel foot attachments furnished without extra charge and packed in a neat, velvet lined box are complete in every detail, and with them one can produce any and all kinds of fancy work. A full set consists of Tucker, Binder, Braider, Hemmer Foot, Feller, Quilter Cloth Guide and Screw, four Hemmers of varying widths, six Needles, four Bobbins, two Screw Drivers, Oil Can and Wax. Illustrated Books of Instruction.

No. 3472/668 WALTHAM "SPECIAL" BALL-BEARING SEWING MACHINE.
List price $63.75

The New Waltham Rotary Electric Sewing Machine

Equipped With a Universal Electric Motor for Direct or Alternating Current. Its Cost of Operation Is Insignificant.

A High-Class Machine—The Improved Waltham Rotary Sewing Machine is too well and favorably known to require an extended description. It has many desirable and exclusive features, including, The Automatic Tension that regulates itself to all classes of goods, the double Spool Pins, the double width Rocker Head, the Automatic Stitch Regulator, the advantages of oiling all parts from above and the entire and absolute freedom from clogging of thread, which is a serious defect common to all other rotary machines.

The bent cover is built of choice quarter-sawed veneer oak with lustre polished finish and is supplied with a substantial nickel plated metal hinge. The cover is securely attached to base by clinges and plate lock and key.

Complete Nickel-Plated Attachments—The complete nickel-plated steel attachments of highest quality are supplied free of charge.

The simple, compact and extremely efficient Electric Motor is securely attached to the arm of the sewing machine in a convenient position. It is out of the way of the operator and when the machine is in use the motor is swung underneath the arm and is entirely enclosed in the quarter-sawed oak cover. The motor is equipped with insulated cord and plug, which fits any electric lamp socket, and may be instantly attached.

The foot control (or pedal) and rheostat are connected to motor by an insulated cord and are placed on floor in a convenient position. By pressing on the pedal the electric current is applied, the motor is set in motion and it in turn operates the machine by contact with the hand wheel. The Rheostat controls the speed—pressing the foot hard on the pedal produces a high speed, while low speed is attained by a light pressure.

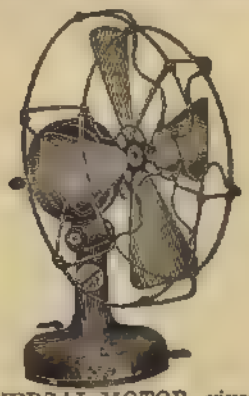
DESK AND BRACKET FANS

Prices on Application

"K & D" DESK AND BRACKET



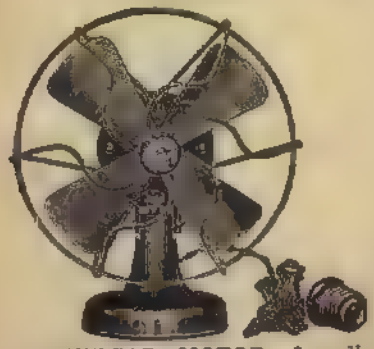
UNIVERSAL MOTOR, gives a very strong breeze, adjustable to any position on desk or wall.

8 inch diameter, three speeds, phosphor bronze motor bearings, enameled base and standard nickel guard and blades, complete with 6-foot cord and plug, w't each 5 lbs.

No. E400E—For direct **current** 110 **volt or alternating** current 110 volts, 60 cycle.....each $14.70

ONE IN A CARTON

"POLAR CUB," DESK AND BRACKET



UNIVERSAL MOTOR, for direct current 110 volt or alternating current 110 volt, 60 cycle, one speed, no switch, die cast frame, spot welded guard, adjustable to any angle, motor black enameled, mica filled commutator rustproof, brass blades, base finished in rich velvet black, equipped with 8 ft. cord and plug.

Made only for 110 volt circuit.

No. 450E—Model "D", 6 in. diam., 8 in. to top of guard, 6 in. to top of motor, w't each 3 lbs., each $7.50

ONE IN A CARTON
ONE DOZEN IN A CASE

No. 460E—Model "9," 9 in. diam., 10½ in. to top of guard, 7½ in. to top of motor, w't each 5 lbs., each $12.50

ONE IN A CARTON; SIX IN A CASE

Finish—The brass blades are highly polished and lacquered. Base and other parts baked on black enamel.

Construction—Cast enclosing shells and base, can be adjusted to any angle desired, either for a bracket or desk fan. The construction is simple and the field of service large. Large air velocity with minimum current consumption.

Speeds—Has four point switch for three speeds, namely, slow, medium and fast, ranging from 900 to 1500 revolutions per minute.

Equipment——8 ft. cord and attachment plug included.

"PEERLESS," DESK AND BRACKET

OSCILLATING.

PEERLESS oscillating fans can be used either as a desk or bracket fan without the use of an adaptor.

They are designed to move from side to side through a desired angle, thus distributing the air over a larger area than with a stationary fan.

DIRECT CURRENT

110 Volt.

No. E1212E—12 in. diam., 3 speeds, 960, 1460 and 1860, w't boxed 40 lbs., each $46.40

WATER COOLERS

SANITARY OPEN TOP WATER BAGS

Constructed with steel wire holder and sliding clamp which securely fastens the spout and completely seals the open end of the bag.

These bags are made of material having the peculiar property of holding water and yet exuding enough moisture to prevent the sun from having any effect on the water inside.

First and second time filling, water will evaporate quite rapidly, after which bag is in condition to hold water indefinitely.

Guaranteed to keep water cool for forty-eight hours.

FIBRE BEVERAGE

A—Metal ice container, or body with ice.
B—Cooling jar which holds water.
C—Faucet and stem connecting with cooling jar
D—Waste Water Faucet for melting ice.
E—Demijohn partly filled with water.
F—Rubber gasket supporting demijohn and protecting jar.
G—Removable portion of container cover.

FIBRE

Body or ice container is seamless, made of fibre molded in one piece; absolutely waterproof; and rust proof, and being a non-conducter, is a great ice saver. Cooling jar is a sanitary white crock, carafe shape. Cover of cooler is entirely removable for icing, being in two interchangeable halves. Body rests on tray which serves to catch any moisture collecting on cooler body.

Improved push faucet, self-closing, "C&H" faucet-simple, strong and reliable. ⅜ in. flow, filling an 8 oz. glass in three seconds.

Equipped with stand for office or factory use, steel drip tray enameled, metal bucket for waste water, ice cap. about 15 lbs., height (without bottle) 39 in., triangular space for stand 18 in., each way, shipping w't about 33 lbs.

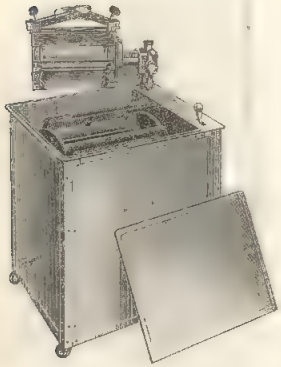
WASHING MACHINES

UNIVERSAL

ELECTRIC



Full cabinet cylinder type, with all movable parts enclosed. Table top cover. Gray enamel finish. Detachable 20-foot cord, with rock-off connection.

Machinery—Silent running cut gears, enclosed in oil. Automatic safety clutch, ball bearing type in drive shaft. All gear driven.

Cylinder—Zinc reversible type. Eighteen and one-half inches long, 18 inches inside diameter. Weight, 19 lbs. Easily removed. Size and construction of cylinder holes prevent injury to daintiest fabrics. Cylinder automatically locks in position with opening at top, when not operating, permitting easy removal of contents. Cylinder revolves twice, reverses, revolving twice in opposite direction, making 18 complete revolutions per minute. Five maple baffle strips inside carry clothing up until they fall back of their own weight into suds.

Tub—Self-draining. Settling zone in bottom prevents sediment from being forced back into clothes. Drain cock outside of cabinet 10¾ inches from floor.

Wringer—Swing, reversible type, wood frame. Safety release. Has four positions, and will not operate except when locked in position. Easily detached, allowing cabinet to be used as table. Double drain board. Rolls 12x1¾ inches.

Guarantee—Universal washer is guaranteed for one year against defects of material and workmanship. It will give years of service if used according to factory directions.

Ordering—Be sure to specify voltage and type of current. If alternating current we must know the number of cycles. We stock E1930—110 volts 60 and 50 cycles, 220 volts 60 cycles; No. E1940—110 volts 60 and 50 cycles. Motor ¼ horse power.

FIRE EXTINGUISHERS

Accurate

Guardene

Phomene

Accurate.—Tank equipped with a double acting brass pump which throws a powerful, steady stream 40 feet. Filled with plain water, to which is added Pyrene "Freeze-Proof." Replaces soda and acid extinguishers where there is danger of freezing.

Guardene.—Cold-rolled copper tank tested to 350 pounds pressure, only subjected to 100 pounds. The Guardene soda and acid charge is used.

Phomene. Cold rolled copper tank. Produces 22 gallons of foam with a stream 25 to 35 feet. Extinguishes burning oil, grease, enamel, tar, wax, shellac, lacquers, inflammable solvents or chemicals. Foam type. Replaces soda and acid extinguishers.

Badger

Pyrene

Pyrene Recharges

Badger.—Copper tank, uses a soda and acid charge. Standard equipment in homes, schools, warehouses, etc.

Pyrene.—Double acting pump throws a steady continuous stream, of a non-conductive liquid blanketing a fire of oil, gasoline or electrical origin. Ideal for protection of homes, schools and automobiles. Complete with hanging bracket.

Every dealer should be interested in supplying seasonable oil to his customer.

Winter motoring demands the use of an oil possessing a very low cold test—else much damage to bearings and cylinder walls is sure to result.

SUPREME AUTO OIL—*Flows Freely at Zero* starts with the engine—lubricates thoroughly and continuously.

The dealer who stocks SUPREME AUTO OIL is sure of a steady flow of customers.

PARIS gowns — who buys them? Fifth Avenue shops — who patronizes them? The news of Society, Art, Antiques—who is interested? Yes, it is a very definite appeal Harper's Bazar makes, and the sort of people who respond to this appeal are the most influential in starting a demand for things — whether it be a fashion, a fabric or a motor-car.

Harper's Bazar

Your copy of The Indianapolis Radius Book, the book of facts on the Indianapolis market, is ready for you. Send for it.

your copy

IN Indianapolis, they are "sold" on the round butter crackers.

Seventy miles away, still in the Indianapolis trading territory, at Terre Haute, the demand is for square, salty crackers.

At one point in the Indianapolis Radius, they buy 2 for 15c. cigars. At another point, the smokers take their cigars in units of five and ten cents straight. At still another, the popular sellers are stogies.

Each market in the United States is as peculiar and as different as an individual. And the parts of a city market also vary.

TRADE MARK REGISTERED IN THE U. S. PAT. OFFICE.

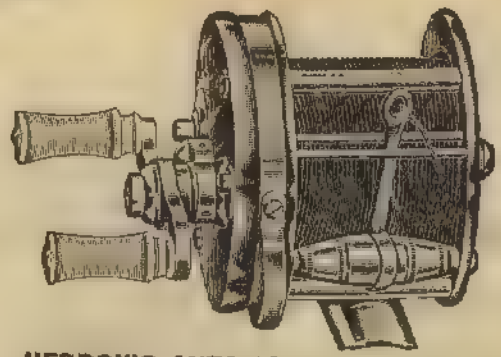
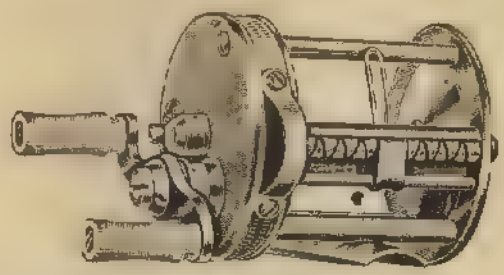
ONE IN A BOX



HEDDON'S AUTO-SPOOLER REELS

Construction of the spooling device is sturdy—producing minimum amount of friction and practically unlimited life.
The kite-wind spool, much the same as one would make by hand, is always constant and relieves the angler from attention to spooling.
No. 4-18—Solid german silver frame, phosphor bronze gears, quadruple multiplier; built in No. 4 size frame, the spool holds 50 yards of No. 20 test and 75 yards of No. 15 test line, length of spool 1⅞ in, diam. 1⅞ in., equipped with Heddon designed double handle; Heddon's oiling system, completely oiling the reel without taking it down .....each $24.00

ONE IN A BOX



HEDDON'S LEVEL WINDING

A Level Winding Reel that is up to the recognized high standard of Heddon quality in every respect. New and patented features such as the Steady Bar (patent applied for), an improved, exceedingly strong, and silent gear train; a stabilized line carriage, and a perfect screw housing guarantee its correct functionmg and satisfactory service.

Full quadruple multiplying, with exactly the correct ratio of speed between the spool and line carriage to produce that criss-cross or "kite winding" of the line which so effectually presents back-lashing Spiral gears, of a special hard drawn phosphor bronze are so novelly arranged that they are much stronger than are ordinarily used, and also make it possible to avoid the objectionable construction of placing the spool off the center of the reel. Smaller in size, lighter in weight, it nevertheless has a spool capacity of 100 yards of 15 pound test line. Smooth velvet finish that is practically indestructible. Equipped with Heddon designed double handle. Heddon's oiling system, completely oiling the reel without taking it down.

No. 3-35LW—Made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs' drill rod, hardened, oil tempered, ground and polished to size $35.00

ONE IN A CHAMOIS BAG

FISHING REELS

QUADRUPLE MULTIPLYING

SOUTH BEND, ANTI-BACK LASH

A guarantee for one year with each reel. This reel is the only one of its kind made which has a brake that works automatically with the proper force as the line slackens at the end of the cast.

The spool and gear journals are of special steel, accurately turned ground, lapped and burnished to mirror like surface, turning in solid phosphor bronze bushings.

The gearing is of special hunting tooth tram, the gear of which is cut from hard drawn brass, the pinion from special tool steel.

Can be used with or without back lash as desired.

No. 399—100 yds., 1⅝ in. pillar, 2 in. in diameter, jeweled bearings, hand polished, solid German silver, balanced white bone handle with back sliding click .....each $16.60

ONE IN A BOX

Mr. Howard Heinz, President of the H. J. Heinz Company, has just signed a five-year contract for our entire service.

About 30 years ago, when Street Car circulation figures were in the *millions*, instead of the *billions* of these years, Mr. H. J. Heinz, the founder of the business, made his first Street Car advertising contract. He became a large user and firm friend of the medium.

The new contract is an attestation of the value of Street Car advertising by the present generation.
